SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it can be effectively masterplanned to become part of the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby. The closest is a conservation area some 70m from the site.

### Summary of SA

The site is not constrained by flood risk or nature conservation designations. There are no heritage assets on site, however there is a conservation area some 70m south of the site. Residential development on the site could be effectively masterplanned and landscaped to integrate with the existing village. The site is however classified as grade 3 agricultural greenfield land. The site does not have any public transport connections and there are no major sources of employment nearby and there are limited services and facilities within the village, with travel required to nearby settlements for education, shopping and leisure activities.

However the site is within proximity to the A14 which would assist in the operation of the site if commercial development is located on site.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

Page 2568 of 3488

**Summary of SA**

Overall, the appraisal is mixed but is mainly negative in terms of using greenfield land of high agricultural quality (grade 2). It has good connections to the strategic road network for employment development, however this proximity may give rise to higher levels of pollutants. The site is, however, detached by over 600m from the main cluster of properties found within the village. It is not served by public transport infrastructure, there are public rights of way within 500m of the site but no footpath connects the site to Bythorn. As a result it is likely that any future users of the site will access it via car and not be able to utilise more sustainable modes of transport. The site is not constrained by flood risk, heritage or nature conservation designations. The scale of employment development may require additional infrastructure in order to service it. The proposed employment use at 10,000 sqm floorspace would make efficient use of land. The site is within proximity to the A14 which would assist in the operation of the site if commercial development is located on site.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

### Summary of SA

The site is not constrained by fluvial flood risk, however, there is significant risk from surface water flooding. There are no nature conservation or heritage designations impacting the site. The site is classified as grade 3 agricultural greenfield land. The site adjoins the south eastern edge of the village so could provide a small scale extension to the built form. It is in close proximity to the A14 which could give rise to additional levels of pollution. The site could be effectively masterplanned to successfully integrate with the existing village subject to appropriate sustainable drainage and landscaping. The site does not have any public transport connections and there are no major sources of employment nearby. There are limited services and facilities within the village, with travel required to nearby settlements for education, shopping and leisure activities.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets existing within or immediately adjoining the site so there are no constraint from these.

#### Summary of SA

The site is located on the southern edge of the village and can be effectively masterplanned to become part of the existing place and community. It is within 800 m from a church, playing field and a public house. The site is within flood zone 1 and is not constrained by flooding. It is classified as grade 2 agricultural land, is wholly greenfield and in agricultural use. It has no nature designations, heritage and conservation assets on it or immediately adjoining it which will impact development. It is remote from educational, retail and employment destinations and has no public transport access although it has reasonable access to local social facilities. Overall, residential development would not support a sustainable lifestyle, but would provide some residential opportunity for local residents and families. The site is bounded on its eastern boundary by Station Road and the Victory Playing Field increasing the likelihood of noise, light and visual pollution. Through design these should be considered, reduced and mitigated still as well as its potential landscape impact. The site is highly exposed within the wider landscape with clear views extending across to more undulating countryside to the east. It is proposed that the number of homes is reduced to ensure development would be proportionate and not have a detrimental effect on the character of the area and landscape.

	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	--	The site is approximately 18kms from Huntingdon railway station and Catworth has no bus service. A pavement is located within 40m opposite from the site.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The eastern part of the site is located such that it can be effectively masterplanned to become part of the existing place and community although the proposed mix of uses will require careful design and consideration so that they can be successfully integrated. Also landscaping will be required due to its edge of village location.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	At its eastern end, the site adjoins a conservation area and is adjacent to several listed buildings.

### Summary of SA

The site is not constrained by flood risk or by nature conservation designations. It is somewhat constrained by heritage assets as it adjoins a conservation area and is adjacent to several listed buildings. It is remote from educational, retail and employment destinations and has no public transport access although it has reasonable access to local social facilities. The proposed development would be a modest westerly extension to the built form of the village which could be successfully integrated subject to appropriate masterplanning, landscaping and design.

SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	--	The site is beyond 5km of a railway station and there are no bus stops within 800m of the site.  The site is remote from public rights of way or segregated cycleways nor are there public footpaths.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	--	

# 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			The site is accessible from vehicles exiting the A14 at junction 16.
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	++	The scale of the proposed scheme is likely to create many new jobs although the nature and number of jobs are unknown at this stage. The intended proportion of employment, retail and logistics is also not yet known.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The site promoter seeks a combination of employment, retail and logistics development. It is unclear the proportion each of these will take but it likely that retail will be ancillary to the employment development and serve future employees or trade from the A14, therefore not directly serving Catworth.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it could not be effectively integrated with the existing community but the proposed uses means that this is not necessarily an issue as it needs to be well connected to the strategic road network.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is not constrained by fluvial flood risk but does have some surface water flood risk. It is not constrained by heritage or nature conservation designations. The site is detached from the built form of Catworth and proposes a large scale employment led scheme utilising its connections to the A14 although it has no public transport access which may encourage travel via less sustainable modes of transport. There is only standard broadband available within the vicinity of the site which may require upgrades depending on the nature of employment uses on site. While proposed for employment uses, there may still be an impact of increased levels of noise, air and visual pollution on future employees on site arising from its proximity to the A14. Through design these should be considered, reduced and mitigated still as well as its potential landscape impact.

SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	-	The site is remote from any retail facilities and the nearest primary school is 2.5kms away in Brington. St Leonard's Church, the village hall, the Racecourse pub and the playing fields are within 800m.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	--	
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	+	
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	--	The site is located over 1.5kms from any major sources of employment but benefits from superfast broadband nearby.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	--	The site is approximately 18kms from Huntingdon railway station and Catworth has no bus service. There is direct road frontage to Fox Road. A public right of way bisects the site and others are in close proximity.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential or community uses.

# 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include any new retail or social facilities specifically although the site promoter suggests willingness to consult with the local community over preferred requirements.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The scale and location of the site would not contribute to good placemaking in Catworth. Effective integration of any scheme into the existing community would be very challenging
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The southern section of the site falls within the conservation area and there are both listed buildings and a scheduled monument in the vicinity.

## Summary of SA

The site is at low fluvial flood risk although surface water flood risk exists, particularly in the northern and central sections, which would impact on layout and capacity of any development scheme. It would have limited impacts on nature conservation sites with potential opportunities to link into Little Wood. It has a direct road frontage and access to public rights of way. It comprises wholly greenfield land of grade 3 agricultural value. It is remote from educational, retail and employment destinations and has no public transport access although it has reasonable access to local social facilities. Overall, residential development would not support a sustainable lifestyle. The site has very limited direct connection with the existing built part of the village and the proposed site would leave an isolated field between any new development and existing properties on Church Lane. Development would not facilitate effective integration with the existing community or support high quality placemaking outside the site itself. There are heritage assets in the vicinity which could be impacted by any development scheme although good design should overcome any issues arising from this. The sustainability of the site is considered very poor for residential development purposes.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The south eastern part of the site adjoins the conservation area boundary and a scheduled monument (milestone) is situated on the Fox Road boundary.

# 1 Western Huntingdonshire

## Summary of SA

The site is at low flood risk and development would have limited impacts on nature conservation sites. Its limited impacts on heritage assets could be effectively mitigated. It comprises best and most versatile (grade 2) greenfield agricultural land. It has a direct road frontage to Fox Road and a limited access to the junction at Brook End. It is remote from educational, retail and employment destinations and has no public transport access although it has reasonable access to local social facilities. Overall, residential development would not support a sustainable lifestyle. The site has extremely limited direct connection with the existing built part of the village other than wrapping around a disused factory building at the southern end and facing onto one house across Fox Road. Development would not facilitate effective integration with the existing community or support high quality placemaking outside the site itself. The sustainability of the site is considered very poor for residential development purposes.

Use for biodiversity net gain could effectively be integrated into the landscape and respond sensitively to the local character,
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no heritage assets in the vicinity of the site.

#### Summary of SA

The proposed use for biodiversity net gain and low flood risk of the site results in a sustainability appraisal which reflects positively on its potential to contribute towards resilience to climate change. Provision of biodiversity net gain would provide limited employment/ farm diversification opportunities which could be of benefit. Access by public transport is not achievable. The site is currently classified as best and most versatile agricultural land; under current government proposals the biodiversity net gain use would be secured for at least 30 years. The proposed use could be effectively integrated into its immediate surroundings and could contribute positively to the aspect of the locality from the village. It is not well connected to strategic green infrastructure but could offer local scale advantages due to the proximity to Little Catworth Meadow SSSI. Overall the proposed use would be sustainable on this site.

SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	--	The site is approximately 18kms from Huntingdon railway station and Catworth has no bus service. The site adjoins Church Road and Church End, with multiple public rights of way in close proximity.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential or community uses.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	+	The site promoter suggests the potential inclusion of additional community facilities such as an extension to the cemetery or a village hall. No evidence is put forward of the need for these and it is noted that the current cemetery has space remaining and the village hall was refurbished and extended in 2018.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is positioned such that it is well related to the existing village. Nearby heritage assets would need to be carefully reflected to ascertain whether the impact of development on them could be adequately mitigated. Development of the whole site would, however,

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			be significantly out of scale with the existing village and would detrimentally impact on its character. A reduced scale may be more achievable.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	--	The site was designated as a scheduled monument for the Catworth manorial complex and associated ridge and furrow in December 2023. It also adjoins the grade I listed St Leonard's Church and development would impact on the setting of at least 3 other listed buildings. The western edge of the site is within the conservation area.

#### Summary of SA

The site is at low fluvial or surface water flood risk. It has direct frontages to two roads and access to public rights of way. The site has potential to contribute to the diversity of housing available in Catworth and expand local community facilities. However, the site comprises entirely greenfield best and most versatile agricultural land. Whilst it would be unlikely to detrimentally impact on any existing nature conservation sites it would not contribute to enhancement of strategic green infrastructure either. The site has reasonable access to local social facilities but it is remote from educational, retail and employment destinations and has no public transport access so it would not support sustainable lifestyles. The site has potential to support improved housing choices and community facilities within the village. However, the scale of development needed to achieve this is likely to be significantly detrimental to the form and character of Catworth. The site both contains and adjoins highly sensitive heritage assets and built development would detrimentally impact on these. Overall, development of the whole of the proposed site would not constitute sustainable development.

#### Updates after initial appraisal

# 1 Western Huntingdonshire

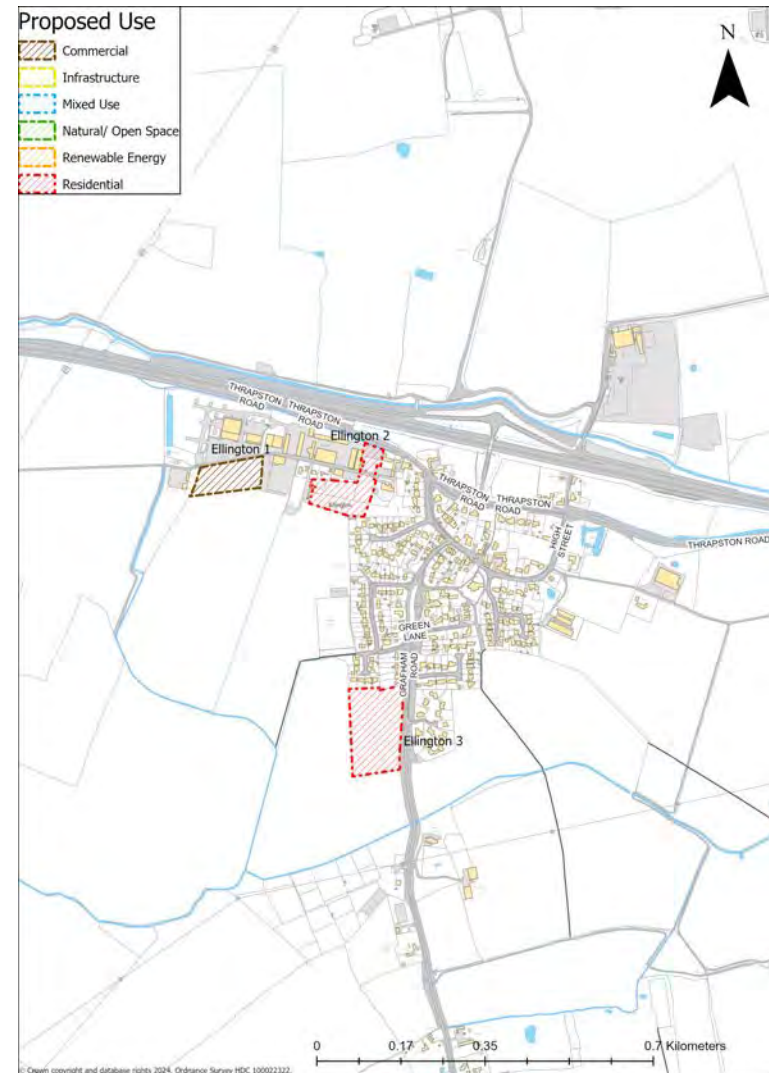

## Ellington

**1.6** A total of 3 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

- Ellington 1: Land South of Ben Burgess, Ellington
- Ellington 2: Land South East of Brook Farm, Ellington
- Ellington 3: Land West of Grafham Road, Ellington

**1.7** Please note the following sites partially fall within Ellington parish:

- Alconbury 10: Land at Weybridge Farm - note that this site crosses over Ellington and Alconbury parishes and is predominantly within Alconbury parish so the site assessment has been included within Alconbury parish of the Northern Central Huntingdonshire LAA document.
- Brampton 16: Land at Low Harthay and Woodhatch Farms, Brampton - note that this site crosses over Ellington and Brampton parishes and is predominantly within Brampton parish so the site assessment has been included within Brampton parish of the Central Huntingdonshire LAA document.

**Ellington 1: Land South of Ben Burgess, Ellington**

**1.8** As identified in the LAA, the site is completely within flood zone 3a. The site promoter has put the site forward for commercial uses. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.

**1.9** Therefore, a sustainability appraisal for the site has not been undertaken.

**Ellington 2: Land South East of Brook Farm, Ellington**

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets on site but it is within 45m of the grade II listed Brook House.

## Summary of SA

The site is heavily constrained by fluvial flood risk with about half of the site being within flood zone 3a, there is however enough land in flood zone 1 that could accommodate some development if appropriate masterplanning, drainage and access could be secured. The site is not constrained by nature conservation or heritage designations but there is a listed building nearby. While it is closely related to the built form, the location of flood risk would result in a potential development that would not relate well to the form and character of the village and would not be fully integrated with the existing place and community. It is in very close proximity to employment opportunities at the Brook Farm Industrial Estate and within walking distance to leisure and cultural facilities and natural greenspace. However, the closest primary school is in Spaldwick and a convenience shop is found in Grafham. It is not particularly well served by public transport options.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

# 1 Western Huntingdonshire

## Summary of SA

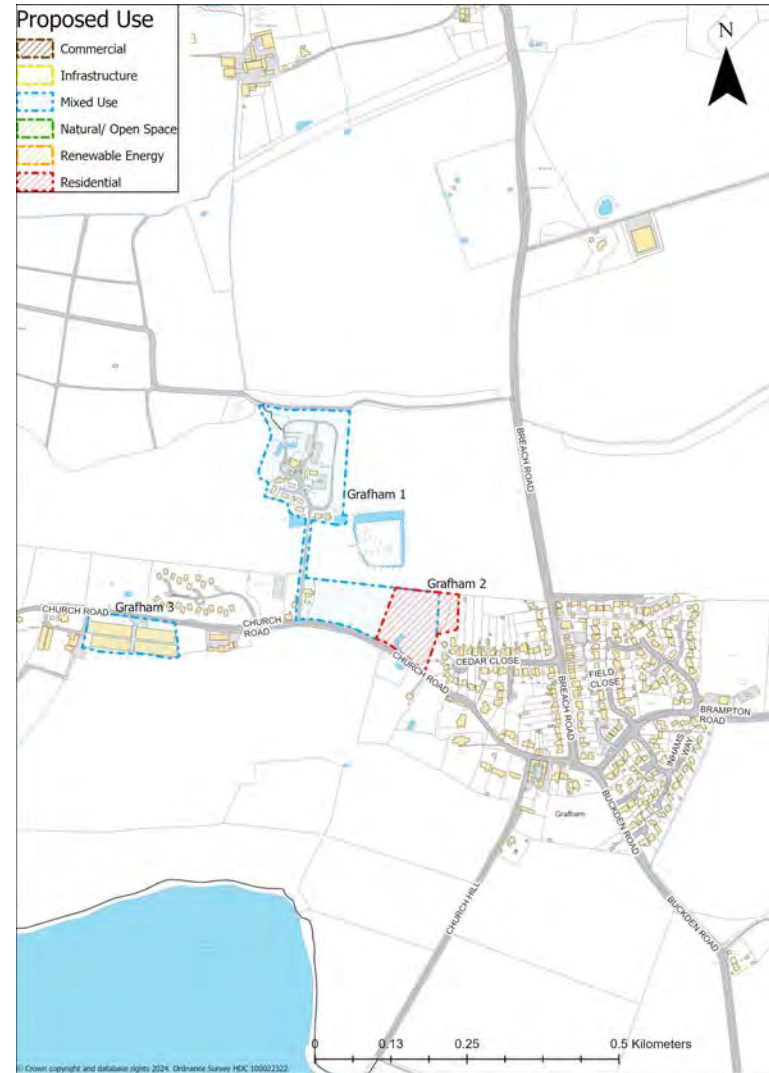

The appraisal for the site is predominantly positive. There is some risk of surface water flooding but no fluvial flood risk on site. The site is not constrained by nature conservation or heritage designations. It would relate well to the existing village and could be successfully integrated with the existing place and community providing a southerly extension to the village. It is within close proximity to employment opportunities at the Brook Farm Industrial Estate and within walking distance to local leisure and cultural facilities and natural greenspace. However, the closest primary school is in Spaldwick and a convenience shop is found in Grafham. It is served by a bus although this is not fequent service.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	<p>Within the campsite there is the grade II listed Old Manor Cottage.</p>

# 1 Western Huntingdonshire

## Summary of SA

The site contains two parcels of land including an existing campsite. The site is not constrained by flood risk or nature conservation designations. There is a listed building within the campsite. The land is grade 3 agricultural land with existing structures on site. The campsite parcel is physically detached from the main built form of the village but the eastern parcel much more closely relates to the built form of Grafham. It is in good proximity to several social and leisure facilities within the village but primary education is found in a neighbouring village and the closest employment opportunities are outside of the village. Public transport is limited with only a bus stop in the village with an infrequent service. The site promoter states that whilst it is the intention of Grafham Water Caravan and Motorhome Club Campsite to remain in leisure use at present, the Club would like to secure flexible alternatives that would allow residential development on site either in tandem with the current use, or solely residential development subject to an alternative site within the district being found to accommodate the Club's ongoing leisure use.

# 1 Western Huntingdonshire

## Summary of SA

The site is not constrained by fluvial flood risk (there is some surface water flood risk), heritage or nature conservation designations. The site is currently in use as an intensive poultry farm with several large existing agricultural structures on site. It is beyond ideal distances from social and leisure facilities within the village but still accessible. Primary education is found in a neighbouring village and the closest employment opportunities are outside of the village. Public transport is limited with only a bus stop in village with an infrequent service. The site does not relate well to the existing settlement. The site is detached from the main built form of the village. Access to the main settlement of Grafham would be via a narrow road with with no safe pedestrian/ active travel route. Whilst the demolition of the existing poultry units could enhance the 'gateway' to the village, this does not justify new buildings in such a detached location. This is especially so of uses relating to residential and care home development which would benefit from being sustainably located near to accessible services and facilities. Proposals for commercial leisure uses could present issues relating to active travel/pedestrian safety through increased vehicle movements along what is a narrow road. As a result of the above it is considered that the site could not be effectively masterplanned to become part of the existing community.

#### Summary of SA

The site relates well to the existing built form of Great Staughton and would see a continuation of recent development along The Green. It is constrained somewhat by surface water flood risk and is adjacent to a listed building. It is not constrained by nature conservation designations. It is a greenfield site consisting of grade 3 agricultural land. It is remote from natural greenspace but within 800m of the recreation ground and tennis courts. It is also within 800m of other leisure and cultural facilities as well as a bus stop. It is remote from employment opportunities, its lack of public transport may reinforce a reliance on car travel.

The site is about 3km from the Airfield Industrial Estate at Little Staughton and is just over 5km from concentrations at the Bicton and Harvard Industrial Estates and employment opportunities at Kimbolton Preparatory and Senior schools.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			Superfast broadband is available in the vicinity.
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	-	<p>The site is located over 5km from St Neots railway station. The site is within 800m of several bus stops, the highest being ranked E on the Place Based Carbon Calculator meaning that there is an infrequent bus service.</p> <p>There is a footpath along the site frontage along The Highway.</p>
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	+	It is unclear how many jobs could be provided from the non-residential elements of any development. It is likely to be low density considering the scale and proposed uses.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	++	The proposal supports provision of additional retail, employment and/or potentially a medical facility.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	++	The site's redevelopment would reuse land within the built form of Great Staughton and therefore is located such that it can be effectively masterplanned to become part of the existing place and community. This is, however, subject to careful masterplanning so that the reuse of the site is sensitively integrated within the street scene and that impacts to heritage assets are mitigated.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	It adjoins a conservation area and is adjacent to several listed buildings on three sides.

**Summary of SA**

The site is previously developed and is located within the existing built form of Great Staughton. It is accessed via The Highway within walking distance of leisure and cultural facilities as well as a bus stop. It is constrained somewhat by flooding particularly the western expansion site. There are several heritage assets to consider which will need careful consideration in the development of any masterplan. The proposed uses are a mix of residential and retail/employment including potentially a local medical centre for the existing surgery to relocate to. It is not constrained by nature conservation designations. It is remote from employment opportunities, its lack of public transport may likely reinforce a reliance on car travel. Considering the flood risk, it is considered that the eastern expansion site or the central site would be most appropriate for development. The western expansion site could still be considered but for less vulnerable uses.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is not constrained by flood risk, nature conservation or heritage designations. It benefits from relating well to the existing built form of Hail Weston providing easy access to local facilities. The proposed scale of development does not present an efficient use of land but the design of any scheme will need to be sensitive to its edge of village location and transition between the village and the open countryside. It has reasonable access to active travel and greenspace opportunities. Employment opportunities are approximately 5kms away in the neighbouring town of St Neots. The site is remote from primary education reducing active travel opportunities to get to school. Bus services are very limited but rail travel is accessible approximately 5kms away to facilitate longer distance public transport journeys.

## Updates after initial appraisal

	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	St Neots railway station is just within 4.9kms walking route although the local bus service is infrequent being rated as E- on the Place Based Carbon Calculator. The site has direct access to a pavement and is within 500m of two public rights of way.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of existing retail or social facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	++	The site comprises partially previously developed land which is well integrated with the surrounding properties and could support a high quality infill scheme provided it was designed sensitively to reflect the relationship with surrounding properties.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is directly over the road from the grade II* listed St Nicholas's Church and any development scheme should be sensitive to the setting of this building.

#### Summary of SA

The site benefits from comprising partially previously developed land with the greenfield element not being of exceptionally high value in the local context. It is not at any significant flood risk and is not anticipated to be so even at the 2080 modelling point, providing longer term resilience to climate change. It has reasonable access to active travel and greenspace opportunities. The immediate location has limited village based facilities but a wide range of social and employment opportunities are around 5kms away in St Neots. The site is remote from primary education reducing active travel opportunities to get to school. Bus services are very limited but rail travel is accessible approximately 5kms away to facilitate longer distance public transport journeys. The site is sensitive to heritage and tree constraints which would limit overall capacity and influence the design and quality of development.

SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of existing retail or social facilities although 0.2ha are proposed for unspecified community uses.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is surrounded by existing properties on three sides and has potential to be effectively integrated into the surrounding community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site immediately adjoins the churchyard for St Nicholas Church which is grade II* listed.

## Summary of SA

The site benefits from relating well to the existing built form of Hail Weston providing easy access to local facilities. The proposed scale of development would make efficient use of the land whilst allowing sufficient scope to avoid development on the area of surface water flood risk. It is very sensitively located in relation to the listed St Nicholas Church; any development would need to respond positively to this with avoidance of the area of land at surface water risk potentially benefitting this. It is not at any other significant flood risk and is not anticipated to be so even at the 2080 modelling point providing longer term resilience to climate change. It has reasonable

access to active travel and greenspace opportunities. Employment opportunities are around 5kms away in St Neots. The site is remote from primary education reducing active travel opportunities to get to school. Bus services are very limited but rail travel is accessible approximately 5kms away to facilitate longer distance public transport journeys.

# 1 Western Huntingdonshire

## Summary of SA

The site is wholly within flod zone 1 but contains minor areas of surface water flood risk. It is of sufficient size to include a range of homes and public greenspace within the site. It is in reasonable proximity to the facilities of St Neots and connected by a footpath allowing access by active travel although public transport options are limited. St Neots railway station is within 5kms. The site has direct access to a pavement and a public right of way. The land is wholly greenfield and of grade 2 best and most versatile agricultural value so development would not support reuse of previously developed land or promote the circular economy. The site has very limited physical connectivity to Hail Weston village with the adjoining boundary only comprising 8 properties in the north western corner of the site with all other boundaries being with open countryside. The scale and location of the proposed development would harm the form and character of Hail Weston.

SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	The site is within 5km of St Neots railway station. It is also within 800m of a bus stop although this does not run a frequent service (rated E- on the Place Based Carbon Calculator).
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			There is no pavement along the northern boundary of the site or adjacent to it. Along the site's western boundary along Fox Road there is a narrow pavement.
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it could be effectively masterplanned to become part of the existing place and community but this would need to incorporate landscaping and careful design to mitigate impact on nearby heritage assets and retain the rural character of this part of the village.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is not located within a conservation area but there are two listed buildings opposite the site.

### Summary of SA

The site is not constrained by fluvial flood risk, nature conservation or heritage designations. There is some surface water flood risk. The site benefits from relating well, particularly its western half, to the existing built form of Hail Weston providing easy access to local facilities. The proposed scale of development presents an efficient use of land incorporating some open and nature greenspace. The design of any scheme will need to be sensitive to its edge of village location and transition between the village and the open countryside. It has reasonable access to active travel and greenspace opportunities. Employment opportunities are approximately 5kms away in the neighbouring town of St Neots. The site is remote from primary education reducing active travel opportunities to get to school. Bus services are very limited but rail travel is accessible approximately 5kms away to facilitate longer distance public transport journeys.

	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	St Neots railway station is just within 5kms although the local bus service is infrequent (rated E- on the Place Based Carbon Calculator). The site has direct access to a pavement and is within 200m of two public rights of way.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential use.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of existing retail or social facilities
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is surrounded by existing properties on three sides and has potential to be effectively integrated into the surrounding community but would need to be sensitive to the adjoining churchyard. A sustainable design solution would need to address the surface water flooding risk.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site immediately adjoins the churchyard for St Nicholas Church which is grade II* listed.

**Summary of SA**

The site benefits from relating well to the existing built form of Hail Weston providing easy access to local facilities. The site is a reduced version of that assessed as Hail Weston 4. The proposed scale of development would make efficient use of the reduced land area whilst allowing sufficient scope to avoid development on the area of surface water flood risk. The reduced site would also have a lower impact on the surrounding area. It is very sensitively located in relation to the listed St Nicholas Church; any development would need to respond positively to this with avoidance of the area of land at surface water risk potentially benefitting this. It is not at any

other significant flood risk and is not anticipated to be so even at the 2080 modelling point providing longer term resilience to climate change. it has reasonable access to active travel and greenspace opportunities. Employment opportunities are around 5kms away in St Neots. The site is remote from primary education reducing active travel opportunities to get to school. Bus services are limited but rail travel is accessible approximately 5kms away to facilitate longer distance public transport journeys.

SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site's context means that any future development will need to be very sensitive to its location and context particularly in relation to heritage assets as well as flood risk in the southern portion of the site. It is surrounded by built development so, subject to careful design and masterplanning, could be integrated into the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	To the north/ north west are Britdens Farm and Wornditch Farm. Both of these are listed buildings. The Heritage Statement submitted as part of the Call for Sites submission also identifies that well defined ridge and furrow forms a non-designated heritage asset in the southern part of the site sloping down towards the River Kym.

## Summary of SA

The site is constrained by flood risk on its southernmost end from the River Kym and is also constrained by various heritage assets which will require mitigation if development is brought forward. It is not constrained by nature conservation designations. The site is predominantly grade 3 agricultural land, however approximately half of the southern parcel is classified as grade 2. It has good access to natural greenspace. Although located on the north westernmost extent of the village, the site has good access to a primary school and is in reasonable proximity to a range of local scale retail, leisure and cultural facilities. It is also close to a range of employment locations.

SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	+	The southern part of the site is within 800m of Budgens on Thrapston Road and specialist shops on High Street and London Road. The site adjoins Kimbolton Primary Academy for which the site promoter suggests providing additional land. The site has reasonable access to public meeting halls on Thrapston Road, St Andrews Church and playing fields on Pound Lane.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	++	
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	+	
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	++	The site is within 1.5kms of Bicton and Harvard Industrial Estates and employment opportunities at Kimbolton Preparatory and Senior schools. Ultrafast broadband is available adjoining the western end of the site and superfast broadband adjoining the eastern end.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	++	

# 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	-	The site is around 20kms from St Neots railway station and has limited access to bus services. The site fronts onto Stow Road in the west and Newtown in the south east facilitating vehicular and pedestrian connectivity. It is crossed by four public rights of way providing routes both into the village and out to surrounding countryside.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposed development does not include employment, commercial or tourism uses.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	+	The proposal includes land to expand Kimbolton Primary Academy.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The location of the site would allow for masterplanning of a sustainable design focusing built development on the lower land in the southern part of the site. This should encourage efficient use of the built area of land. Integration into the surrounding area could be facilitated through multiple existing public rights of way and extension of the primary school into the site.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	Warren House is grade II* listed and situated about 240m from the closest point of the eastern boundary of the site and is in direct line of sight leading to potential impact on its setting which careful design and landscaping would be needed to mitigate. The site rises significantly to the north and development, particularly in the northern part of the site, has potential to impact on views to and from the conservation area and numerous listed buildings primarily clustered around High Street and East Street with the spire of the grade I listed St Andrew's Church visible from the site above roofs of existing properties.

**Summary of SA**

The site primarily comprises grade 2 best and most versatile agricultural land and has not been previously developed. It has relatively poor access to public transport although bus services are available from High Street. It poses potential for detrimental impact on heritage assets, primarily from longer distance views although the setting of Warren House would need particular mitigation. The site is wholly in flood zone 1 and is outside all climate change flood risk areas at 2080. Surface water is an issue with established channels running through the site. Although on the outskirts of the village, the site directly adjoins the primary school and is in reasonable proximity to a range of local scale retail, leisure and cultural facilities. It is also close to a range of employment locations. The site directly adjoins Stow Road and is well connected to public rights of way offering active travel routes to both practical and leisure destinations. The scale of the site provides opportunities for a range of sizes, types and tenures of homes facilitating social sustainability. The rising topography to the north constrains the site in terms of its ability to be integrated into the surrounding countryside; the site promoter's proposal to retain the northern half for green infrastructure uses would facilitate this. The concentration of new homes in the southern part of the site would reinforce the modern housing and educational character of the adjoining area. The extensive green infrastructure proposed would promote biodiversity and active leisure uses supporting environmental and social aspects of sustainability.

## Summary of SA

The site is classified as grade 3 agricultural land and is not constrained by fluvial flood risk or nature conservation designations. The site is wholly previously developed land but has now fully naturally vegetated. It is bounded by agricultural land covered with trees and hedges and is about 700m from Stonely. It comprises mature trees and hedges which would be impacted by the proposed development. The site is fairly remote from natural greenspace as well as educational, recreational, and cultural institutions, which are located in Kimbolton. It is only 5kms from Bicton and Harvard Industrial Estates. The density of the proposal would not make an efficient use of land and the site is not well related to the existing built development. The site is located such that it could not be effectively integrated with the existing community. Development would be detrimental to the existing trees and an Aboricultural Impact Assessment would be required to assess and mitigate the impact of the proposed development on the existing trees.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is within 800 m from a church, playing field and a public hall and around 800m from Kimbolton Primary Academy. It is classified as grade 2 agricultural land, is wholly greenfield and in agricultural use. It has no nature designations, heritage and conservation assets on it or immediately adjoining it which would impact development. The site is constrained by fluvial flood risk. Flood risk assessment and necessary mitigation measures would be required to address fluvial flooding. Although the site has reasonable accessibility to village facilities the amount of development would not contribute to protecting the form and character of the surrounding townscape and landscape.

SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.

## 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located away from any existing development and currently relates to the open countryside within which development would not be sensitive to the local character. Only if the allocated development to the south east of the site is completed might this be feasible as a sensitively designed extension.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is classified as grade 3 agricultural land and is not constrained by fluvial flood risk or nature conservation designations. It is bounded by agricultural land to the north and agricultural land to the east, west and south. The site adjoins site allocation KB 2 (North of Station Road/Stow Road, Kimbolton) in the Huntingdonshire's Local Plan 2036 to the south. It is within 800 m from a playing field and a public hall. It is within 5 kms from Bicton and Harvard Industrial Estates. The site is poorly related to the existing built development. The site is located such that it could not be effectively integrated with the existing community until after the adjoining housing is completed.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is large relative to Old Weston but only around a fifth of it is anticipated as being for residential development with the remainder for biodiversity net gain. A scheme may be able to be effectively masterplanned to integrate the residential portion into the south eastern part of the village with the remainder reinforcing the countryside setting and character of the southern end of the site.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	The only designated heritage asset nearby is the grade II* listed St Swithin's Church which faces the western boundary of the site. Good design and layout should mitigate any impact on this.

## Summary of SA

The land is within flood zone 1 with little risk of surface water flooding within the site. It offers potential for flood mitigation to be incorporated to reduce the risk from the stream running parallel to the northern boundary. Although the site is relatively large in scale for its context only a small portion is anticipated as being for residential development which could be integrated into the existing form of the village with the remainder for biodiversity net gain providing greenspace uses reinforcing the character of the wider setting. The land is entirely greenfield and is classified as best and most versatile agricultural land, the site is remote from retail, education and employment opportunities although there are local social facilities nearby. Public transport is extremely limited and there are currently no footpaths accessible from the site. The biodiversity net gain element proposed may generate or help retain a limited amount of employment.

# 1 Western Huntingdonshire

## Summary of SA

The land is wholly within flood zone 1 with some surface water flood risk within the site. The site is not constrained by nature conservation designations but is constrained by heritage as the grade II\* listed St Swithin's Church is located immediately north of the site. The site is detached from the main built form of the village despite adjoining the parish church and could not be effectively masterplanned into the existing village. The land is entirely greenfield and is classified mostly as grade 2 with some grade 3 agricultural land. The site is remote from natural greenspace, retail, education and employment opportunities although there are local social facilities nearby. Public transport is extremely limited and there are currently no footpaths accessible from the site.

## Updates after initial appraisal

### Old Weston 3: Manor Farm, Old Weston

- 1.21** As identified in the LAA, the vast majority of the site is within flood zone 3b and 3a with only a very small portion of the site being within flood zone 1 (below the site threshold for site assessment). The site promoter has put the site forward for residential uses which are classed as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.22** Therefore, a sustainability appraisal for the site has not been undertaken.

## Stow Longa

**1.23** A total of 3 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

- Stow Longa 1: Land East of Kimbolton Road, Stow Longa
- Stow Longa 2: Land to the South of Spaldwick Road, Stow Longa
- Stow Longa 3: Land North of Rookery Farm, Stow Longa

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	It adjoins a conservation area and also the Old Vicarage, a non-designated heritage asset.

### Summary of SA

The site is not constrained by flood risk or nature conservation designations. The site is located on the edge of the built form of Stow Longa but development would impair retention of the local character formed by grassland/ paddocks running to the rear of Spaldwick Road. It is somewhat constrained by heritage as it adjoins the conservation area and is within the setting of a non-designated heritage asset. The land is classified grade 2 agricultural greenfield land. It is also remote from natural greenspace and has limited opportunities to enhance strategic habitat connectivity. The site is within 5km of the Bicton and Harvard Industrial Estates but has limited public transport options with only a bus stop that is infrequently served available. Stow Longa has limited services and facilities with no shop or primary school.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	It adjoins a conservation area and is also opposite the grade II listed Stow Cottage.

### Summary of SA

The site is not constrained by flood risk or nature conservation designations. The site is located on the edge of the built form of Stow Longa and it could be effectively masterplanned into the existing place and community subject to design and heritage considerations being addressed. The land is classified predominantly as grade 2 with some grade 3 land. It is classified as greenfield land but there are existing agricultural structures present on site. It is remote from natural greenspace and has limited opportunities to enhance strategic habitat connectivity. The site is within 5km of the Bicton and Harvard Industrial Estates but has limited public transport options with only a bus stop that is infrequently served available. Stow Longa has limited services and facilities with no shop or primary school.

# 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			The site is wholly located within flood zone 1 with some recorded risk from surface water flooding in the north-western corner of the site. There is also surface water flood risk along Stow Road.
SA4	<ul style="list-style-type: none"> <li>Prioritise development of previously developed land?</li> </ul>	--	The site is wholly greenfield grade 2 agricultural land with no existing structures on site.
	<ul style="list-style-type: none"> <li>Prioritise development on land of agricultural land grade 3 or lower (including urban and non-agricultural land)?</li> </ul>	--	
SA5	<ul style="list-style-type: none"> <li>Promote new development with opportunities to participate in leisure and recreation using publicly accessible natural green space?</li> <li>Could development contribute towards enhancing or increasing the strategic green or blue infrastructure network or linkages to it?</li> </ul>	--	<p>The site is remote from any natural greenspace.</p> <p>It has no or limited capacity for linkages to the strategic green infrastructure network.</p>
SA6	<ul style="list-style-type: none"> <li>Impact on a designated site of biodiversity or geodiversity significance?</li> </ul>	++	The site is sufficiently remote from designated nature sites so it is unlikely there will be an impact.
	<ul style="list-style-type: none"> <li>Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	-	The site is located outside any of Natural Cambridgeshire's Priority Landscapes and has limited potential to contribute towards improvements strategically in habitat connectivity.
SA7	<ul style="list-style-type: none"> <li>Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	--	On its northern edge, the site adjoins a pair of cottages and agricultural buildings on the edge of the village. It extends south along Kimbolton Road connecting down to a small cluster of cottages and a farm. The site as a whole very much relates to the open countryside.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			The site promoter identifies that residential uses will only be provided on 1ha of the site. This proposes nine dwellings which represents a very low density for the site. The remainder of the site is to be used as follows: 1ha for natural/green or open spaces, 1ha for biodiversity net gain and 0.51ha to safeguard against flooding.
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	+	The proposal is distant from major sources of pollution and not of a scale likely to cause substantial pollution.
SA9	<ul style="list-style-type: none"> <li>Contribute to meeting a wide range of the types, sizes and tenures of housing needed across the district?</li> <li>Meet the needs of specific housing groups such as gypsies and travellers or older people?</li> <li>Contribute to diversification of the housing supply by being no more than 1 ha in size?</li> </ul>	+	The site is promoted for market and/or affordable homes. The overall site is over 1ha at 3.51 ha in size but the site promoter only seeks to use 1ha of the site for residential uses.
SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	-	The closest town centre is Huntingdon which is around 17kms from the site. Stow Longa does not have a local convenience shop.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	--	There is no primary school within the village, closest being in the nearby village of Spaldwick which is in excess of 800m.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	N	The site is within 800m of St Botolphs Church.
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	+	The site is within 5km of the Bicton and Harvard Industrial Estates.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	++	Ultrafast broadband is available in the vicinity.

SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	-	<p>The site is located around 16kms from Huntingdon railway station. The site is within 800m of a bus service rated F+ on the Place Based Carbon Calculator.</p> <p>A public right of way cuts through the site and there are others within 500m of the site.</p>
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	+	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located such that it cannot be effectively masterplanned to become part of the existing place and community. It may be possible to integrate residential units on the northern end of the site where they adjoin the existing built form of the village but this would be challenging due to the surface water flood risk here.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is not constrained by fluvial flood risk or nature conservation or heritage designations. There is some surface water flood risk present in the northern part of the site in proximity to the existing village edge. Only the northern edge of the site adjoins the built form of Stow Longa, the site extends along Kimbolton Road and would effectively connect the village to a small cluster of properties that are detached from it and situated in the open countryside. Due to the risk of surface water flooding, it is unlikely that the site could be effectively masterplanned to integrate with the existing community as to do so development would need to be focused in

the northern part of the site. The land is classified grade 2 agricultural greenfield land. It is also remote from natural greenspace and has limited opportunities to enhance strategic habitat connectivity. The site is within 5km of the Bicton and Harvard Industrial Estates but has limited public transport options with only a bus stop that is infrequently served available. Stow Longa has limited services and facilities with no shop or primary school.

## 1 Western Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	++	The proposal supports provision of additional retail facilities within a village.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it could be effectively masterplanned to become part of the existing place and community. However, careful consideration will be required to integrate the proposal, in particular, retail uses on the site in terms of scale, design and heritage impact. The public right of way may need to be rerouted if it cannot be successfully integrated within the site. Access is also a key constraint, if access from the B645 rather than Church Road were provided this would not reflect the character and form of development in the village.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is located wholly within a conservation area, the grade I listed All Saints Church is located to the north of the site which is a prominent local landmark.

**Summary of SA**

The site is not constrained by fluvial flood risk but there is some surface water flood risk. It is not constrained by nature conservation designations. The site has good access to local leisure and cultural facilities but primary education is sourced in Kimbolton. There is a bus stop next to the site but this does not run a frequent service. The site is within 5km of the Bicton and Harvard Industrial Estates and the proposed mixed use of residential and retail development could provide some modest levels of employment within Tilbrook and provide a service that is currently lacking. The site is however heavily constrained by heritage with it being located within a conservation area and within the setting of the grade I listed All Saints Church. There is a public right of way running through the site which wither need to be incorporated into the design of the site or rerouted.

## Brampton

1.1 A total of 18 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

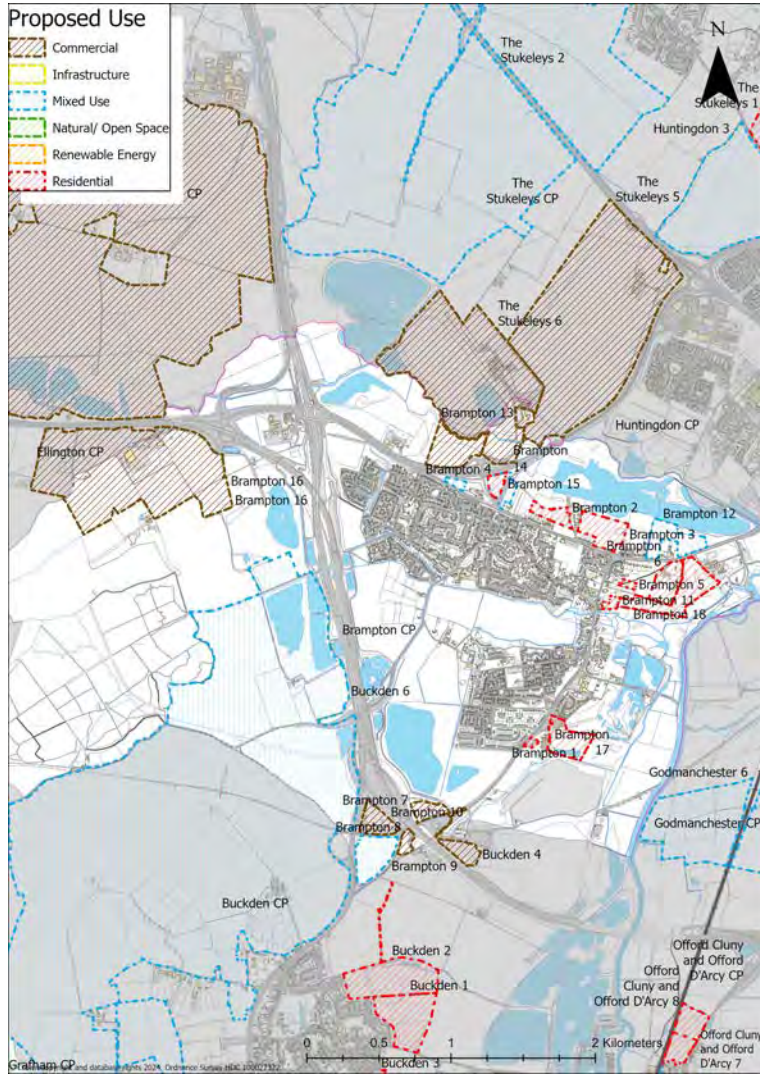

- Brampton 1: Swift Car Care, Buckden Road, Brampton
- Brampton 2: Land to the North of Thrapston road Brampton and West of Poplars Farm 38, Brampton
- Brampton 3: Land to the North of Thrapston Road (opposite The Hurdles), Brampton
- Brampton 4: Wallis Land, Thrapston Road, Brampton
- Brampton 5: Land adjacent The Rectory, Church Road, Brampton
- Brampton 6: Land at Water Meadows, South of Huntingdon Road, Brampton
- Brampton 7: Area 1 Park Farm, Brampton
- Brampton 8: Area 2 Park Farm, Brampton
- Brampton 9: Area 3 Park Farm, Brampton
- Brampton 10: Area 4 Park Farm, Brampton
- Brampton 11: Manor Farm, Brampton
- Brampton 12: Land off Huntingdon Road, Brampton
- Brampton 13: Land North of A141, South of Brampton racecourse, Brampton
- Brampton 14: Land North of Thrapston Road and South of the A141 (larger site), Brampton
- Brampton 15: Land North of Thrapston Road and South of the A141 (smaller site), Brampton
- Brampton 16: Land at Low Harthay and Woodhatch Farms, Brampton - this site also partially falls within Ellington parish. As the majority of the site falls within Brampton parish, the site has been assessed here instead. A link to the site can also be found within the Ellington section of the Western Huntingdonshire LAA document.

- Brampton 17: Brampton Park Golf Club (South site)
- Brampton 18: Brampton Park Golf Club (North site)

1.2 Please note that the following sites also partially fall within Brampton parish:

- The Stukeleys 6: Huntingdon Racecourse also partially falls within Brampton parish but is predominately within The Stukeleys parish so the site assessment has been included within The Stukeleys parish of the Northern Central Huntingdonshire LAA document.
- Buckden 6: Land West of A1 from Buckden to Brampton also partially falls within Brampton parish but is predominately within Buckden parish so the site assessment has been included within Buckden parish of the Southern Huntingdonshire LAA document.

1 Central Huntingdonshire

**Brampton 1: Swift Car Care, Buckden Road, Brampton**

- 1.3 As identified in the LAA, the site is within 50m of Buckden Landfill Waste Management Area (WMA) and within the consultation area for the WMA. No assessment has been made by the site promoter on the impact of the proposed development on the MWA. It is noted that in the submitted covering letter than an odour assessment is being undertaken and will be made available in due course.
- 1.4 Therefore, a sustainability appraisal for the site has not been undertaken.

**Brampton 2: Land to the North of Thrapston road Brampton and West of Poplars Farm 38, Brampton**

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located such that it could not be effectively integrated with the existing community and would result in significant landscape harm on the setting of the County Park.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site, and is sufficiently removed from the nearby conservation area.

## Summary of SA

The site is somewhat constrained by fluvial flood risk. It consists of grade 3 agricultural land and is greenfield. It is not constrained by heritage assets but it adjoins Hinchingsbrooke Country Park. The site has good accessibility to services, facilities primary education and employment opportunities within Brampton and also in Huntingdon. It also has good accessibility to public transport options. While it relates well to the built form of Brampton, the site has a closer relationship to the rural setting of the Country Park and in depth development of such a scale is not characteristic for the area. As such, development in this location is likely to lead to adverse landscape impact as well as impact on the character of the area.

### Summary of SA

The site is not constrained by fluvial flood risk but there is some surface water flood risk along its northern edge. It is greenfield and consists of land classified as grade 2 agricultural land. It is detached from the main built form of Brampton located between Brampton and Buckden. It is not constrained by nature conservation or heritage designations. It is located within the Great Ouse Valley Green Infrastructure Priority Area. The site has very limited accessibility to services and facilities within Brampton and to other nearby settlements and very limited accessibility to public transport options. The site does not relate closely to either Brampton and relates much more closely to the open countryside making its integration with an existing place and community very challenging. Additionally, its proximity to the road network increases the risk of air, light and noise pollution.

#### Summary of SA

The site is constrained by fluvial and surface water flood risk. It consists of land classified as urban with agricultural structures on site. It is not constrained by nature conservation designations but it is constrained by heritage designations being within a conservation area and nearby to several listed buildings. It is located within the Great Ouse Valley Green Infrastructure Priority Area. The site has good accessibility to services, facilities, primary education and employment opportunities within Brampton and also in Huntingdon. It also has good accessibility to public transport options. The site relates to the built form of Brampton but also with the Great Ouse Valley landscape being located on the settlement's eastern edge.

SA5	<ul style="list-style-type: none"> <li>Promote new development with opportunities to participate in leisure and recreation using publicly accessible natural green space?</li> <li>Could development contribute towards enhancing or increasing the strategic green or blue infrastructure network or linkages to it?</li> </ul>	++	The site is wholly within 200m of 0.5 ha (Doorstep Standard), 300m of 2 ha (Local Standard) and 1km of 10 ha (Neighbourhood Standard) of natural green space. It also adjoins to Hinchingsbrooke Country Park to the north and therefore has direct capacity to link to the blue or green infrastructure network.
SA6	<ul style="list-style-type: none"> <li>Impact on a designated site of biodiversity or geodiversity significance?</li> </ul>	--	The site adjoins to Hinchingsbrooke Country Park which is a County Wildlife Site  and is within approximately 900m of a SSSI and 1km of Special Area of Conservation. It is sufficiently remote the other designated nature sites.
	<ul style="list-style-type: none"> <li>Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	+	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			The site is within Natural Cambridgeshire's Green Infrastructure Priority Area and has potential to contribute positively to habitat connectivity.
SA7	<ul style="list-style-type: none"> <li>Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	-	<p>The site is located along Thrapston Road which is typically characterised by ribbon development. The site relates well to Brampton village but any proposed development would have a closer relationship to Hinchingsbrooke Country Park. It is of significant value to the setting of the country park.</p> <p>The site forms part of an existing site allocation in the Huntingdonshire Local Plan to 2036 under site allocation HU8 Hinchingsbrooke Country Park Extension for green infrastructure uses. The site promoter sees to include publicly accessible open space and the opportunity to include an additional car park for Hinchingsbrooke Country Park as well as properties in the southern part of the site along Thrapston Road (1.5ha of the site). The addition of a car park on this side of the Country Park could be beneficial as this would reduce the number of car journeys along Huntingdon Road and Hinchingsbrooke Park Road to access existing parking facilities at the Country Park. The site is however constrained by flood risk so large parts of the site are not appropriate for built development and it is proposed to concentrate built development in the parts of the site at the lowest risk of flooding.</p>
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	-	The proposal may be impacted by increased levels of air, noise and light pollution arising from its proximity to the B1514 (Thrapston Road).
SA9	<ul style="list-style-type: none"> <li>Contribute to meeting a wide range of the types, sizes and tenures of housing needed across the district?</li> </ul>	+	The site proposes market and/or affordable housing as well as open space and a potential car park. The site promoter states that residential development will take up 1.5ha of the total site.

SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	++	The site is within 5km of Huntingdon Town Centre and within 1.5km of two Co-Ops located within Brampton village.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	+	The site is on the edge of Brampton village which has a primary school.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	+	The site is within 800m of multiple culture and leisure facilities measuring from the site frontage onto Huntingdon Road. These are, St Mary Magdalene Church, Brampton Memorial Playing Fields and Centre and The Black Bull public house.
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	++	The site is within 1.5km from Hinchingsbrooke Secondary School and is within 5km of multiple concentrations of employment measuring from the site frontage onto Huntingdon Road. These include, Hinchingsbrooke and Ermine Business Park, Stukeley Meadows Industrial Estate and Hinchingsbrooke Secondary School.  The site benefits from ultrafast broadband in the vicinity.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	++	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	The site is within 5km of Huntingdon train station and is within 800m of a bus service rated D+ on the Place Based Carbon Calculator meaning there is a regular service.  A pavement adjoins the site frontage onto Huntingdon Road.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	+	The proposal is for residential development alongside natural/ open space and car parking facilities for Hinchingsbrooke Country Park.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	Considering the flood risk on site and the ribbon type of development typical along Thrapston Road, in depth development of the scale proposed is not suitable. However, if only open space uses and facilities to support the Country Park were pursued, then the site can be effectively integrated into the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets within the site. However, it is adjacent to a conservation area and is close proximity to listed buildings, namely grade II listed 23 Huntingdon Road to the west and grade I listed Pepys House which could be impacted by the development.

#### Summary of SA

The site is constrained by fluvial flood risk. It consists of grade 3 agricultural land and is greenfield. It adjoins a conservation area, listed buildings and Hinchingsbrooke Country Park. The site has good accessibility to services, facilities primary education and employment opportunities within Brampton and also in Huntingdon. It also has good accessibility to public transport options. The site as a whole relates well to the built form of Brampton but has a closer relationship to the rural setting of the Country Park and in depth development of such a scale is not characteristic for the area. As such, development could only be considered potentially suitable for uses that support the Country Park such as a car park and for green infrastructure inline with the current allocation for the site in the Local Plan to 2036.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	<p>There are no designated heritage assets within or in the immediate vicinity of the site.</p>

# 1 Central Huntingdonshire

## Summary of SA

The site has some flooding constraints. It is greenfield and consists of land classified as grade 3 agricultural land. It is nearby to the Brampton Racecourse SSSI but is not constrained by heritage designations. It is located within the Great Ouse Valley Green Infrastructure Priority Area. As a whole, the site has limited accessibility to services and facilities within Brampton and also in Huntingdon and limited accessibility to public transport options. Accessibility is better on its eastern parcel. The western parcel does not relate closely to either Brampton or the open countryside but its detachment from Brampton will make successful integration of development very challenging. The eastern parcel relates more so but in depth development would not be characteristic of the form and character of development in this location. Additionally, its proximity to the road network increases the risk of air, light and noise pollution.

			the settlement or the countryside. The submitted concept plan shows the promoter's intention to deliver housing in the form of apartment blocks. This would not conform with the dominating form of the area which is typically linear development that faces into the village. The location and context of the site makes integration with the existing place and community challenging. As such, this development would be an isolated development with little relationship with Brampton.
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	-	It is bounded on all sides by the road network with the A141 and Spittals roundabout to the north, the B1514 to west and south and by a link route between the A141 and B1514 roundabout to the east. This means there is an increased likelihood of air, light and noise pollution.
SA9	<ul style="list-style-type: none"> <li>Contribute to meeting a wide range of the types, sizes and tenures of housing needed across the district?</li> <li>Meet the needs of specific housing groups such as gypsies and travellers or older people?</li> <li>Contribute to diversification of the housing supply by being no more than 1 ha in size?</li> </ul>	+	The site is proposed for market and/or affordable housing. It is over 1ha in size.
SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	++	The site is within 5km of Huntingdon town centre and within 1.5km of two Co-Op food stores within Brampton village.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	+	The site is in Brampton village which has a primary school.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	N	The site is within 800m Brampton Memorial Playing Fields and Centre but is beyond 800m from other culture and leisure facilities in Brampton.

# 1 Central Huntingdonshire

## Summary of SA

The site has some flooding constraints. It is greenfield and consists of land classified as grade 3 agricultural land. It is nearby to the Brampton Racecourse SSSI but is not constrained by heritage designations. It is located within the Great Ouse Valley Green Infrastructure Priority Area. The site has limited accessibility to services and facilities within Brampton and also in Huntingdon and limited accessibility to public transport options. The site does not relate closely to either Brampton or the open countryside but its detachment from Brampton will make successful integration of development very challenging. Additionally, its proximity to the road network increases the risk of air, light and noise pollution.

## Updates after initial appraisal

### Brampton 16: Land at Low Harthay and Woodhatch Farms, Brampton

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
SA1	<ul style="list-style-type: none"> <li>Reduce greenhouse gas emissions in line with, or exceeding, nationally or locally set targets?</li> </ul>	+	<p>The site is immediately south of the A14 and is adjacent to the A1. There maybe opportunities to connect the site to the existing bus network and provide an enhanced service from Huntingdon to the western part of the district via Brampton. Although the proximity to the A14 could potentially incentivise car usage if the bus network along this corridor is not enhanced. The site promoter states that an Employees Travel Strategy would likely be prepared to include a shuttle bus service and a car sharing scheme to minimise the car trips of future employees to and from the site. They also identify opportunities for public footpath improvements between the site and the village of Brampton.</p> <p>No information has been provided suggesting built development on the site will promote low or zero carbon technologies above Building Regulation requirements, however the site promoter states that it is intended to deliver a solar farm within the site although the size of this is to be confirmed.</p>
	<ul style="list-style-type: none"> <li>Promote enhancements to green infrastructure networks to facilitate increased absorption and dissipation of nitrogen dioxide and other pollutants?</li> </ul>	N	

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			The site promoter also seeks to incorporate some open space and green infrastructure within the site which could provide enhanced linkages to the adjacent Great Ouse Valley Green Infrastructure Priority Area. The site promoter sets out that some open space and biodiversity net gain opportunities could be included within the scheme, the exact amount of land this may occupy is unclear at this stage so increased absorption of pollutants is likely to be minimal.
SA2	<ul style="list-style-type: none"> <li>Concentrate new development in locations that maximise opportunities to adapt and be more resilient to the unavoidable impacts of the climate emergency?</li> </ul>	++	The site is not at risk of fluvial flood risk with climate change taken into account at 1 in 100 (Design Flood).
	<ul style="list-style-type: none"> <li>Support habitats in adjusting to the impacts of the climate emergency?</li> </ul>	-	The site promoter sets out that some open space and biodiversity net gain opportunities could be included within the scheme, the exact amount of land this may occupy is unclear at this stage, this will impact the site's potential contribution to help habitats adjust to the impacts of the climate emergency.
SA3	<ul style="list-style-type: none"> <li>Maintain and where possible improve the quality and availability of water resources?</li> </ul>	--	Due to the size of the proposed site a new WRC will most likely be required, this will require future infrastructure delivery planning for confirmation.
	<ul style="list-style-type: none"> <li>Minimise the risk of flooding from all sources?</li> </ul>	+	The site is wholly within flood zone 1 but there is significant surface water flood risk across the site particularly focused along the centre of the northern edge of the site.
SA4	<ul style="list-style-type: none"> <li>Enable the use of land that has previously been developed in preference to greenfield land?</li> </ul>	-- -	The site consists of greenfield land. The site submission which includes the waste recycling centre does include some 10ha of previously developed land with it currently occupied by a Waste Recycling Centre; an energy from waste plant and farm.

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
	<ul style="list-style-type: none"> <li>Promote development in locations that are grade 3 agricultural land or lower (including urban and non-agricultural land) in preference to higher grades?</li> </ul>	-	The site is mostly classified as grade 3 agricultural land although its south eastern corner is classified as grade 2.
SA5	<ul style="list-style-type: none"> <li>Focus development in areas which are either well served by publicly accessible open and natural green space or have the capacity to provide additional such space?</li> </ul>	+	The site is remote from Natural England's access to natural green space standards but has capacity for the inclusion of green space within the site. It also has, due to the scale of the proposal, scope for linkages to the blue or green infrastructure network.
	<ul style="list-style-type: none"> <li>Ensure current strategic blue and green infrastructure networks are not compromised and future extensions or improvements are not prejudiced?</li> </ul>	+	The site is outside of the Great Ouse Valley Green Infrastructure Priority Area but due to the scale of the site has some capacity to improve habitat connectivity.
SA6	<ul style="list-style-type: none"> <li>Protect sites of designated biodiversity or geodiversity significance?</li> </ul>	-	The site is approximately 300m from a SSSI but is sufficiently remote from the other designated nature assets.
	<ul style="list-style-type: none"> <li>Promote opportunities for the recovery and enhanced connectivity of sites of biodiversity or geodiversity significance?</li> </ul>	+	The scale of the site could enable the inclusion of green infrastructure and networks within the site which could potentially enhance or connect to priority habitats.
SA7	<ul style="list-style-type: none"> <li>Promote opportunities to protect and enhance valued landscape and townscape characteristics?</li> </ul>	-	The site is located within the Southern Wolds Landscape Character Area which is characterised by ridges and valleys with very gently undulating ground divided by the steep ridge that contains Grafham Water. The site rises from its lowest point along its northern edge adjoining the A14 reaching its highest point along the centre of its southern boundary, this is some 30m higher. The site is well defined by hedgerows and field boundaries but is fairly open particularly to the south as it is more well defined and confined to the north by the strategic road network. The site is located within the countryside with a public right of way found towards the western edge of the site.
	<ul style="list-style-type: none"> <li>Reinforce local distinctiveness and a sense of place?</li> </ul>		

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			<p>The site is of a scale whereby the development is of a scale where it could form its own commercial hub with links to the strategic road network and could provide substantial areas of landscaping providing a softer development edge that mitigates landscape harm. The site promoter also seeks to integrate open spaces and a solar farm which would further assist in this.</p>
SA8	<ul style="list-style-type: none"> <li data-bbox="293 660 1021 691">• Promote actions to reduce contributions to air pollution?</li> <li data-bbox="293 719 1099 782">• Facilitate the minimisation of light, noise and odour pollution, in particular on the rural environment</li> </ul>	-	<p>Development at this scale may require upgrades to the A14 and the Brampton Hut roundabout as well as to other local roads and enhanced public and active travel connections into the surrounding area. The site being located to the west of Brampton beyond the A1 means there are fewer connections to existing cycle paths and bus stops are more challenging and less frequent.</p> <p>The A14 forms a strong northern edge to the site and could give rise to higher levels of air, noise and light pollution on future users of the site, as could the site's proximity to the A1 to the east. The site is of a size that significant landscaping buffers and noise mitigation could be provided to mitigate this impact. Additionally, these can be designed to mitigate the impact the air, noise and light pollution that could potentially arise from such a development. There is already a Waste Recycling Centre; an energy from waste plant and farm which increases the likelihood of enhanced levels of pollutants within the site and on the surrounding area. The site promoter has submitted two options for the site, one options includes the relocation of this recycling centre and the other omits it from the proposals. In both scenarios, there will still be a recycling area within the site.</p> <p>Landscaping, open space and the potential solar farm could provide some mitigation and help to integrate it into the wider development of the site for a commercial scheme.</p>

## 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
SA9	<ul style="list-style-type: none"> <li>Facilitate the delivery of the district's housing needs in sustainable locations that meet the community's needs?</li> </ul>	N	The site is being promoted for a commercial led scheme so will not provide any additional housing.
SA10	<ul style="list-style-type: none"> <li>Support and enhance the more deprived areas of the district?</li> </ul>	-	<p>The site is large and falls within both Brampton and Great Staughton wards, it is however predominately within Brampton ward. Analysis of deprivation by Cambridgeshire County Council gives the Brampton ward a local index of deprivation score of 10 (where 1 is most deprived and 10 is least deprived). Great Staughton ward is ranked as 9 meaning it is also one of the least deprived wards in the district.</p> <p>As the site is being promoted for a commercial scheme, social and community facilities would not necessarily be expected to be included on site as part of its development.</p>
	<ul style="list-style-type: none"> <li>Maximise opportunities for access to existing or proposed social and community facilities and services?</li> </ul>	N	
SA11	<ul style="list-style-type: none"> <li>Contribute to regeneration activities?</li> </ul>	-- +	<p>The site consists of greenfield land and also previously developed land with it currently occupied by a Waste Recycling Centre; an energy from waste plant and farm. As such the development of the site could contribute towards the reuse of some previously developed land and regeneration for the submission where this centre is included within proposals.</p> <p>The site is subject to detailed masterplanning and it still needs to be determined whether the water recycling centre is to be included within proposals or not (this reduces the potential site area by 10ha and also creates a 'hole' within the site). Engagement with Cambridgeshire County Council will be critical on this aspect and also how commercial uses can be successfully integrated next to a water recycling area which could bring increased amenity issues for future users. Notwithstanding these, the site has the potential to deliver a commercial scheme consisting of employment uses and logistics and</p>
	<ul style="list-style-type: none"> <li>Enhance and diversify economic opportunities with the district?</li> </ul>	+	

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			distribution development utilising the site's location along the A14 and proximity to Brampton Hut linking to the A1. Indicative floorspace figures have been provided and in their supporting statement the agents for the two submissions state that up to 2,876 full-time equivalent jobs could be provided on site once it is built.
SA12	<ul style="list-style-type: none"> <li>Support development in locations with good active travel and public transport links and services or provide opportunities for significant improvements?</li> </ul>	+	The site is approximately 6km from Huntingdon train station and is beyond 800m from a bus service. The site promoter states that an Employees Travel Strategy would likely be prepared to include a shuttle bus service and a car sharing scheme to minimise the car trips of future employees to and from the site. They also identify opportunities for public footpath improvements between the site and the village of Brampton. This could be made more viable if delivered in combination with Land at Weybridge Farm (Brampton Cross) - Alconbury 8.
SA13	<ul style="list-style-type: none"> <li>Attract new investment and provide opportunities to improve the resilience of the local economy?</li> <li>Contribute to a balanced portfolio of employment land in sustainable locations throughout the district?</li> <li>Support retention and growth of indigenous companies?</li> <li>Encourage sustainable tourism?</li> </ul>	++	<p>The site has potential to attract new investment and could become a mini hub for commercial and logistics development along the A14 corridor. It is a sustainable location for employment opportunities being in good proximity to potential employees in Huntingdon, Brampton, Ellington, Buckden and Grafham with potential for active travel and public transport accessibility from these locations which could be enhanced through a development at this scale. There is the potential to support indigenous companies. Tourism is unlikely to be a focal part of development on the site.</p> <p>Also considering its wider context, the site is immediately south of another site submissions (CfS:232 - Land at Weybridge Farm (Brampton Cross) - Alconbury 8), which has been submitted for a commercial scheme known as Brampton Cross. Therefore taking a bigger picture view, the site could work with other landowners to</p>

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			provide a larger hub of new employment development with connections to the strategic road network in close proximity to existing settlements and utilise public transport and active travel modes more effectively.
SA14	<ul style="list-style-type: none"> <li>Facilitate modernisation of existing town centres to meet current and anticipated needs?</li> </ul>	N	The site is not expected to include local scale shopping facilities, it could potentially provide a small retail outlet for employees to buy lunches etc, but this is likely to be a very small amount of the site and would be subject to masterplanning. It is in relatively close to Huntingdon town centre being about 7km from it. The additional demand generated from and expenditure capacity of the site's future occupants has potential to assist in facilitating some modernisation of the existing town centres particularly if there is a local workforce.
SA15	<ul style="list-style-type: none"> <li>Strengthen a local sense of place?</li> </ul>	-	The site is a mixture of farmland and a water recycling centre so it does not have a distinct identity already and it doesn't adjoin any existing settlements. The site is large and it is proposed that as a whole the site could provide an opportunity for a mini commercial hub along the A14 corridor near to the Brampton Hut roundabout. Its landscape character is largely shaped by it being wholly within the Southern Wolds Landscape Character Area which is characterised by ridges and valleys with very gently undulating ground divided by the steep ridge that contains Grafham Water. The A14 also strongly defines the landscape character of the site to the north. Considering these factors and the rising land levels of the site, development would be visible from some distance from a number of different directions and could impact the landscape setting of nearby settlements most notable Ellington. There is a public right of way within the site.
	<ul style="list-style-type: none"> <li>Retain the character of existing settlements?</li> </ul>		
SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	++	There are no designated heritage assets within or in the immediate vicinity of the site.

## Summary of SA

The site is located to the east of Ellington and to the west of Brampton and the Brampton Hut roundabout. The site is currently occupied by a Waste Recycling Centre; an energy from waste plant and farm. It is located immediately south of the A14. The SA includes the appraisal of two submissions, one includes the waste recycling centre and the other does not. The site is mostly greenfield land apart from the waste recycling centre which is previously developed land. The land is classified as mostly grade 3 agricultural land apart from its south eastern corner is classified as grade 2. The site is wholly within flood zone 1 but there is significant surface water flood risk across the site particularly focused along the centre of the northern edge of the site. The site is not constrained by heritage designations, it is within 300m of Brampton Wood SSSI. The site is not accessible to public transport at the moment but the site promoter states that a shuttle bus and enhancements to public rights of way and walking routes could be made to nearby settlements. This could be made more viable particularly if delivered in combination with the adjacent site Alconbury 8 (Land at Weybridge Farm (Brampton Cross)). The proposal has the potential to provide a mini commercial hub located along the A14 corridor. The site is a strategic scale employment site which would contribute to economic opportunities in the district through construction and associated trades for the duration of its delivery and its operation and could support significant high density economic opportunities in the district. Development of the site could have substantial landscape impact most notably to the south and west. The A14 forms a strong northern edge to the site and also gives rise to the potential greater impact from pollution.

## Updates after initial appraisal

### Brampton 17: Brampton Park Golf Club (South site)

- 1.11** As identified in the LAA, the site is within the consultation area of Buckden Landfill Waste Management Area (WMA). No assessment has been made by the site promoter on the impact of the proposed development on the MWA and no odour assessment has been submitted in support of the submission.
- 1.12** Therefore, a sustainability appraisal for the site has not been undertaken.

# 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	++	The proposal would include redevelopment of land and buildings that are now redundant from their industrial use which would improve the appearance of the local area. Although separated from the main part of Godmanchester it adjoins homes at Riverside Mill and is just over the River Great Ouse to Huntingdon town centre. Development could be effectively integrated with the existing place.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site adjoins to both Godmanchester, to the south, and Huntingdon, to the west, Conservation Areas. There are also listed buildings, namely the Riverside Mill apartments, and a medieval bridge to the north west. Therefore the development could have an impact upon designated heritage assets.

## Summary of SA

The site is partially constrained by fluvial flood risk. It is wholly previously developed land and contains a range of buildings and hardstanding. It is in close proximity to services and facilities in Huntingdon town centre as well as a range of employment opportunities. It is accessible to both railway and bus services. It has very good access to open spaces. There is a slight risk of pollution impacts being experienced. Development would make effective use of the land and provide the opportunity to create new homes in a highly sustainable location.

## Updates after initial appraisal

### Godmanchester 2: Corpus Christi Paddock, Godmanchester

- 1.15** As identified in the LAA the constraints arising from the heritage assets compounded by the multiple difficulties in achieving access mean that the site is considered unsuitable for development and therefore not achievable.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	<p>The site benefits from being promoted by the developer of the adjoining site who could provide physical connectivity between this and Whitehill Gardens. A consistency of character could be achieved with this. However, the landform rises to the east and emphasises the relationship of the land with the wider agricultural landscape.</p> <p>A key route is suggested through the site which the promoter suggests could enable access to substantial further land around the south and east of Godmanchester as far up as the A1307. However, the promoter of Godmanchester site 4 (Emmanuel Knoll Village) has an alternative proposal for an access further south which would negate the need for this link. Effective masterplanning between both sites would be advantageous should they both come forward for development.</p> <p>As a freestanding site there would be challenges in successfully integrating development into Godmanchester despite the immediate connectivity into Whitehill Gardens due to the lack of formal footpath linkages into Romans' Edge.</p>
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage within or in close proximity to the site

## Summary of SA

This site is greenfield and classified as grade 2 agricultural land. It is within flood zone 1 and experiences minimal surface water flood risk. There are no nature conservation designations or heritage assets within the site's immediate vicinity. The site is within access thresholds of local services and facilities including primary education although safe walking routes are not always available due to the lack of a safe footpath along the A1198 by the southwestern edge of Romans' Edge. It also benefits from reasonable proximity to public transport services. There are significant challenges in terms of impact on the wider landscape and the form and character of Godmanchester due to the site's detachment from the main built form.

SA5	<ul style="list-style-type: none"> <li>Promote new development with opportunities to participate in leisure and recreation using publicly accessible natural green space?</li> <li>Could development contribute towards enhancing or increasing the strategic green or blue infrastructure network or linkages to it?</li> </ul>	++	The site is remote from Natural England's 'Access to Green Space Standards' but has capacity for 800-1,200 homes with open space and biodiversity enhancement included within the site.
SA6	<ul style="list-style-type: none"> <li>Impact on a designated site of biodiversity or geodiversity significance?</li> </ul>	++	The site is sufficiently remote from the designated nature assets.
	<ul style="list-style-type: none"> <li>Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	-	The site is outside Natural Cambridgeshire's Green Infrastructure Priority Areas and has limited capacity for improvements strategic in habitat connectivity.
SA7	<ul style="list-style-type: none"> <li>Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	--	<p>The site promoter suggests a development of 800-1,200 new homes with a relief road taking traffic between the A1307 and A1198. The southernmost point of this would be around 900m south of the roundabout on the A1198 leading into Gumcester Way and London Road. This is around the same distance as this roundabout is south from that of the A1198 with the A1307. This would significantly impact on the rural approach to the southern edge of Godmanchester.</p> <p>The site promoter's scale of proposed development would represent an increase of just over 30% to the number of homes in Godmanchester. It would also represent increasing the land area of the town by half.</p> <p>The proposed site would reinforce the change to the character of Godmanchester instigated by the Romans' Edge development which has in itself led to growth to the east of the A1198 of over 30% since 2016.</p>

## Central Huntingdonshire

1

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			<p>The proposal would form a significant further extension to the south and east of Godmanchester with little relationship to wider Godmanchester although with potential to relate well to the form and character of Romans' Edge. The landform slopes to both the northwest and southwest from the centre of the site with slopes down towards Romans' Edge from which development on the site would be highly visible and affect the character of that area which currently adjoins open countryside.</p> <p>The proposed concept layout for the site indicates just 27.55 ha (26%) being used for residential development with 6.3% used for the relief road and a total of 58.3% being used for a variety of open space uses and drainage attenuation. With less than 30% of the 106ha site being proposed for built uses it is not judged to make efficient use of land.</p>
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	-	<p>The northern and southern boundaries would both be at risk of suffering some noise, light and air pollution due to their proximity to the A1307 and A1198. The western corner would adjoin proposed recreational land next to Godmanchester Rovers Football Ground which may give rise to limited noise impacts but these would be nothing beyond that expected to be associated with a large scale development. The scale of the development is such that it has some potential to generate light, noise and visual impacts.</p>
SA9	<ul style="list-style-type: none"> <li>Contribute to meeting a wide range of the types, sizes and tenures of housing needed across the district?</li> <li>Meet the needs of specific housing groups such as gypsies and travellers or older people?</li> <li>Contribute to diversification of the housing supply by being no more than 1 ha in size?</li> </ul>	++	<p>The would support a wide range of types, sizes and tenures of homes.</p>

	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	-	The site is approximately 900m from a public footpath along the A1198.
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	+	The site promoter does not propose any dedicated employment land within the site; although a mixed use 'village centre' is proposed with a community hub, retailers and flexible workspace facilities.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal would not reinforce the existing local centres in serving their communities but suggests creation of new facilities to service the new community.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	<p>The site is wholly greenfield with extensive views over the site from multiple public vantage points including within Romans' Edge, along the A1198 and along the A1307. The scale of the proposed site would necessitate masterplanning and opportunities are available for integration into Romans' Edge. The low proportion of the site proposed for built development would facilitate its ability to be sensitive to the local environment, for instance through retention of land with a historic ridge and furrow pattern within the open space provision.</p> <p>However, there are challenges to integrating the site into Godmanchester. The southern part of the site is completely separate from Godmanchester as indicated by the presence of two intervening proposed development sites (Godmanchester 3 and Godmanchester 8). The southwestern most field is proposed to be retained in agricultural use with the relief road cutting through it. Should the site be developed in isolation this road link would not be sensitive to the rural character of the area. If the relief road proves not to be achievable the site would struggle to provide safe access appropriate to the scale of proposed development.</p>
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage within or in close proximity to the site

# 1 Central Huntingdonshire

## Summary of SA

The site is greenfield land comprising a mixture of grade 2 and grade 3 agricultural land. It is within flood zone 1 and has little risk of surface water flooding. The site promoter is advocating development to enhanced environmental standards with an on-site solar energy park to meet around 40% of the site's electricity needs. Development would not impact on any designated nature conservation assets but equally would not contribute positively to strategic habitat connectivity.

The site is extensive and the amount of residential development proposed for the amount of land involved would not represent an efficient use of land. The site would form a substantial extension to Godmanchester and hence impact on its wider form and character although would represent a continuation of the character established by Romans' Edge forming a further new neighbourhood to the east of the A1198. It would however support provision of a wide range of housing sizes, types and tenures. The site is within most threshold distances for public transport and services although safe footpath connections do not currently exist from the southern part of the site and routes would need to connect through Romans' Edge. Both northern and southern edges of the site may be subject to pollution impacts from adjacent roads. There are no designated heritage assets likely to be impacted and the concept plan proposes retention of the existing ridge and furrow pattern within one field.

## Summary of SA

The site is greenfield best and most versatile agricultural land. It is flood zone 1 but experiences surface water flood risk along the Stoneyhill Brook edge. Development would not impact on nature conservation designations but provides limited opportunities to contribute to enhanced strategic habitat connectivity. The site adjoins existing development on the southern edge of Godmanchester but there are no opportunities for integration with this to aid connectivity to the established community. The site promoter's proposed density would result in a relatively dense form of development adjoining the adjoining open countryside with impacts on long distance views. The site has good accessibility to primary education, social, sporting, local retail facilities and employment. The site has reasonable public transport connectivity. No heritage assets would be impacted by the development.

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			The site is close to Godmanchester which provides a limited range of local services with larger scale services available in Huntingdon. The additional demand generated from and expenditure capacity of the site's future occupants has some potential to assist in facilitating some modernisation of Huntingdon town centre.
SA15	<ul style="list-style-type: none"> <li data-bbox="293 600 1137 647">• Strengthen a local sense of place?</li> <li data-bbox="293 647 1137 1174">• Retain the character of existing settlements?</li> </ul>	--	<p>The site is largely arable farmland which in itself does not have a distinct identity so any development scheme would need to have a strong design code to develop a new sense of place. The proximity of parts of the site to the western end of Godmanchester would have significantly detrimental impacts on the character of the existing town. The remainder of the site is more disconnected along much of the northern edge of the site which would substantially impede integration and rely on development of additional intervening land to support access to wider services and facilities.</p> <p>The scale of the proposed development would dwarf Godmanchester being more than double its present size alone. Once completed as an extension to Godmanchester the combined size would exceed the current size of Huntingdon impacting on the long established relationship between the two settlements with Huntingdon historically serving as the larger market town providing services to Godmanchester's residents.</p>
SA16	<ul style="list-style-type: none"> <li data-bbox="293 1190 1137 1254">• Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	N	There are no heritage designations within the site, however, the Roman Road of Ermine Street forms the eastern boundary so there is high potential for archaeological value in the vicinity of this.

# 1 Central Huntingdonshire

## Summary of SA

The site is wholly greenfield and primarily comprises best and most versatile agricultural land. It is a low risk of flooding and hence relatively less vulnerable to enhanced flooding through climate change. Development would have potentially detrimental impacts on the Ouse Valley Green Infrastructure Priority Area and the Portholme SAC and SSSI. Although the local character of the landscape has been changed by the A14 being rerouted through it the overall feel remains rural as most of this length of the A14 is in a shallow cutting with embankments reducing the visibility of the road from the surrounding countryside. The site is extensive and additional land would need to be incorporated to create an contiguous site. The site adjoins Godmanchester on the western side and but is more disconnected along much of the northern edge of the site substantially impeding integration. Thus, the proposed development would have a significantly detrimental impact on both the wider landscape and on the character of the existing small town of Godmanchester. Proximity to the A14 and the scale of the proposed development would enhance risks of air and light pollution. The site is located in an attractive area in terms of the housing market but would not contribute to regeneration or reducing deprivation particularly. There is no clarity over the employment elements of the proposed development; the scheme's lack of direct access to Cambridge via the A14 is a potential impediment and employment uses could give rise to substantial harm due to the amount of traffic that may be drawn through Godmanchester on the A1198 to access the A1307 to reach Cambridge. The proposed scale and location of the scheme would be sufficient to create a sense of place through good design but would substantially damage the character of Godmanchester and its relationship to Huntingdon as a larger market town.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	N	There are no heritage designations within the site, however, the Roman Road of Ermine Street forms the eastern boundary so there is potential for archaeological value in the vicinity of this.

## Summary of SA

The site is greenfield best and most versatile agricultural land located in flood zone 1. The site is separated from the built up area of Godmanchester by an intervening field (put forward as Godmanchester 5) and would be wholly dependent on development of that land to generate sustainable development of the site allowing for any integration into the existing community notwithstanding that is challenging for Godmanchester 5 too. Development would not impact on nature conservation designations but provides limited opportunities to contribute to enhanced strategic habitat connectivity. The site has been promoted both individually by the owner for 138 new homes and by an agent as part of a larger scheme for around 530 new homes. Its location adjoining the adjoining open countryside would give rise to impacts on long distance views. The site has good accessibility to primary education, social, sporting, local retail facilities and employment. The site has reasonable public transport connectivity. No heritage assets would be impacted by the development.

#### Summary of SA

The site has good potential for the proposed open space and biodiversity net gain use. It offers some opportunities for consolidation with the open space created west of Comden Drive and along Silver Street and for provision of habitat linkages between open countryside and Portholme.

#### Updates after initial appraisal

#### Godmanchester 11: Land to the south of the A1307, Godmanchester

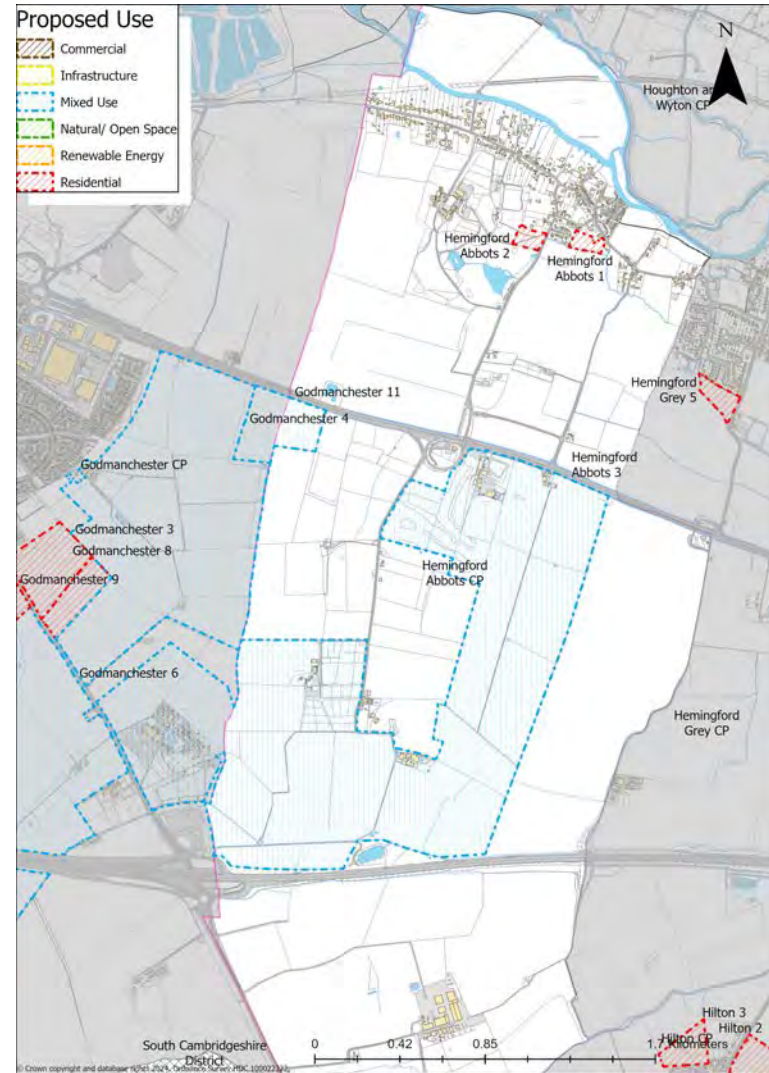

- 1.19** This site does not progress through to the sustainability appraisal as the proposed scheme cannot be delivered without substantial harm being caused to Emmanuel Knoll Plantation and is unsuitable as a freestanding scheme being dependent on adjoining land.

# 1 Central Huntingdonshire

## Hemingford Abbots

**1.20** A total of 3 sites has been identified/ put forward through the desktop review or Call for Sites process. These are:

- Hemingford Abbots 1: Royal Oak Gardens, High Street, Hemingford Abbots
- Hemingford Abbots 2: Land West of Rideaway, Hemingford Abbots
- Hemingford Abbots 3: The Lattenburys (land to the South of the A1307 and North of A14, and West of A1198) - this site also partially falls within Godmanchester parish.

**Hemingford Abbots 1: Royal Oak Gardens, High Street, Hemingford Abbots**

- 1.21** As identified in the LAA, the entire site is covered with matured trees with Tree Preservation Order and is constrained by flooding. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and the very limited proportion of the site being located within a lower at risk zone and the protected trees on site, the site is considered unsuitable for development.
- 1.22** Therefore, a sustainability appraisal for the site has not been undertaken.

## Summary of SA

The site is located in the southern edge of the village and can be effectively masterplanned to become part of the existing place and community. It is classified as grade 3 agricultural land and offers no opportunities to contribute to regeneration. Approximately 82% of the site is within flood zone 2 and would require an Exception Test through Level 2 SFRA. It is remote from educational, retail and employment destinations although it has reasonable access to local social facilities. It has limited public transport access but has good connectivity to the strategic transport network. The site is exposed to the open countryside, is within a conservation area and is in close proximity to a listed building. As such, the development would not contribute to protecting the form and character of the surrounding townscape and landscape. Also, the amount of development will not make an efficient use of land. Overall, the sustainability of the site is considered very poor for residential purposes.

SA3	<ul style="list-style-type: none"> <li>Maintain and where possible improve the quality and availability of water resources?</li> </ul>	-	<p>Due to the size of the proposed site a new WRC will most likely be required, this will require future infrastructure delivery planning for confirmation. The site promoter is exploring a joint venture arrangement with Anglian Water for foul water disposal to connect</p>
	<ul style="list-style-type: none"> <li>Minimise the risk of flooding from all sources?</li> </ul>	+	

## 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			<p>directly to Huntingdon waste water treatment works. Installation of pre-treatment plants is also proposed to reduce the need for additional discharge permits into the River Great Ouse.</p> <p>Whilst fluvial flood risk is very low surface water flood risk will require some mitigation. A level 2 SFRA is required to demonstrate the detailed impacts and requirements. Given the scale of the site it is anticipated that there will be ample opportunities to manage and mitigate the level of flood risk.</p>
SA4	<ul style="list-style-type: none"> <li>Enable the use of land that has previously been developed in preference to greenfield land?</li> </ul>	--	The site is predominantly greenfield agricultural land so would have little impact on use of previously developed land. It is classified as grade 2 agricultural land.
	<ul style="list-style-type: none"> <li>Promote development in locations that are grade 3 agricultural land or lower (including urban and non-agricultural land) in preference to higher grades?</li> </ul>	--	
SA5	<ul style="list-style-type: none"> <li>Focus development in areas which are either well served by publicly accessible open and natural green space or have the capacity to provide additional such space?</li> </ul>	++	<p>The northern part of the site is within Natural England's access to natural greenspace standards for having a space of at least 20ha within 2kms. It is also generally within reasonable proximity of the open spaces along the Ouse Valley corridor. As much of the site is greenfield agricultural land it includes a series of established hedgerows and tree belts which could form the basis for opportunities for further provision.</p> <p>Current strategic blue and green infrastructure networks are not expected to be compromised by development of this site nor their future extension or improvement inhibited, as these are more likely to be focused directly within the Great Ouse Valley river corridor and its associated flood meadows.</p>
	<ul style="list-style-type: none"> <li>Ensure current strategic blue and green infrastructure networks are not compromised and future extensions or improvements are not prejudiced?</li> </ul>	++	

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
SA6	<ul style="list-style-type: none"> <li>Protect sites of designated biodiversity or geodiversity significance?</li> </ul>	++	<p>There are no designated sites of biodiversity or geodiversity value within the site. However, a county wildlife site, Littlebury Meadows, is situated just to the west of the site. Inclusion of a country park and green infrastructure network within the site may assist with connectivity to biodiversity assets within the Ouse Valley green infrastructure priority area. There are no tree preservation orders within the site.</p>
	<ul style="list-style-type: none"> <li>Promote opportunities for the recovery and enhanced connectivity of sites of biodiversity or geodiversity significance?</li> </ul>	++	
SA7	<ul style="list-style-type: none"> <li>Promote opportunities to protect and enhance valued landscape and townscape characteristics?</li> </ul>	+	<p>The majority of the site lies within the South east Claylands landscape character area which is typified by a gently undulating landform of which the ridge running through the central part of this site is a typical feature. Established hedgerows are common in the character area of which there are many both within and surrounding the site. The layout of any future development could build on these as an established local feature contributing to provision of an established character within the new community. The northern edge of the site falls within the Ouse Valley landscape character area which focuses on the blue and green corridor associated with the river. The site is peripheral to this area and is cut off from it by the A1307.</p> <p>There are limited opportunities for the proposal to reinforce local distinctiveness as it has little relationship to existing settlements. The green infrastructure network could contribute to reinforcing the distinctive character of the wider Ouse Valley area and the open nature of the countryside of the south east claylands. As a new community the masterplan would need to create a sense of place and identity of its own.</p>
	<ul style="list-style-type: none"> <li>Reinforce local distinctiveness and a sense of place?</li> </ul>		
SA8	<ul style="list-style-type: none"> <li>Promote actions to reduce contributions to air pollution?</li> </ul>	+	<p>The proposed masterplan places a strong emphasis on promotion of active travel and public transport options connected by on-site mobility hubs to facilitate interchange between these modes. A potential</p>

## 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
	<ul style="list-style-type: none"> <li>Facilitate the minimisation of light, noise and odour pollution, in particular on the rural environment</li> </ul>		<p>sustainable travel corridor along the route of the A1307 is also promoted. These would all have the potential to reduce contributions to air pollution relative to the scale of development proposed.</p> <p>The site is bounded by major highways to north and south so is already exposed to light and noise pollution. Development on the raised central portion of the site could lead to light pollution impacting on settlements further afield. The illustrative masterplan focuses development away from this area to reduce this impact.</p>
SA9	<ul style="list-style-type: none"> <li>Facilitate the delivery of the district's housing needs in sustainable locations that meet the community's needs?</li> </ul>	++	<p>The site is located in close proximity to Huntingdon, St Ives and Godmanchester and development could contribute to meeting the needs of current and future residents and businesses in the local area. It is also accessible to the A1307 and A1198 routes which could offer access to Cambridge and other major employment locations although sustainable travel options are currently limited.</p> <p>In terms of market demand and meeting community needs the site is located within the Godmanchester and Hemingford Abbots ward of the district. Analysis of average house prices per square metre by ward using data from Hometrack for April to September 2023 shows this ward as the thirteenth most expensive of the 26 wards in the district indicating it is at the mid-point of market demand and average costs for people looking to purchase homes in the locality relative to the district as a whole. Rental data for October 2022 to October 2023 indicates this ward as the fifth most expensive for renting a 3-bedroom home. Together these help to indicate that delivering new homes on this site would facilitate delivery in a sustainable location that would meet the community's needs.</p>

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
SA10	<ul style="list-style-type: none"> <li>Support and enhance the more deprived areas of the district?</li> </ul>	N	<p>The site is situated within the Godmanchester and Hemingford Abbots ward. Analysis of deprivation by Cambridgeshire County Council gives this a local index of deprivation score of 10 (where 1 is most deprived and 10 is least deprived). This indicates that the area experiences little deprivation so although development has potential to assist through provision of additional employment, education, skills and training and reducing barriers of housing and services these are not a priority in the local area.</p> <p>Social and community facilities would be expected to be included on site as part of the development. However, the site is within 5 kms of Huntingdon town centre and 7 kms of St Ives town centre when measured by road from the central point of the frontage onto the A1307 and slightly closer to St Ives town centre by active travel routes offering potential to enhance usage of services and facilities in these town centres. There are no publicly accessible local scale leisure or cultural facilities within 800m of any part of the site boundary.</p>
	<ul style="list-style-type: none"> <li>Maximise opportunities for access to existing or proposed social and community facilities and services?</li> </ul>	++	
SA11	<ul style="list-style-type: none"> <li>Contribute to regeneration activities?</li> </ul>	++	<p>The site would not contribute to regeneration activities being wholly greenfield land.</p> <p>The site promoter proposes inclusion of a 6 ha employment area within the site along with community spaces supporting co-working. As with all major scale strategic sites development would also contribute to economic opportunities in the district through construction and associated trades for the duration of its delivery. there is no indication of the nature of employment proposed other than that it aims to contribute to a balanced and resilient economy.</p>
	<ul style="list-style-type: none"> <li>Enhance and diversify economic opportunities with the district?</li> </ul>	+

SA12	<ul style="list-style-type: none"> <li>Support development in locations with good active travel and public transport links and services or provide opportunities for significant improvements?</li> </ul>	+	Several public rights of way skirt the site but currently offer limited practical linkages. Public transport services currently use the A1198 connecting Huntingdon to Cambourne and onto Cambridge and opportunities could be taken to divert and enhance these services. The site promoter's vision document places a strong emphasis on public transport and promotes a sustainable travel corridor along the A1307 although engagement would be needed with Cambridgeshire County council to demonstrate the feasibility of this.
SA13	<ul style="list-style-type: none"> <li>Attract new investment and provide opportunities to improve the resilience of the local economy?</li> </ul>	+	The site promoter proposes inclusion of a 6 ha employment area within the site along with community spaces supporting co-working. A strong emphasis is also placed on supporting home working. The scale of employment land would have potential to support retention and growth of indigenous companies. Sustainable tourism opportunities are unlikely.
	<ul style="list-style-type: none"> <li>Contribute to a balanced portfolio of employment land in sustainable locations throughout the district?</li> </ul>		
	<ul style="list-style-type: none"> <li>Support retention and growth of indigenous companies?</li> </ul>		
	<ul style="list-style-type: none"> <li>Encourage sustainable tourism?</li> </ul>		
SA14	<ul style="list-style-type: none"> <li>Facilitate modernisation of existing town centres to meet current and anticipated needs?</li> </ul>	+	The site would be expected to include local scale shopping facilities to help future occupants meet day to day needs using active travel. It is in relatively close proximity to the existing town centres of both Huntingdon (5kms) and St Ives (7kms). The additional demand generated from and expenditure capacity of the site's future occupants has potential to assist in facilitating some modernisation of the existing town centres.

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
SA15	<ul style="list-style-type: none"> <li>Strengthen a local sense of place?</li> </ul>	N	<p>The land currently has a largely agricultural character with its sense of place being that of the open countryside situated between key elements of the highway network. Development would alter the local character of the site and any scheme would need to create a wholly new sense of place.</p> <p>Development would be visible in long distance views from parts of the Hemingfords; the design and layout of any scheme would need to balance impact on these with facilitating long distance views that help to connect it to the surrounding area.</p>
	<ul style="list-style-type: none"> <li>Retain the character of existing settlements?</li> </ul>		
SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	+	<p>There is only one listed property within the site which directly faces onto the A1307 which impacts on its setting. Given the frequency of archaeological finds in the wider area related to Roman roads in particular there is potential for additional archaeological discoveries which could enhance understanding of the area's historic value.</p>

**Summary of SA**

The site is predominantly greenfield agricultural land at minimal risk of flooding. It has a distinctive landform typical of the character of the area with a central ridge of higher land influencing the character of the site and its relationship with the wider area. The proposed scheme is promoted with strong environmental credentials targeted at minimising the impact on climate change of any development scheme and promoting its resilience to unavoidable impacts. It is located with reasonable proximity to both Huntingdon and St Ives in an area of relatively strong market demand and low deprivation. The proposed mix of uses would contribute to provision of social and community facilities as well as housing. Employment provision, including that for home and co-working, is also included to reduce the need to travel. Strong active and public transport proposals are also promoted although their feasibility will need further exploration. Development would have some impact on landscape character but the site is bounded on three sides by existing highways which provide a degree of separation from the wider landscape at least at the local level. Any schemes would need to incorporate longer distance views into the layout to assist with integration into the surrounding area. The site has potential to link into the Ouse Valley green infrastructure priority area and promote additional habitat connectivity.

## Summary of SA

This is a previously developed site located within Huntingdon. It was formerly used for community and educational uses but the site promoter is now exploring other options for the site. There is some surface water flood risk. It is not constrained by nature conservation or heritage designations. It has very good connectivity to local services, facilities, shops, primary education and employment opportunities. It is within walking distance to Huntingdon town centre and is within 300m of bus stops served by the Guided Bus. Redevelopment would have to be carefully masterplanned and engagement with the local community to ensure successful integration and an appropriate design and density for the site.

SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	++	The site is within 850m of Huntingdon town centre.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	+	The site is approximately 1.2km from the Cromwell Park Primary School.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	N	Huntingdon has numerous leisure and cultural facilities but the site is just beyond 800m of many of these except for the existing playing fields on the site and the Sandford Public House. It is proposed to provide alternative playing facilities within the development.
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	++	The site is within 750m from Hinchingsbrooke Secondary School and is within 850m of Huntingdon town centre. It is also within 3km of St Peter's Road Industrial Area, Stukeley Meadows Industrial Estate and Hinchingsbrooke and Ermine Business Park.  Ultrafast broadband is available within the vicinity.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	++	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	The site is within 650m of Huntingdon train station. The site is within 800m of several bus stops, the closest is a bus stop along Brampton Road adjacent to the site rated D on the Place-based Carbon Calculator. The highest rated bus stop is rated B meaning there is a frequent service. This stop is served by the Guided Busway connecting Huntingdon to St Ives and Cambridge.  There is a pavement to the east of the site which connects through Scholars Avenue.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> </ul>	N	The proposal is for residential development.

## 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
	<ul style="list-style-type: none"> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>		
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail facilities but proposes to relocate the existing playing fields towards the south of the site and redeveloping the existing playing fields for housing.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The proposal could be integrated into the existing place and community, however, vehicular access to the site is a challenge as there is currently only a footpath connecting the site form Scholars Avenue. Additionally, the relocated playing fields are proposed to be placed within the southern part of the site where there is a higher risk of flood risk which means they not be useable at all times.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is located within a conservation area. Also, to the north west is the grade I listed Hinchingsbrooke House. The site's relationship to Hinchingsbrooke House and the setting which it forms is a key development constraint as it is prominent in longer distance views including those from the railway which is accentuated by the land sloping away to the south.

**Summary of SA**

The site currently greenfield with playing fields. It is located adjoining existing residential development at Scholars Avenue located on the southern edge of Huntingdon along Brampton Road. There is risk from fluvial flooding particularly in the southern part of the site. It is in close proximity to nature conservation and heritage designations including Portholme Meadow and Hinchingsbrooke House. The site forms an important part of the setting of Hinchingsbrooke House and is prominent in longer distance views. It has very good connectivity to local services, facilities, shops, primary education and employment opportunities. It is within walking distance to Huntingdon town centre and is within 800m of bus stops served by the Guided Bus.

	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> </ul>	N	The proposal does not include employment, commercial or tourism uses.

# 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
	<ul style="list-style-type: none"> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>		
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is wholly greenfield land and offers no opportunities to contribute to regeneration. The site has the opportunity through masterplanning to be integrated with residential development to the west however there may be issues relating to safety of pedestrians from the proposed development and those using New Road for active travel opportunities due to a lack of footpaths, the narrowness of the road and its setting within the wider countryside.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets within the site and the listed buildings to the west in Offord Cluny will unlikely be impacted by the development. However, there is a conservation area approximately 100m north west of the site which could be impacted by the development.

## Summary of SA

The site is constrained by fluvial flood risk on 5% of the site, the greatest restriction is surface water flood risk which affects the southern half of the site. The site is grade 2 agricultural best and most versatile land, is wholly greenfield and in use as an equestrian paddock.

The site is beyond 5km of a town centre, however it is within 800m of a local convenience store, a primary school, village hall, pub, church and recreation ground meaning local services and facilities would be accessible to future residents. The site is distant from large scale concentrations of employment but is within 1.5km of Greenwable Park in Offord Cluny which presents small scale employment opportunities. Public transport options are limited at best. Some of the site has access to natural green space. Landscape impact would be minimal and no heritage designations are affected.

The site is of a size that could contribute to the housing needs of the district. Its relationship with the countryside and the nearby conservation area could pose challenges to the comprehensive integration of the site with the village and nearby residential development.

# 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
	<ul style="list-style-type: none"> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>		
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site sits immediately south of residential development and has the opportunity through masterplanning to be integrated with the residential development to the north through the provision of extended pavements ensuring safety of pedestrians. The site has little relationship to the countryside to the south as it is substantially screened with trees and hedgerow. The design, layout of the site and elevations would require consideration of chalet bungalows to the north to avoid overbearing. The transport impacts on the village due to increased population would require assessment to ensure safety.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within the site. The listed buildings north of the site are separated by an existing built up area and therefore it is unlikely the development would negatively impact their setting.

## Summary of SA

The site is not constrained by fluvial flood risk and minimal surface water flood risk is present on site. Approximately half of the site to the west is grade 3 agricultural land with the remaining land grade 2. The site is wholly greenfield agricultural land.

The site is beyond 5km of a town centre, access to a local convenience store is within 1.1km and a primary school 1km, the site is within 800m of a pub, church and recreation ground meaning some local services and facilities would be accessible to future residents. The site is distant from large scale concentrations of employment but is within 1.5km of Greenwable Park in Offord Cluny which presents small scale employment opportunities. Public transport options are limited at best. The site adjoins to Natural Cambridgeshire's Green Infrastructure Priority Area and has some capacity to contribute to improvements in habitat connectivity. Landscape impact would be minimal and no heritage designations are affected.

The site is of a size that could contribute to the housing needs of the district. The site has the opportunity through masterplanning to be integrated with the residential development to the north through the provision of extended pavements ensuring safety of pedestrians. The site has little relationship to the countryside to the south as it is substantially screened with trees and hedgerow. The design, layout of the site and elevations would require consideration of chalet bungalows to the north to avoid overbearing.

#### Updates after initial appraisal

#### Offord Cluny and Offord D'Arcy 3: Land adjacent to Manor Court, Offord Cluny

**1.26** As identified in the LAA the site is not suitable for development due to its impact on the setting of a Grade II heritage asset, the removal of established trees and establishment of residential properties would fundamentally impact the character and setting of the listed building and the conservation area, whilst also significantly reducing the biodiversity and ecological value of the site. As such a sustainability appraisal of the site has not been undertaken.

#### Offord Cluny and Offord D'Arcy 4: Field opposite The Glebe, New Road, Offord Cluny

	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	++	The site promoter proposes approximately 16,000sqm of employment land on the site which could support small scale employment opportunities/ office accommodation.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	Development of the site provides the opportunity to enhance the setting of this area if development were sensitively designed. However there are significant challenges to effectively masterplanning the site so that it can be effectively integrated with the existing community. Challenges include access, which if taken from Station Lane to the south of the site would mean traffic immediately exiting in extreme proximity to a railway crossing, causing potential for significant safety issues. Mitigation from noise, air, light and vibrational impact from the railway line may also limit the scale and layout of development, as would the unusual size and shape of the site.

# 1 Central Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets within the site. However, the site adjoins to a conservation area and there are several listed buildings to the east which could be impacted by the development.

## Summary of SA

There is significant fluvial and surface water flood risk on the site which will be exacerbated by the impact of climate change. Although the site is classified as part grade 3 and 4 agricultural it is part previously developed land and part greenfield land with historic use as a railway sidings meaning it presents an opportunity for regeneration. The site has little value in relation to the form and character of the local area and relates well to existing development.

The site is beyond 5km of a town centre, however it is within 800m of a local convenience store, a primary school, village hall, pub, church and recreation ground meaning local services and facilities would be accessible to future residents. The site is distant from large scale concentrations of employment but is opposite Greenewable park and proposes employment land providing employment opportunities. Public transport options are limited at best. The site is remote from the designated nature assets, but close to natural green space. It has limited capacity for linkages to the existing green or blue infrastructure network.

The site is less than 1 hectare and as such could contribute to the government's aspiration to promote sites suitable for SME builders. five to six homes are proposed.

The site proposal provides the opportunity to enhance the setting of this area if development were sensitively designed. However there are significant challenges to effectively masterplanning the site, challenges include access, safety, proximity to a railway crossing, mitigation from noise, air, light and vibrational impact from the railway line and contamination. At this time it is unclear whether flood risk could be mitigated.

1 Central Huntingdonshire

Page 2898 of 3488

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site's location within the gateway to the village and the presence of residential development to the south and east imply that there is opportunity for the site to be effectively masterplanned to become part of the existing place and community. The transport impacts on the village due to increased population would require assessment to ensure safety.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets within the site. However, the site adjoins to a conservation area and there are several listed buildings along the High Street to the south which could be impacted by the development.

**Summary of SA**

The site is not constrained by fluvial flood risk and minimal surface water flood risk is present on site. The site is wholly grade 3 agricultural land.

The site is beyond 5km of a town centre, however it is within 800m of a local convenience store, a primary school, village hall and church meaning some local services and facilities would be accessible to future residents. The site is distant from large scale concentrations of employment but is within 1.5km of Greenwable Park in Offord Cluny which presents small scale employment opportunities. Public transport options are limited at best.

The site is remote from any natural green space according to the Natural England 'Access to Green Space Standards and has no capacity for linkages to the existing green or blue infrastructure network. The site has a strong relationship to the countryside, but also a close relationship with the residential element of the village. The site is of a size that could contribute to the housing needs of the district.

The site would require careful masterplanning to integrate development with the existing village and avoid detrimental impact to the setting of the conservation area and nearby listed buildings. Low density development would be required to compliment the character of the village. The transport impacts on the village due to increased population would require assessment to ensure safety and strategic landscaping would be required to transition to the open countryside. Impacts on residents as a result of the railway line would require mitigation.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site can be effectively masterplanned so that development can be integrated into the existing place and community. This will require effective landscaping, sustainable drainage and sensitive design reflecting its proximity to heritage assets. In depth development up to the southern boundary of the site would not be characteristic so to ensure greater integration a frontage development along Rectory Road or close type development within the northern half of the site could be pursued.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is adjacent to a conservation area and the grade II* Bluntisham House.

#### Summary of SA

This site is greenfield and classified as grade 3 agricultural land. It is within flood zone 1 and constrained by some surface water flood risk. There are no nature conservation designations nearby to the site but it is located within the Great Ouse Valley Green Infrastructure Priority Area. The site is adjacent to a conservation area and the grade II\* Bluntisham House. The site is well served in terms of access to local services and facilities, primary education and employment opportunities within Earith and St Ives. It is also served by public transport.

#### Summary of SA

This site is greenfield and classified as grade 2 agricultural land. It is within flood zone 1 and constrained by some surface water flood risk. There are no nature conservation designations or heritage assets within the site's immediate vicinity. Development may require assessment on recreational impact on nearby SSSI. The site is well served in terms of access to local services and facilities, primary education and employment opportunities within Earith and St Ives. It is also served by public transport. The site relates very well to the existing settlement being located on its northern edge with direct links to Colne Road.

	<ul style="list-style-type: none"> <li>Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	-	<p>The site is located outside of the Great Ouse Valley Green Infrastructure Priority Area so it has limited capacity for linkages to the strategic green infrastructure network.</p>
SA7	<ul style="list-style-type: none"> <li>Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	--	<p>The site consists of two parcels of land, one north of Wood End and the other south of Wood End to the west of Bluntisham. The site is located to the west of the main built form of Bluntisham so does not relate well to the existing settlement and a pavement doesn't extend this far along Bluntisham Heath Road/ Wood End so access to existing services and facilities is more challenging. The site therefore relates more closely to the countryside and is located in a very sensitive location. The northern parcel of the site consists of orchard land which is becoming increasingly rare across the district. Orchard land in this part of the district is a key characteristic of its landscape character. As such, its development would further erode this landscape character.</p> <p>The proposed capacity is for 100 homes across above parcels, the site promoter has not provided a more detailed breakdown on how many homes could be provided on each parcel. Development would have significant impacts on the landscape and townscape character of Bluntisham.</p>

			There is no pavement along the site's frontage along Bluntisham Heath Road/Wood End, it is within 150m from a footpath along Wood End.
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located to the west of the main built form of Bluntisham and so therefore would be less successful in being fully integrated and part of the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no designated heritage assets on site but the south eastern corner of the northern parcel of the site is adjacent to a grade II listed building.

### Summary of SA

This site is greenfield and consists of land classified as grade 2 agricultural land. It is within flood zone 1 with minimal surface water flood risk. There are no nature conservation or heritage designations on site but it is within 200m of the Heath Fruit Farm CWS and within the setting of a grade II listed building. The site is somewhat remote from local services and facilities and primary education within Bluntisham and also from employment opportunities within Earith and St Ives. It is remote from natural greenspace. The site consists of two parcels of land, one north of Bluntisham Heath Road/ Wood End and the other south of it. The northern parcel consists of orchard land. The site is located to the west of the main built form of Bluntisham means it relates more closely to the countryside and development would likely resulting significant landscape impacts and detrimentally harm the character of the settlement.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within the site or in the immediate vicinity of the site.

#### Summary of SA

The site is located towards the southern end of Colne. It consists of orchard land, an increasingly scarce resource across the district. The site is therefore wholly greenfield and is wholly classified as grade 2 agricultural land. It is remote from natural greenspace. The site is constrained by surface water flooding but not fluvial flood risk. It is not constrained by heritage designations but is located within 2km of the Ouse Washes Ramsar/SPA/SAC site. It has a good level of public transport provision and reasonable accessibility to nearby employment locations and services within Colne. The nearest primary school is located in the neighbouring village of Earith.

Additionally it would need to retain existing hedgerows to minimise landscape impact and retain the contained nature of the existing paddock land.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within the site or in the immediate vicinity of the site

#### Summary of SA

The site is located to the south east of the centre of Colne. It consists of a mix of greenfield and previously developed land with an existing dwelling, 'Ramadie' on site as well as various agricultural structures. The site is wholly classified as grade 2 agricultural land. It is remote from natural greenspace. The site is not constrained by flooding or by heritage designations but is located within 2km of the Ouse Washes Ramsar/SPA/SAC site. It has a good level of public transport provision and reasonable accessibility to nearby employment locations and services within Colne. The nearest primary school is located in the neighbouring village of Earith. The potential for in depth development on site is less characteristic and its location on the edge of Colne will require sensitive design and landscaping.

Additionally sensitive design will be required to reduce any amenity impacts on neighbouring properties, particularly any single storey dwellings.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within or nearby to the site.

#### Summary of SA

The site is located on the eastern edge of Colne. It consists of greenfield land classified as grade 2 agricultural land but it does contain a large agricultural structure on site. It is remote from natural greenspace. The site is constrained by surface water flooding but not fluvial flood risk. It is not constrained by heritage designations but it is located within 2km of the Ouse Washes Ramsar/SPA/SAC site. It has a good level of public transport provision and reasonable accessibility to nearby employment locations and services within Colne. The nearest primary school is located in the neighbouring village of Earith. The site is in a sensitive location with the open countryside to the east and north but existing established vegetated boundaries form a natural buffer which could be reinforced in a future development. It would provide in depth development which is less characteristic of the area so sensitive design will also be required to minimise the amenity impacts of development on the adjoining single storey properties.

#### Updates after initial appraisal

# 1 Eastern Huntingdonshire

## Colne 4: Land at Cranbrook Plants, Colne Road, Somersham, (Colne)

- 1.3 As identified in the LAA, the site is within 400m of a water recycling area. Residential uses are the most vulnerable to odours and no odour assessment has been submitted to justify this development and demonstrate that the impact could be adequately mitigated to ensure acceptable levels of residential amenity.
- 1.4 Therefore, a sustainability appraisal for the site has not been undertaken.

## Colne 5: Land at Colne Road, Somersham, (Colne)

- 1.5 As identified in the LAA, the site is wholly classified as grade 1 agricultural land. Grade 1 agricultural land is the highest quality of agricultural land, its loss is heavily resisted in the NPPF.
- 1.6 Therefore, a sustainability appraisal for the site has not been undertaken.

## Colne 6: Land West of the B1050, Earith Road, Colne

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is remote from Colne and Earith villages and is undergoing restoration following its previous use as a gravel extraction site. As such as the site and its associated leisure uses will relate much more closely to the countryside than to either settlement, therefore integration with them is not necessary, however the leisure uses could provide a complimentary development that could assist in the longer term management and enjoyment of the site.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within the site or in the immediate vicinity of the site.

#### Summary of SA

The site is detached from a settlement and relates much more closely to the open countryside than either Somersham or Colne. It is remote from public or active travel. It consists of a former gravel extraction and quarrying works which has been undergoing conservation and restoration for several years with works to complete in 5 years. The site is also used for fishing. The site promoter's longer term ambition for the site is to provide some additional commercial leisure uses consisting of holiday lodges, associated water related leisure uses and biodiversity net gain. The impact of intensifying the leisure uses on site would need detailed assessment particularly in terms of its potential impact on the Earith Gravel Pits CWS and the Ouse Washes Ramsar/SPA/SAC.

## Summary of SA

The site is located on the northern edge of Earith and relates well to the existing settlement, it is currently used as an equestrian centre so its redevelopment would utilise land that is partially previously developed. It is not constrained by fluvial flooding but does have surface water flood risk. It is located in a sensitive location on the northern edge of the settlement with the countryside on two sides. It is located within the Great Ouse Valley Green Infrastructure Priority Area and nearby to several nature conservation sites including the Ouse Washes. It is not constrained by heritage assets. It is in good proximity to several services and facilities such as a primary school, shop, public house, bus stops and employment opportunities.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			25ha, this makes a more efficient use of land keeping development out of at risk areas from flooding. The site is broadly flat but is bounded by the strategic road network on its western and southern edges, also considering that development would be concentrated on the southern half of the site closest to the road network, the landscape impact is somewhat mitigated but it is inevitable that development at this scale would result in a continuing change to the landscape character of the area in line with that which has been underway with the development of the Lakes Business Park to the south. The area of land north of the proposed built development can be used to provide landscaping as well as flood mitigation to help address this.
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	-	The site is bounded on its southern boundary by the A1307 increasing the likelihood of noise, light and visual pollution. ## 1 Eastern Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is narrow and the presence of extensive TPO protected trees, the A1307 and gas mains, means it is highly constrained in design terms meaning it will be incredibly challenging to deliver a high quality living environment for any future residents. This is likely to result in a linear form of development which would be functionally very detached from the rest of the village.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	There are no designated heritage assets on site or nearby.

**Summary of SA**

The site is equally grade 2 and grade 3 agricultural land located at a junction between Cambridge Road and Huntingdon Road on the approach to the A1307 flyover. It is constrained by some surface water flood risk, TPO protected trees and potentially greater levels of noise, light and visual pollution arising from its proximity to the A1307. It is not constrained by nature conservation or heritage designations. The site has good access to local services and facilities, primary education and employment opportunities. It is however functionally detached from the settlement in terms of pedestrian accessibility and its development would give rise to design challenges.

## Hemingford Grey

**1.10** A total of 13 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

- Hemingford Grey 1: Mill Lane Field, Hemingford Grey
- Hemingford Grey 2: Land West of Cullum Farm, London Road, Hemingford Grey
- Hemingford Grey 3: Land South of Marsh Lane and East of Long Lane, Hemingford Grey
- Hemingford Grey 4: Land North of Marsh Lane and East of Dendys, Hemingford Grey
- Hemingford Grey 5: Land off Gore Tree Road, Hemingford Grey
- Hemingford Grey 6: Land East of Daintree Way, Hemingford Grey
- Hemingford Grey 7: Land West of Cullum Farm and Yes! Estate, London Road, Hemingford Grey
- Hemingford Grey 8: Garden at 1 Hemingford Road, St Ives (Hemingford Grey)
- Hemingford Grey 9: Land South of Hemingford road, Hemingford Grey
- Hemingford Grey 10: Dockesy's Farm, North of St Ives Road, Hemingford Grey
- Hemingford Grey 11: Hemingford Grey Lake, South of Marsh Lane, Hemingford Grey
- Hemingford Grey 12: Land North of Hemingford Road, Hemingford Grey
- Hemingford Grey 13: Land West of London Road, Hemingford Grey

### Hemingford Grey 1: Mill Lane Field, Hemingford Grey

1.11 Note: This site has been submitted twice for differing uses:

- CfS:29 for open space uses (natural, green or open space uses, and biodiversity net gain opportunities) and land for a cemetery. This was submitted by Hemingford Grey Parish Council.
- CfS:336 for residential development by Cambridgeshire County Council (the landowners).

1.12 As set out in the LAA, the residential uses submitted under CfS:336 are unsuitable due to the substantial risk of flooding on the site, this submission is therefore not appraised below. Additionally, the potential cemetery use submitted under CfS:29 is also considered unsuitable due to the risk of flooding. Therefore, only the potential open space and biodiversity net gain uses are appraised below as these are potentially suitable.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it can be effectively masterplanned to become part of the existing place and community. The proposed open space uses and biodiversity net gain opportunities would compliment the neighbouring residential uses and primary school.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	The site is wholly located within a conservation area and there there is a grade II listed building (Oak Cottage) abutting the southwestern edge of the site. The proposed open space uses and biodiversity net gain opportunities would not deliver built development so impact on these designated heritage assets is minimal.

## Summary of SA

The site is heavily constrained by fluvial flood risk meaning the potential land uses for the site are limited. Built development is not suitable but open space uses and biodiversity net gain could be brought forward. This would compliment the neighbouring land uses and could be successfully integrated into the existing place and community as well as provide opportunities to reinforce the character of the area and the Great Ouse Valley Green Infrastructure Priority Area. The site is poorly served by public transport options but is accessible via walking and cycling with a footpath along the site's frontage along St Ives Road.

## Updates after initial appraisal

--

**Hemingford Grey 2: Land West of Cullum Farm, London Road, Hemingford Grey**

- 1.13 As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.14 Therefore, a sustainability appraisal for the site has not been undertaken.

**Hemingford Grey 3: Land South of Marsh Lane and East of Long Lane, Hemingford Grey**

- 1.15 As identified in the LAA, the majority of the site is within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.16 Therefore, a sustainability appraisal for the site has not been undertaken.

**Hemingford Grey 4: Land North of Marsh Lane and East of Dendys, Hemingford Grey**

- 1.17 As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.18 Therefore, a sustainability appraisal for the site has not been undertaken.

**Hemingford Grey 5: Land off Gore Tree Road, Hemingford Grey**

- 1.19 As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.20 Therefore, a sustainability appraisal for the site has not been undertaken.

**Hemingford Grey 6: Land East of Daintree Way, Hemingford Grey**

- 1.21 Note: This site has been submitted twice for differing uses:

# 1 Eastern Huntingdonshire

- CfS:105 for residential development by an agent working on behalf of the landowner
- CfS:170 for infrastructure (transport/parking), open space uses (natural, green or open space, and biodiversity net gain opportunities) and a cemetery by Hemingford Grey Parish Council.

**1.22** As set out in the LAA, the residential uses submitted under CfS:105 are unsuitable due to the substantial risk of flooding on the site, this submission is therefore not appraised below. Additionally, the potential cemetery and parking uses submitted under CfS:170 is also considered unsuitable due to the risk of flooding. Therefore, only the potential open space and biodiversity net gain uses are appraised below as these are potentially suitable.

#### Updates after initial appraisal

--

# 1 Eastern Huntingdonshire

## Hemingford Grey 7: Land West of Cullum Farm and Yes! Estate, London Road, St Ives (Hemingford Grey)

- 1.23** As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.24** Therefore, a sustainability appraisal for the site has not been undertaken.

## Hemingford Grey 8: Garden at 71 Hemingford Road, St Ives (Hemingford Grey)

- 1.25** As identified in the LAA, the site is below the minimum site size threshold of 0.25ha being only 0.13ha. Therefore, the site cannot accommodate the minimum 5 homes required in order to be assessed through the LAA and be considered for potential allocation in the Local Plan.
- 1.26** Therefore, a sustainability appraisal for the site has not been undertaken.

## Hemingford Grey 9: Land South of Hemingford Road, Hemingford Grey

- 1.27** As identified in the LAA, the site is almost completely located wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.28** Therefore, a sustainability appraisal for the site has not been undertaken.

## Hemingford Grey 10: Dockesy's Farm, North of St Ives Road, Hemingford Grey

# 1 Eastern Huntingdonshire

## Summary of SA

The site is located within flood zone 3a but it is proposed to deliver moorings on the site which is water compatible development. The site is not constrained by heritage designations but it is wholly located within the Marsh Lane Gravel Pits CWS. The proposed capacity would likely result in significant impacts on the CWS which will require further investigation. The site is located on the south eastern edge of Hemingford Grey. The site is poorly served by public transport options but is accessible via walking and cycling with a footpath accessible from the site's access. It is within good accessibility to local village services and facilities as well as employment options and to a town centre.

## Updates after initial appraisal

### Hemingford Grey 12: Land North of Hemingford Road, Hemingford Grey

- 1.29** As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.30** Therefore, a sustainability appraisal for the site has not been undertaken.

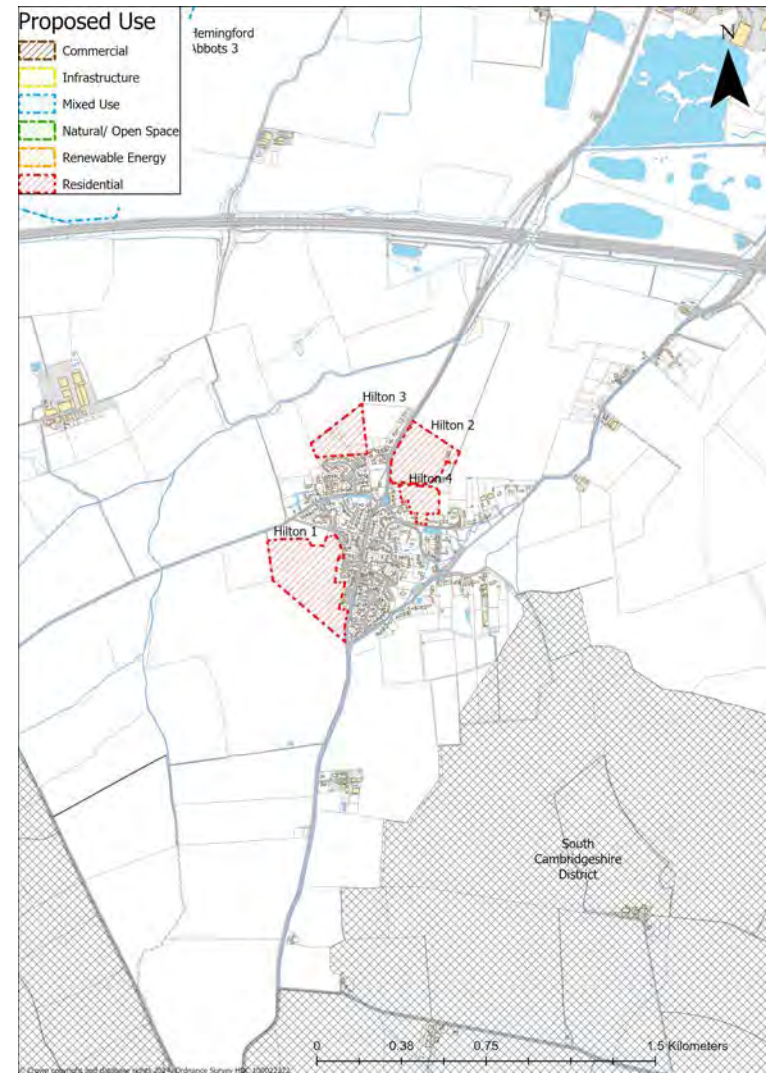

### Hemingford Grey 13: Land West of London Road, Hemingford Grey

- 1.31** As identified in the LAA, the site is wholly within flood zone 3a. The site promoter has put the site forward for residential uses which are classes as being more vulnerable in the NPPF. Considering the very high flooding risk within the site and none of it being located within a lower at risk zone, the site is considered unsuitable for development.
- 1.32** Therefore, a sustainability appraisal for the site has not been undertaken.

## Hilton

1.33 A total of 4 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

- Hilton 1: Land West of Potton Road, Hilton
- Hilton 2: Land East of The Paddocks, Hilton
- Hilton 3: Land North of New England, Hilton
- Hilton 4: Land North of High Street, Hilton

# 1 Eastern Huntingdonshire

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is not constrained by fluvial flood risk, nature conservation designation or by heritage assets but is located within the Great Ouse Valley Green Infrastructure Priority Area. It is somewhat constrained by surface water flood risk. The site is well served in terms of access to community services and facilities, primary education, public transport via bus travel and employment opportunities. The site is located on the northern edge of the settlement between Bluntisham Road and the A1123 as such development has the potential to be masterplanned so that it integrates with the existing place and community but this would be subject to design considerations incorporating sustainable drainage and mitigation against noise from the A1123. It will also require assessment on access provision and traffic levels arising from the proposed retail element of the scheme.

## Updates after initial appraisal

--

**Holywell-cum-Needingworth 2: Land East of Bluntisham Road (northern part), Needingworth**

- 1.37** As identified in the LAA, the site is within 250m of a mineral development area and the eastern edge of the site falls within the mineral development area itself. No detailed assessment has been submitted alongside the call for sites submission to assess the impact of residential development on the MDA.
- 1.38** Therefore, a sustainability appraisal for the site has not been undertaken.

**Holywell-cum-Needingworth 3: Land East of Bluntisham Road (larger site), Needingworth**

- 1.39** As identified in the LAA, the site is within 250m of a mineral development area and the eastern edge of the site falls within the mineral development area itself. No detailed assessment has been submitted alongside the call for sites submission to assess the impact of residential development on the MDA. Also the southern half of the site is also within 400m of a water recycling area. Residential uses are the most vulnerable to odours and no odour assessment has been submitted apart from a short statement in the supporting statement to justify this development and demonstrate that the impact could be adequately mitigated to ensure acceptable levels of residential amenity.
- 1.40** Therefore, a sustainability appraisal for the site has not been undertaken.

**Holywell-cum-Needingworth 4: Land West of Needingworth**

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

### Summary of SA

The western half of the site is heavily constrained by fluvial flood risk with the majority being within flood zone 3b. It is not constrained by nature conservation designation or by heritage assets but is located within the Great Ouse Valley Green Infrastructure Priority Area. The site is well served in terms of access to community services and facilities, primary education, public transport via bus travel and employment opportunities. The site is located to the west of Needingworth extending into the countryside, it is considered that development of the site would not protect or reinforce the existing settlement character in terms of its location but also scale and could not be effectively masterplanned to integrate with the existing place and community.

### Updates after initial appraisal

#### Holywell-cum-Needingworth 5: Lodel Farm, Overcote Road, Needingworth

- 1.41** As identified in the LAA, the site is within 400m of a water recycling area. Residential uses are the most vulnerable to odours and no odour assessment has been submitted apart from a short statement in the supporting statement to justify this development and demonstrate that the impact could be adequately mitigated to ensure acceptable levels of residential amenity.
- 1.42** Therefore, a sustainability appraisal for the site has not been undertaken.

#### Holywell-cum-Needingworth 6: Burgess & Walker, South of entrance to Needingworth Industrial Estate, St Ives (Needingworth)

- 1.43** As identified in the LAA, approximately two thirds of the site is within flood zone 3b with the remaining third of the site being in flood zones 3a and 2. There is also a substantial risk from surface water flood risk. It is proposed for lorry parking which falls under a less vulnerable use in the NPPF but the impact of hardstanding could have significant knock on flooding impacts.
- 1.44** Therefore, a sustainability appraisal for the site has not been undertaken.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located on the eastern edge of St Ives adjacent to existing established employment development. Subject to detailed masterplanning and an assessment of the access and transport capacity to accommodate development, the site could be designed so that it effectively integrated with the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	There are no designated heritage assets on site or within the immediate vicinity. However the submitted Heritage Desk-Based Assessment concludes that the site is known to contain the remains of a Roman settlement in its south eastern corner.

## Summary of SA

The site could provide a strategic scale extension to the town of St Ives. It is located on the eastern edge of St Ives adjacent to existing established employment areas. It has good access to services and facilities within the town but is of a scale to also provide additional services and facilities such as small scale retail, employment and health uses as well as a primary school. It has good connectivity to public transport options including the guided busway to Cambridge. It is not constrained by nature conservation designations or by heritage assets but it is located within the Great Ouse Valley Green Infrastructure Priority Area. The site is constrained by both fluvial and surface water flood risk.

## Updates after initial appraisal

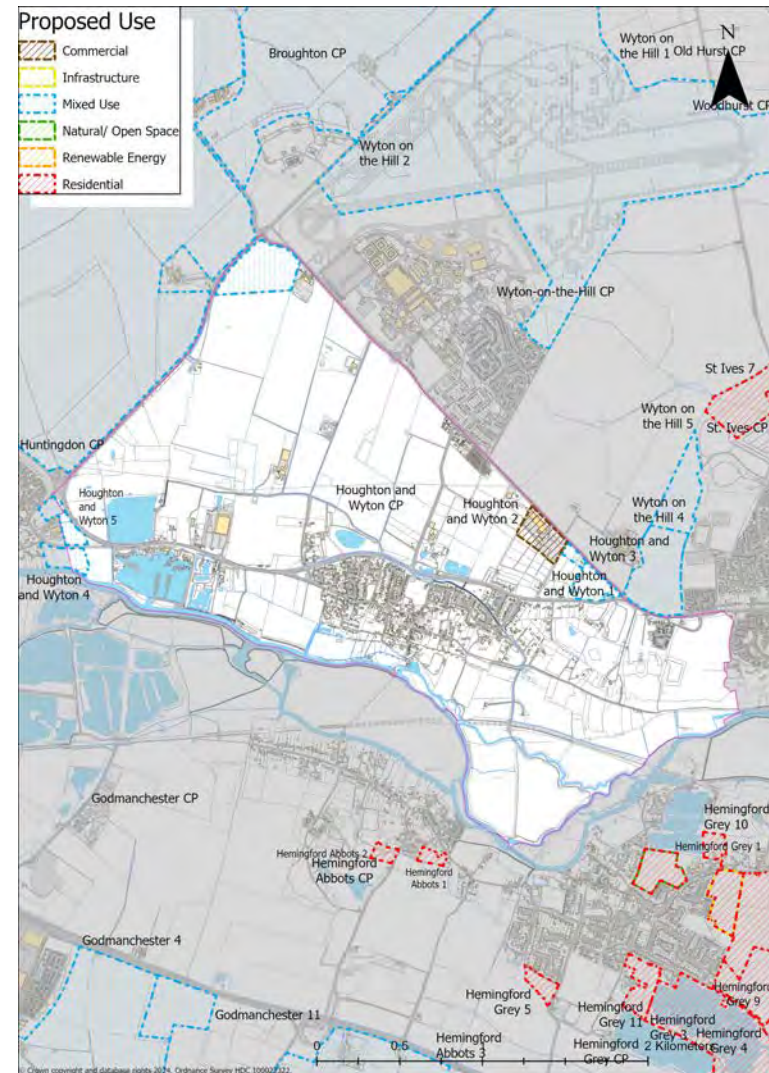

--

## Houghton and Wyton

1.45 A total of 4 sites have been identified/ put forward through the desktop review or Call for Sites process. These are:

- Houghton and Wyton 1: tir na Nog, Sawtry Way, Houghton
- Houghton and Wyton 2: Land at New Manor Farm, Sawtry Way, Wyton
- Houghton and Wyton 3: Land between Houghton Hill Road and Sawtry Way, Sawtry
- Houghton and Wyton 4: Land off Old Houghton Road, Hartford, Huntingdon (Houghton and Wyton) - this site also partially falls within Huntingdon parish. As the majority of the site falls within Houghton and Wyton parish, the site has been assessed here instead. A link to the site can also be found within the Huntingdon section of the Central Huntingdonshire LAA document.
- Houghton and Wyton 5: Land North of 6 Old Houghton Road, Hartford, Huntingdon (Houghton and Wyton) - this site also partially falls within Huntingdon parish. As the majority of the site falls within Houghton and Wyton parish, the site has been assessed here instead. A link to the site can also be found within the Huntingdon section of the Central Huntingdonshire LAA document.

# 1 Eastern Huntingdonshire

## Summary of SA

The site is in current mixed commercial and residential use which the site promoter seeks to diversify with a mix of employment, residential and renewable energy uses. The site is not constrained by fluvial flood risk, heritage or nature conservation designations. There is some surface water flood risk. The site is well served by public transport being located within 3km of Huntingdon train station and to a bus stop served by the Guided Busway to Cambridge via St Ives. It is also nearby to other employment locations. It is beyond 800m of services and facilities within Houghton and Wyton but is connected via existing footpaths. It is intended to deliver retirement pitches on the site, considering this and the site's location, it may not be as accessible or sustainable or accessible for future residents.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no heritage designations on site either but the site adjoins a conservation area on its western edge.

## Summary of SA

The site is constrained very highly by fluvial flood risk making it unsuitable for built development but potentially a suitable location for flood mitigation and mooring development. The site is constrained by nature conservation designations and also by heritage assets being located adjacent to a conservation area. The site has good accessibility to services within Huntingdon, primary education, public transport and employment opportunities. It is sustainably located for water based tourism related uses. The scale of mooring development would be dependent on engagement with relevant environmental and water management bodies to determine the scale of mooring development that could be accommodated sustainably and have minimal landscape impact on the Great Ouse Valley.

			There is a pavement along some of the site's frontage along Meadow Lane. There is also a pavement that runs along the site's western edge along Harrison Way.
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located on the eastern edge of St Ives, it is physically well related to the town but it is separated from it via the A1123 which makes integration and accessibility to services more challenging. Considering the proposed use of the site for specialists housing having services and facilities within accessible distance via safe routes is even more critical. On the other hand, the site promoter seeks to utilise the northern half of the site for open space including utilising an existing informal track parallel to Harrison Way to make a loop to provide amenity value.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no heritage designations on site but it is adjacent to a conservation area with the A1096 (Harrison Way) separating the site from it.

# 1 Eastern Huntingdonshire

## Summary of SA

The site is constrained by flooding. It is adjacent to the St Ives conservation area and is within the Great Ouse Valley Green Infrastructure Priority Area. It is located wholly within the Meadow Lane Gravel Pits CWS. While it is well served in terms of services, facilities, primary education and employment opportunities by being located on the eastern edge of St Ives, it is however separated by the A1123. It is well served by public transport being within walking distance to the Guided Busway.

SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	While the site adjoins the northern edge of St Ives, it is unclear whether there will be connections from the development into the adjoins residential areas or not. If not, there is no footpath along Old Ramsey Road to connect the site's frontage thus making physical connections to services and facilities within St Ives challenging. As such it will be very challenging to integrate development with the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

#### Summary of SA

The site is constrained fluvial and surface water flooding, it is not constrained by heritage or nature conservation designations. Development of the site would see built development extending into the countryside in a location with less sustainable connections to services and facilities in St Ives by foot or by cycling. It would also alter the landscape setting to the town by continuing built development northwards. The site is within reasonable proximity to employment, public transport connections, natural greenspace and to education facilities. The site is also wholly greenfield land mostly classified as grade 2 agricultural land.

#### Updates after initial appraisal

#### St Ives 6: Westwood Farm, North of Marley Road, St Ives

- 1.47** As identified in the LAA, approximately 75% of the site falls within a water recycling area as the site adjoins a sewage works. Residential uses are the most vulnerable to odours and no odour assessment has been submitted to justify this development and demonstrate that the impact could be adequately mitigated to ensure acceptable levels of residential amenity. The land that does not fall within the water recycling area is very detached from St Ives so its development would not relate well to the settlement being located in the open countryside.

# 1 Eastern Huntingdonshire

1.48 Therefore, a sustainability appraisal for the site has not been undertaken.

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			climate change. A level 2 SFRA is required to demonstrate the detailed impacts and requirements. Given the scale of the site it is anticipated that there will be ample opportunities to manage and mitigate the level of flood risk.
SA4	<ul style="list-style-type: none"> <li>Enable the use of land that has previously been developed in preference to greenfield land?</li> </ul>	++	The site is almost entirely classified as previously developed land as it is a former RAF airfield and contains substantial areas of hardstanding. Less than 5% of the total land area comprises grade 2 agricultural land.
	<ul style="list-style-type: none"> <li>Promote development in locations that are grade 3 agricultural land or lower (including urban and non-agricultural land) in preference to higher grades?</li> </ul>	++	
SA5	<ul style="list-style-type: none"> <li>Focus development in areas which are either well served by publicly accessible open and natural green space or have the capacity to provide additional such space?</li> </ul>	++	<p>Wyton Airfield is just beyond several of the thresholds for Natural England's access to natural greenspace standards. However, it is still in relatively close proximity to the extensive publicly accessible open and natural green spaces of the Ouse Valley corridor which would provide diverse opportunities for recreation. The site has potential to provide publicly accessible open green space and already contains several small wooded areas and large areas of grassland which have the potential to form the core of additional open space provision.</p> <p>Current strategic blue and green infrastructure networks are not expected to be compromised by redevelopment of Wyton Airfield, nor their future extension or improvement inhibited, as these are more likely to be focused directly within the Ouse Valley river corridor and its associated flood meadows.</p>
	<ul style="list-style-type: none"> <li>Ensure current strategic blue and green infrastructure networks are not compromised and future extensions or improvements are not prejudiced?</li> </ul>	++	
SA6	<ul style="list-style-type: none"> <li>Protect sites of designated biodiversity or geodiversity significance?</li> </ul>	++	There are no designated sites of biodiversity or geodiversity value within the site. The former RAF Wyton bomb dump county wildlife site is directly across the A141 from the site. There are no

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
	<ul style="list-style-type: none"> <li>Promote opportunities for the recovery and enhanced connectivity of sites of biodiversity or geodiversity significance?</li> </ul>	+	internationally designated sites within 2kms and the closest SSSI is 2.25 kms from the nearest boundary. The site offers limited opportunities to promote opportunities for the recovery or enhancement of sites of biodiversity or geodiversity value with the strongest potential being for promoting linkages to the RAF Wyton bomb dump county wildlife site. There are no tree preservation orders within the site.
SA7	<ul style="list-style-type: none"> <li>Promote opportunities to protect and enhance valued landscape and townscape characteristics?</li> <li>Reinforce local distinctiveness and a sense of place?</li> </ul>	++	<p>The site is located within the Central Claylands landscape character area which predominantly comprises gently undulating arable land with a relatively large scale field pattern. It is on a raised plateau and immediately adjoins the remaining RAF Wyton operational base which contains buildings of a range of heights and can be seen extensively from the surrounding areas. The villages of Old Hurst and Woodhurst are situated to the north of the site with views across the landscape up to the site. Development of Wyton Airfield would be partially visible from both of these villages. The wider area is typified by ancient woodland and hedgerows. Development could promote opportunities to enhance this characteristic through provision of additional woodland and hedgerows.</p> <p>The south western corner of the site adjoins Wyton on the Hill which comprises the former married quarters housing. The layout is predominantly demi-detached and short terraces of homes with back gardens frequently containing boundary trees. There are very limited areas of public open space beyond 5 children's play areas and the primary school site. The sense of place of Wyton on the Hill remains closely aligned with the adjoining operational RAF base. Redevelopment of the site and integration with Wyton on the Hill offers opportunities to enhance the residential village character of Wyton on the Hill and create a high quality locally distinctive new settlement.</p>

			demand generated from and expenditure capacity of the site's future occupants has potential to assist in facilitating some modernisation of the existing town centres.
SA15	<ul style="list-style-type: none"> <li>Strengthen a local sense of place?</li> <li>Retain the character of existing settlements?</li> </ul>	+	<p>The site has an established character from its use as a military airfield which connects strongly with the adjoining remaining RAF Wyton and the former married quarters housing now forming the separate community of Wyton on the Hill. To the north the site adjoins open countryside with the nearest village being Woodhurst situated 1 km to the north east.</p> <p>Being located on level land the majority of the site is contiguous with the surrounding countryside which is characterised by relatively flat open land predominantly in agricultural use.</p> <p>Wyton on the Hill has a strong sense of place due to its purpose designed nature as married quarters. Development for a residential led scheme could reinforce the domestic nature and scale of this adjoining use, complementing it with more diverse housing types and improved accessibility to community services and facilities.</p>
SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	+	There are no known archaeological sites or features within the site. The nearest conservation area is at Woodhurst some 1.1 kms from the nearest part of the site boundary.

## Summary of SA

Wyton Airfield comprises previously developed land located close to the market towns of Huntingdon and St Ives within an area of relatively high market demand for new homes. It adjoins the existing community of Wyton on the Hill and development as a new settlement could be integrated with this community and enhance its sustainability through greater access to local services and facilities. The site adjoins a major employer and some employment opportunities would be included within the site although it is promoted as a residential led scheme. It is also in close proximity to diverse employment opportunities in Huntingdon and St Ives. The location

offers opportunities for diversion of the Busway through the site providing high quality public transport links east into St Ives and Cambridge and west to Huntingdon. Opportunities are also present for enhancing active travel linkages both for day-to-day and leisure journeys. Overall, Wyton Airfield is sustainably located for new development.

Substantial facilities would be required on site such as education, local convenience shopping, community and leisure infrastructure to support sustainable lifestyles for any future residents. Integration of these with the existing community of Wyton on the Hill would boost their sustainability.

The site has limited sustainability benefits in terms of nature conservation and access to strategic infrastructure. Development is unlikely to be close enough to give rise to detrimental impacts but equally is not close enough to facilitate significant connectivity improvements.

As a former military airfield the site, the adjoining community of Wyton on the Hill and the remaining RAF Wyton base have a strong existing character. Development could build on the established character to provide a sense of place early on within development of the scheme. In terms of the wider landscape, development would impact on views from Woodhurst and Old Hurst and the wider countryside around the site, particularly given its position on a raised plateau. The site benefits from established hedgerows and trees around most boundaries which would provide a mature starting point for any landscaping scheme to help reduce the local level visual impact of development.

SA14	<ul style="list-style-type: none"> <li>Facilitate modernisation of existing town centres to meet current and anticipated needs?</li> </ul>	+	The site would be expected to include local scale shopping facilities to help future occupants meet day to day needs using active travel. It is in relatively close proximity to the existing town centres of both Huntingdon (6kms) and St Ives (8kms). The additional demand generated from and expenditure capacity of the site's future occupants has potential to assist in facilitating some modernisation of the existing town centres.
SA15	<ul style="list-style-type: none"> <li>Strengthen a local sense of place?</li> <li>Retain the character of existing settlements?</li> </ul>	-	<p>The land currently has a wholly agricultural character with its sense of place being that of the open countryside. Development would fundamentally alter this and any scheme would need to create a wholly new sense of place. Development would impact significantly on the character of Broughton bringing new development along Bridge Road which is the primary route into the village and bringing new development north of this close to the eastern edge of the village thereby completely altering its rural setting.</p> <p>Development would also impact on the wider setting of Kings Ripton in terms of long distance views from the eastern side of the village although a strong landscaping scheme could partially ameliorate this.</p>
SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	-	There are no known archaeological sites or features within the site. However, Broughton conservation area is within 150 m of the nearest point of the proposed site boundary; built development in such close proximity could substantially impact on the setting of the conservation area. Kings Ripton conservation area is some 800 m distant and would be less directly affected.

**Summary of SA**

Hungary Hall Farm is a wholly greenfield site comprising predominantly best and most versatile grade 2 agricultural land which reduces its sustainability for development. However, it is relatively close to Huntingdon via the A141 which provides opportunities for access to a range of employment and services. Sustainable travel opportunities are currently limited to a bus service running along the A141 on the eastern side although this has potential for enhancement. The CPCA is promoting substantial upgrades to public and active travel in the wider A141 corridor which this site has potential to link into from its eastern side. The site is promoted for mixed use although the amount of non-residential use remains to be determined. The site promoter advocates bringing the site forward in conjunction with redevelopment of Wyton Airfield which could boost the sustainability of the overall scheme, certainly to the benefit of Hungary Hall Farm. However, by the point of submission in 2023 there was no indication that any liaison had taken place to co-ordinate a single scheme or that the proposal was acceptable to the promoter of Wyton Airfield.

Substantial facilities would be required on site such as education, local convenience shopping, community and leisure infrastructure to support sustainable lifestyles for any future residents. Integrated development with Wyton Airfield could provide opportunities for enhanced sustainability of this site although would not overcome the impacts it would have on best and most versatile agricultural land.

The site has limited sustainability benefits in terms of nature conservation and access to strategic infrastructure. Development is unlikely to be close enough to give rise to detrimental impacts but equally is not close enough to facilitate significant connectivity improvements other than to the Wyton bomb dump county wildlife site.

Development of this site would significantly impact on the rural character of the local area, in particular it would significantly detrimentally impact on Broughton, the primary approach to it and its conservation area. The development of the site in isolation would give rise to a wholly detached area of development that would not relate well to the existing landscape character or settlement hierarchy of Huntingdonshire. However, if development were to occur in conjunction with Wyton Airfield it might support a more sustainable new settlement as whole. The site itself has a mixture of boundary landscaping at present with trees and hedgerows containing much but not all of the site. These would form the basis of a landscaping scheme to assist with integration of any development into the surrounding landscape but would need substantial reinforcement, particularly on the northern and western parts of the site.

#### Summary of SA

Lodge Farm is a wholly greenfield site comprising a mixture of grade 2 and grade 3 agricultural land. It adjoins Huntingdon on the south western side with the A141 forming two of the site's boundaries. The location has opportunities to benefit from CPCA proposed upgrades to the A141 and active travel routes in its vicinity potentially enhancing potential occupiers' accessibility to sustainable forms of travel although there is currently no public transport or active travel infrastructure along the A141 where it adjoins Huntingdon and only a limited service on the stretch along the eastern edge of the site.

Limited opportunities exist to link to and enhance strategic green infrastructure areas. There are no designated nature conservation assets within the site but a network of green landscaping corridors runs through and around the site offering opportunities for enhancement.

Development would form a major extension to Huntingdon and push the town's boundary out beyond that established by the A141 since the 1980s which contain the existing late 20th century development of 'The Birds' estate. Opportunities for integration are limited and potential would need to be maximised to gain the sustainability benefits of the site's location adjoining an existing town and providing opportunities to access existing services and facilities rather than being a freestanding site in the countryside.

The site is in an area of mixed housing market demand with relatively low levels of deprivation. It is in relatively good proximity to a wider range of employment, social and community services. Some would also be expected to be provided on site given the scale of the development enhancing access to local scale facilities. Given its relationship with Huntingdon development may boost the town centre as a result of more expenditure capacity in the local area.

## Wyton on the Hill 4: Land North of Houghton Road (southern portion), St Ives (Wyton on the Hill)

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA1	<ul style="list-style-type: none"> <li>Promote low and zero carbon technologies?</li> </ul>	N	The site promoter intends to build to the Future Homes Standards from 2025 so development will be aligned with national standards but not exceed them.  The site is remote from any air quality management area. The land is wholly greenfield so will not support the circular economy.
	<ul style="list-style-type: none"> <li>Not contain, and be at least 200m from an air quality management area?</li> </ul>	+	
	<ul style="list-style-type: none"> <li>Support the circular economy through the reuse and recycling of existing land, buildings or materials?</li> </ul>	-	
SA2	<ul style="list-style-type: none"> <li>Is the site located in an area with lower resilience to the predicted impacts of climate change?</li> </ul>	++	The site is not at risk of fluvial flood risk with climate change taken into account at 1 in 100 (Design Flood).
SA3	<ul style="list-style-type: none"> <li>Be served by existing water and waste water infrastructure or will it require infrastructure upgrades to facilitate growth?</li> </ul>	-	The site closest to the St Ives water catchment area which may require upgrades to accommodate growth, some work may be necessary to ensure that there would be no adverse impacts.  The site is wholly in flood zone 1 with very small areas at risk of surface water flooding primarily near the south eastern edge of the site and the northern half of the western boundary.
	<ul style="list-style-type: none"> <li>Use land in flood zone 1 (unless the proposed use is water compatible) taking into account the impact from surface water flood risk?</li> </ul>	++	
SA4	<ul style="list-style-type: none"> <li>Prioritise development of previously developed land?</li> </ul>	--	The site is wholly greenfield with no built structures on. Approximately a third of the site is classified as grade 3 agricultural land along the southern edge; the majority of it is classed as grade 2.
	<ul style="list-style-type: none"> <li>Prioritise development on land of agricultural land grade 3 or lower (including urban and non-agricultural land)?</li> </ul>	--	
SA5	<ul style="list-style-type: none"> <li>Promote new development with opportunities to participate in leisure and recreation using publicly accessible natural green space?</li> <li>Could development contribute towards enhancing or increasing the strategic green or blue infrastructure network or linkages to it?</li> </ul>	+	Hill Rise Park provides access to natural green space some 300 m from the northern edge of the site. Although just beyond Natural England's accessible green infrastructure standards in terms of distance the site is relatively close to a range of natural green spaces

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			such as Hemingford Meadows and St Ives Thicket which provide leisure opportunities. The site is also of a scale to accommodate some open green space within it.
SA6	<ul style="list-style-type: none"> <li data-bbox="293 536 1126 619">Impact on a designated site of biodiversity or geodiversity significance?</li> <li data-bbox="293 619 1126 796">Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	+	The site is 0.6 km north of Houghton Meadows SSSI and approximately 370 m from the Houghton Grange grassland county wildlife site which is the closest of several nearby county wildlife sites. The southern site boundary is 160 m north of the Ouse Valley green infrastructure priority area so it provides only limited opportunities to contribute to future improvements in connectivity between the ecologically important sites in the vicinity.
SA7	<ul style="list-style-type: none"> <li data-bbox="293 812 1126 874">Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	-	The form and character of the local area is very mixed. Whilst development might relate well to modern housing on Garner Drive this only comprises a small element of the site's boundaries. The majority of the land is surrounded by open space leisure uses or agricultural land; introducing built development would significantly impact on these by enclosing them into the built environment rather than the edge of settlement character they currently have. Development would also impact on longer distance views from Wyton on the Hill. To the south the site adjoins the Houghton and Wyton conservation area and the two grade II listed lodges to Houghton Grange. Redevelopment of the Houghton Grange site for residential use is changing the character of this area. Development of this site would alter the form of the local area by introducing development on both sides of the A1123 and increasing the perception of coalescence of St Ives with Houghton and Wyton. The developer's proposed density would, however, make efficient use of the land in terms of the number of homes proposed.

	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	++	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	The site has access to high frequency bus services (B+) 350 m from the site frontage along Houghton Road to Garner Drive.  The A1123 benefits from an existing pavement on the southern side of the road.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	++	

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	No specific employment related proposals are anticipated although the developer proposes to include a convenience shop within the scheme the additional sustainability of which is accounted for below.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	++	The developer proposes to include a convenience shop within the scheme which could boost local access to services as there is no local centre in the immediate vicinity.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	Although high quality design could be incorporated within the site itself only the southern third of the site along its eastern boundary adjoins the existing built up area of St Ives; the remainder on the eastern side would adjoin the outdoor leisure centre impacting on its edge of town countryside setting. A portion of the western boundary adjoins Houghton Hill Industries with development of the site effectively making this contiguous with St Ives. Development would affect the character of the local area by spreading the perception of the outskirts of St Ives along Sawtry Way.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The two grade II listed lodges to Houghton Grange are situated immediately south of centre the site along the A1123 frontage. This edge also adjoins the Houghton and Wyton conservation area.

#### Summary of SA

The site is wholly greenfield land of which around two thirds is best and most versatile grade 2 agricultural land. The site is just beyond the threshold for likely impact on several designated nature conservation sites and the Ouse Valley green infrastructure priority area. It adjoins outdoor sports facilities potentially allowing for sustainable access to them although light and noise pollution may affect any future homes from these. The site has good proximity to a range of services and facilities being on the outskirts of St Ives as well as access to some more local facilities including primary education. It has good access to high quality public transport but active

# 1 Eastern Huntingdonshire

travel routes would require a crossing of the A1123 or new provision. The site is sensitively located to the west of St Ives and would extend the built form into the surrounding countryside. It is immediately north of Houghton and Wyton conservation area including Houghton Grange. Development has potential to give rise to reinforcing the perception of coalescence of St Ives and Houghton and Wyton.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
	<ul style="list-style-type: none"> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>		East West Rail Route may also impact the site. There are therefore challenges to successfully integrating development into the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within or in close proximity to the site.

**Summary of SA**

The site is not constrained by fluvial flood risk, heritage or nature conservation designations, surface water flood risk runs through the centre of the site. It is grade 2 best and most versatile agricultural land, is wholly greenfield and is in agricultural use. Due to the size of the site, impact on the surrounding countryside would be significant due to the site's current isolated location.

The site is approximately 5km from St Neots train station, providing sustainable transport options, a bus service is within 800m but the service is infrequent. The site is approximately 600m from a public footpath providing some integrated active travel opportunities.

The closest town centre is St Neots which is within 5km from the site, The site proposes employment and retail uses and could include a local community centre; Primary School and land for health facilities. These could provide additional employment and social benefit to the new community.

The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability. The green infrastructure proposed will promote biodiversity and active leisure uses supporting environmental and social aspects of sustainability. Integration of the site with the nearby residential area of St Neots, with safe crossings and enhanced transport infrastructure could pose a significant challenge. The status of Bedford Local Plan proposed allocation HOU Little Barford New Settlement (where further integration is proposed is also currently unknown.

The proposed rerouting of the A428 increases the likelihood of noise, light, air and visual pollution as does the potential EastWest Rail route , which could impede comprehensive site development dependant on its location within or adjacent to the site.

SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses so the criterion does not apply.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	++	The site is for renewable energy which is compatible with its countryside location.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is in close proximity to Eynesbury Hardwicke House which is a listed building and could be adversely impacted by the development.

## Summary of SA

The site is wholly classified as grade 2 agricultural land. The site is proposed for renewable energy generation which can be compatible with agricultural land as such sites can be temporary in nature and can revert back to agricultural use potential having positive impacts on intensively farmed land allowing time for restoration. Some agricultural uses would also be able to continue around and within solar farm sites depending on their nature. The site is in flood zone 1 with surface water flood risk, the proposed use is classified as essential infrastructure meaning development is compatible. Potential of the site to impact upon a listed building would require consideration.

The site is sufficiently remote from all of the designated nature sites and there are no known heritage assets within the site so it is unlikely there will be an impact.

SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	++	The closest town centre is St Neots which is within 5km from the site.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	N	The proposal is for non-residential use and therefore distance to education facilities is not relevant.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	-	The site is further than 800m from any leisure or cultural facilities.
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	++	The site will provide over 5 ha of employment land.
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	The site benefits from superfast broadband in the vicinity
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	++	The site is further than 800m from a bus service but is approximately 3km from St Neots train station.
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	+	The site is within 500m of a public right of way but is not accessible by footpath
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	+	The site would support predominantly low density employment uses such as logistics with a small (1,500 sqm) of higher density employment.

# 1 Southern Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses and therefore this criterion does not apply.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located in open countryside such that it could not be successfully integrated with an existing community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are no known heritage assets within the site. However, it is approximately 100m north from listed buildings, measuring from the south west corner of the site boundary which could be adversely impacted by the development.

## Summary of SA

The site is not constrained by fluvial flood risk, or nature conservation designations, some surface water flooding is present. It is grade 2 best and most versatile agricultural land, is wholly greenfield and is in agricultural use. Impact on the setting of listed buildings would require careful consideration and landscape mitigation.

The site is approximately 3km from St Neots train station and further than 800m from a bus service. The site is within 500m of a public right of way but is not accessible by footpath meaning access to the site via sustainable means is currently not available making employment opportunities less accessible .

The proposal for employment and logistics uses means that light, odour and visual pollution is possible within the rural setting. The site would be surrounded by the existing A428 and new route of the A428. The local transport network may be impacted by the proposed uses. The site is located in open countryside, but some rural properties are present just outside and within the site successful integration of these properties would require careful consideration. A

This would provide a level of low density employment
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	++	The site promoter mentions that the retirement complex "would also include limited retail and employment opportunities commensurate to the proposed scale and uses". This would provide a level of retail provision to serve new residents
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is located east of the proposed new A428 and is in an isolated location. Status of Bedford Local Plan proposed allocation HOU Little Barford New Settlement is also currently unknown meaning integration with this proposed allocation is also uncertain. Finalisation of the East West Rail Route may also impact the site. There are therefore challenges to successfully integrating development into an existing place and community. The site promoter infers that the retirement complex "would also include limited retail and employment opportunities commensurate to the proposed scale and uses", however to ensure a sustainable development this would be more preferable as a free standing building to serve the wider development.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no known heritage assets within the site. It is sufficiently remote from Eynesbury Hardwicke Manor, a listed building, which is approximately 200m east of the site.

## Summary of SA

The site is not constrained by fluvial flood risk, heritage or nature conservation designations, surface water flood risk is present in some areas It is grade 2 best and most versatile agricultural land, is wholly greenfield and is in agricultural use. Due to the size of the site, impact on the surrounding countryside would be significant due to the site's current isolated location.

The site is within 5km from St Neots train station and bus station, with no bus serving the area, providing limited sustainable transport opportunity. Two public rights of way within the northern half of the site which could provide some integrated active travel opportunities albeit may be impractical due to the isolated countryside location of the site.

The closest town centre is St Neots which is within 5km from the site, which provides some opportunity for the new community to access services and facilities and multiple concentrations of employment are within 5km providing some opportunity for employment. The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability. There is not indication that green infrastructure would be proposed nor further cultural, education or social facilities to support the new community. The site is beyond 1.5km from a town based primary school (St Neots). A retirement complex would provide limited employment opportunities .

The site is in an isolated countryside location integration of the site with the nearby residential areas would not be feasible. The status of Bedford Local Plan proposed allocation HOU Little Barford New Settlement (where further integration is proposed is also currently unknown.

The proposed rerouting of the A428 increases the likelihood of noise, light, air and visual pollution as does the potential EastWest Rail route , which could impede comprehensive site development dependant on its location within or adjacent to the site and further separate the site from the poposed Little Barford allocation.

	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	-	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it could not be effectively integrated with the existing community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is wholly located within flood zone 1 with no recorded risk from surface water flooding. The site has potential to contribute to the diversity of housing available in Buckden and expand local community facilities. However, it comprises the best and most versatile (grade 2) greenfield agricultural land. The eastern parcel is identified as a Green Infrastructure Priority Area and a strong landscaping buffer would be needed on the eastern edge to reduce the impact on the Great Ouse Valley green infrastructure priority area which follows the course of the river to the east of the site. It has no designated heritage assets that could impact development. The

site has reasonable access to local social and educational facilities but it is remote from retail and employment destinations. Though the site has access to public transport, there is an infrequent service which would not promote sustainable lifestyles. Although the site can potentially be accessed from Mill Road, this will have significant impact on the capacity and safe operation of the A1 and the Buckden roundabout. The site is in close proximity to the County Wildlife and adjoins the open countryside. As such and development will need to be very sensitive to protecting the form and character of the wildlife site and the adjoining countryside. The proposed development would therefore not contribute to protecting the form and character of the surrounding townscape and landscape. The sustainability of the site is considered very poor for residential development purposes.

#### Updates after initial appraisal

#### **Buckden 2: Land East of Bishops Way, Buckden**

- 1.4** As identified in the LAA, there are significant constraints that impede the development of the site. Impact on the Great Ouse Valley green infrastructure priority area, County Wildlife Site and the wider ecological network of the Ouse Valley would be detrimental. Also, access to the site from Bishops Way may be unachievable. is constrained by heavily access and the County Wildlife Site.
- 1.5** Therefore, a sustainability appraisal for the site has not been undertaken.

#### **Buckden 3: Land off Vineyard Way, Buckden**

- 1.6** As identified in the LAA, the site is within 400m of a water recycling area. Residential uses are the most vulnerable to odours and no odour assessment has been submitted to justify this development and demonstrate that the impact could be adequately mitigated to ensure acceptable levels of residential amenity
- 1.7** Therefore, a sustainability appraisal for the site has not been undertaken.

#### **Buckden 4: Brampton Road, Buckden**

- 1.8** As identified in the LAA, the site is within the consultation area of a WMA. No assessment has been made by the site promoter on the impact of the proposed development on the MWA.
- 1.9** Therefore, a sustainability appraisal for the site has not been undertaken.

#### Summary of SA

The site is not constrained by fluvial flood risk, there is some surface water flood risk on the side of the site nearest to the A1. The site is not constrained by heritage or nature conservation designations. It is physically detached from the main built form of Buckden but it is connected via footpath and underpass providing a link to services and facilities however many of these are beyond 800m of the site. The site's location being in such close proximity to the A1 makes it more likely to be impacted by sources of pollution from the strategic road network. Development on the site would result in depth development uncharacteristic of the immediate locality. The site is partially previously developed. The site is remote from employment and sustainable modes of transport.

			which cannot be determined at this stage until the detailed use classes of these are refined indicating the potential jobs density the they will provide.
SA12	<ul style="list-style-type: none"> <li>Support development in locations with good active travel and public transport links and services or provide opportunities for significant improvements?</li> </ul>	-	The site is located to the west of the A1 where connections to existing cycle paths and bus stops are more challenging and less frequent. At present, to access services in Buckden or Brampton, users must use an underpass to cross the A1 located near to the Buckden roundabout. Services in nearby Grafham are accessible via Brampton Road but this does not have footpaths and is single lane. Incorporating sustainable and active modes of transport on this side of the A1 is more challenging and may require more substantial infrastructure works.
SA13	<ul style="list-style-type: none"> <li>Attract new investment and provide opportunities to improve the resilience of the local economy?</li> <li>Contribute to a balanced portfolio of employment land in sustainable locations throughout the district?</li> <li>Support retention and growth of indigenous companies?</li> <li>Encourage sustainable tourism?</li> </ul>	+	The site has potential to attract some new investment, the site promoter expects some 69 hectares of employment land to come forward across the site. It is a sustainable location for employment opportunities being in good proximity to potential employees in Huntingdon, Brampton, Buckden, Little Paxton and St Neots with potential for active travel and public transport accessibility from these locations which could be enhanced through a development at this scale. The potential to support indigenous companies is unknown without further details of the scale and nature of employment land anticipated. Tourism is unlikely to be a focal part of development on the site but development here could increase the number of visitors to Grafham Water and further support nearby tourism opportunities.
SA14	<ul style="list-style-type: none"> <li>Facilitate modernisation of existing town centres to meet current and anticipated needs?</li> </ul>	+	The site would be expected to include local scale shopping facilities to help future occupants meet day to day needs using active travel. The site promoter has stated that there could be some 26,000sqm of retail floorspace across the whole site. It is in relatively close

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			proximity to the existing town centres of both Huntingdon (5.5kms) and St Neots (7kms). The additional demand generated from and expenditure capacity of the site's future occupants has potential to assist in facilitating some modernisation of the existing town centres.
SA15	<ul style="list-style-type: none"> <li>Strengthen a local sense of place?</li> </ul>	-	The site is largely arable farmland so it does not have a distinct identity already and it doesn't adjoin any existing settlements. The site is very large and it is proposed that as a whole the site could provide an opportunity for a new free standing community. Its landscape character is shaped by it being wholly within the Southern Wolds Landscape Character Area which is characterised by ridges and valleys with very gently undulating ground divided by the steep ridge that contains Grafham Water. Considering these factors and the rising land levels of the site, development would be visible from some distance from a number of different directions and very significantly alter the landscape character of the are and of surrounding settlements such as Brampton, Buckden and Grafham. There are several public rights of way within the site, one that continues from Taylors Lane, another from Hardwick Lane and one from Buckden roundabout.
	<ul style="list-style-type: none"> <li>Retain the character of existing settlements?</li> </ul>		
SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	-	There are no heritage assets within the site itself, however it is in close proximity to several designated heritage assets. Buckden Conservation Area is situated approximately 200 metres east of the site along Taylors Lane Number 17 Taylors Lane, approximately 50 metres east of the site, is Grade II Listed. Model Farm and the Barn north of Model Farm, approximately 370 metres west of the site are Grade II Listed. A Moated Site, approximately 450 metres west of the site is a Scheduled Monument.

## Summary of SA

The site consists of 527ha of land which is largely greenfield land. The vast majority of the site is classified as being grade 2 agricultural land but there are some parts of the site that are grade 3. The site is relatively unconstrained by flood risk with most of the site being within flood zone 1 with some minimal elements being within higher flood risk zones. The site is generally not accessible to natural greenspace but is near to Grafham Water and is of a scale that could provide substantial amounts of open space as part of a balanced and mixed community. Is nearby to designated nature conservation designations including being within 5km of Portholme Meadow, as a result development is likely to impact these sites but could provide opportunities to enhance and link these at a strategic scale. There are some designated heritage assets that could be impacted by the proposal. Development at this scale would result in a very significant impact on the landscape which while of a scale to provide landscape buffers and zones to mitigate impact, would fundamentally alter the character of the area. The site is located adjacent to the A1(M) nearby to several settlements but is not particularly accessible via sustainable modes of transport to these to access services and facilities, employment opportunities or shops and education. The site is not served by public transport but could potentially be linked into the public transport network. The proposed development would however be a free standing community which would provide all of these elements. Also, development would require a new junction onto the A1(M) as well as onto other roads which is likely to be very costly and may not be feasible in highways terms. A mix of housing sizes, types and tenures would be provided as part of a mixed and balanced community meeting various market and affordable needs.

The site adjoins Diddington Brook which may result in some increased risk from flood risk in the future.
SA3	<ul style="list-style-type: none"> <li>Be served by existing water and waste water infrastructure or will it require infrastructure upgrades to facilitate growth?</li> </ul>	+	The site is located near to Buckden and St Neots water recycling area catchments. Buckden WRA has more than 10% of the flow permit remaining after existing committed growth allowing opportunity to accommodate new development; whereas St Neots WRA may require upgrades to accommodate growth, some work may be necessary to ensure that there would be no adverse impacts. The type of development is unlikely to require significant new or upgraded infrastructure waste water infrastructure to support development.
	<ul style="list-style-type: none"> <li>Use land in flood zone 1 (unless the proposed use is water compatible) taking into account the impact from surface water flood risk?</li> </ul>	+	The site is wholly within flood zone 1, there is some large amounts of surface water flood risk located along the site's northern boundary which in places flows into the centre of the site. This flood risk is attributed to Diddington Brook.

There is a bus stop just outside of the site on Diddington Road, this is however rated E+ on the Place Based Carbon Calculator meaning there is an infrequent service.</p> <p>There is no footpath access to the site, there is public right of way that runs along the site's eastern edge which may be able to provide some sort of connection.</p>
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	+	
SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposed use of the site is as a solar farm so will not create new or enhanced employment or tourist facilities and opportunities.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is detached from the main built form of Diddington being located on the opposite side of the A1. As such the site relates much more closely with the open countryside. With landscaping it maybe possible to integrate solar panels on the site without detrimentally impacting the site's immediate surroundings.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	Opposite the site is the listed Lodge Farm which may be impacted by proposals. Adjacent to the site on the other side of the A1 is a conservation area but considering the distance and the separation as a result of the A1 the impact on heritage assets within the main built form of Diddington is reduced. The live planning application on the site has highlighted that there may be impact on some non-designated heritage assets: Diddington War Memorial, South Lodge and The Vicarage.

**Summary of SA**

The site has been put forward for a solar farm. It is a large site being some 47ha located in a sensitive location along the A1 and between green infrastructure priority areas and nearby to various sites of nature conservation. It is physically detached from the main built form of Diddington being separated by the A1 so it relates much more closely to the open countryside. This means that the impact on existing communities is limited but the impact on the landscape could be significant, however a though landscape assessment will be required and there could be opportunities to incorporate biodiversity net gain opportunities and provide linkages between habitats sites. It is within flood zone 1 but does have an increased risk of surface water flooding arising from Diddington Brook running along its northern boundary. The site has limited accessibility by sustainable modes of transport so it is likely that anyone who needs to access the site or within within the site would will use a car.

SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it can be effectively masterplanned to become part of the existing place and community. This will be subject to high quality landscaping and design.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is adjacent to and along some of its eastern edge adjoins the conservation area. There is potential for archaeology on site particularly arising from medieval agricultural practices which will require investigation.

## Summary of SA

The site is well related to the village being located on its Western edge. It is a greenfield site classified as grade 2 agricultural land. It is within walking distance of primary education, leisure and cultural facilities and natural greenspace. It is also within close proximity to employment locations. It is not constrained by fluvial flood risk but there is some risk of surface water flooding, there are no nature conservation designations or heritage assets within the site but it does adjoin the conservation area. It is also within 1km of a SSSI so additional development may lead to some increased recreational pressure. The site is not well served by public transport options so if services are needed that are outside of the village then trips are likely to be made using private car.

It is considered that the proposed residential use may present difficulties with integration with the existing uses. Greater opportunities for this integration are to be had if employment uses were pursued on site rather than residential. The site is located such that it can be effectively masterplanned to become part of the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	There are no designated heritage assets on site or nearby.

## Summary of SA

The site is somewhat detached from the main built form, it currently adjoins the Sand Road Industrial Estate and recreation ground so does still very much relate to the settlement. It is a greenfield site classified as grade 2 agricultural land. It is within walking distance of primary education, leisure and cultural facilities and natural greenspace. It adjoins an existing industrial estate and could provide an opportunity to expand it providing greater diversity in employment options within the settlement. It is not constrained by flood risk, nature conservation designations or by heritage. The site is not well served by public transport options so if services are needed that are outside of the village then trips are likely to be made using private car. The compatibility of uses with large scale residential adjacent to Sand Road industrial estate may present multiple amenity issues in relation to transport movements, noise and vibration. It is considered that the proposed residential use may present difficulties with integration with the existing uses. Greater opportunities for this integration are to be had if employment uses were pursued on site rather than residential. The site is located such that it can be effectively masterplanned to become part of the existing place and community.

The scale of the site would make it challenging to successfully integrate the development with the existing place and community and harmonise with its landscape setting.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	There are no designated heritage assets on site or nearby.

**Summary of SA**

The site is somewhat detached from the main built form, but is adjacent to the Sand Road Industrial Estate. While still relating to the settlement, the successful integration of this site would be challenging based on its scale and landscape setting. It is a greenfield site classified as grade 2 agricultural land. It is not constrained by fluvial flood risk but there is risk from surface water flooding on its southern edge as a result of its proximity to Mandeau Brook. It is not constrained by nature conservation designations or by heritage. It is within walking distance of leisure and cultural facilities and natural greenspace. It could provide an opportunity for new employment but the opportunities for sustainable travel is severely limited as the site is remote from public transport opportunities and there is no direct footpath to the site. Therefore, users are likely to travel to the site by private car.

The site's proposed access is opposite two listed buildings, but as the proposed development site is back land and largely obscured from public view the impact on heritage is reduced.

Page 3189 of 3488

## Summary of SA

The site is located on the western edge of Great Paxton offering an opportunity for back land development which would not have a considerable impact on the character of the settlement as the development would not extend the building line any further than the properties north of the site. It is not constrained by flood risk, nature conservation designations or by heritage. The site is classified as grade 3 agricultural land. It is within walking distance to several key leisure and cultural facilities within the village as well as a shop, primary school and employment opportunities. It is within close proximity to the East Coast Mainline Railway, the impact of which will need mitigation. While Great Paxton is within 5km of St Neots, the settlement is not well served via public transport which is likely to result in greater trips being made by car to services outside of the village.

SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal is for residential development.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.

## 1 Southern Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it can be effectively masterplanned to become part of the existing place and community. This would be subject to careful design incorporating landscaping and noise mitigation due to the proximity of the railway to the site.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The grade II listed 26 High Street may be impacted by proposals.

## Summary of SA

The site is located on the western edge of Great Paxton offering an opportunity for back land development which would have a greater impact on the character of the area as the site extends within 50m of the railway line. The site is classified as grade 3 agricultural land. It is not constrained by fluvial flood risk or nature conservation designations but there is some constraints arising from surface water flood risk and or by heritage. It is within walking distance to several key leisure and cultural facilities within the village as well as a shop, primary school and employment opportunities. It is within very close proximity to the East Coast Mainline Railway, the impact of which will need mitigation. While Great Paxton is within 5km of St Neots, the settlement is not well served via public transport which is likely to result in greater trips being made by car to services outside of the village.

SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	+	The site could provide over 3ha of employment land. The site promoter has not specified the specific uses so it is estimated that there could be modest job growth.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is detached from the main village and relates much more closely to the open countryside. Development could be integrated with the adjoining industrial estate, however the size of the site would more than double the size of the estate. Through design and landscaping will be required to ensure that such a scale of extension can be sensitively integrated with the immediate landscape.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	+	There are no designated heritage assets on site or nearby.

#### Summary of SA

The site is located outside of the main built form of Great Paxton but adjoins the Harley Industrial Estate along Paxton Hill (B1043), as such the site relates more closely to the open countryside. The land is classified as grade 2 agricultural land so is of high value. It is not constrained by fluvial flood risk, nature conservation designations or by heritage. There is some surface water flood risk. The site is not immediately accessible to services within Great Paxton as there is no footpath connection. Additionally, while Great Paxton is within 5km of St Neots, the site and settlement as a whole is not well served via public transport which is likely to result in greater trips being made by car which does not offer the most sustainable mode to travel to and from work.

Safety of access for residents would require consideration.</p>
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	No known heritage assets are located within the site

## Summary of SA

The site is not constrained by fluvial flood risk or heritage designations and surface water flood risk is negligible. The site is wholly greenfield land after being restored after minerals extraction with no existing structures on site and classified as non-agricultural land.

The site is within proximity of 10 ha of natural green space, adjoins woodland and is close to playing fields and lakes and Paxton Pits (a SSSI). There are therefore potential opportunities to link to the strategic green or blue infrastructure network. The site is situated within Natural Cambridgeshire Great Ouse Valley Green Infrastructure Priority Area.

The site is north of residential development. The site is screened by trees and as such has the potential to be developed in a way sensitive to the surrounding area. Integration with the existing community could be achieved via access off Old Great North Road and assessment of potential active travel access via a public right of way on the eastern edge of the site could be explored.

The site is of a size which would contribute to meeting the needs of the district, but not large enough to provide a substantial range of sizes, types and tenures. However the proposed capacity would make an efficient use of land when considering the surrounding lower forms of density in the settlement within its immediate vicinity.

The closest town centre is St Neots which is within 2.2km from the site, its location near a market town provides potential employment and social opportunities, whilst potential additional retail could support the immediate needs of a new community. The site is within 5km from St Neots train station, providing sustainable transport options, a bus service is within 800m but the service is infrequent. There is a public right of way that crosses the site from the north and continues along the southern boundary which could provide some integrated active travel opportunities. The site is within 800m of multiple culture and leisure facilities and a primary school which are accessible by a public footpath and is within 5km of multiple concentrations of employment. providing potential retail, employment, social and cultural opportunities.

The road bounding the northern boundary of the site is within a mineral development area and provides access for vehicles associated with its operation. Safety of access for residents would require consideration.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	No known heritage assets are located within the site or nature conservation assets

#### Summary of SA

The site is not constrained by fluvial flood risk or heritage designations and surface water flood risk is negligible. It is grade 2 best and most versatile agricultural land and is wholly greenfield.

The site is within proximity of 10 ha of natural green space, woodland is present in the southern edge of the site and playing fields opposite the site frontage on Great North Road and within 1km of Little Paxton Pits (SSSI).

There are therefore potential opportunities to link to the strategic green or blue infrastructure network. The site is situated within Natural Cambridgeshire Great Ouse Valley Green Infrastructure Priority Area.

The site is located on the western edge of Little Paxton acting as a green wedge between Little Paxton and the A1, perceived as forming part of the wider countryside, it is therefore located in a sensitive location. It is not considered that development would not contribute towards protecting the form and character of the surrounding landscape.

# 1 Southern Huntingdonshire

The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability. The proposed capacity for the site would be an effective use of land and reflect the low form of density common to the settlement particularly considering that 4 to 5ha is proposed for natural green or open space uses.

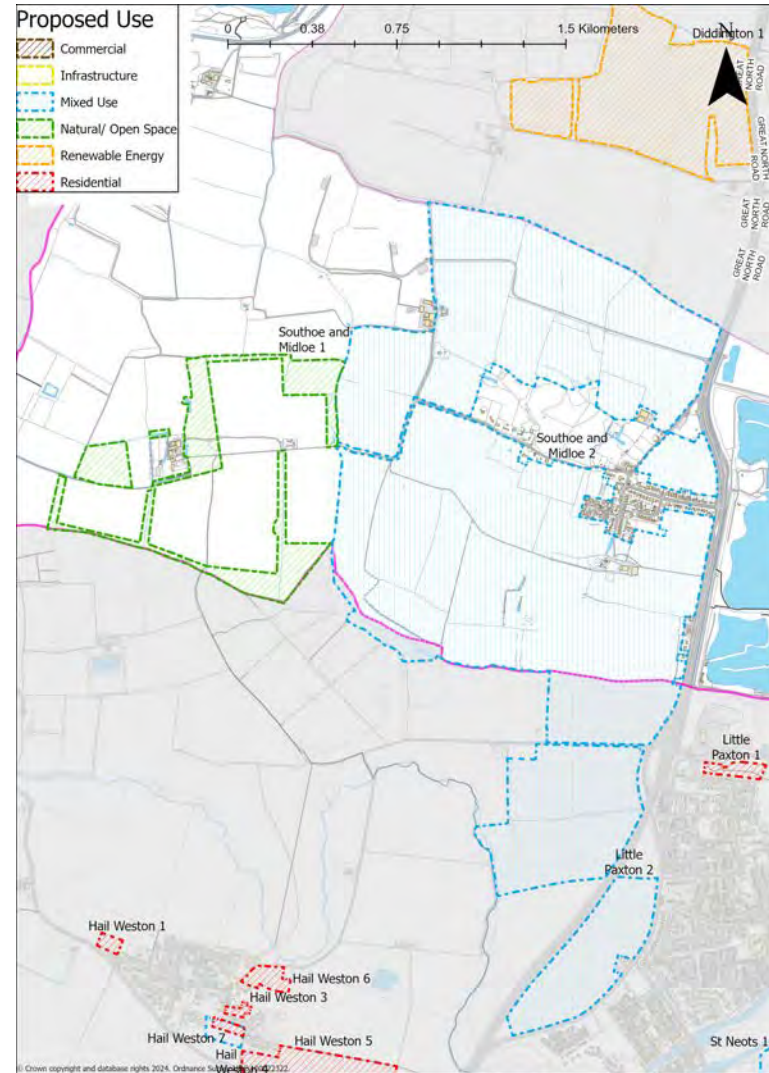

The closest town centre is St Neots which is within 3.2km from the site, its location near a market town provides potential employment and social opportunities, the site promoter notes that there is scope for associated social/community facilities, but there is no firm commitment to assess whether this could support the immediate needs of a new community. However The site is within 800m of Little Paxton Primary School, a number of culture and leisure facilities measuring and within 5km of multiple concentrations of employment. The site is within 5km from St Neots train station, providing sustainable transport options, a bus service is within 800m but the service is infrequent. There is a pavement opposite the site frontage (Great North Road) which could provide some integrated active travel opportunities and connectivity to the settlement. The site abuts the A1 and so is likely to suffer from air, light and noise pollution from traffic.

SA7	<ul style="list-style-type: none"> <li>Promote opportunities to protect and enhance valued landscape and townscape characteristics?</li> </ul>	--	<p>The village of Southoe is predominantly situated in eastern edge of the Great Ouse Valley Character Area, the ecological value of which is recognised through the designation of Sites of Special Scientific Interest or County Wildlife Sites. Although separated by the A1, the proposed site still sits within a landscape which retains many features reflective of this area.</p>
	<ul style="list-style-type: none"> <li>Reinforce local distinctiveness and a sense of place?</li> </ul>		

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			<p>The remainder of the site is located within the Southern Wolds, this area incorporates the lower valleys of the River Kym which lies south of the site and forms a broad valley. This is evident in the site's topography where the site slopes downwards toward the A1, with its lowest point being its south eastern corner. This is some 25m lower than its north western corner. The Southern Wolds is very rural in character with scattered villages and benefits from long views over the surrounding countryside. It is characterised by a number of woodland types, including ancient woodland, also present on the edge of the proposed site. These features promote a sense of enclosure contributing to the tranquillity of the area. The gradual loss of traditional features of the agricultural landscape are also affecting the landscape character of the Southern Wolds and it is considered that large scale development in this area would fundamentally impact the setting, preservation and management of existing deciduous woodlands and have an intrusive impact on the landscape and long distance views. Southoe is a small rural village and the scale of development proposed would substantially alter the character and form of the village.</p>
SA8	<ul style="list-style-type: none"> <li>• Promote actions to reduce contributions to air pollution?</li> <li>• Facilitate the minimisation of light, noise and odour pollution, in particular on the rural environment</li> </ul>	-	<p>The scale of potential development would generate an amount of light and noise pollution on the village of Southoe significantly greater than it currently experiences. Increased development also has the potential to increase traffic and travel on and around the A1 with the potential to increase air pollution. However as the village is adjacent to the A1 the impact of this would require further investigation.</p>
SA9	Facilitate the delivery of the district's housing needs in sustainable locations that meet the community's needs?	++	<p>This site is located adjacent to the A1 with the market town of St Neots close by. The potential for public and active travel connections to this centre to provide sustainable access to services, employment and local facilities is unknown. Safe access across the A1 for active</p>

SA16	<ul style="list-style-type: none"> <li>Conserve and where possible enhance sites, features and area of archaeological value throughout the district?</li> </ul>	-	The settlement contains some listed buildings.

SA Objective	Decision aiding questions: Will approach/ option help to....	Score	Commentary
			The site promoter notes that an archaeological dig in the early 1930s investigated the former medieval manor and moat to the south of the site which has opportunity to be integrated into future open space. Further archaeological work was undertaken as part of the recent wind turbine development uncovered late Iron Age to Romano British features. Further investigation and conservation and enhancement of the medieval manor and moat and other uncovered features would require addressing.

#### Summary of SA

Southoe Garden Village proposal wholly greenfield agricultural land. The site surrounds the small settlement of Southoe and is adjacent to the A1 extending significantly into open countryside. Manor farm has been included within the site (which includes one residential unit and associated agricultural uses) which lies south of the village, therefore the reuse of previously developed land is extremely minimal. The vast majority of the site is grade 2 agricultural land with a small proportion being grade 1. The majority of the site is flood zone 1 with areas of flood zone 2 and 3a. Risk from surface water flooding is present across the site.

The site is in an area of relatively high market demand for new homes. It surrounds the existing community of Southoe and development as a new settlement has the potential to be integrated with this community and enhance its sustainability through greater access to local services and facilities. The site proposes some employment opportunities and is in proximity to diverse employment opportunities in St Neots. The location offers potential opportunity to improved public transport connectivity through its location next to the A1 which could provide further linkages to St Neots railway station, although the certainty of this is unknown. Opportunities are also present for enhancing active travel linkages both for day-to-day and leisure journeys. Substantial facilities would be required on site such as education, local convenience shopping, community and leisure infrastructure to support sustainable lifestyles for any future residents. Integration of these with the existing community of Southoe would boost their sustainability. Two primary schools, one secondary school, neighbourhood hubs, and a district centre are proposed to support residential development.

The land currently has a wholly agricultural character with its sense of place being that of the open countryside. A strong landscaping scheme would be required given the open nature of the site, topography and the sensitive habitats surrounding it. The site is bounded by Little Paxton Wood (a SSSI and ancient woodlands), there are several ancient woodlands which surround the site and County Wildlife Sites within and adjacent to the site, which would require appropriate protection from the impacts of any development. An increased population in this area could detrimentally impact the wear and usage of these areas potentially putting them at risk.

# 1 Southern Huntingdonshire

Development would fundamentally alter the landscape setting and any scheme would need to create a wholly new sense of place. Development would impact significantly on the character Southoe completely transforming the scale, nature and character of the existing rural settlement. Development would also impact long distance views of open countryside from all aspects and from the village and A1.

The scale of potential development would generate an amount of light and noise pollution. Development also has the potential to increase traffic and travel on and around the A1 with the potential to increase air pollution.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site is north of the residential development and separated by Priory Hill Road extending into the countryside. Residential properties south of Priory Hill Road face inwards with predominantly back gardens abutting the road, there are therefore challenges to successfully integrating development into the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	There are no designated heritage assets within or in close proximity to the site.

## Summary of SA

Flood zone 2 over 50% of the site and the western edge of the eastern portion of the site, but would be a compatible use for proposed green infrastructure/ biodiversity net gain / environmental initiatives. Surface water and fluvial flood risk would require mitigation.

Just over half of the eastern portion of the site is within flood zone one and surface water flood risk is present on some of the site. There are no heritage constraints affecting the site.

The eastern part of the site is within the Great Ouse Green Infrastructure Strategic area. The site is highly exposed in both the local landscape and in longer distance views, significant landscaping would be required to mitigate impact of the development, with the River Great Ouse a prominent feature on the western boundary. Proposed housing between the railway line and the B1043 is the open countryside and the site is detached from residential development by Priory Hill Road. The site relates more closely to its countryside setting and development would create an isolated pocket of residential development, with little relationship to its surrounding countryside location. Due to the significant slope towards the railway line building elevations could significantly impact the landscape character.

The site is approximately 1.5km from St Neots train station, a bus service within 800m is nearby but is infrequent. The pavement immediately across the road from the site on Mill Lane provides some integrated active travel opportunities.

The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability and proposed green infrastructure would promote biodiversity and active leisure uses.

The closest town centre is St Neots which is within 1.5km from the site as is Station Road Industrial Area, providing leisure education and employment opportunities. Its location close to Priory Junior School and Longsands College Secondary School, Priory Park playing/ sports fields and approximately between 1-2km from multiple culture and leisure facilities in St Neots town centre provides potential employment and social opportunities, whilst potential additional retail could support the immediate needs of a new community. Integration of the site with the nearby residential area of St Neots, with safe crossings and enhanced transport infrastructure could pose a significant challenge.

St Neots Water Recycling centre within the centre of the western parcel of the site meaning that only approximately 13.5ha of the eastern parcel of land proposed for residential development site sits outside the Water Recycling Area buffer zone, increasing the potential odour impact on future residents. The eastern portion of the site is also bounded by the railway line meaning that noise and vibrational impacts are highly likely.

SA13	<ul style="list-style-type: none"> <li>Provide opportunities for the creation of new businesses beyond supporting people working from home?</li> <li>Facilitate retention or expansion of existing businesses?</li> <li>Support provision of tourism facilities or services appropriate to the sustainability of its location?</li> </ul>	N	The proposal does not include employment, commercial or tourism uses.
SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include retail or social uses so does not apply.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	-	The site forms a fundamental part of the Great Ouse Valley Priority Landscape Area, development in this location would impact upon the sensitivity and setting of an important landscape corridor.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	The site is wholly within a conservation area

#### Summary of SA

The site is constrained by flood risk, over half of the site is within flood zone 2 and some within flood zone 3a and 3b, 41% of the site is flood zone 1, surface water flood risk is also present. The site is wholly within a conservation area but not constrained by any listed buildings.

The site is within the Great Ouse Green Infrastructure Strategic area and is also a Natural Cambridgeshire Priority Landscape Area (Great Ouse Valley). The site forms a significant part of these areas and the green corridor stretches from Eaton Ford and Eynesbury and north towards the town centre and Riverside Park. Its proximity to Local Green Space Riverside Park and the The Pightle Millennium Green means that residential development would fundamentally impact the landscape setting, biodiversity and ecology of the area and wider countryside. Residential development on this site would have significant biodiversity, landscape, light and environmental impacts.

# 1 Southern Huntingdonshire

The site is approximately 1km from St Neots town centre, 1.1km from Bushmead Primary School and 800m from St Mary's Church and River Mill pub and adjoins to playing fields and Riverside Park by public footpath. It is also 1-1.5km from leisure and cultural facilities a secondary school and industrial and business parks. However it is considered that the significant impact on the Great Ouse Valley - closely associated with the identity of St Neots would override any benefits associated with additional housing provision. Proximity to St Neots train station and bus services assist in accessibility to this valued landscape with social and cultural opportunities providing additional benefit to enhance the leisure experience.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	A Scheduled Monument - Castle Hills - bounds south eastern corner of site with mature trees and hedgerow. The site is also wholly within a conservation area

## Summary of SA

The site is not constrained by fluvial flood risk, surface water flooding is present on the site. It is grade 3 agricultural land, is wholly greenfield and is uncultivated with public access. A Scheduled Monument - Castle Hills - bounds south eastern corner of site with mature trees and hedgerow and protected ash tree sits just outside the north eastern boundary the impact of development near which would need careful consideration. The majority of the site sits within the Great Ouse Green Infrastructure Strategic area and is wholly within a conservation area. The site comprises the south western corner of the green corridor acting as a gateway to green infrastructure which stretches from Eaton Ford and Eynesbury and north towards the town centre and Riverside Park. Residential development could fundamentally impact the landscape setting, biodiversity and ecology of the area and wider countryside. Residential development in this location could create an isolated pocket of development, with little relationship to its surrounding countryside location fundamentally altering the gateway to a significant green corridor associated with the River Great Ouse.

Development of the site will be visible from public space, in particular the bridge over the river.

The site is approximately 1km from St Neots town centre, Bushmead Primary School and within 800m from St Mary's Church, multiple public houses, Jubilee Hall and playing fields. It is also within 1.5km a secondary school and industrial and business parks. It is within 5km from St Neots train station and 800m from a bus service. These indicate sustainable access to employment, social, cultural, leisure and employment opportunities.

## Updates after initial appraisal

--

**St Neots 4: Land North of the A428, St Neots**

**1.18** As identified in the LAA, 99% the site is wholly within flood zone 3b. The site promoter has put the site forward for 11 to 12 commercial units which are classed as less vulnerable uses in the NPPF meaning that this type of development should not be permitted in flood zone 3b. The remaining land would not be capable of providing commercial units or mitigation against risk, considering this, the site is considered unsuitable for development. As such, a sustainability appraisal for the site has not been undertaken.

SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is previously developed but nearby residential development all has rear gardens to the site other than those directly facing onto the Hall Road access route.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	No known designated heritage sites are located within or in close proximity to the site.

## Summary of SA

The site is at significant flood risk for both fluvial and surface water flooding which impede the ability to safely develop it for the requested residential use. It is previously developed land, mostly classed as urban but around a quarter as grade 1 agricultural land. The site has good access to natural open space and is partially within the Great Ouse Valley priority landscape area although it would have limited opportunities to contribute to this. The site may be impacted by both noise and light pollution from adjoining uses. The site is well located in terms of access to education, employment, social and sports facilities. It is within cycling distance of the railway station but has an infrequent bus service. Development would not impact on any known heritage assets.

## Summary of SA

The site is not constrained by fluvial flood risk or heritage designations. The site is predominantly grade 2 best and most versatile agricultural land, is wholly greenfield and is in agricultural use. There is minimal surface water flood risk.

The site is bounded by the railway line, the A428 and the the B1046 and screened by with trees and hedgerow and banking associated with the railway line, it has no direct relationship to the landscape. However the elevation of the buildings could make the development more prominent due to the sloping nature of the site. Although a small portion of the land is identified as being in the Ouse Valley Priority Landscape Area, this is significantly detached providing no connectivity or direct relationship with the area due to the presence of the railway line.

The site could relate well to Wintringham Park to the north once complete, and through the provision of pedestrian links to the north and west, has the potential to be integrated with the community.

The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability.

The closest town centre is St Neots which is within 5km , its location on the edge of a market town provides potential employment and social opportunities. The site is approximately 5km from St Neots train station, providing some sustainable transport opportunity, there are no bus services within 800m. The site is approximately 1.5km from Ernulf Secondary School and within 800m of Wintringham Primary Academy meaning some facilities are nearby.

## Updates after initial appraisal

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	++	No known heritage sites are located within or in close proximity to the site

Summary of SA

The site is not constrained by fluvial or surface water flood risk nor heritage or nature conservation designations. It is grade 2 best and most versatile agricultural land, is wholly greenfield and acts as a landscape transition from the A426/Cambridge Road roundabout and residential development further north east mirroring the intention of Strategic Allocation (Wintringham Park) to the east. Landscaping to address this visual impact would be essential to the compatibility of any proposed scheme with the form and character of the area.

The closest town centre is St Neots which is within 5km from the site as is an Industrial Estate, its location on the edge of a market town provides potential employment and social opportunities. The site is approximately 5km from St Neots train station and It is within 800m from a bus service operating a frequent service providing sustainable transport opportunities. A pavement that adjoins onto the site frontage, which can provide active travel opportunities. The site is approximately 1.5km from Wintringham Primary Academy and 800m from Loves Farm Church meaning some facilities are nearby.

The site is bounded by the A428 and abuts the Cambridge Road roundabout so residential development is likely to suffer from noise, air light and air pollution. The range of development options proposed provide a varied assessment of their sustainability, for example commercial uses could be of a scale to cause additional pollution, whilst battery storage would not. Access to the site by vehicle in a safe manner could be a barrier to the safety of road users and pedestrians if residential or commercial options were chosen due to proximity to the roundabout.

SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are designated heritage assets (grade 2 listed building on Tithe Farm) that could be adversely impacted by the development.

**Summary of SA**

The majority of the site is within flood zone 1, 0.3ha of the site is in flood zone 3b which presents the opportunity for flood mitigation.

It is grade 2 best and most versatile agricultural land, is wholly greenfield and is in agricultural use. The vast majority of the site is greenfield land, the only buildings on site are from Tithe Farm (grade 2 listed building) which includes one residential building (the remainder being agricultural use) . The setting and preservation or enhancement of which would be required.

The site is currently open countryside. The site relates well to the settlement being located on its eastern edge adjoining Strategic Extension Loves Farm 2 which once completed would mean that the proposed site would abut new homes . Cambridge road forms a strong southern edge to the site. The north of the site rises steeply with the potential to screen housing development from the countryside if masterplanned effectively. Proposed linkages into Loves Farm 2 are uncertain until reserved matters on Loves Farm 2 are confirmed.

However the site relates closely to the open countryside and patches of wooded area across the site could be adversely impacted by the development if masterplanned ineffectively. The scale of development could make an efficient use of land. The proximity of the site in relation to the A428 may give rise to additional levels of air, noise and visual pollution which may require mitigation. However, development in this area through Loves Farm and Wintringham Park demonstrates that this could be mitigated.

The scale of the site provides opportunities for a range of sizes, types and tenures of home facilitating social sustainability. The site promoter proposes that all other uses are to be determined this includes a school, health uses and neighbourhood hub and commercial uses, due to the uncertainty of further proposed uses this cannot be assessed as a certain and as such how sustainable the development could be for new residents. The closest town centre is St Neots which is within 5km from the site as are two Industrial Estates, its location on the edge of a market town provides potential employment and social opportunities. The site is approximately 5km from St Neots train station, providing some sustainable transport opportunity, there are no bus services within 800m. A pavement that adjoins onto the site frontage, which can provide active travel opportunities. The site is approximately 1.5km from Wintringham Primary Academy meaning some facilities are nearby.

	<ul style="list-style-type: none"> <li>Use land in flood zone 1 (unless the proposed use is water compatible) taking into account the impact from surface water flood risk?</li> </ul>	++	The site is wholly located within flood zone 1 with no recorded risk from surface water flooding.
SA4	<ul style="list-style-type: none"> <li>Prioritise development of previously developed land?</li> </ul>	--	The site is greenfield land grade 3 agricultural land. The site is a disused cricket ground and has a built structure on it
	<ul style="list-style-type: none"> <li>Prioritise development on land of agricultural land grade 3 or lower (including urban and non-agricultural land)?</li> </ul>	-	
SA5	<ul style="list-style-type: none"> <li>Promote new development with opportunities to participate in leisure and recreation using publicly accessible natural green space?</li> <li>Could development contribute towards enhancing or increasing the strategic green or blue infrastructure network or linkages to it?</li> </ul>	+	The site is within 200 m of a 0.5 ha area of natural green space.
SA6	<ul style="list-style-type: none"> <li>Impact on a designated site of biodiversity or geodiversity significance?</li> </ul>	++	The is sufficiently remote from designated nature sites so it is unlikely there will be an impact.
	<ul style="list-style-type: none"> <li>Ensure current strategic ecological networks are not compromised, and future improvements in strategic habitat connectivity are not prejudiced?</li> </ul>	-	The site is located outside any of Natural Cambridgeshire's Priority Landscapes and has limited potential to contribute towards improvements strategically in habitat connectivity.
SA7	<ul style="list-style-type: none"> <li>Make efficient use of land whilst also protecting the form and character of the local area?</li> </ul>	-	The site is located on the edge of Yelling High Street and was formerly used as a cricket ground. Although the site relates well to the existing built form, it lies next to the Yelling conservation area and adjoins the open country side to the south, east and west. The site promoter is

## 1 Southern Huntingdonshire

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
			seeking to develop the site for 40 homes which is higher than the surrounding properties. This would not make an efficient use of land and would not reflect the character of the area of the existing built form. Also, the amount of development would not contribute to protecting the form and character of the surrounding townscape and landscape. Access to the site can be achieved from a field road shared with the land to the north (Yelling 1) which connects to the High Street. However, achieving access for the proposed 40 homes in addition the proposed 20 homes for the adjoining site (Yelling 1) via the field road may not be ideal and would require further scoping.
SA8	<ul style="list-style-type: none"> <li>Be unlikely to cause or suffer from widespread light, noise, odour or visual pollution?</li> </ul>	+	The proposal is distant from major sources of pollution and not of a scale likely to cause substantial pollution.
SA9	<ul style="list-style-type: none"> <li>Contribute to meeting a wide range of the types, sizes and tenures of housing needed across the district?</li> <li>Meet the needs of specific housing groups such as gypsies and travellers or older people?</li> <li>Contribute to diversification of the housing supply by being no more than 1 ha in size?</li> </ul>	+	The site promoter is seeking to develop the site for 40 market and/or affordable homes which will contribute to the housing needs of the district.
SA10	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access town centres and local convenience shops?</li> </ul>	-	The closest town centre is St Neots which is in excess of 5km from the site. The nearest settlement is Yelling but this does not have a local convenience shop.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access education facilities?</li> </ul>	--	Yelling does not have a primary school and the nearest primary school is in Eltisley (South Cambridgeshire District). The site is of insufficient capacity to provide a school on site.
	<ul style="list-style-type: none"> <li>Minimise the distance people need to travel to access leisure and cultural facilities?</li> </ul>	N	The site is within 800 m from the Yelling Baptist Church.

SA Objective	Decision aiding questions: Will allocation of the site....	Score	Commentary
SA11	<ul style="list-style-type: none"> <li>Facilitate access to a range of employment opportunities?</li> </ul>	--	<p>The site is not located within 1.5km of an existing concentration of employment and proposes potentially no employment development.</p> <p>It benefits from superfast broadband in the vicinity.</p>
	<ul style="list-style-type: none"> <li>Be in a location with high quality digital infrastructure?</li> </ul>	+	
SA12	<ul style="list-style-type: none"> <li>Benefit from access to public transport infrastructure?</li> </ul>	--	<p>The site is more than 5 km from St Neots railway station and Yelling has no bus service.</p> <p>The site is within 500 m of a public right of way</p>
	<ul style="list-style-type: none"> <li>Benefit from access to active travel infrastructure for practical and social activities?</li> </ul>	+

SA14	<ul style="list-style-type: none"> <li>Reinforce the role of town, local and village centres in serving their communities?</li> </ul>	N	The proposal does not include new or result in the loss of retail or social facilities or the retention or modernisation of existing facilities.
SA15	<ul style="list-style-type: none"> <li>Provide high quality development sensitive to the character of the local environment?</li> <li>Promote sustainable design solutions?</li> <li>Provide opportunities to incorporate crime reduction measures?</li> </ul>	+	The site is located such that it can be effectively masterplanned to become part of the existing place and community.
SA16	<ul style="list-style-type: none"> <li>Impact on any heritage assets or their settings?</li> </ul>	-	There are designated heritage assets that could be adversely impacted by the development

# 1 Southern Huntingdonshire

## Summary of SA

The site is not constrained by fluvial flood risk and does not have surface water flood risk. The site is located on the edge of Yelling High and was formerly used as a cricket ground. Although the site relates well to the existing built form, it lies next to the Yelling conservation area and adjoins the open country side to the south, east and west. The amount of development would not contribute to protecting the form and character of the surrounding townscape and landscape and would have detrimental effect on the character of the area. It is remote from educational, retail and employment destinations and has no public transport access although it is within 800 m from the Yelling Baptist Church.

## Updates after initial appraisal

This page is intentionally left blank

**Public**  
**Key Decision – Yes**

## HUNTINGDONSHIRE DISTRICT COUNCIL

**Title/Subject Matter:** Fens & Lincs Reservoirs

**Meeting/Date:** Cabinet – 16th July 2024

**Executive Portfolio:** Executive Councillor for Economy, Regeneration and Housing

**Report by:** Chief Planning Officer

**Wards affected:** Lincolnshire Reservoir: Stilton, Folksworth & Washingley (Stibbington, Sibson and Chesterton parishes)  
Fens Reservoir: Somersham and Holywell-cum-Needingworth (Bluntisham and Earith parishes)

---

### **Executive Summary:**

Anglian Water, in partnership with Cambridge Water, is in the pre application stage of Development Consent Orders for Fens Reservoir and the Lincs Reservoir respectively, both with associated infrastructure requirements. Recognising the East of England as an area of high growth the reservoirs aim to secure a reliable supply of water for the future and create new opportunities for the region to thrive and grow.

In late 2022 a first phase of consultation on the sites identified was held and early concept designs.

The second phase of non-statutory consultation opened on 30th May and will close on 9th August 2024. This consultation outlines the preferred location of the associated water infrastructure needed for both reservoirs in order to fill them, treat the water and distribute the water to our homes and businesses.

Following this consultation there will be at least one further statutory consultation, likely mid- 2025, in line with the requirements of the Planning Act 2008, on the proposals prior to submission of the Development Consent Order (DCO) application.

The Council has been collaborating with a number of partners under the Fens Water Partnership in order to consider the potential development of the Fens Reservoir with an aim of creating a sustainable water resource for the area and future growth, whilst also enhancing the environment and wider social-economic opportunities for local communities.

During the current round of consultation, a number of events have been held as identified on their website ( link in background papers)

Due to the statutory timings required, a short window of time is given in order for the consultation documentation to be considered and responded to by specialists across the council. As such it is not possible to prepare a draft response on this now or for a later Cabinet meeting. With that in mind, the proposal in this report is to seek authorisation for a response to be prepared with officers and authorisation to be delegated to the Chief Planning Officer, in consultation with the Leader and Executive Councillor for Economy, Regeneration and Housing, to prepare and submit formal comments on the current second non statutory consultation on the Fens and Lincs reservoirs and associated infrastructure proposals.

Delegation is further sought on the next stages of work due to the statutory time constraints to respond to DCO matters incorporating a range of specialist support.

### **Recommendations:**

The Cabinet is

### **RECOMMENDED**

1. to authorise the Chief Planning Officer, in consultation with the Leader and Executive Councillor for Economy, Regeneration and Housing, to prepare and submit formal comments on the current second non statutory consultation on the Fens and Lincs reservoirs and associated infrastructure proposals; and
2. to delegate authority to the Chief Planning Officer to take all associated action necessary in the interests of the efficient and timely conduct of the Council's compliance with the Fens Reservoir and the Lincs Reservoir DCO procedures including but not limited to:
  - a) prepare the Council's responses to any written questions from Examining Authority during the DCO Examinations and to submit those to the Examining Authority;
  - b) settle the content of and submit any Written Representations to the Examining Authority;
  - c) to negotiate, settle and complete any legal agreements relevant to secure the granting of a DCO pursuant to the applications;
  - d) settling and the submission of the Statement of Common Ground to the Examining Authority;
  - e) the instruction of witnesses and legal advisors throughout the Examination process if required; and
  - f) the discharge of DCO requirements made under any development consent order granted by Secretary of State.

## **1. PURPOSE OF THE REPORT**

- 1.1 This report provides an outline of the details set out in the second non-statutory consultation on the Fens and Lincs reservoirs proposal and associated infrastructure. It sets out the background to these proposals at this stage, which is part of the pre-app stage prior to the submission of the projects as separate Development Consent Order (DCO) applications. Due to the timing of the consultation, delegation is sought to enable the Council response to be submitted within the statutory, short timeline.

## **2. WHY IS THIS REPORT NECESSARY/BACKGROUND**

- 2.1 The Fens and Lincs reservoirs projects are recognised as Nationally Significant Infrastructure Projects (NSIPs). They are both major investment proposals to secure a reliable supply of water for current and future communities and businesses across Huntingdonshire and the wider region. They will enable extra water to be stored, providing a level of resilience, volume of water and environmental opportunities that are not provided by other resource options such as desalination or water reuse.
- 2.2 Following the National Framework for Water Resources in 2020 the way water companies planned for the future changed. They are required to collaborate across boundaries to develop regional plans. Huntingdonshire sits within the Water Resources East. From these plans, the water companies then develop their Water Resources Management Plan (WRMP). This sets the plans and investments for the company such as building new water resources. Both the Anglian Water and the Cambridge Water WRMPs identify the proposals as crucial to meet the growing demands on water supplies and to protect the environment.
- 2.3 The Council has been collaborating with a number of partners under the Fens Water Partnership in order to consider the potential development of the Fens Reservoir with an aim of creating a sustainable water resource for the area and future growth, whilst also enhancing the environment and wider social-economic opportunities for local communities.
- 2.4 Through early engagement key priorities for the Parishes, residents and businesses of Huntingdonshire can be shared with Anglian Water. These include (but not limited to) ensuring key objectives of the Councils Corporate Plan and Place Strategy can be shared and included as part of the delivery strategy to deliver new water-related infrastructure. This includes matters such as maximising opportunities for active travel, enhancing the visitor economy of Huntingdonshire and ensuring skills opportunities in the delivery of the new reservoirs are made available to local residents.

## **3. RESERVOIR PROPOSALS**

- 3.1 The proposed reservoirs have an important role to play in the future growth aspirations for Huntingdonshire and the wider region. The reservoirs themselves will sit outside of Huntingdonshire and will have a water surface areas of approximately 5km<sup>2</sup> - around the size of Grafham Water

- and hold up to 55 million cubic metres of water each. They will have the potential to supply up to 250 million litres of water a day between them for over half a million homes, as well as protecting the environment by enabling a reduction in the amount of water taken from rivers and underground aquifers elsewhere in the region. The associated infrastructure will be regional including within the district. The points relevant to Huntingdonshire District Council are:

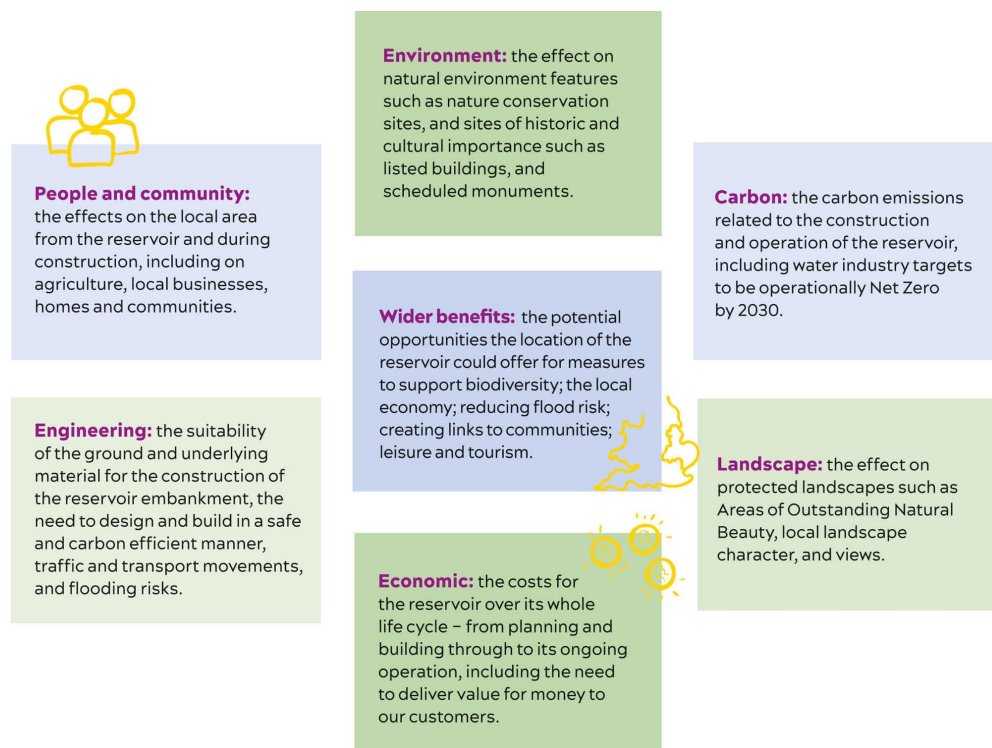

#### Fens Reservoir

- Upstream infrastructure options remaining to transport water from Great Ouse (Earith) Source to the reservoir
- Emergency drawdown, in the very unlikely event this is required, excess flows would be disposed of via the Sixteen Foot Drain
- Downstream infrastructure options remaining to transport potable water into Cambridge supply at Bluntisham, and Madingley incorporating a pipeline spur to Bluntisham including a service reservoir and one piped option to Madingley.

#### Lincs Reservoir

- Downstream infrastructure options remaining for treating water and passing into supply at one of three connections points, including a piped option Wilsthorpe to Chesterton. This would include a service reservoir to the east of Elton Furze Golf Club.

3.2 A range of factors have been assessed in considering the project and associated infrastructure as set out below.

3.3 The current non statutory consultation details can be found on the [Fens Reservoir Website](#) and [Lincs Reservoir Website](#). The consultations will

run until from 30 May for 8 weeks. A number of drop-in events, pop-up events and online events will be held .

#### **4. CONSULTATION**

4.1 The current non statutory consultation details can be found on the [Fens Reservoir Website](#) and [Lincs Reservoir Website](#). The consultations will run until from 30 May to the 9<sup>th</sup> August. A number of drop-in events, pop-up events and online events are being held to ensure opportunities for local residents, businesses and Parishes to engage with Anglian Water. Details are available on Anglian Water's website

4.2 The consultation documents will be reviewed by specialist technical officers at the Council and comments provided. Key areas for consideration could include:

- Air quality
- Land contamination
- Vibration effects
- Noise
- Landscape and Visual impacts
- Ecology and Biodiversity
- Cultural Heritage
- Health Impacts including walking/cycling opportunities
- Climate change

#### **5. COMMENTS OF OVERVIEW & SCRUTINY**

5.1 Comments are to be submitted by the 9th August 2024. Given the tight turn around, agreement has been sought by the Chair of Overview & Scrutiny (Performance & Growth) to present this directly to Cabinet recognising there will be a further non-statutory consultation in spring/summer 2025.

#### **6. KEY IMPACTS / RISKS**

6.1 The key impact from not carefully considering these two reservoir and associated infrastructure proposals could be that views of Huntingdonshire communities and businesses are not heard. The level of future growth within the district needs to be considered as part of these proposals to ensure there is sufficient water supply to meet our future needs.

6.2 In the event of tight timescales that do not allow for the formal cycle of meetings delegations are sought now to ensure prompt responses to future consultations.

#### **7. WHAT ACTIONS WILL BE TAKEN/TIMETABLE FOR IMPLEMENTATION**

7.1 Subject to Cabinet approval of the recommendations in this report, the Council response to this second non-statutory consultation will be submitted by the deadline of 9<sup>th</sup> August 2024.

7.2 Following this non-statutory consultation, Environmental Impact Assessment report and opinion will be undertaken by Anglian Water in consultation with statutory stakeholders. The next statutory consultation is expected in the Spring/summer of next year. Following this the DCO application will be submitted.

## **8. LINK TO THE CORPORATE PLAN, STRATEGIC PRIORITIES AND/OR CORPORATE OBJECTIVES**

*(See Corporate Plan)*

8.1 This will help to deliver across a range of the Council's Corporate Plan priorities specifically Creating a better Huntingdonshire for future generations by:

- Improved housing - 27. Maintain the level of new housing delivery, which meets the needs of Huntingdonshire residents, including the type of home and tenure (open market and social housing).
- Forward-thinking economic growth – 32. Continue to update the Local plan.
- Forward-thinking economic growth - 36. Influence delivery of infrastructure including East West Rail, A428, A141 Strategic Outline Business Case and future Transport Strategies

## **9. LEGAL IMPLICATIONS**

9.1 None currently for the Council as this is a non-statutory consultation response. Part 6 of the Planning Act 2008 sets out the legal requirements regarding Development Consent Order applications.

## **10. RESOURCE IMPLICATIONS**

10.1 There are no direct staffing implications arising from this report. A number of specialist officers across the Council are engaging in this process. As Nationally Significant Infrastructure Projects (NSIPs) this resource is considered necessary and is programmed and monitored within Planning Services and the wider Council.

10.2 Specialist officer input will increase as the NSIPs progress through the pre-application stage and into the DCO examination. Resource will need to be carefully planned for and balanced against other areas of statutory work including the determination of planning application and progress of the Local Plan.

10.3 There may be future budget implications for resource and or legal support through the formal DCO process.

## **11. HEALTH, ENVIRONMENT, CLIMATE CHANGE AND POLICY IMPLICATIONS**

11.1 As the Fens and Lincs Reservoir NSIPs progress, specialist officers will consider all appropriate implications for our current and future communities and businesses in responding appropriately and proportionately to the applications.

11.2 Through the consultation process Anglian Water will be strongly encouraged to maximise opportunities for environmental enhancements, to maximise biodiversity net gain and inclusion of active travel which will contribute to environmental and ecology improvements while improving health and wellbeing of residents.

## **12. REASONS FOR THE RECOMMENDED DECISIONS**

12.1 Due to the time constraints, outside of the control of the Council, the response for the second non-statutory consultation will not fit within programmed Cabinet cycle. Delegation is recommended to meet the requirements for responses to this and future areas of work for expediency.

Dear Ms. Underhill

### **Fens Reservoir and Associated Water Infrastructure Proposals - Phase Two Consultation**

I am writing on behalf of Huntingdonshire District Council (HDC) in relation to the above non-statutory consultation on the Fens Reservoir and associated water infrastructure proposals project.

Thank you for confirming in the email dated 8<sup>th</sup> July 2024 to Mrs. Burton that HDC's comments would be acceptable in letter and table form.

The Council's response is attached as appendix 1 to this letter. The Council recognises that the project is still in development and a further consultation will be undertaken in the summer months of 2025. For that reason, and through a continued collaborative approach, further detailed responses will be shared as the scheme progresses and the Development Consent Order process is taken forward.

While this consultation primarily focusses on the technical aspects of the proposal the Council would welcome continued close collaboration with Anglian Water to ensure opportunities to enhance wider infrastructure to support residents, businesses, and the visitor economy of Huntingdonshire, supporting the ambitions of Huntingdonshire District Council, as set out in our Huntingdonshire Futures Place Strategy ([Huntingdonshire Futures | Let's Talk Huntingdonshire](http://HuntingdonshireFutures.com) ([letstalkhuntingdonshire.net](http://letstalkhuntingdonshire.net))). We wish to maximise every opportunity to ensure our ambitions are met, delivered and will establish an enduring legacy ensuring Huntingdonshire remains one of the best places in the country to live, work and invest. It is recognised that this scheme offers opportunities to enhance the health and wellbeing of our residents through active travel, we would wish to see environmental net gain maximised to create a visitor destination within the wider unique fens landscape and we also wish to work with you to ensure that as the scheme develops employment and skills development opportunities are made available to local residents working alongside local businesses.

If you have any further queries on any of the comments raised within this response please email [implementation@huntingdonshire.gov.uk](mailto:implementation@huntingdonshire.gov.uk) .

Yours sincerely,

A handwritten signature in black ink, appearing to read 'C. Kerr'.

**Clara Kerr**

**Chief Planning Officer**

## Appendix 1

- 1.1 Huntingdonshire District Council Cabinet met on the 16<sup>th</sup> July 2024 and approved the preparation and submission of formal comments on the current Phase 2 non statutory consultation on the Lincolnshire Reservoir and associated water infrastructure proposals project.
- 1.2 Comments are only provided in the main on the associated infrastructure elements that fall within Huntingdonshire District Council rather than on the overall scheme.
- 1.3 It is considered that the Lincolnshire Reservoir and associated water infrastructure proposals project is seen as a key opportunity to support the water needs of our communities and meet the growth agenda set out in our Local Plan 2036.
- 1.4 The Council has liaised with its specialist officers and the responses are set out in the table below.

Specialism	Proposal aspect referred to	Comments
Planning Policy	Options Appraisal Report Page 11, para 2 Loss of Habitat	Option A: Loss of habitat from Ouse washes should ensure habitat restoration and betterment post scheme completion, due to European designated status. The same would apply if Option B were to be chosen. Regard should be had to acceptable water levels to ensure habitat status is not adversely impacted.
	Page 11 – General comment:	Agree that both schemes (A and B) should look to reduce flooding. Schemes should work towards achieving betterment in relation to risk of flooding from all sources.
	Page 91 – 6.2.2 –	Abstraction from the Ouse Washes would result in loss of habitat. The scheme should ensure habitat restoration and betterment post scheme completion, due to European designated status. Consideration of water quality treatment to mitigate against invasive species (paragraph 6.2.4) is commended and requires serious consideration. Regard should be had to acceptable water levels to ensure habitat status is not adversely impacted. Scheme should look to reduce flooding. Schemes should work towards achieving betterment in relation to risk of flooding from all sources, this is especially pertinent to Earith which has significant flooding at points in the year resulting in the closure of the A1123 for safety reasons.
	Page 92, paragraph 6.2.11.	“The downstream pipeline corridor towards Madingley and Bluntisham runs initially in a south-west direction from the water treatment works towards Somersham. From here it continues south, with a spur connection to the service reservoir at Bluntisham. The route continues south, followed by routing around the east of Fen Drayton Lakes near to Swavesey. The route is 43.3km of pipeline and would be installed by open cut installation techniques except where it crosses the constraints, such as A roads, detailed in Paragraph 3.3.8.” These rural settlements are relatively isolated and a transport assessment and impact on traffic and transport

Specialism	Proposal aspect referred to	Comments
		movements would be welcomed to ensure minimal impact to residents.
	Page 92, paragraph 6.2.13 & 14	<p>“The area of land identified for siting of a new service reservoir at Bluntisham is located directly north-west of the village, north of Wood End Road.</p> <p>6.2.14 The new reservoir at Bluntisham would require a spur from the downstream transfer to Madingley. This spur would start north of Wheatsheaf Road and west of Pidley Sheep Lane. The circa 3.5km pipeline would cross the B1040 north of existing dwellings, routing in an east-southeasterly direction towards the new service reservoir.”</p> <p>These rural settlements are relatively isolated and a transport assessment and impact on traffic and transport movements would be welcomed to ensure minimal impact to residents.</p>
	Page 94, paragraph 6.3.1	<p>“WSO-B would take water from the Great Ouse at Earith and the River Nene and its Counter Drain. Water from the Great Ouse at Earith would be piped directly to the reservoir or the Middle Level system.”</p> <p>Abstraction from the Ouse Washes would result in loss of habitat. The scheme should ensure habitat restoration and betterment post scheme completion, due to European designated status. Consideration of water quality treatment to mitigate against invasive species requires serious consideration. Regard should be had to acceptable water levels to ensure habitat status is not adversely impacted. Scheme should look to reduce flooding. Schemes should work towards achieving betterment in relation to risk of flooding from all sources, this is especially pertinent to Earith which has significant flooding at points in the year resulting in the closure of the A1123 for safety reasons.</p>
	Page 94, paragraph 6.3.2	<p>“Water would be conveyed directly to the Fens Reservoir from the Great Ouse at Earith using a 1,500mm diameter pipeline of approximately 19.3km in length. It would be installed via open cut installation techniques except where it crosses the constraints, such as A roads, detailed in Paragraph 3.3.8.”</p> <p>Earith is relatively isolated and a key commuting route for many residents in and outside the district, a transport assessment and impact on traffic and transport movements would be welcomed to ensure minimal impact to residents.</p>
	Page 94, paragraph 6.3.3	<p>“The proposed pipeline corridor follows a route from south of Bluntisham within the RSPB Hanson Ouse Fen Nature Reserve north-west towards Pidley. Following crossing of the B1040 it realigns northwards between Pidley and Somersham, before heading north-east, skirting Somersham towards Chatteris.”</p> <p>These rural settlements are relatively isolated and a transport assessment and impact on traffic and transport</p>

Specialism	Proposal aspect referred to	Comments
		movements would be welcomed to ensure minimal impact to residents.
	General comment, chapter 6	There are opportunities that should be considered to enhance active travel opportunities in conjunction with the installation of associated infrastructure, there is an opportunity to enhance provision in areas such as Somersham, Bluntisham, Pidley, Earith etc.
	General comment, chapter 6	Both schemes should ensure no deterioration of water quality and habitat status and look towards betterment.
	General comment	Downstream transfer pipelines for both options A and B run through Huntingdonshire Local Plan's Green Infrastructure Priority Area of the Great Ouse Valley, and some County Wildlife sites. In addition, the pipeline will pass north of Holywell conservation area. These sites can be found on our interactive policies map: <a href="https://3csharedservices.org">HDC Local Planning Policies (3csharedservices.org)</a> and can be provided as shape files on request. The relevant Local Plan policies are LP 3 Green Infrastructure, LP 11 Design Context. Local Plan policy LP 3 notes that "A proposal within the Ouse Valley Landscape Character Area, defined in the Huntingdonshire Landscape and Townscape Assessment Supplementary Planning Document will be supported where it contributes to the landscape, wildlife, cultural and historical value of the area." The policy also includes improvements to accessibility, naturalness and connectivity of green spaces, assisting in achieving Natural England's ANGST standard, maintaining and enhancing rights of way network amongst its criteria. As a strategic policy for the district, it is requested that any pipeline and service reservoir development aim to meet the aims of this policy and contribute to these objectives in a positive manner. Policy LP 11 looks towards the <a href="#">Huntingdonshire Landscape and Townscape Assessment SPD 2022</a> and our <a href="#">conservation areas</a> asking that regard is had to these and their valued characteristics. Likewise, it is requested that any pipeline and service reservoir development aim to meet the aims of this policy and contribute to these objectives in a positive manner.
Environmental Protection	General comment	The impact of construction and operational noise on nearby residents would need to be considered. It is possible for a new river intake with treatment equipment and a pumping station to be located on land to the south of Bluntisham known as Gull Field (south of the old railway). There are a number of dwellings along Station Road and Rectory Road to the north of this. It is also possible for a new service reservoir to be located to the north-west of Bluntisham on land known as "Colne Heath". This is situated north of The Heath (road). There are a number of dwellings situated alongside The

Specialism	Proposal aspect referred to	Comments
		Heath. These dwellings would need to be considered with regard to construction and operational noise. Dwellings located along the pipeline corridors would also need to be considered during the construction phases. A Construction Environmental Management Plan would need to be agreed prior to the start of any work.
	General comment	Land contamination would need to be assessed throughout the whole scheme in order to protect construction workers, end users and uncontaminated land and water.
	General comment	The air quality would need to be considered, in particular, any change of traffic movement through villages such as Bluntisham and Earith.
	General comment	The noise, land contamination and air quality assessments proposed by the specialist consultants during the Local Authority Associated Infrastructure Forum – round 1 meeting on 15 May 2024 were acceptable and will be required.
Built Heritage (excl archaeology)	Introduction	The proposals are at an early stage for above ground heritage, the proposed 500m route has been identified and a methodology established for the assessment of heritage assets – ( Built Heritage Methodology doc no SROP-MML-XXX-XX-RPT-TA 000193) the methodology however has yet to be applied and at this stage it is not possible to identify which heritage assets are likely to be affected by the works and what the impact is likely to be. The Council therefore is unable to provide a full and detailed response at this time.
	Para 3.2.3	States that the building heritage methodology has been designed to consider impacts arising from the reservoir and associated built infrastructure only. The Council would encourage the scope of the assessment to be extended to extend the methodology to address transfer works which may be limited in time but which may have impacts on the built heritage.
	Table 3.1 p15	Heritage Value Criteria. There is some confusion regarding the High and Medium heritage values, particularly as both categories refer to grade II listed buildings and conservation areas. Listed buildings by definition are of national importance it therefore seems unreasonable to group their significance with non designated sites of regional importance. It is unclear what criteria are used to determine what is substantial significance and good significance
	General	The Options Appraisal Report identifies two routes WSoA and WSoB, it is noted that WSOA is the preferred route as it states p11 that WSOA would likely result in lower level of impact on the value of designated heritage assets in the villages of Bluntisham and Earith ( are these assets scheduled monuments in which case these are the remit of Historic England). Minimising the impact of development on heritage assets through the

Specialism	Proposal aspect referred to	Comments
		consideration of initial design options is welcomed however it is not clear which assets will be affected by either route and why route A is better than route B The identification of ‘the setting of both Bluntisham and Earith Conservation Areas, including the Grade I Parish Church of St Mary, Grade II Bluntisham and Earith War Memorial and Grade II* Bluntisham House within the Bluntisham Conservation Area.’ It appears arbitrary when there is no mention of the impact on heritage assets in Holywell.
Landscape	General comment	This was a high-level overview of the emerging design of the proposed Fens Reservoir. This includes the proposed main reservoir site and associated water infrastructure. The proposed reservoir site, between Chatteris and March is of a purposely synthetic feature with indicative landscape elements emerging, which include woodland, wetland, floating wetland, grassland and other areas of land set aside for potential environmental mitigation and/or enhancement.
	General comment	Opportunities are emerging through the project vision which could be steered to create significant and lasting opportunities for the biodiversity and the emerging landscape. Care must be taken as the project evolves, to ensure that the emerging landscapes are not fragmented withing the wider landscape and to not feel alien within the receiving landscape character. Connectivity is key to deliver lasting benefits to biodiversity.
	General comment	The associated water infrastructure is currently shown as a 500m wide corridor. This is due to be narrowed down to a 50m wide corridor as the project further develops. The impact on the landscape at this stage is unclear. However, there is a real concern for how this will be routed particularly in the areas of Bluntisham, Holywell, the Great River Ouse and RSPB Fen Drayton Lakes in terms of visual impact of the receiving landscape and associated wildlife.

Dear Ms. Staples

## **Lincolnshire Reservoir and Associated Water Infrastructure Proposals - Phase Two Consultation**

I am writing on behalf of Huntingdonshire District Council (HDC) in relation to the above non-statutory consultation on the Lincolnshire Reservoir and associated water infrastructure proposals project.

Thank you for confirming in the email dated 8<sup>th</sup> July 2024 to Mrs. Burton that HDC's comments would be acceptable in letter and table form.

The Council's response is attached as appendix 1 to this letter. The Council recognises that the project is still in development and a further consultation will be undertaken in the summer months of 2025. For that reason, and through a continued collaborative approach, further detailed responses will be shared as the scheme progresses and the Development Consent Order process is taken forward.

While this consultation primarily focusses on the technical aspects of the proposal the Council would welcome continued close collaboration with Anglian Water to ensure opportunities to enhance wider infrastructure to support residents, businesses, and the visitor economy of Huntingdonshire, supporting the ambitions of Huntingdonshire District Council, as set out in our Huntingdonshire Futures Place Strategy ([Huntingdonshire Futures | Let's Talk Huntingdonshire \(letstalkhuntingdonshire.net\)](https://www.huntingdonshire.gov.uk/letstalk)). We wish to maximise every opportunity to ensure our ambitions are met, delivered and will establish an enduring legacy ensuring Huntingdonshire remains one of the best places in the country to live, work and invest. It is recognised that this scheme offers opportunities to enhance the health and wellbeing of our residents through active travel, we would wish to see environmental net gain maximised to create a visitor destination within the wider unique fens landscape and we also wish to work with you to ensure that as the scheme develops

employment and skills development opportunities are made available to local residents working alongside local businesses.

If you have any further queries on any of the comments raised within this response please email [implementation@huntingdonshire.gov.uk](mailto:implementation@huntingdonshire.gov.uk) .

Yours sincerely,

A handwritten signature in black ink, appearing to read 'C. Kerr'.

**Clara Kerr**

**Chief Planning Officer**

## Appendix 1

- 1.1 Huntingdonshire District Council Cabinet met on the 16<sup>th</sup> July 2024 and approved the preparation and submission of formal comments on the current Phase 2 non statutory consultation on the Lincolnshire Reservoir and associated water infrastructure proposals project.
- 1.2 Comments are only provided in the main on the associated infrastructure elements that fall within Huntingdonshire District Council rather than on the overall scheme.
- 1.3 It is considered that the Lincolnshire Reservoir and associated water infrastructure proposals project is seen as a key opportunity to support the water needs of our communities and meet the growth agenda set out in our Local Plan 2036.
- 1.4 The Council has liaised with its specialist officers and the responses are set out in the table below.

Specialism	Proposal aspect referred to	Comments
Planning Policy	General Comment	<b>Whole scheme options, options A to D all include the same downstream transfer route and reservoir location options, therefore all comments relate to all options.</b>
	<b>General comments all, related to chapter 4 (starting page 74) and paragraphs 6.2.12 (page 111), 6.2.13 (page 112), 6.3.6 (page 113), 6.4.11 (page 115), 6.5.5 (page 116)</b>	
		Downstream transfer pipelines and service reservoir locations run through Huntingdonshire Local Plan's Green Infrastructure Priority Area of the Great Ouse Valley, and some County Wildlife sites. In addition, the pipeline will pass through Wansford and Stibbington conservation area. These sites can be found on our interactive policies map: <a href="https://3csharedservices.org">HDC Local Planning Policies (3csharedservices.org)</a> and can be provided as shape files on request. The relevant Local Plan policies are LP 3 Green Infrastructure, LP 11 Design Context. Local Plan policy LP 3 notes that "A proposal within the Ouse Valley Landscape Character Area, defined in the Huntingdonshire Landscape and Townscape Assessment Supplementary Planning Document will be supported where it contributes to the landscape, wildlife, cultural and historical value of the area." The policy also includes improvements to accessibility, naturalness and connectivity of green spaces,, assisting in achieving Natural England's ANGsT standard, maintaining and enhancing rights of way network amongst its criteria. As a strategic policy for the district, it is requested that any pipeline and service reservoir development aim to meet the aims of this policy and contribute to these objectives in a positive manner. Policy LP 11 looks towards the <a href="#">Huntingdonshire Landscape and Townscape Assessment SPD 2022</a> and our <a href="#">conservation areas</a> asking that regard is had to these and their valued characteristics. Likewise, it is requested that any

Specialism	Proposal aspect referred to	Comments
		pipeline and service reservoir development aim to meet the aims of this policy and contribute to these objectives in a positive manner.
		Flood zone 3 and 3 b are located in areas associated with the River Nene and also run immediately west of the sites identified as potential service reservoir locations near Chesterton. Consideration of water quality treatment to mitigate against invasive species would require serious consideration. Regard should be had to acceptable water levels to ensure habitat status is not adversely impacted. Scheme should look to reduce flooding. Schemes should work towards achieving betterment in relation to risk of flooding from all sources.
		Downstream pipeline transfer is proposed through Wansford and near to Stibbington and Chesterton. Changes in transport movement and the short-term increase in construction traffic and large vehicles have the ability to significantly impact these rural settlements. A transport assessment and impact on traffic and transport movements, including pedestrian accessibility would be welcomed to ensure minimal impact to residents. In addition, these settlements benefit from access to the A1 and A47 allowing economic and social opportunity further afield, the impact of restricted access to these networks has the ability to impact these settlements and those further afield, something which should be considered, assessed and mitigated where possible.
Environmental Protection	General Comment	A reservoir and associated water supply pipeline infrastructure is proposed in the north of our district of Huntingdonshire in the fields to the west of the A1 between Chesterton and Peterborough Services. There are two different proposed locations of the reservoir, and we have no preference for either although recognise that the southern option is further away from Mound Lodge but is still close to Hill Farm.
	General Comment	The impact of construction and operational noise on nearby residents would need to be considered.
	General Comment	A Construction Environmental Management Plan would need to be agreed prior to the start of any work.
	General Comment	Land contamination would need to be assessed throughout the whole scheme in order to protect construction workers, end users and uncontaminated land and water.
	General Comment	The noise, land contamination and air quality assessments proposed by the specialist consultants during the Local Authority Associated Infrastructure Forum – round 1 meeting were acceptable and will be required.
Heritage (excl archaeology)	Introduction	The proposals are at an early stage for above ground heritage, the proposed 500m route has been identified and a methodology established for the assessment of

Specialism	Proposal aspect referred to	Comments
		heritage assets, ( Built Heritage Methodology doc no SROP-MML-XXX-XX-RPT-TA 000193) the methodology however has yet to be applied and it is not possible to identify which heritage assets are likely to be affected by the works and what the impact is likely to be. The Council therefore is unable to provide a full and detailed response at this time.
	Para 3.2.3	States that the building heritage methodology has been designed to consider impacts arising from the reservoir and associated built infrastructure only. The Council would encourage the scope of the assessment to be extended to extend the methodology to address transfer works which may be limited in time but which may have impacts on the built heritage.
	Table 3.1 p15	Heritage Value Criteria. There is some confusion regarding the High and Medium heritage values, particularly as both categories refer to grade II listed buildings and conservation areas. Listed buildings by definition are of national importance it therefore seems unreasonable to group their significance with non designated sites of regional importance. It is unclear what criteria are used to determine what is substantial significance and good significance
	General	The Options Appraisal Report identifies a small area of impact in Northern Huntingdonshire relating to the transfer of treated water to the supply at Chesterton. It is noted that a number of options and routes have been considered and a preferred option identified however at this stage there is insufficient detail to comment on the impact of above ground heritage assets within this district.
Landscape	General	This was a high-level overview of the emerging design of the proposed Lincolnshire Reservoir. This includes the proposed main reservoir site and associated water infrastructure, of which a small section of pipeline corridor enters Huntingdonshire district southwest of Peterborough, east of Wansford and west of Chesterton, terminating at the junction of A605 and A1(M).
	General	The associated water infrastructure is currently shown as a 500m wide corridor. This is due to be narrowed down to a 50m wide corridor as the project further develops.
	General	Care must be taken as the project evolves, to ensure that the emerging landscapes are not fragmented withing the wider landscape and to not feel alien within the receiving landscape character. Connectivity is key to deliver lasting benefits to biodiversity.

## HUNTINGDONSHIRE DISTRICT COUNCIL

**Title/Subject Matter:** 3C ICT Shared Service review

**Meeting/Date:** Overview & Scrutiny (Performance and Growth)  
4<sup>th</sup> Sept 2024

**Executive Portfolio:**

Cllr Lara Davenport-Ray (Portfolio Holder for Shared Services)

Cllr Brett Mickelburgh (Portfolio Holder for Finance and resources)

**Report by:**

John Taylor (Chief Operating Officer and lead officer for HDC 3C ICT Shared Service)

**Ward(s) affected:** All

---

### RECOMMENDATION

The Overview and Scrutiny Panel is invited to comment on the recommendations for the shared ICT service as highlighted in the Cabinet report attached.

This page is intentionally left blank

**Public**  
**Key Decision - Yes**

## **HUNTINGDONSHIRE DISTRICT COUNCIL**

**Title/Subject Matter:** 3C ICT Shared Service review

**Meeting/Date:**

Overview and Scrutiny Panel (Performance and Growth) – 4<sup>th</sup> September 2024

Cabinet – 10<sup>th</sup> September 2024

**Executive Portfolio:**

Cllr Lara Davenport-Ray (Portfolio Holder for Shared Services)

Cllr Brett Mickelburgh (Portfolio Holder for Finance and Resources)

**Report by:**

John Taylor, Chief Operating Officer and Lead Officer for HDC 3C ICT Shared Services)

**Ward(s) affected:** All

---

**Executive Summary:**

This paper makes recommendations on the future of the shared ICT service that serves Huntingdonshire District Council, Cambridge City Council and South Cambridgeshire District Council.

Having been in place since 2015, and in advance of renewing the agreement to share services, the time is right to make sure the delivery of ICT services to each Council is meeting strategic and operational needs. With the support of a jointly procured independent consultancy this assessment has concluded that:

- Overall core operational service delivery and SLA performance is good, but with some areas of improvement identified;
- The governance model for managing 3C ICT is not effective and needs a “reset”;
- The delivery of “Digital” leadership and project capabilities is generating frustration with varying expectations on what this service should deliver and a general view it is not working as effectively as it should.

This report presents a set of options to tackle these matters, assesses the options and makes a recommendation on the future shape and nature of a shared 3C Digital service.

Ultimately, this investment in digital capabilities will improve the councils' ability to provide modern, digital services to residents, maximise productivity and ensure organisational priorities are achieved – a key requirement for all Councils in the partnership.

**Recommendation(s):**

The Cabinet is asked to:

**RECOMMENDED**

- a. note the final report submitted by Triple Value Impact (TVI) (Appendix 1 – confidential item);
- b. agree to the recommended option 1 (redesigned 3C ICT and Digital, Lead Authority remains HDC) and to delegate the responsibility for finalising the scope and detailed nature of the new agreement and associated activities to the Chief Executives and respective Portfolio Holders for each partnership council reporting on progress through the revised member board.

## 1. PURPOSE OF THE REPORT

### 1.1 The purpose of this report is to:

- 1.1.1 Provide an overview of the review of the 3CT ICT Service that was commissioned by all three partner councils (Huntingdonshire District Council, South Cambridgeshire District Council, Cambridge City Council). Following a tender process, an independent third party consultancy, Triple Value Impact (TVI) were selected in April 2024 to undertake the review;
- 1.1.2 Provide the key options to address the concerns and meet the ICT and digital requirements of the three partner councils;
- 1.1.3 Provide sufficient data and analysis to enable the three partner councils to jointly agree a preferred option, which will be further developed in the next phase of work and will support the delivery of the digital transformation ambitions of each partner council.

## 2. BACKGROUND

### 2.1 In April 2024 Cambridge City Council (CCC), Huntingdonshire District Council (HDC) and South Cambridgeshire District Council (SCDC) initiated a review of 3C ICT Shared Service in response to the following key factors:

- 2.1.1 Current 3C ICT Service Agreement forthcoming renewal deadline by **30th September 2024**;
  - i. Recent reports carried out independently by the three councils (not through 3C ICT) to determine the respective councils' own digital target operating model and digital, data and technology related strategies;
- 2.1.2 Findings from these reports that highlighted capacity and capability gaps within ICT and digital and within council teams;
- 2.1.3 A cost apportionment exercise and analysis of 3C ICT activity data undertaken during 2023/24;
- 2.1.4 An acknowledgement of areas where the 3C ICT service provision is working well, but also a consensus by the three councils that the current 3C ICT service is unable to meet all business and strategic requirements across the 3 partner councils.

### 2.2 The three partner councils undertook a competitive procurement process to source an experienced consultancy organisation to undertake this review, and Triple Value Impact (TVI) was appointed. TVI had undertaken significant projects reviewing other ICT shared services across the country and were well placed to undertake this review. The TVI review approach has sourced information and views from a broad and comprehensive range of sources, including the following:

- 2.2.1 ICT user satisfaction survey run in all three partner Councils
- 2.2.2 ICT staff satisfaction survey

- 2.2.3 ICT member satisfaction survey
  - 2.2.4 Interviews/workshops with the 3C ICT service
  - 2.2.5 Interviews/workshops with stakeholders from all three councils
  - 2.2.6 Review of documentation from councils and 3C ICT service
- 2.3 A review across the range of sources listed above facilitated some early conclusions about the existing structure and delivery of the 3C ICT Shared Service, namely:
- 2.3.1 The operational ICT service is delivering a reasonably good service, with 62% of users satisfied with the service;
  - 2.3.2 The ICT architecture estate is generally well maintained and managed, with relatively few major legacy systems that would add cost, risk, and complexity;
  - 2.3.3 The service has generally made good progress in sharing architecture and applications – more than many other shared ICT services;
  - 2.3.4 Overall core operational service delivery and Service Level Agreement (SLA) performance is reasonably good, but with some areas of improvement identified;
  - 2.3.5 The general view is that the governance model for managing 3C ICT is not effective and needs a “reset”, with concern from the two non-host councils that the ICT service has become more of a contract delivery arrangement rather than a truly shared service, an issue which is evident through the governance model that all parties were using;
  - 2.3.6 The delivery of “Digital” leadership and project capabilities is generating frustration with many varying expectations on what this service should deliver and a general view that it is not working; all councils have transformation programmes that rely heavily on digital transformation and therefore ICT digital service is critical to the successful completion of these transformation programmes.
- 2.4 It was noted that no council wished there to be a ‘Do Nothing’ option and a recognition and agreement that changes were required to meet the demand and expectations from all partner councils.
- 2.5 On the basis that the operational delivery of ICT services was accepted as ‘good’ and delivering value for money across the 3 councils, the latter 2 conclusions (2.3.5 governance model and 2.3.6 digital leadership and delivery) formed the basis of the options developed.
- 2.6 A number of Target Operating Model options were presented back to the partner councils (options 1 – 7). All options are set out in the TVI report, attached as Appendix 1. These ranged from building on the existing model but with increased digital capability and capacity through to dissolving the shared service partnership for the 3 councils. A high-level overview of the impacts against risk, operational cost, digital costs, implementation costs, complexity and timescales were set against each option.

### **3. OPTIONS CONSIDERED & ANALYSIS**

- 3.1 Discussions across the officer and Member key stakeholders of the partner councils concluded that option 1 was the preferred option and should be developed further, specifically detailing the cost impacts for implementation and running of the service.
- 3.2 This option would create a common 3C Digital Service, refocusing the service towards supporting the councils' transformation programmes and retaining HDC as the lead authority – aligned to an improved governance approach that resolves the issues felt across all councils.
- 3.3 The recommendation across all partner councils is that option 1 is identified as the most optimum, to mitigate the risk of disruption to current services, to deliver the changes in a timely manner and to deliver the greatest return on investment for supporting the digital ambitions of each partner council.

### **4. COMMENTS OF OVERVIEW & SCRUTINY**

- 4.1 The comments of the relevant Overview and Scrutiny Panel will be forwarded to Cabinet prior to its consideration of this report.

### **5. KEY IMPACTS / RISKS**

- 5.1 Please see **Appendix 1 - 3C ICT review Final report** for full details of risks and impacts for the preferred option.

### **6. WHAT ACTIONS WILL BE TAKEN/TIMETABLE FOR IMPLEMENTATION**

- 6.1 The expected timeframes for delivery of the key elements of the preferred option are set out below:
  - 6.1.1 Approval of the preferred option by each partner council and subsequent update of the 3C ICT Service Agreement forthcoming renewal deadline by 30th September 2024;
  - 6.1.2 Revised and agreed joint governance model by end of January 2025;
  - 6.1.3 An agreed cost apportionment split for recharging and implementation of a methodology for future charging by June 2026;
  - 6.1.4 Recruitment of an appropriately skilled and experienced Chief Digital Information Officer by March 2025;
  - 6.1.5 Implement a revised TOM and organisational structure under the CDIO, with an increased digital focus, by the end of June 2025.

6.2 The details and joint agreement on these timescales and deliverables will be agreed by all councils and progressed using an amended governance process. They are included in this report for guidance and to enable a strategic decision to be made.

## 7. LINK TO THE CORPORATE PLAN, STRATEGIC PRIORITIES AND/OR CORPORATE OBJECTIVES

7.1 The review of the 3C ICT service agreement supports and delivers Priority 3 of the Corporate Plan – Doing our core work well.

7.2 The review is also a core component of the HDC Productivity Plan, submitted to the Department for Levelling Up by the deadline of the 19th July, under the category ‘2) Opportunities to take advantage of advances in technology and make better use of data to inform decision making and service design’.

## 8. CONSULTATION

8.1 A number of internal consultation activities were undertaken to assess the deliverability of the 3C ICT service and the levels of satisfaction from users.

8.2 The consultations took the form of short online surveys for each partner council, allowing for themes to be identified at an individual council level. Results were also consolidated by TVI to identify specific strengths and weaknesses across all partner councils.

8.3 The consultations were made available to the following groups:

TYPE OF SURVEY	LIVE DATES	HDC RESPONDENTS	TOTAL RESPONDENTS OVER 3 COUNCILS
ICT user satisfaction survey	23 <sup>rd</sup> May - 13 <sup>th</sup> June	211 respondents	552 respondents
ICT member satisfaction survey	11 <sup>th</sup> June – 12 <sup>th</sup> July	26 respondents	38 respondents

8.4 A further ICT staff satisfaction survey for 3C ICT staff was issued on 28th June and received 65 ICT staff respondents. The results of these surveys are referenced within the detail of the TVI report.

## 9. LEGAL IMPLICATIONS

9.1 The council’s Monitoring Officer has been consulted on the recommendations and notes the continuation of the agreement and that this raises no legal concerns.

## **10. RESOURCE IMPLICATIONS**

- 10.1 There are a number of resource implications relating to this paper.
- 10.2 Moving to a new arrangement will require investment, this is the cost of change. The transition costs estimated by TVI and discussed with Officers are c£240k. This will be split across the partnership by thirds – so an indicative figure of £80k per council.
- 10.3 The assessment of ongoing costs is contained in the TVI report. The precise detail of this will need to be determined during implementation. Some key elements are:
- 10.3.1 There are some new capabilities proposed in the service, which will see some new roles created.
  - 10.3.2 There are some current capabilities that can be amended or simplified. The nature of this will be delivered during a formal transition process that will be overseen by an improved governance arrangement.
  - 10.3.3 At present the model is forecasting the ongoing service delivery costs will broadly be the same. However, each council is committing £100k in year to progress and enhance our digital capacity (subject to the budget approvals process for each council).
  - 10.3.4 All of these potential changes will fully involve staff and HR and relevant support (e.g. ERG and/or Unison).
- 10.4 All the financial elements within the TVI report have been shared with partners and each has ensured their s151 Officer has reviewed, commented and clarified the estimates. All have provided assurance the estimates are reasonable and can be legitimately used to make a decision on future direction by the partnership.

## **11. ENVIRONMENT AND CLIMATE CHANGE IMPLICATIONS**

- 11.1 None.

## **12. OTHER IMPLICATIONS**

- 12.1 The report recommends no change in employing authority. It should be noted if transfer to another council is pursued there will be significant HR impacts related to a change in lead authority.

## **13. REASONS FOR THE RECOMMENDED DECISIONS**

- 13.1 The report presents a rigorous assessment of the current position of the shared 3C ICT service and, with the aid of independent external support, a range of options for the future have been examined.
- 13.2 Having balanced the feedback from all councils, the assessment of current and future needs, the costs and opportunities of change and evaluated the

risks and time to deliver the outcomes each council seeks, it has concluded to recommend option 1 to each council.

#### **14. LIST OF APPENDICES INCLUDED**

## **HUNTINGDONSHIRE DISTRICT COUNCIL**

**Title/Subject Matter:** Finance Performance Report (Q1)

**Meeting/Date:** Overview & Scrutiny Panel (Performance and Growth) – 4th September 2024

**Executive Portfolio:** Executive Councillor for Finance & Resources

**Report by:** Chief Finance Officer

**Ward(s) affected:** All Wards

---

### **Executive Summary**

This report provides detail on the Council's budget and forecast expenditure for 2024/25 based on quarter 1 income and expenditure.

### **RECOMMENDATION**

The Overview and Scrutiny Panel is invited to comment on the Finance Performance Report (Q1) and appendices 1,2 and 3.

## HUNTINGDONSHIRE DISTRICT COUNCIL

**Title/Subject Matter:** 2024/25 Finance Performance Report – Q1 Forecast

**Meeting/Date:** Cabinet – 10<sup>th</sup> September 2024

**Executive Portfolio:** Executive Councillor for Finance and Resources

**Report by:** Chief Finance Officer

**Ward affected:** All

---

### Executive Summary:

This report sets out the forecast outturn for the financial year 2024/25 for both revenue and capital.

### REVENUE FORECAST

The current net revenue budget for 2024/25 is £26.310m (Original budget of £26.004m plus brought forward of budget of £0.306m). The forecast for 2024/25 is £26.423m, less contributions from reserves of £0.557m, this results in an underspend of £0.444m.

### This is as a result of (large variations);

**Corporate Resources underspend £1.2m as a result of;** Increased interest receipts, reduced utilities costs at Pathfinder House and Eastfield House. Offset by increased National Insurance costs.

**Chief Planning Officer underspend £0.1m as a result of;** Increased Planning Performance Agreement income.

**Operations underspend £0.9m as a result of;** Green waste subscription income higher than budgeted, also increased CCTV and Street Cleaning income. Offset by increased cost of watercourses.

**Leisure and Health underspend £0.1m as a result of;** Increased membership income and increased Active Lifestyle classes funding. Offset by increases in maintenance and licence costs.

**Chief Operating Officer overspend £0.4m as a result of;** Shortfall in temporary accommodation subsidy and costs of business continuity improvements.

**Corporate Leadership overspend £1.2m as a result of;** A new Community Health and Wealth Delivery Fund set up to implement Huntingdonshire Futures and a new post and new projects budget to further improve the customer experience.

**Strategic Insight and Delivery overspend £0.3m as a result of;** Reduction in market, car parks and parks income, and additional costs at pavilions.

## **CAPITAL FORECAST**

The approved original budget was £26.073m, which included re-phased budget from prior years of £13.288m. At the year end the actual budget rephased was £18.917m, which is £5.629m more rephased than originally budgeted. In addition £198,000 in additional expenditure (funded from reserves and external funding) has been added. The current budget is therefore £31.900m (£26.073m + £5.629m + £0.198m). The forecast expenditure for 2024/25 is £30.682m, an in-year underspend of £1.218m (this may result in rephasing to 2025/26).

**This is as a result of (Large variations only);**

**The most significant variations being, in-year underspends;**

Hinchingbrooke Country Park £2.1m, and ICT projects £0.3m

**Against overspends;**

CIL £1.1m (this is funded from the CIL reserve) and Salix Projects £0.1m which will result in future utilities savings.

### **Recommendation(s):**

It is recommended that:

- Cabinet is invited to consider and comment on the revenue financial performance for the financial year 2024/25 quarter 1, as detailed in Appendix 1 and summarised in paragraph 3.2.
- Cabinet is invited to consider and comment on the capital financial performance for 2024/25 quarter 1, as detailed in Appendix 2 and summarised in paragraph 3.3.
- Cabinet is invited to consider and comment on the prudential and treasury management indicators for 2024/25 quarter 1, as detailed in Appendix 3.

## PURPOSE OF THE REPORT

1.1 To present details of the Council's financial performance for 2024/2025.

- Revenue forecast of an underspend of £0.444m.
- Capital forecast in-year underspend of £1.218m.

## BACKGROUND

2.1 The revenue budget and MTFs for 2024/25 approved in February 2024 assumed a net expenditure budget of £26.004m, since increased by carry forwards of £0.306m giving a total current budget of £26.310m.

A gross capital budget of £26.073m was approved, increased to £31.900m due to additional re-phasing of schemes at the year-end of £5.629m, and additional funding of £0.198m not included in the original budget.

2.2 The detailed analysis of the 2024/25 forecast outturn is attached at Appendix 1 for revenue, and Appendix 2 for capital.

## FINANCIAL PERFORMANCE

3.1 Financial Performance Headlines

The outturn position for the current financial year and the impact of variations will be incorporated within the MTFs.

**Revenue** The current budget is £26.310m (original budget £26.004m + budget carried forward from 2023/24 of £0.306m), the forecast outturn is £26.423m, taking into account contributions from reserves of £0.557m this is a forecast underspend of £0.444m.

**Capital** The approved original budget is £26.073m, which included budgeted rephasings of £13.288m. At the year end the actual budget rephased was £18.917m, which is £5.629m more rephased than budgeted. As a result, the current budget including growth from funded schemes, is £31.900m (£26.073m+£5.629m+£0.198m).

### 3.2 Summary Revenue Variances by Service (Appendix 1 for detail)

The table below shows the total variances for each Service and the main reasons for the variance;

Head of Service	Budget £'000s	Budget c/fwd £'000s	Current Budget £'000s	Forecast Actual £'000s	Reserve Movements £'000s	Forecast Variance £'000s	Comments
Corporate Resources	8,507	12	8,519	7,277	35	(1,207)	<b>Income;</b> Increased interest receipts <b>Expenditure;</b> Additional National Insurance costs, and increased rental costs. Reduced utilities costs at Pathfinder House and Eastfield House.
Chief Operating Officer	5,869	134	6,003	6,598	(179)	416	<b>Income;</b> Shortfall in temporary accommodation subsidy. <b>Expenditure;</b> Increased costs as a result of business continuity improvements.
Economic Development	397	-	397	382	-	(15)	<b>Expenditure;</b> Staff costs savings.
Housing Strategy	213	-	213	232	-	19	<b>Expenditure;</b> Costs for contract for site disposals for affordable housing.
Corporate Leadership	711	45	756	2,009	(59)	1,194	<b>Expenditure;</b> New Community Health and Wealth Delivery Fund of £750k set up, and £400k allocated to enhancing customer experience post and projects.
Chief Planning Officer	770	75	845	776	(44)	(113)	<b>Income;</b> Increased Planning Performance Agreement income.
Strategic Insight and Delivery	643	1	644	1,107	(192)	271	<b>Income;</b> Reduced market income, penalty charge CPE income delayed by lack of parliamentary time, reduced pay and display income income, and reduced grounds rents. <b>Expenditure;</b> Additional pavilions costs.
Operations	5,603	5	5,608	4,790	(84)	(902)	<b>Income;</b> Green waste subscription income higher than budget, CCTV increased income, additional Street Cleansing income. <b>Expenditure;</b> Increased costs of watercourse maintenance and increased use of agency staff for Waste which is partially offset by vacant post saving.
Leisure and Health	346	-	346	267	-	(79)	<b>Income;</b> Increased membership income. Increased number of Active Lifestyle classes delivered, extra funding received to pay for the extra classes. <b>Expenditure;</b> Increased licence and maintenance costs.
ICT	2,945	34	2,979	2,985	(34)	(28)	<b>Expenditure;</b> Salary underspends while vacancies were filled.
<b>Total</b>	<b>26,004</b>	<b>306</b>	<b>26,310</b>	<b>26,423</b>	<b>(557)</b>	<b>(444)</b>	

Further analysis of the revenue variance and service commentary are in Appendix 1. This provides the variances by service and comments have been provided by the budget managers/Head of Service.

### 3.3 Capital Programme (Appendix 2 for detail)

The approved gross capital programme for 2024/25 is £26.073m, this total included budgeted rephasings of £13.288m. At the year end a total of £18.917m was rephased, an additional rephase of £5.629m. The total current budget is £31.900m including growth of £0.198m (£26.073m+£5.629m+£0.198m).

The table below shows the total variances for each Service and the main reasons for the variances.

Head of Service	Existing and New Bids £000	Budget Rephase (1) £000	Original Budget £000	Year End Rephase (2) £000	Net Rephase (3) £000	Growth/ Virement £000	Current Budget £000	Actual £000	Forecast £000	Over/(Under) Spend	Comment on Variance

<b>Total</b>	<b>12,785</b>	<b>13,288</b>	<b>26,073</b>	<b>18,917</b>	<b>5,629</b>	<b>198</b>	<b>31,900</b>	<b>1,202</b>	<b>30,682</b>	<b>(1,218)</b>	
<p>(1) This is the estimated rephase when the budget is set.</p> <p>(2) This is the actual rephase at the year end when all costs are known</p> <p>(3) This is the actual rephase less the budget rephase. Original budget + net rephase + growth = Current budget</p>											

### 3.4 Council Tax and Business Rates Collection

The Council Tax collection rate at the end of quarter 1 (28.51%) is higher than the previous year (27.51%). The Business Rates collection rate at the end of quarter 1 (32.06%) is lower than at the end of quarter 1 in the previous year (33.01%). The movement in collection rates compared to previous years is due to timing and profiling of payments and does not reflect any underlying collection issues.

The number of working age Council Tax Support claimants at the end of quarter 1 was 4,736 which is 750 more than at the end of quarter 1 in 2023/24 (3,986). The number of pensioner Council Tax Support claimants was 2,818 at the end of quarter 1 2024/25, compared to 2,867 for the same period last year.

### 3.5 Miscellaneous Debt Update

The table below shows the debtor analysis as at 30<sup>th</sup> June 2024.

Service	Debtor Aged Days						Total Debt
	Current	<90	91 to 180	181 to 365	>365	Future

4.0 Update on the Commercial Investment Strategy and Investment Properties

4.1 The Commercial Investment Strategy (CIS) was approved by Cabinet in September 2015 and the CIS Business Plan in December 2015. The implementation of the CIS is seen as a key means by which the Council can generate income to assist it in meeting the forecast gap in the revenue budget. The CIS supplements the income from the legacy estate of investment properties, held for the purpose of generating revenue income.

4.2 For quarter 1 2024/25, the budget and forecast expenditure and income for the CIS and investment properties are:

<b>CIS Investments</b>	<b>Budget £000</b>	<b>Forecast Outturn £000</b>	<b>Variance £000</b>
<b>Cash Investments</b>			
CCLA Property Fund	(162)	(180)	(18)
<b>Total Cash Investments</b>	<b>(162)</b>	<b>(180)</b>	<b>(18)</b>
Property Rental Income	(4,754)	(4,893)	(139)
Loan Interest	581	581	0
<b>Total Property Investments</b>	<b>(4,173)</b>	<b>(4,312)</b>	<b>(139)</b>
<b>TOTAL</b>	<b>(4,335)</b>	<b>(4,492)</b>	<b>(157)</b>
<b>CIS Borrowing (Maturity Loans from PWLB)</b>			
<b>Property</b>	<b>Maturity Date</b>	<b>Amount</b>	<b>% (Fixed)</b>
Wakefield	26/06/2039	£11,963,000	2.18
Fareham	02/10/2037	£5,000,000	2.78
Rowley Centre	11/03/2039	£7,292,000	2.49

### 4.3 Commercial Properties - Market Update and Activity

Market activity in the first quarter of 2024/25 remained limited with investors continuing to remain cautious. The run up to the July General Election caused market uncertainty despite indications that inflation was returning to more controlled levels and a future fall in interest rates was looking increasingly likely.

Offers received for vacant space remain demanding in terms of the levels of incentives required, particularly for larger units where tenants tend to be commercially astute and well advised. Some tenants of smaller units have exited their leases when their fixed terms ended but our assessment is that the level of change is more due to circumstance and timing rather than a significant recent change in market conditions. We continue to receive interest in smaller space and a number of new lettings have been concluded and are in progress.

There has been some activity in the CIS portfolio, the majority of which is positive, although currently vacancies remain at a similar level to previously.

At Little End Road, St Neots, the letting of Unit 23a remains in progress, but has not yet been concluded. Also a rent review on Unit 21b has now been completed, but Unit 21a remains vacant. Action is being taken to more clearly allocate additional parking to the unit which we hope will improve re-letting prospects.

The refurbishment of the two vacant Fareham office properties is complete and the certificate of practical completion has been issued. The lease for the ground floor suite of Office 1500 is being drafted, but disappointingly no further offers for space have been received. Despite the offices now being of a high standard with greatly improved energy efficiency ratings. There remains a notable amount of other vacant space on this business park which is creating something of a 'tenant's market' and increasing the level of incentives that potential tenants demand.

2 Stonehill, Huntingdon remains vacant. Additional security measures have been put in place, and repairs are underway including repairs to the roof.

The two vacant restaurant units, and another unit at Rowley Arts Centre are now under offer.

At Freeway Drive Castleford the index linked rent review has been completed.

Lease renewals are progressing at Shawlands Retail Park Sudbury. Carpetright have undertaken a financial restructure and intend to close their Sudbury Unit, but this had been anticipated, and an offer at an acceptable level has been accepted from another tenant.

The table below shows the activity in relation to leases, rents and vacant properties in the previous quarters and a forecast for the next quarter.

<b>Property Statistics</b>	<b>2023/24 Quarter 3 Actual</b>	<b>2023/24 Quarter 4 Actual</b>	<b>2024/25 Quarter 1 Actual</b>	<b>2024/25 Quarter 2 Forecast</b>
Number of lettable units held by HDC	186	186	190 <sup>1</sup>	190
No. let on typical commercial leases	128	127 <sup>2</sup>	126 <sup>2</sup>	126
No. let on long leases	24	24	24	24
No. let on non commercial leases	17	18 <sup>2</sup>	18 <sup>2</sup>	18
No. vacant	15	15	20	20
Vacant properties by town;				
• Huntingdon	7	6	6	7
• St Neots	6	6	6	6
• St Ives	0	0	2	2
• Fareham	2	2	6 <sup>1</sup>	5
<b>Property Activity</b>	<b>Quarter 3 Actual</b>	<b>Quarter 4 Actual</b>	<b>Quarter 1 Forecast</b>	<b>Quarter 2 Forecast</b>
Number of leases renewed	2	1	3	4
Number of rents reviewed	0	1	1	0
Number of new lettings	1	1	3	8
Number of units under offer	1	0	8	0
Number of leases ended	0	0	2	2
<b>Financial changes</b>	<b>Quarter 3 Actual</b>	<b>Quarter 4 Actual</b>	<b>Quarter 1 Forecast</b>	<b>Quarter 2 Forecast</b>
Increases/(decrease) in annual rents receivable due to lease renewals*	(£270,950)	£4,000	£8,000	0
Increases/(decrease) in annual rents receivable due to rent reviews	£0	£23,000	£177,509	0
Increase in annual rents receivable due to new leases	£4000	£6250	£19,300	£189,429
Decrease in annual rents receivable due to vacations & insolvencies	£0	£47,500	£12,100	£65,520 <sup>3</sup>

NB: Some reviews and renewals may be backdated so effective from previous quarters.

Where stepped rents are agreed the figures quoted relate to the average rent.

Figures above ignore letting incentives

<sup>1</sup> Fareham is now recorded as 6 lettable office suites instead of 2 buildings.

<sup>2</sup> CAB's occupation of Eastfield House has moved from commercial to non commercial terms and will remain non commercial when they relocate to Pathfinder House.

<sup>3</sup> Carpentryright, Sudbury have announced a financial restructure and closure of our store however we already have alternative interest in the unit.

## 5 COMMENTS OF OVERVIEW & SCRUTINY

The comments from the Overview and Scrutiny Panel will be forwarded to Cabinet prior to its consideration of this report.

## **6. RECOMMENDATIONS**

- Cabinet is invited to consider and comment on the revenue financial performance for the financial year 2024/25 quarter 1, as detailed in Appendix 1 and summarised in paragraph 3.2.
- Cabinet is invited to consider and comment on the capital financial performance for 2024/25 quarter 1, as detailed in Appendix 2 and summarised in paragraph 3.3.
- Cabinet is invited to consider and comment on the prudential and treasury management indicators for 2024/25 quarter 1, as detailed in Appendix 3.

## **7. LIST OF APPENDICES INCLUDED**

Appendix 1 – Financial Performance for revenue quarter 1 2024/25.

Appendix 2 – Financial Performance for capital quarter 1 2024/25.

Appendix 3 – Treasury and Prudential Indicators quarter 1 2024/25.

Corporate Resources	<b>Human Resources</b>										<p>2 fully funded roles for the workforce strategy have been created with one member of staff seconded into one of those roles. That existing role is to be backfilled at 1 FTE. Agency staff has been used to cover peak absence. Planned maternity costs at the end of the year has lead to an overspend with HR. Planned increase in training forecast.</p> <p>Negotiations ongoing regarding the Phoenix Court rent review. The expectation is that the rent will increase for this financial year and that backrent will need to be paid. A percentage of the CIS income will be transferred to the CIS Landlord Reserve</p>

Contribution to 3CBC is lower due to forecast external income higher than budgeted which means it funds a higher proportion of our costs

Pest control is seeing a reduction in income due to seasonal issues. Mobile Home Park continues to have an underspend on the electricity linked to the inflated budget allocation to offset the national utilities inflation. Management cost of the Mobile Home Park will continue to see an underspend as we continue the hand over process from Places For People back to HDC .

Investment in improving business continuity measures.

Variance due to carry forward of budget from 2023/24 to undertake outstanding work from 2023/24.

Underspend within staff due to the licensing manager role being partly covered with a shared service

New Business Development Officer role was forecast at highest spinal point within grade. This did not pull through into the forecast pack from last year and accounts for £12,284. In addition Economic Development Officer role left mid month with less salary paid; Maternity Cover started mid month with less salary paid.

Revised contract site disposal for affordable housing no budget.

A new Community Health and Wealth Delivery Fund set up to support the creation and implementation of Huntingdonshire Futures.

Unavoidable pressure on subscription and membership fees. Unexpected recruitment costs not budgeted. Agency staff cost are being reviewed.

Creation of new post and funding provided for schemes to improve the customer experience.

Currently have 4 vacancies within the service which we are forecasting will be filled part way through the year. Increases in the SLA charges based on CPI increase. Keyholding scheme will run for the entire financial year with call out fees included. Expenditure increased due to project costs, this is recovered as increased income.

Underspend relates to the budget carry forward, will look to spend this within 24/25.

Watercourse overspend is due to lack of maintenance in the past which has meant that we have to complete works to reduce the risk of localised flooding. A growth bid will be submitted to increase the budget. Underspend on the sewer ditches/drains is due to only a few drains and ditches being HDC's legal responsibility. Currently going through the process of identifying what is and is not HDC's responsibility and will adjust the budget accordingly once that is completed. The grounds maintenance contract with Places for people was taken back in house at the start of the financial year and so we will not receive the income from that contract in 24/25.

Additional income from County council that was unexpected

Increased agency staff costs partially offset by vacant posts within the establishment

# Treasury Management Update – Quarter 1

The CIPFA (Chartered Institute of Public Finance and Accountancy) Code of Practice for Treasury Management 2021 recommends that members be updated on treasury management activities at least quarterly. This report, therefore, ensures this Council is implementing best practice in accordance with the Code.

## 1. Economic update

- The first quarter of 2024/25 saw:
  - GDP growth flatlining in April following positive Q4 2023/24 growth figures of 0.7% quarter to quarter.
  - A stalling in the downward trend in wage growth, with the headline 3 month year on year rate staying at 5.9% in April.
  - CPI inflation falling from 2.3% in April to 2.0% in May.
  - Core CPI inflation decreasing from 3.9% in April to 3.5% in May.
  - The Bank of England holding rates at 5.25% in May and June.
  - 10-year gilt yields climbing to 4.35% in April, before closing out at 4.32% in May.
- The news that the economy grew by 0.7% quarter on quarter in Q4 2023/24 confirmed that it moved out of its very mild technical recession that prevailed at the end of 2023. However, data released for April and May so far shows a slight stalling in the recovery, with GDP data for April coming out at 0.0% month on month, as inclement weather weighed on activity. Moreover, the fall in the composite Purchasing Manager Index output balance from 53.0 in May to 51.7 in June confirms tepid growth.
- On a more positive note, the 2.9% month on month increase in retail sales volumes in May more than reversed the 1.8% month on month drop in April as rainfall returned to seasonal norms. The strength was broad-based across the retail sector, including online, (+5.9% month on month) suggesting an underlying strengthening in sales beyond weather effects. With inflation falling back to target, the Bank Rate likely to be reduced soon and with consumer confidence improving, retail sales may well continue to strengthen.
- Stronger consumer spending, as low inflation allows households' real incomes to strengthen and the drag from higher interest costs fades, suggests that real consumption will strengthen substantially over the next two years. However, investment will only make a modest contribution to GDP growth. With the industrial sector still 12% smaller than in 2019, excess capacity will continue to cap the need for industrial firms to invest. But improving business sentiment should raise investment by services' firms. Further, a fall in mortgage rates should trigger a recovery in residential investment. Overall, strong consumer spending is likely to be the backbone of GDP growth, along with government consumption. Link's advisors, Capital Economics, forecast that following GDP growth of 1.0% in 2024, activity will continue to the upside with GDP growth of 1.5% for both 2025 and 2026 (consensus forecasts are 1.2% and 1.4% respectively).
- Nonetheless, the on-going stickiness of wage growth in April will be a lingering concern for the Bank of England. The 3 month year on year rate of average earnings growth stayed at 5.9% in April (consensus 5.7%), whilst the more timely 3 month annualised rate rebounded from 5.9% to 9.3%. This stickiness partly reflected April's 9.8% increase in the

minimum wage. This leaves the Bank of England's forecast for a fall back in regular private sector pay growth from 5.8% in April to 5.1% in June looking a challenge.

- Despite the stickiness of wage growth in April, sharp falls in employment and a move up in unemployment suggests that wage growth will soon be back on a downward path. The 139,000 fall in employment in the three months to April was accompanied by a rise in the unemployment rate from 4.3% to 4.4%. This was the fourth increase in a row and took it to its highest level since September 2021. The rise would have been larger were it not for the 132,000 increase in inactivity in the three months to April as the UK's disappointing labour market participation performance since the pandemic continued. The vacancies data also paint a picture of a slowly cooling labour market. The number of job vacancies fell from an upwardly revised 908,000 to 904,000, leaving vacancies 31% below the peak in May 2022, but 11% above the pre-pandemic level.
- The fall in CPI inflation in May back to the Bank's 2% target for the first time since July 2021 will have come as welcome news to the Bank. Furthermore, with CPI inflation of 3.3% in the US and 2.6% in the Euro-zone in May, the UK appears to have won the race to get CPI inflation back to 2.0%. A further easing in food inflation from 2.8% in April to 1.6% in May played a part in the fall in overall CPI inflation and with food producer price inflation at just 0.2% in May, food price inflation will probably soon fall to zero.
- The core rate also fell back from 3.9% to 3.5%. Within that, core goods CPI inflation slipped below zero for the first time since October 2016. As expected, clothing/footwear, recreation/culture and restaurants/hotels categories inflation declined, reflecting base effects from big increases last May. While services inflation fell from 5.9% to 5.7%, this decline was smaller than the Bank of England expected (forecast 5.3%). And the timelier three-month annualised rate of services prices has rebounded from 8.5% to 9.2%. This suggests that the persistence in domestic inflation that the Bank is worried about is fading more slowly than it thought. Even so, there is scope for inflation to fall further.
- There was little chance that the Bank would cut rates at its June meeting, given upside surprises on services CPI inflation and wage growth. But several developments implied a rate cut is getting closer. First, two members of the MPC, Ramsden and Dhingra voted again to reduce rates immediately to 5.00%. Second, despite the recent run of stronger inflation and activity, the minutes noted "indicators of inflation persistence had continued to moderate" and that a range of indicators suggest pay growth had continued to ease. And there was new wording that members of the MPC will consider all the information available and how this affects the assessment that the risks from inflation persistence are receding "as part of the August forecast round".
- Throughout the quarter there was a degree of volatility in the gilt market and, by way of example, the 10-year gilt yield rose from 4.05% on 2<sup>nd</sup> April to finish at 4.15% on 28<sup>th</sup> June but it has exceeded 4.30% on several occasions. Overall, investors judged that interest rates will need to remain high for longer to keep inflation around the 2.0% target.
- Meanwhile, the FTSE 100 broke through the 8,000 mark in April for the first time since a brief three-day period in February last year and reached a record closing high of 8,446 on 15<sup>th</sup> May. However, by the end of the quarter, despite AI-fuelled rises in the US S&P500, it finished rather tamely and had fallen back to 8,164. Arguably, significant interest rate cuts and an on-going UK economic recovery will be required for a further resurgence to take hold.

## **MPC meetings 9<sup>th</sup> May and 20<sup>th</sup> June 2024**

- On 9<sup>th</sup> May, the Bank of England's Monetary Policy Committee (MPC) voted 7-2 to keep Bank Rate at 5.25%. This outcome was repeated on 20<sup>th</sup> June.
- Nonetheless, with UK CPI inflation now back at 2% and set to fall further over the coming months, Ramsden and Dhingra – who voted again to reduce rates immediately to 5.00% in June – may shortly be joined by some members in the no-change camp, for whom the June decision was “finely balanced” as the upside news on services price inflation was more likely to be a reflection of one-off effects and volatile components rather than factors that would push up “medium-term inflation”.

## **2. Interest rate forecasts**

The Council has appointed Link Group as its treasury advisors and part of their service is to assist the Council to formulate a view on interest rates. The PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1<sup>st</sup> November 2012.

The latest forecast, updated on 28<sup>th</sup> May, sets out a view that both short and long-dated interest rates will start to fall once it is evident that the Bank of England has been successful in squeezing excess inflation out of the economy, despite a backdrop of a stubbornly robust economy and a tight labour market.

Moreover, whatever the shape of domestic data, recent gilt market movements have been heavily influenced by the sentiment pertaining to US monetary policy. Again, inflation and labour data has proven sticky and the market's expectation for rate cuts has gradually reduced throughout the course of the year, so that possibly rates may not be cut more than once, or possibly twice, before the end of 2024. In any event, even if the Bank of England starts to cut rates first, it may mean that the medium and longer parts of the curve take longer to fully reflect any such action until the US yield curve shifts lower too. Given the potential inflationary upside risk to US treasuries if Trump wins the presidential election in November (increased tariffs on imports from China for example), therein lies a further risk to yields remaining elevated for longer.

The General Election is not expected to have a significant impact on UK monetary policy. There is minimal leeway for further tax cuts or added spending without negatively impacting market sentiment. It may even be the case that the Bank of England will steer clear of an August rate cut – should that be supported by the inflation data – in favour of weighing up fiscal policy implications and market sentiment in the aftermath of the election.

Accordingly, Link's central case is still for a rate cut before the end of September, but they are not committed to whether it will be in August or September. Thereafter, the path and speed of rate cuts is similar to that which we previously forecast, with Bank Rate eventually falling to a low of 3% by H2 2026.

However, given the increased uncertainty surrounding Link's central gilt market forecasts, and the significant issuance that will be on-going from several of the major central banks, it has marginally increased its PWLB forecasts by c20 to 30 basis points across the whole curve since the previous quarter.

In summary, regarding PWLB rates, movement in the short-end of the curve is expected to reflect Link’s Bank Rate expectations to a large degree, whilst medium to longer-dated PWLB rates will remain influenced not only by the outlook for inflation, domestically and globally, but also by the market’s appetite for significant gilt issuance (£200bn+ for each of the next few years). As noted at the Link March Strategic Issues webinars, there is upside risk to that part of our forecast despite the Debt Management Office skewing its issuance to the shorter part of the curve.

Link Group Interest Rate View		28.05.24

**Notes**

Money market yield forecasts are based on expected average earnings by local authorities for 3 to 12 months. The Link forecast for average earnings are averages i.e., rates offered by individual banks may differ significantly from these averages, reflecting their different needs for borrowing short-term cash at any one point in time.

### 3. Annual Investment Strategy

The Treasury Management Strategy Statement (TMSS) for 2024/25, which includes the Annual Investment Strategy, was approved by the Council on 21st February 2024. In accordance with the CIPFA Treasury Management Code of Practice, it sets out the Council’s investment priorities as being:

- Security of capital
- Liquidity
- Yield

The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity, aligned with the Council’s risk appetite. In the current economic climate, over and above keeping investments short-term to cover cash flow needs, there may be benefit to seeking out value available in periods up to 12 months with high credit rated financial institutions, using the Link suggested creditworthiness approach, including a minimum sovereign credit rating and Credit Default Swap (CDS) overlay information.

As shown by the charts below and the interest rate forecasts in section 2, investment rates have remained elevated during the first quarter of 2024/25 but are expected to fall back through the second half of 2024 as inflation reduces and the MPC starts to loosen monetary policy.

### Creditworthiness

There have been very few changes to credit ratings over the quarter under review. However, officers continue to closely monitor these, and other measures of creditworthiness to ensure that only appropriate counterparties are considered for investment purposes.

### Investment counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function

### Credit Default Swap prices

For UK banks, these have remained low, and prices are not misaligned with other creditworthiness indicators, such as credit ratings. Nevertheless, it remains important to undertake continual monitoring of all aspects of risk and return in the current circumstances.

### Investment balances

The council's average level of funds available for investment purposes during the quarter was £65m. The level of funds available was mainly dependent on the timing of precept payments, receipt of grants, progress on the capital programme and reserves held.

FINANCIAL YEAR TO QUARTER ENDED 30/06/2024							
	Bank Rate	SONIA	7 day	30 day	90 day	180 day	365 day
<b>High</b>	5.25	5.20	5.20	5.21	5.23	5.26	5.30
<b>High Date</b>	02/04/2024	03/05/2024	13/05/2024	26/06/2024	28/06/2024	28/06/2024	28/06/2024
<b>Low</b>	5.25	5.19	5.19	5.20	5.22	5.25	5.09
<b>Low Date</b>	02/04/2024	04/04/2024	02/04/2024	03/04/2024	02/04/2024	02/04/2024	02/04/2024
<b>Average</b>	5.25	5.20	5.20	5.21	5.23	5.26	5.21
<b>Spread</b>	0.00	0.01	0.01	0.01	0.01	0.01	0.21

The Council's budgeted short-term investment interest income for 2024/25 is £1.4m, and the current forecast for the year is £2.9m. The average investment rate (not including service loans and property fund) was 5.19%.

### **IFRS 9 Fair Value of Assets Statutory Override**

Following the consultation undertaken by the Department of Levelling Up, Housing and Communities (DLUHC) on IFRS 9, the Government has extended the mandatory statutory override for local authorities to reverse out all unrealised fair value movements resulting from pooled investment funds to 31st March 2025. Local authorities are required to disclose the net impact of the unrealised fair value movements in a separate unusable reserve throughout the duration of the override in order for the Government to keep the override under review and to maintain a form of transparency. This mechanism applies to the CCLA Property Fund in which the council has £4m invested.

### **Approved limits**

Officers can confirm that the approved limits within the Annual Investment Strategy were not breached during the quarter ended 30<sup>th</sup> June 2024.

A full list of investments held as of 30th June 2024 and quarterly investment movements is in Appendix 2.

## 4. Borrowing

Due to the overall investment position no new external borrowing (short or long term) was undertaken in the quarter to 30<sup>th</sup> June 2024. It is anticipated that further borrowing will not be undertaken during this financial year, based on current knowledge.

<b>Borrowing</b>	<b>Balance 01/04/2024 £m</b>	<b>Movement £m</b>	<b>Balance 30/06/2024 £m</b>	<b>Weighted Average Rate %</b>	<b>Weighted Average Maturity (Years)</b>
Public Works Loans Board	34.254	0	34.254	2.84	20.2
Salix Loan	0.018	0	0.018	0	1.7
<b>Total</b>	<b>34.273</b>	<b>0</b>	<b>34.273</b>	<b>2.84</b>	<b>20.2</b>

### **PWLB maturity Certainty Rates 1<sup>st</sup> April to 30<sup>th</sup> June 2024**

Gilt yields and PWLB rates remained relatively stable between 1<sup>st</sup> April and 30<sup>th</sup> June. Having said that, the spread between the low and high points during the quarter was between 0.3% and 0.45% across the curve.

The 50-year PWLB Certainty Rate target for new long-term borrowing (the low point of our forecast on a two-year timeline) started 2024/25 at 4.00% and increased to 4.20% on 28<sup>th</sup> May. As can be seen, with rates remaining elevated across the whole of the curve, it is advised to not borrow long-term unless the Authority wants certainty of rate and judges the cost to be affordable.

**PWLB RATES 02.04.24 - 28.06.24 (note: the 1<sup>st</sup> April & 29<sup>th</sup> and 30<sup>th</sup> June were bank holidays/weekends)**

**HIGH/LOW/AVERAGE PWLB RATES FOR 02.04.24 – 28.06.24**

	1 Year	5 Year	10 Year	25 Year	50 Year
<b>Low</b>	5.27%	4.70%	4.80%	5.28%	5.06%
<b>Date</b>	21/06/2024	04/04/2024	02/04/2024	02/04/2024	21/06/2024
<b>High</b>	5.61%	5.14%	5.18%	5.61%	5.40%
<b>Date</b>	29/05/2024	01/05/2024	01/05/2024	30/05/2024	30/05/2024
<b>Average</b>	5.43%	4.92%	4.98%	5.42%	5.20%
<b>Spread</b>	0.34%	0.44%	0.38%	0.33%	0.34%

**5. Debt rescheduling**

Debt rescheduling opportunities have remained a possibility in the current quarter for those authorities with significant surplus cash and a flat or falling Capital Financing Requirement in future years. Members will be advised if there is value to be had by rescheduling or repaying a part of the debt portfolio.

## **6. Compliance with Treasury and Prudential Limits**

The prudential and treasury Indicators are shown in Appendix 1.

It is a statutory duty for the Council to determine and keep under review the affordable borrowing limits. During the quarter ended 30<sup>th</sup> June 2024, the Council has operated within the treasury and prudential indicators set out in the Council's Treasury Management Strategy Statement for 2024/25. The Chief Finance Officer reports that no difficulties are envisaged for the current or future years in complying with these indicators.

All treasury management operations have also been conducted in full compliance with the Council's Treasury Management Practices

## **7. Other**

### **Training**

Treasury training is being arranged for members of the Overview and Scrutiny Panel (Performance and Growth) and the Corporate Governance Committee, this is likely to be around the time of the half year report and will be provided by Link.

**APPENDIX 1: Prudential and Treasury Indicators for 2024-25 as of 30<sup>th</sup> June 2024**

<b>Treasury Indicators</b>	<b>2024/25 Limit £'000</b>	<b>30.06.24 Actual £'000</b>

## UK Banks 5 Year Senior Debt Credit Default Swap Spreads as of 30<sup>th</sup> June 2024

This graph shows the assessment of creditworthiness risk of key banks over time. The cost of insuring against default is shown in basis points down the left- hand axis. Credit risk has reduced markedly in recent weeks. The cost of insuring against the prospect of default is still low in historic terms. (The chart below shows the cost in basis points of ensuring against the prospect of default on 5 year “paper” issued by major UK banks v the ITRAXX Senior Financials Index.)

## **APPENDIX 3: Approved countries for investments as of 30<sup>th</sup> June 2024**

### **Based on lowest available rating**

#### **AAA**

- Australia
- Denmark
- Germany
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

#### **AA+**

- Canada
- Finland
- U.S.A.

#### **AA**

- Abu Dhabi (UAE)
- Qatar (upgraded from AA- 20/3/24)

#### **AA-**

- Belgium
- France
- **U.K.** (UK will be used even if rating falls below AA-, see TMS paragraph 4.3)

## **GLOSSARY**

### **Bail in Risk**

Bail in risk arises from the failure of a bank. Bondholders or investors in the bank would be expected to suffer losses on their investments, as opposed to the bank being bailed out by government.

### **Bank Equity Buffer**

The mandatory capital that financial institutions are required to hold, in order to provide a cushion against financial downturns, to ensure the institution can continue to meet its liquidity requirements.

### **Bank Rate**

The official interest rate of the Bank of England, this rate is charged by the bank on loans to commercial banks.

### **Bank Stress Tests**

Tests carried out by the European Central Bank on 51 banks across the EU. The tests put banks under a number of scenarios and analyse how the bank's capital holds up under each of the scenarios. The scenarios include a sharp rise in bond yields, a low growth environment, rising debt, and adverse action in the unregulated financial sector.

### **Basis Point**

1/100<sup>th</sup> of 1% i.e., 0.01%. 10 basis points is 0.1%.

### **Bonds**

A bond is a form of loan, the holder of the bond is entitled to a fixed rate of interest (coupon) at fixed intervals. The bond has a fixed life and can be traded.

### **Call Account**

A bank account that offers a rate of return and the funds are available to withdraw on a daily basis.

### **Capital Financing Requirement (CFR)**

The CFR is a measure of the capital expenditure incurred historically but has yet to be financed; by for example capital receipts or grants funding. The current CFR balance is therefore financed by external borrowing, and internal borrowing (i.e., use of working capital on the balance sheet – creditors, cash etc).

### **Certificate of Deposit**

Evidence of a deposit with a financial institution repayable on a fixed date. They are negotiable instruments, and have a secondary market, and can be sold before maturity.

### **Collar (Money Market Fund)**

The fund "collar" forms part of the valuation mechanism for the fund. LVNAV funds allow investors to purchase and redeem shares at a constant NAV calculated to 2 decimal places, i.e., £1.00. This is achieved by the fund using amortised cost for valuation purposes, subject to the variation against the marked-to-market NAV being no greater than 20 basis points

(0.2%). (This compares to current Prime CNAV funds which round to 50 basis points, or 0.5%, of the NAV.)

### **Constant Net Asset Value (CNAV)**

Constant Net Asset Value refers to funds which use amortised cost accounting to value all of their assets. They aim to maintain a Net Asset Value (NAV), or value of a share of the fund at £1 and calculate their price to 2 decimal places.

### **Counterparty**

Another organisation with which the Council has entered into a financial transaction with, for example, invested with or borrowed from.

### **Credit Default Swaps (CDS)**

A financial agreement that the seller of the CDS will compensate the buyer in the event of a loan default. The seller insures the buyer against a loan defaulting.

### **Credit Ratings**

A credit rating is the evaluation of a credit risk of a debtor and predicting their ability to pay back the debt. The rating represents an evaluation of a credit rating agency of the qualitative and quantitative information, this result in a score, denoted usually by the letters A to D and including +/-.

### **DMO DMADF**

The Debt Management Account Deposit Facility. This is run by the UK's Debt Management Office and provides investors with the ability to invest with UK central government.

### **ECB**

The European Central Bank, one of the institutions that makes up the EU. Its main function is to maintain price stability across the Eurozone.

### **ESG**

Environmental, society, and governance investing, makes reference to a set of standards for an organisation's behaviour, which can be used by a socially aware investor to make investment decisions. Environmental factors include how an organisation safeguards the environment, social criteria look at how the organisation manages its relationships with the community, employees, suppliers, and customers, and governance deals with leadership, internal controls and audits.

### **Federal Reserve (Fed)**

The central bank of the United States.

### **Forward Deal**

The act of agreeing today to deposit/loan funds for an agreed time limit at an agreed date and rate.

### **Gilts**

least 30% of assets maturing on a weekly basis. Bonds issued by the Government.

**Link Group**

The Council's treasury advisors, who took over from Arlingclose in March 2023.

**Liquidity**

The degree to which an asset can be bought or sold quickly.

**LVNAV Money Market Fund**

Low volatility net asset value. The fund will have at least 10% of its assets maturing on a daily basis and at

**MiFID**

Markets in Financial Instruments Directive, is a regulation that increases the transparency across the EU's financial markets and standardises the regulatory disclosures required. In force since 2008.

**Minimum Revenue Provision (MRP)**

An amount set aside from revenue to repay debt.

**Money Market Funds**

An open-ended mutual fund that invests in short-term debt securities. A deposit will earn a rate of interest, whilst maintaining the net asset value of the investment. Deposits are generally available for withdrawal on the day.

**Public Works Loans Board (PWLB)**

The PWLB is an agency of the Treasury, it lends to public bodies at fixed rates for periods up to 50 years. Interest rates are determined by gilt yields.

**REFCUS**

Revenue Expenditure Funded from Capital Under Statute. Expenditure which would normally be considered revenue expenditure, but has been statutorily defined as capital expenditure, including the giving of a loan, grant or other financial assistance to any person, whether for use by that person or by a third party, towards expenditure which would, if incurred by the council, be capital expenditure. Or expenditure incurred on the acquisition, production or construction of assets for use by, or disposal to, a person other than the council which would be capital expenditure if those assets were acquired, produced or constructed for use by the council.

**SONIA**

Sterling overnight index average interest rate. On each London business day, SONIA is measured as the trimmed mean, rounded to four decimal places, of interest rates paid on eligible sterling denominated deposit transactions.

**Transactional Banking**

Use of a bank for day-to-day banking requirement, e.g., provision of current accounts, deposit accounts and on-line banking.

## UN Principles for Responsible Banking

Are a unique framework for ensuring that signatory banks' strategy and practice align with the vision society has set out for its future in the Sustainable Development Goals and the Paris Climate Agreement.

The framework consists of 6 Principles designed to bring purpose, vision and ambition to sustainable finance. They were created in 2019 through a partnership between founding banks and the United Nations. Signatory banks commit to embedding these 6 principles across all business areas, at the strategic, portfolio and transactional levels.

- **Principle 1:** Alignment, align business strategy with individual's goals as expressed in the sustainable development goals, the Paris Climate Agreement and national and regional frameworks.
- **Principle 2:** Impact and Target Setting, increase positive impacts and reduce negative impacts on, and managing the risks to people and environment.
- **Principle 3:** Clients and Customers, work with clients and customers to encourage sustainable practices and enable economic activities that create shared prosperity.
- **Principle 4:** Stakeholders, engage with stakeholders to achieve society's goals.
- **Principle 5:** Governance and Culture, implement the commitment to these principles through effective governance.
- **Principle 6:** Transparency and Accountability, periodic review of the implementation of these principles, and be transparent about and accountable for the positive and negative impacts, and the contribution to society's goals.

•

A 3-step process guides signatories through implementing their commitment:

1. Impact Analysis: identifying the most significant impacts of products and services on the societies, economies and environments that the bank operates in.
2. Target Setting: setting and achieving measurable targets in a banks' areas of most significant impact.
3. Reporting: publicly report on progress on implementing the Principles, being transparent about impacts and contributions.

## UN Principles for Responsible Investments

The 6 principles for responsible investments offer possible actions for incorporating ESG issues into investment practice.

The principles that the signatories sign up to are;

- **Principle 1:** We will incorporate ESG issues into investment analysis and decision-making processes.
- **Principle 2:** We will be active owners and incorporate ESG issues into our ownership policies and practices.
- **Principle 3:** We will seek appropriate disclosure on ESG issues by the entities in which we invest.
- **Principle 4:** We will promote acceptance and implementation of the Principles within the investment industry.
- **Principle 5:** We will work together to enhance our effectiveness in implementing the Principles.

- **Principle 6:** We will each report on our activities and progress towards implementing the Principles.

The Principles for Responsible Investment were developed by an international group of institutional investors reflecting the increasing relevance of environmental, social and corporate governance issues to investment practices. The process was convened by the United Nations Secretary-General.

## HUNTINGDONSHIRE DISTRICT COUNCIL

**Title/Subject Matter:** Corporate Performance Report, 2024/25 Quarter 1

**Meeting/Date:** Overview and Scrutiny (Performance and Growth) Panel, 4 September 2024

**Executive Portfolio:** Councillor Stephen Ferguson, Executive Councillor for Resident Services and Corporate Performance and Councillor Lara Davenport-Ray, Executive Councillor for Climate Transformation & Workforce

**Report by:** Neil Sloper, Assistant Director (Strategic Insights and Delivery)

**Ward(s) affected:** All

---

### RECOMMENDATION

The Overview and Scrutiny Panel is invited to comment on details of delivery of Corporate Plan actions/projects and operational performance measures from the Cabinet report attached.

**HUNTINGDONSHIRE DISTRICT COUNCIL**

<b>Title/Subject Matter:</b>	Corporate Performance Report, Quarter 1 2024/25
<b>Meeting/Date:</b>	Cabinet, 10 September 2024
<b>Executive Portfolio:</b>	Councillor Stephen Ferguson, Executive Councillor for Resident Services and Corporate Performance and Councillor Lara Davenport-Ray, Executive Councillor for Climate Transformation & Workforce
<b>Report by:</b>	Neil Sloper, Assistant Director (Strategic Insights and Delivery)
<b>Ward(s) affected:</b>	All

---

**Executive Summary:**

The purpose of this report is to brief Members on progress with Corporate Plan actions/projects and the results and forecasts for operational performance measure as at the end of Quarter 1 (April to June 2024).

**Recommendations:**

The Cabinet is invited to consider and comment on progress and performance during Quarter 1, as summarised in the Corporate Performance Report attached and detailed in Appendices A and B.

## 1. PURPOSE

- 1.1 The purpose of this report is to present an update on delivery of the Corporate Plan during Quarter 1 (April to June 2024).

## 2. BACKGROUND

- 2.1 The annual refresh for 2024/25 of the Council's Corporate Plan 2023-2028 was approved at the Council meeting in March 2024. The performance data in the attached Corporate Performance Report and its appendices relates to the performance measures and actions/projects selected for 2024/25.
- 2.3 Performance data has been collected in accordance with standardised procedures.

## 3. PERFORMANCE MANAGEMENT

- 3.1 Members of Cabinet and the Overview and Scrutiny (Performance and Growth) Panel have an important role in the Council's Performance Management Framework and a process of regular review of performance data has been established. The focus is on delivery against our strategic outcomes and regular reporting should enable Scrutiny to maintain a strategic overview. Their comments will be shared with Cabinet following the Overview and Scrutiny Panel's meeting on 4 September 2024.
- 3.2 Progress on Corporate Plan actions/projects and operational performance measures is reported quarterly. The **Corporate Performance Report** attached summarises progress and performance by outcome. The report is focused on outcomes, with a single page summary followed by tables and pie charts summarising the status of actions/projects and performance measures linked to the outcome. A full list is also provided for each outcome which shows the status reported for each action/project and performance measure linked to that outcome as at Q1.
- 3.3 Further detail is also available in appendices to the Corporate Performance Report. At the request of the Overview and Scrutiny Members, the report format has been amended and **Appendix A** now provides integrated updates on Corporate Plan actions and projects from responsible officers, covering both progress against planned delivery and the impact that has had on the outcome.
- 3.4 **Appendix B** provides updates on operational performance measures, showing performance this year broken down by month and how this compares to targets, intervention levels and last year's performance, where possible. This is provided via graphs to make such comparisons simpler and provide a direction of travel. For those who may need to use screen readers to access the information, an accessible table version link will be available on [Corporate Plan and Performance - Huntingdonshire.gov.uk](https://www.huntingdonshire.gov.uk).
- 3.4 The following table summarises overall progress in delivering Corporate Plan actions for 2024/25:

Status of Corporate Plan Actions	Number	Percentage
Green (on track)	37	76%
Amber (within acceptable variance)	12	24%
Red (behind schedule)	0	0%
Missing	0	0%

Note: actions being delivered as/through projects/programmes are not included in this table as their status is being reported via project reporting mechanisms instead and this avoids any double counting. Percentages may not sum to 100% due to rounding.

3.5 The statuses of Corporate Plan projects at the end of June are shown in the following table.

Status of Corporate Plan Projects/Programmes	Number	Percentage
Green (on track)	9	60%
Amber (within acceptable variance)	6	40%
Red (behind schedule)	0	0%
Missing	0	0%

Note: This no longer includes corporate projects which are not linked to actions in the current Corporate Plan, progress for these projects are reported on a project by project basis, through Overview and Scrutiny panel meeting e.g. the One Leisure programme

3.6 The latest statuses for operational performance measures at the end of June are summarised here:

Latest Operational Performance Indicator Results	Number	Percentage
Green (on track)	21	66%
Amber (within acceptable variance)	8	25%
Red (behind schedule)	3	9%
Missing	0	0%

Forecast outturn statuses for operational performance measures are summarised here:

Forecast Year-End Operational Performance Indicator Results	Number	Percentage
Green (on track)	26	81%
Amber (within acceptable variance)	5	16%
Red (behind schedule)	1	3%
Missing	0	0%

#### 4. COMMENTS OF OVERVIEW & SCRUTINY PANELS

4.1 The Overview and Scrutiny (Performance & Growth) Panel is due to receive this report at its meeting on 4 September 2024. Comments from the Panel will be shared with Cabinet following the Overview and Scrutiny Panel's meeting.

#### 5. RECOMMENDATIONS

5.1 The Cabinet is invited to consider and comment on progress and performance during Quarter 1, as summarised in the **Corporate Performance Report** and detailed in **Appendices A and B**.

#### 6. LIST OF APPENDICES INCLUDED

**Corporate Performance Report, Quarter 1, 2024/25**

**Appendix A** – Progress on Corporate Plan Actions/Projects, Quarter 1, 2024/25

**Appendix B** – Operational Performance Measure Graphs, Quarter 1, 2024/25

# Outcome 1: Improving the happiness and wellbeing of residents

**We want the highest possible quality of life for the people of Huntingdonshire. It will be a place which attracts employers and visitors and somewhere residents are proud to call home. We will be evidence based, responsive and support the foundations of a good life. This includes personal independence, prosperity, social connection, community and good health.**

*Most actions for this outcome are on track at the end of this quarter. The action to maximise physical activity in the district and our work to promote this with local partners has benefitted from the recent successful delivery of the Community Health Prevention Project. Our new action to deliver a Community Health and Wealth Building Strategy is progressing well, following co-development with key partners. The main principles of the strategy are being reviewed and member input requested in July by from the Overview and Scrutiny (Environment, Communities and Partnerships) Panel. The action to refresh our Social Value Policy and explore larger opportunities to maximise local benefit through a Community Wealth Building approach to procurement and the roles of anchor institutions has improved from Red to Amber status due to a plan being developed to deliver this work and the transfer of this action to the Corporate Director (People).*

*There have been eight Huntingdonshire Futures grants awarded in Q1, contributing to a Green status for our corporate project to formally engage with relevant stakeholders, residents and business to explore how our place strategy priorities are transformed into delivery. Other work contributing to this project in Q1 includes priority areas being agreed and next steps outlined for data analysis and a launch event for stakeholders to form initial priorities. Continuing from 2023/24, the corporate project to deliver the skills and employment workstream of the UK Shared Prosperity Fund programme remains at an Amber status in Q1. However, delivery is underway, with referrals received, sessions being delivered and further targeted activity scheduled over the summer with school leavers.*

*The number of residents attending our One Leisure Active Lifestyles sessions are up by over two thirds (68.6%) compared to Quarter 1 in 2023/24. Although attendances at our Sports Development activities and programmes are lower this quarter compared to the same period last year (-5%) the service is performing above target and is forecasting this to also be the case at year-end. The only performance measure that is not on track at Q1 for this outcome relates to One Leisure facilities admissions, which is reported with an Amber status. This is due to lower admissions than the Q1 target (14.6k admissions lower than 381,546 target for end of June) although the service do expect to over-perform and reduce this gap later in the year during the months of peak attendance. Currently the service are forecasting an Amber status for March 2025 but state it is possible the target will be achieved by the year end.*

## Performance Summary:

Status of Corporate Plan actions	Number	%
<b>Green (on track)</b>	5	83%

2. Number of attendances at Sports Development activities and programmes (cumulative year to date)	G	G
3. Number of One Leisure Facilities admissions – swimming, Impressions, fitness classes, sports hall and pitches (excluding Burgess Hall and school admissions) (cumulative year to date)	A	A

## Outcome 2: Keeping people out of crisis

**We will identify the root causes that lead people into crises and find ways to prevent them. We will do this through our own actions. We will also work in partnership with residents, businesses, community groups, charities and our public sector partners.**

*Good progress on delivering actions and projects linked to this outcome has continued in Quarter 1, with all reported as having a Green status. The corporate project to report regularly on the delivery of an integrated financial vulnerability model between HDC and our partners is progressing well, despite a slight delay to the relocation of Citizens Advice, with the move into Pathfinder House expected to be completed during July. Joint working sessions are also taking place with the NHS social prescribing team who are also now co-located within Pathfinder House.*

*As part of regular quarterly reporting for our two new actions in this outcome, data will be presented to members of the Overview and Scrutiny (Environment, Communities and Partnerships) Panel in July. This will provide an update on how the Council Tax project and other work is helping us to identify and act on opportunities to adopt early intervention and how we are maximising the benefits of a targeted approach to support residents at risk of experiencing crisis through the promotion and delivery of relevant services, such as our joint data project with the Police.*

*The number of Disabled Facilities Grant (DFG) adaptations remains at an Amber status in Quarter 1 (also Amber in Q4 2023/24) and the average time taken to complete DFGs has been rated Red at the end of Q1, from Amber at the end of Q4 2023/24. The service expect to achieve their target by the year end for the number of DFG adaptations while an Amber status is currently forecast at year end for the average time taken to complete DFGs. A new action to “Work with partners to review the provision of Disabled Facilities Grants and ensure we maximise our ability to prevent crisis and support those who need help” is included in our Corporate Plan this year and the Overview and Scrutiny (Environment, Communities and Partnerships) Panel has agreed to form a Task and Finish Group to support this.*

*The remaining performance measures related to this outcome all have a Green status for Q1. Highlights include our Benefits team’s performance who reduced the average time to process new claims and changes of circumstance and our Housing Needs and Resource team who achieved 131 homelessness preventions from April to June (a 19% increase on the same period last year).*

## Performance Summary:

Status of Corporate Plan actions	Number	%

Corporate Plan Action	Direction of Travel	Latest Status
10. Act on opportunities for early intervention and regularly report on learning and impact.	N/a	G
11. Maximise, and report on, the benefits of a targeted approach to support residents at risk of experiencing crisis through the promotion and delivery of relevant services (e.g. improve data sharing with the police to inform a targeted on-the-ground door-knocking campaign to help prevent crime).	N/a	G

Corporate Plan Project/Programme	Direction of Travel	Latest Status
9. Report regularly on progress on the delivery of an integrated financial vulnerability model between HDC and partners (PROJECT).	↔	G

Operational Performance Indicator	Latest Status	Forecast Status
4. The number of residents enabled to live safely at home and prevented from requiring care or a prolonged stay at hospital due to a Disabled Facilities Grant (DFG) (cumulative year to date)	A	G
5. Average time (in weeks) between date of referral and practical completion of jobs funded through Disabled Facilities Grants (cumulative year to date)	R	A
6. Average number of days to process new claims for Housing Benefit and Council Tax Support (cumulative year to date)	G	G
7. Average number of days to process changes of circumstances for Housing Benefit and Council Tax Support (cumulative year to date)	G	G
8. Number of homelessness preventions achieved (cumulative year to date)	G	G
9. Number of households housed through the housing register and Home-Link scheme (cumulative year to date)	G	G

# Outcome 3: Helping people in crisis

**Where a crisis has already happened, we will work holistically to understand the issues, the cause of these issues and what opportunities exist to address them. We will seek to prevent multiple personal crises becoming entrenched and unmanageable by addressing root causes**

*The Corporate Plan for 2024/25 commits us to reporting on the benefits of targeted approaches to support residents to improve their quality of life, support residents at risk of crisis and support residents who are already experiencing crisis. Groups who are in need of help as the result of crisis include those who are homeless, those impacted by the cost-of-living crisis and refugees and other guests in need of support while living in local communities.*

*Most actions aligned to this outcome are on track as at the end of June 2024. For example, our Community team continue to support refugees and other guests by fostering good community relations and providing advice and assistance to both hosts and guests under the Homes for Ukraine scheme. More recently, support has been extended to include further housing support for refugees through the Local Authority Housing Fund.*

*The action to promote WeAreHuntingdonshire as a tool for partners to provide directed and tailored support, based on our 'wider determinants of health' approach has also been given a Green status at Q1. Promotion of the tool has begun this quarter, using a range of methods including leaflets delivered to specific areas within the district, households that have moved into or within the district and also directly within our communities.*

*One action reported with an Amber status relates to our work with partners to review the provision of Disabled Facilities Grants. As noted in Outcome 2, the Overview and Scrutiny (Environment, Communities and Partnerships) Panel Task and Finish Group will help to support our work in this area and is currently being scoped and finalised. It is hoped that Member input will help us to review and improve this process.*

*In line with the performance reported for Outcome 2, the number of homelessness preventions achieved and the number of households housed through the housing register and Home-Link scheme, the Housing Needs and Resources team successfully kept the numbers of households in Temporary Accommodation (TA) consistently below our target at the end of every month this quarter.*

## Performance Summary:

Status of Corporate Plan actions	Number	%

16. Continue to promote WeAreHuntingdonshire as a tool for partners to provide directed and tailored support based on our wider determinants approach.	↔	G
17. Lobby, and support campaigns, for improvements to the living conditions of local residents.	N/a	G

Operational Performance Indicator	Latest Status	Forecast Status
10. Number of households in Temporary Accommodation (snapshot at end of each period)	G	G

# Outcome 4: Improving housing

**We want everyone to live in a safe, high quality home regardless of health, stage of life, family structure, income and tenure type. Homes should be energy efficient and allow people to live healthy and prosperous lives. New homes should be zero carbon ready and encourage sustainable travel.**

*The action relating to our work with Health and Social Care Providers to explore future models of housing, support and care to live independently for longer was previously an Amber status (in Q4 2023/24), however work has progressed since April 2024 and the status has improved to Green. This is due to demand profiles for specialist housing groups being received and further discussions taking place with partners to help inform the delivery of new housing and our 2025 Housing Strategy.*

*A new action to complete an Affordable Housing Advice note to support the delivery of new affordable housing is on track, with a draft due to be shared with housing and planning teams in Q2.*

*There are four actions reported as Amber, with most delayed due to external factors. Actions relating to the Supported Housing (Regulatory Oversight Act) cannot proceed until associated regulations are set out by Government and these will be delayed by the General Election. Work with Registered Providers on regeneration opportunities continues to be discussed with our partners but Places for People activity has been more focused on new developments recently. Our own work on a policy to support the use of civil penalties in private sector housing enforcement has started and includes a review of civil penalty schemes being applied across our neighbouring authority areas.*

*While the latest operational performance indicator results show the increase in homes with a Council Tax banding during Q1 was slightly below target (+223 compared to a target of +227), the number of new affordable homes delivered was slightly above target (62 compared to a target of 58). Forecasts are unlikely to be precise after just one quarter so the predicted year-end statuses (Green for net increase in total homes and Amber for new affordable homes) are likely to be subject to change as further data becomes available.*

*Delivery of new homes, and other types of development within the district, can be aided by faster decision making on planning applications received. Results for all three planning application performance indicators show above target performance at the end of Q1. Two of the indicators show improvement compared to the position at the end of Q1 in 2023/24, while the percentage of major applications decided on target now sits at 100% based on decisions reached in April, May and June. The number of outstanding backlog cases which are older than 16 weeks and have no current extension of time in place has been reduced during the quarter. This has had an impact on performance for Minor applications in particular.*

## Performance Summary:

16. Number of planning applications over 16 weeks old where there is no current extension of time in place (total at end of each month)	G	G

## Outcome 5: Forward-thinking economic growth

**We want our local economy to attract businesses that prioritise reducing their carbon footprint. A place where businesses choose to start up, grow and invest in high value jobs so they and our residents and high streets, can flourish and thrive. Local people should be able to develop their skills to take advantage of these opportunities, with businesses and education providers working more closely together to deliver an inclusive economy.**

*Recent work to help attract businesses to the area includes an Invest in Huntingdonshire exhibition at a regional conference, where our Economic Development services were promoted, and networking meetings updating on the current economic outlook and progress with the Made in Huntingdonshire campaign. Business support programmes being funded through the UK Shared Prosperity Fund (UKSPF) are all on track, with the first round of grant awards also made through the Rural England Prosperity Fund (RPF) despite a slight delay in starting this new grant scheme.*

*Partnership working has continued, with a business roundtable meeting held to gather feedback on recruitment and talent needs as part of a review of demand for future provision of Further Education (FE) provision. A presentation on the Cambridgeshire and Peterborough Combined Authority (CPCA)'s initial report on FE provision and skills needs is due in July. The Economic Development team continues to participate in workshops and meetings on the CPCA's State of the Nation work and our Planning team remain involved in activities linked to A428, A141 and East-West Rail developments.*

*Two of the three projects/programmes under this outcome are being reported as Amber, while the delivery of business support projects within the UK Shared Prosperity Fund and Rural England Prosperity Fund is on track overall and has now been reassessed as Green from Amber last quarter. The Market Towns Programme continues to be rated as Amber, with a detailed summer update on this project scheduled for discussion at the Overview and Scrutiny (Performance & Growth) Panel in July. The Local Plan status has moved from Green to Amber due to the impact of the General Election, which has delayed the planned consultation period for Further Issues and Options, and there is also now a vacancy in the team which has reduced capacity. However, progress has been made with draft documents which are being considered by the Local Plan Advisory Group.*

*The refresh of the Huntingdonshire Economic Growth Strategy continues to be reported with an Amber status, with resourcing issues delaying progress further. However, scoping and planning are underway and the team is aiming to complete procurement over the summer.*

29. Deliver the business support projects within the UK Shared Prosperity Fund (UKSPF) and Rural England Prosperity Fund (REPF) programme, including Manufacturing Digitalisation, Green Business Initiative, Jumpstart business competition and a new Start-up programme (PROJECT).	↑	G
31. Continue the delivery of the Market Town Programme, including the ongoing delivery of Future High Street projects in St Neots, development of new Retail Hub in Ramsey, and various other funded projects within the four market towns. Commence feasibility work on new projects to enable them to be brought forward when funding is available (PROJECT).	↔	A
32. Continue the update to the Local Plan, including updating evidence bases in line with National Planning Policy, particularly where it relates to Economy, Environment and Housing (PROJECT).	↓	A

# Outcome 6: Lowering carbon emissions

**We will take positive action to reduce carbon emissions and become a net zero carbon Council by 2040. We will enable and encourage local people and businesses to reduce carbon emissions and increase biodiversity across Huntingdonshire.**

*10 out of 12 actions under this outcome were reported as being on track at the end of June, with the remaining two reported with an Amber status indicating that they are within an acceptable variance and slight delays may be recoverable. Further work is required to identify carbon emissions from the Council's data centres, although the ICT service is able to demonstrate that equipment disposal is already compliant with the Waste Electrical and Electronic Equipment (WEEE) disposal certificate standards. Work to support community projects/plans to reduce carbon emissions is also underway, with the Council supporting efforts to reduce food waste across the district.*

*A number of schemes to reduce the Council's own emissions are progressing well, including the completion of the Hydrotreated Vegetable Oil (HVO) Fuel Trial. The trial has now been completed and lessons learned will be presented to Overview & Scrutiny in the autumn and inform a business case for continued use of HVO, as part of the overall Fleet Decarbonisation Plan being developed. Technical support and consultancy are being procured for this Plan and the Energy Strategy. Proposals for investment in further solar power to generate electricity on Council buildings are being progressed for approval based on an expected payback period of 7½ years.*

*While previous progress with developing the Council's procurement rules to further embed social and environmental value was reported as Red at the end of 2023/24, the Procurement Manager is now reporting that this action had a Green status in Q1. This is due to plans to recruit a new post focused on data analysis to work with them on social and environmental value elements of procurement.*

*One of the projects previously assessed as Amber is now being reported as Green, with the Biodiversity for All project grant awards progressing. The commissioning of Active Travel Studies, part of the UK Shared Prosperity Fund programme, is Amber due to a delayed start but is now underway and this project may still be completed in this municipal year if contracts can be agreed soon.*

*Following the adoption of an Electric Vehicle (EV) Strategy in March 2024, a pilot to install public EV chargers in rural areas is being progressed. Research into land ownership is currently underway to help identify suitable sites for investment. Other work to help reduce the district's overall emissions includes the launch of a Local Business section on our Climate Hub website:*

*<https://letstalkhuntingdonshire.net/resources-for-local-businesses>*

46. Commission Active Travel Studies (UKSPF) to influence/inform future investment priorities (PROJECT).	↔	A

Operational Performance Indicator	Latest Status	Forecast Status
17. Efficiency of vehicle fleet driving – Energy Efficient Driving Index score for the Waste service (cumulative year to date)	G	G

## Outcome 7: Delivering good quality, high value-for-money services

**Around 80% of our resources are aligned to business as usual (BAU) service delivery and this priority focuses on delivering good quality, high value for money services with good control and compliance with statutory functions. We will continue to provide a wide range of existing statutory and important services and seek to improve their efficiency and effectiveness.**

*Good progress has been made on a range of actions and projects focused on improving service delivery, including hosting the Local Government Association (LGA) team for the Corporate Peer Challenge from 15th to 17th May. The LGA's findings will be included in a final report, with an Action Plan to be developed as our response to the assessment and challenge received.*

*We have approved an Artificial Intelligence (AI) policy, with controls in place to enable fair and safe use of AI products while piloting activities and the automation of tasks that are expected to help deliver improved productivity.*

*Five out of the six projects/programmes that relate to this outcome were listed as being on track by the end of Quarter 1. The Planning Improvement Programme remains at Amber following the project manager leaving the authority in December 2023. Work is ongoing on individual projects within this programme while balanced against maintaining performance.*

*Progress on some other activities has been delayed by staffing changes and by the General Election being called for 4th July, with the pre-election periods for both the May and July elections limiting our ability to consult and engage with residents. The Commercial Investment Strategy (CIS) refresh is now due to take place alongside 2025/26 budget setting but for now CIS reserves continue to achieve comparable returns with lower risk through investment with the Debt Management Office.*

*11 operational performance indicators had not meet targets at the end of June, with three having a Red status. While the number of missed bins is higher than expected, this is linked to changes in collection practices linked to the introduction of the Garden Waste Subscription Service. In June there were 999 missed collections from over 415,000 collections (a missed bin rate of 0.06%). The service is already reporting lower numbers being missed and is confident that the annual target will still be met. Long-term and short-term sickness absence are now reported separately, with long-term sickness above the intervention level but falling as cases are actively managed and staff provided with appropriate support. As noted in outcome 2, time taken to complete jobs funded through Disabled Facilities Grants is higher than our intervention level, making planned work with partners and Councillors to improve processes an even higher priority.*

## Appendix A: Progress on Corporate Plan Actions

	<p><b>Outcome: Improving the happiness and wellbeing of residents</b></p> <p><b>Activity type: Do</b></p>
---	---

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
1. Deliver a Community Health and Wealth Strategy, to link broader social determinants of health with a Community Wealth Building approach.	Cllr Pitt	Community Health and Wealth Building Strategy principles are at Scrutiny in July for member input, following co-development with key partners.	N/a	<b>G</b>	The work to date has informed the development of the Hinchingsbrooke Hospital rebuild programme and informed procurement activity at the Council.
2. Undertake a 'deliberative democracy' approach to the development of our Community Health and Wealth Strategy.	Cllr Pitt	Being discussed and consulted on as part of the Health and Wealth Building Strategy.	N/a	<b>G</b>	Discussions with partners on the community co-production being joint activity that also supports the delivery of the Huntingdonshire Futures place strategy work.

**Outcome: Improving the happiness and wellbeing of residents**

**Activity type: Enable**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
3. Deliver the skills and employment workstream of the UK shared prosperity programme (PROJECT).	Cllr Wakeford	Delivery is underway, with dedicated skills advisors taking referrals and delivering sessions across the district. Targeted activity is scheduled with school leavers over the summer, and additional projects are under development.	↔	A	More skills support for HDC residents, particularly high need residents signposted through Residents Advice and Information Team.
4. Refresh our Social Value Policy and explore larger opportunities to maximise local benefit through a Community Wealth Building approach to procurement and the roles of anchor institutions.	Cllr Davenport-Ray	Plan has been developed to deliver this work, and baseline all procurement spend. Work has been picked up by Oliver Morley following departure of Karen Sutton.	↑	A	Work will focus on key priorities identified as part of the Health and Wealth Strategy.
5. Focus on maximising physical activity in the district, and work to promote this across local partners.	Cllr Pitt	Successful delivery of the Community Health Prevention Project - reaching residents with underlying health vulnerabilities, and delivering activity in community setting, and delivering year on year growth in one leisure attendances.	N/a	G	Increase of 100,000 attendances across One Leisure in the past year, demonstrable improvements to mobility and fitness measures delivered to residents with health vulnerabilities.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
6. Maximise, and report on, the benefits of a targeted approach to support residents to improve their quality of life through the promotion and delivery of relevant services (e.g. run campaigns based on a customer segmentation approach, track progress and regularly report on take-up and impact).	Cllr Pitt	Targeted support provided through a range of channels to ensure economic, social and physical activity needs are supported. Currently delivered to movers within the area via council tax, leaflets being delivered across the Oxmoor as part of a joint project with health, and targeted activity via community groups.	N/a	G	All data will be presented to members as part of regular quarterly reporting in July.

**Outcome: Improving the happiness and wellbeing of residents**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
7. Continue to work with statutory partners to secure improvements to transport options for Huntingdonshire, including active travel.	Cllr Wakeford	Ongoing engagement with the Cambridgeshire Peterborough Combined Authority (CPCA) and Cambridgeshire County Council across a range of topics including East-West Rail, A141 and A428. It is anticipated that further discussions regarding Alconbury Station and mobility hubs will progress in Q2. Active travel is being promoted to be incorporated within other infrastructure where possible, including the Lincs and Fens Reservoirs.	↔	G	Feedback on reservoir proposals will be provided to Anglian Water. Commitment from CPCA to undertake a review of the case for Alconbury Station, linked to growth opportunities.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
8. Formally engage with relevant stakeholders, residents and businesses to explore how place strategy priorities are transformed into practical delivery (PROJECT).	Cllr Conboy	Huntingdonshire Futures grant programme has been launched and we have begun to award to the first applicants - eight awarded so far. Inclusive Economy - three priority areas agreed as well as next steps for data analysis. Health Embedded - Refocus to support Community Health and Wealth Building informed by deliberative democracy. Environmental Innovation - Launch event held with 45+ stakeholders, forming initial priorities.	↑	G	Grants are bringing Futures to life, positively impacting residents linked to Pride in Place and Health Embedded. Inclusive Economy are focused on opportunities for those who are disabled and long-term sick, women going back into the workplace, and young people. Health Embedded focused on partnership working for the future benefit of Huntingdonshire.

**Outcome: Keeping people out of crisis**
**Activity type: Do**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
9. Report regularly on progress on the delivery of an integrated financial vulnerability model between HDC and partners (PROJECT).	Cllr Pitt	Slight delay to Citizens Advice (CA) relocation to Pathfinder House due to CA staff absences, but move will be completed in mid-July. NHS social prescribing team now also operating out of Pathfinder House, with regular joint working sessions.	↔	G	Joint working supporting improved resident outcomes.
10. Act on opportunities for early intervention and regularly report on learning and impact.	Cllr Pitt	Council Tax project and others identifying ways for us to intervene ahead of an issue materialising.	N/a	G	All data will be presented to members as part of regular quarterly reporting in July.

### Outcome: Keeping people out of crisis

#### Activity type: Enable

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
11. Maximise, and report on, the benefits of a targeted approach to support residents at risk of experiencing crisis through the promotion and delivery of relevant services (e.g. improve data sharing with the police to inform a targeted on-the-ground door-knocking campaign to help prevent crime).	Cllr Pitt	Joint data project with the police underway, to create targeted data insight.	N/a	G	All data will be presented to members as part of regular quarterly reporting in July.

### Outcome: Helping people in crisis

#### Activity type: Do

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
12. Continue to support refugees and other guests, seeking to support good community relations and smooth transition into long-term residency or return home.	Cllr Pitt	Work continues and has been extended to include further support for housing through the Local Authority Housing Fund.	↔	G	No refugees or guests have yet to end up in temporary accommodation due to failed placements, showing in part the positive outcomes delivered by the preventative approach.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
13. Work with partners to review the provision of Disabled Facilities Grants and ensure we maximise our ability to prevent crisis and support those who need help.	Cllr Ferguson	Scrutiny review currently being scoped and finalised, and review and improvement of the processes is currently underway.	N/a	A	Improvements will deliver faster and more efficient service.

**Outcome: Helping people in crisis**

**Activity type: Enable**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
14. Focus on maximising the economic success of residents via a Community Wealth building approach.	Cllr Pitt	Community Health and Wealth Building Strategy principles are at Scrutiny in July for Member input, following co-development with key partners.	N/a	G	Improved local employment and wider benefit expected.
15. Maximise, and report on, the benefits of a targeted approach to support residents experiencing crisis through the promotion and delivery of relevant services (e.g. identifying individuals who could benefit from support offered by the Resident Advice and Information team and reporting on outcomes).	Cllr Pitt	Targeted support provided through a range of channels to ensure economic, social and physical activity needs are supported. Currently delivered to movers within the area via Council Tax leaflets being delivered across the Oxmoor as part of a joint project with health, and targeted activity via community groups.	N/a	G	All data will be presented to members as part of regular quarterly reporting in July.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
16. Continue to promote WeAreHuntingdonshire as a tool for partners to provide directed and tailored support based on our wider determinants approach.	Cllr Pitt	Being promoted via leaflets across Oxmoor, on Council Tax leaflets for movers, and via community all pointing to different instances of the WeAreHuntingdonshire website to enable us to count impacts.	↔	G	Impacts are expected to include more residents gaining employment support and skills training, taking advantage of physical activity opportunities including free trials at One Leisure. There will also be improvements in social connection and volunteering opportunities. All of these are proven to improve quality of life outcomes.

**Outcome: Helping people in crisis**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
17. Lobby, and support campaigns, for improvements to the living conditions of local residents.	Cllr Conboy	Taking an active part in the County Council's Poverty Commission.	N/a	G	More effective targeting of resources.

**Outcome: Improving housing**

**Activity type: Do**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
18. Commence work on a new Housing Strategy for 2025-2030.	Cllr Wakeford	This work is scheduled for the last quarter of 2024/25	N/a	G	The completion of a new Housing Strategy will inform the delivery of new housing in the district.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
19. Continue to use surplus Council owned sites to deliver affordable housing, for example working with the Longhurst Group (PROJECT).	Cllr Wakeford	New draft contracts have been issued by Longhurst to reflect revised Heads of Terms, work continues on the legal amendments necessary. In parallel, Longhurst continue to work on a revised planning application that they aim to submit in September 2024.	↔	A	The revision of the contract enables the Council and Longhurst to continue to work towards the use of Council owned sites to deliver affordable housing.
20. Complete an Affordable Housing Advice note that will support the delivery of new affordable housing by providing clear guidelines to developers.	Cllr Wakeford	Work has commenced on this document and an early stage "skeleton" document is being put together to share with housing and planning colleagues in Q2.	N/a	G	When completed, this document will give clarity to developers of affordable housing on the Council's expectations in relation to tenure, size and specialist housing. This will set clear expectations on the delivery of new affordable homes, including the objectives in our Climate Strategy and Corporate Plan.
21. Commence work on a policy to support the use of civil penalties with regard to private sector housing enforcement.	Cllr Ferguson	Work has started to draft a policy and review civil penalty schemes across neighbouring authorities to ensure consistency.	N/a	A	This will allow civil penalties to be issued where breaches of legislation are found and allow the enforcement of housing legislation in the private housing sector.
22. Carry out a review of supported exempt accommodation in the area, linked to the Supported Housing (Regulatory Oversight) Act, which will lead to the development of a Supported Housing Strategy.	Cllr Ferguson	No further information released from the Government on when we can expect the regulations to be released that are associated with the Act. No work can commence until this information is available.	N/a	A	No immediate impact as we have been unable to commence this work so far.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
23. Implement the government's new National Supported Housing Standards and introduce licensing regulations.	Cllr Ferguson	As with action 22, no further information released from the Government on when we can expect the regulations to be released that are associated with the Act. No work can commence until this information is available.	N/a	A	No immediate impact as we have been unable to commence this work so far.

**Outcome: Improving housing**
**Activity type: Enable**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
24. Maintain the level of new housing delivery, which meets the needs of Huntingdonshire residents, including the type of home and tenure (open market and social housing).	Cllr Wakeford	The delivery of new housing is broadly in line with the Council's expectations for this year at the end of the first quarter.	↔	G	The delivery of new housing increases the number of homes each year to help people in housing need. New homes are also more thermally efficient.
25. Work in partnership to look at best practice and funding to improve housing conditions, including retrofit programmes in social and private housing.	Cllr Wakeford	Work continues in this area as opportunities arise, and information is shared amongst our Registered Providers (RP) partners. We recently had an RP Forum which focused on Place Making and work on the review of the Local Plan.	↔	G	Improving housing conditions supports Priority 2 of the Corporate Plan.

**Outcome: Improving housing**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
26. Continue to work with Registered Providers to improve conditions in existing accommodation through regeneration schemes.	Cllr Wakeford	Discussions continue with Places for People on a regeneration opportunity in Huntingdon, but they have been concentrating their activity on new developments in recent months. Engagement with partners continues as we seek to maximise the benefits of shared working.	↔	A	Improving housing conditions supports Priority 2 of the Corporate Plan.
27. Work with Health and Social Care Providers to explore future models of housing, support and care, enabling people to live independently for longer.	Cllr Wakeford	The County Council has now shared demand profiles for specialist housing groups and discussions have commenced with commissioning teams and also Head of Brokerage at the County Council to help inform the delivery of new housing and the Housing Strategy for 2025.	↑	G	Improving housing conditions supports Priority 2 of the Corporate Plan.

**Outcome: Forward-thinking economic growth**

**Activity type: Do**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
28. Promote Huntingdonshire as a destination for high value inward investment, prioritising businesses that are proactively reducing their carbon emissions, and produce an annual report on activity.	Cllr Wakeford	Invest in Huntingdonshire has exhibited at a regional conference to promote our services to businesses. The Made in Huntingdonshire campaign has four new case studies of investors in the district.	↔	G	We are continuing to raise the profile of the district, its innovative companies and key selling attributes.
29. Deliver the business support projects within the UK Shared Prosperity Fund (UKSPF) and Rural England Prosperity Fund (REPF) programme, including Manufacturing Digitalisation, Green Business Initiative, Jumpstart business competition and a new Start-up programme (PROJECT).	Cllr Wakeford	UKSPF business support programmes are on track. The REPF business grant scheme was slightly delayed in starting and now has a pipeline of projects with the first round of grant awards made.	↑	G	Outcomes and outputs are recorded within the UK Shared Prosperity Fund programme separately.
30. Refresh the Huntingdonshire Economic Growth Strategy.	Cllr Wakeford	Delayed progress owing to resourcing. Scoping and planning underway, with the aim of completing procurement over the summer.	↔	A	No immediate impact as this work is being scoped and planned.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
<p>31. Continue the delivery of the Market Town Programme, including the ongoing delivery of Future High Street projects in St Neots, development of new Retail Hub in Ramsey, and various other funded projects within the four market towns. Commence feasibility work on new projects to enable them to be brought forward when funding is available (PROJECT).</p>	<p>Cllr Wakeford</p>	<p>Town centre improvements works on schedule for completion in March 2025. Priory Centre refurbishment is due to commence in October, which is a month later than originally scheduled due to objections raised to the scheme planning application. Work is currently underway to resolve these objections and secure consent. Other elements of the programme include Ramsey Great Whyte, Digital Screens and the Shop Front grant scheme, which are all proceeding as planned.</p>	<p>↔</p>	<p>A</p>	<p>Improvement to the local economy of the four market towns in the district, creating more high-quality jobs and skills prospects for local residents. Additional benefits to the Council include increased Business Rates income potential.</p>

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
32. Continue the update to the Local Plan, including updating evidence bases in line with National Planning Policy, particularly where it relates to Economy, Environment and Housing (PROJECT).	Cllr Sanderson	The public engagement material on Further Issues and Options scheduled for consideration by O&S and Cabinet in July has been delayed due to the General Election, which will also delay the consultation period originally scheduled from late July to mid October. A vacancy in the team has also reduced capacity. However, draft documents are under political consideration by the Local Plan Advisory Group.	↓	A	<p>The public engagement phase will be amended to start in the third week of September, subject to Cabinet approval. This will actually be more convenient to many stakeholders, particularly Town and Parish Councils, as it overcomes the difficulties of engagement during August.</p> <p>It will give rise to a slight consequential delay in the Preferred Options engagement in 2025, which will be reflected in an updated Local Development Scheme. However, this could be beneficial in allowing additional time to better reflect anticipated changes to the national planning system.</p>

**Outcome: Forward-thinking economic growth**

**Activity type: Enable**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
33. Work with intermediaries, professional service networks, investors and developers to understand the health of the economy, develop responses and attract investment.	Cllr Wakeford	The third networking meeting took place in April, with updates on the economic outlook and the Made in Huntingdonshire campaign.	↔	G	Intelligence gathering from the market is a vital part of understanding trading conditions and business sentiment.

**Outcome: Forward-thinking economic growth**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
34. Work with the CPCA and partners to complete a review of the future demand for Further Education (FE) provision in the St Neots area and development of the Local Skills Implementation Plan, prioritising connections between FE provision and local employers aligned to core growth sectors.	Cllr Wakeford	A business roundtable was held in April to gather feedback on future recruitment and talent pipeline needs. This will form part of the final recommendations that CPCA have commissioned. The initial report presentation is scheduled for July.	↑	G	A set of recommendations for Further Education provision and skills needs will support our corporate priorities and the Inclusive Economy workstream within the Huntingdonshire Futures project.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
35. Influence and contribute to the creation of a Devolution2 deal for Cambridgeshire & Peterborough; the State of the Region and Place Strategy Vision work and the commissioning of all future business support and grant funding provision.	Cllr Wakeford	Monthly attendance at Technical and State of the Region updates. Attendance at in-person workshop with stakeholders to review progress, positioning and feedback on priorities, dashboard and themes emerging.	↔	G	Work still ongoing.
36. Influence delivery of infrastructure including East West Rail (EWR), A428, A141 Strategic Outline Business Case and future Transport Strategies.	Cllr Wakeford	A428: in construction and on target as per published timetable. EWR: limited activity in Q1 given announcement of July general election. A141: Strategic Outline Business Case ongoing and expected to be reported to CPCA Transport Infrastructure Committee in July.	↔	G	Given strategic nature of work, work is ongoing.

**Outcome: Lowering carbon emissions**

**Activity type: Do**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
37. Complete Hydrotreated Vegetable Oil (HVO) Fuel Trial and present a business case for decision.	Cllr Taylor	Trial complete including teaming up with Fire and Police services. Write up of lessons learned underway to come to Scrutiny in the autumn.	N/a	G	Reduction in carbon emissions.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
38. Deliver a Fleet Decarbonisation Plan.	Cllr Taylor	Work is underway to secure appropriate technical support and to deliver the plan by the end of the municipal year.	N/a	G	Reduction in carbon emissions.
39. Deliver our Energy Strategy.	Cllr Pitt	Scope agreed with Local Partnerships. This work will be progressed in Q2.	↔	G	Lowering the carbon footprint of Council buildings through reduced energy use and changing energy sources.
40. Deliver the Climate Conversation in 2024, showcasing community action and listening to local people in their communities.	Cllr Davenport-Ray	Community Hub launched following success of Climate Conversation 2023. The 2024 event is being planned.	↔	G	Strong and established way to connect with communities and encourage residents to discuss climate interventions.
41. Identify emissions from HDC IT data centres to include in reporting and establish disposal methods for IT equipment to reduce environmental impact.	Cllr Davenport-Ray	Facilities Management team are still looking at ways of providing electricity usage data for the data centre so we can calculate emissions. Data is being collected manually on a daily basis at the moment (two weeks so far) and this will be analysed after four weeks' data is available. Disposal methods for ICT equipment is via Waste Electrical and Electronic Equipment (WEEE) compliant processes with certificates of disposal provided by the supplier.	N/a	A	No immediate impact as data is still being collected.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
42. Establish climate and carbon emissions learning and development plan for Council employees.	Cllr Davenport-Ray	Following several managers and staff obtaining a Carbon Literacy award, we have created an iLearning module to deliver learning and development. It is intended that the module will be added to the new iLearning system.	N/a	G	A greater awareness of climate impacts and adaptation for all staff so that the subject can be embedded in all decision making and guidance.
43. Accelerate Solar Power Adoption on Council Buildings.	Cllr Pitt	The proposal has passed stage two of the New Ideas process and a Project Initiation Document will now go to the Delivery Board for approval. The level of potential investment is £420k.	N/a	G	Self-generated electricity on Council operational sites in place by 2026, with reduced energy spend on electricity and improved energy security. The capital payback period is 7.5 years, with a 25 year equipment life.

### Outcome: Lowering carbon emissions

### Activity type: Enable

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
44. Support community projects and plans that reduce carbon emissions.	Cllr Davenport-Ray	We have linked up current community fridges, food waste redistribution services, community allotments, excess farm food waste and other current areas of practice to create a more unified approach in moving towards a more sustainable and climate friendly food system.	N/a	A	This will enable HDC to engage in stakeholder consultations and community outreach to gather insights, concerns and recommendations from residents, businesses and organisations.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
45. Deliver Biodiversity for All (2023-2025) to enable community action and support green skills development (PROJECT).	Cllr Taylor	The grant agreements for the pilot round have been progressed and there is only one site that needs to be progressed to this stage now. The Graduate Ecologists are currently working through the audits for the second round and major hurdles/issues, such as risk assessments for working in water, have now been resolved.	↑	G	Demonstrating our progress, engaging with our communities across Huntingdonshire will inform/influence decisions that increase biodiversity across the district.
46. Commission Active Travel Studies (UKSPF) to influence/inform future investment priorities (PROJECT).	Cllr Wakeford	The commissioning of the Active Travel Feasibility Studies is underway. The project has had a delayed start due to issues with the initial quote against the specification. An alternative supplier has been briefed, with a quote due in July. Project remains recoverable within 2024/25 if the contract is agreed in July.	↔	A	Improvement to the local economy of the four market towns in the district and creating increased high-quality jobs and skills prospects for local residents.
47. Deliver the Phase 1 Rural Pilot HDC Electric Vehicle (EV) Charging Strategy Actions.	Cllr Taylor	Rural pilot progressing, with land ownership research underway to support site investment.	N/a	G	Enabling access to EV charging in rural areas where onstreet and household charging is less feasible - delivering HDC's EV Charging Strategy.

**Outcome: Lowering carbon emissions**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
48. Develop the Council's procurement rules to further embed social and environmental value.	Cllr Davenport-Ray	Looking to resource a new post for Social Value/Progressive Procurement. This post will be a data analyst role and will continue to work with the Procurement Lead on Social Value elements of procurement.	↑	G	Further enhancing support for local businesses and enabling reporting on local economy spend.
49. Expand positive climate action support for local businesses, celebrating best practice and sharing knowledge.	Cllr Davenport-Ray	Resources for Local Businesses section launched on Climate Hub website. We have linked the free consultancy and diagnostic of priorities and efficiencies launched by the Economic Development Team to the Climate Hub resource.	N/a	G	Further enhancing support to the business community to help deliver their net zero ambitions.
50. Adopt the Huntingdonshire Plan for Nature and influence the Cambridgeshire & Peterborough Local Nature Recovery Strategy (LNRS) with our priorities.	Cllr Taylor	The Wildlife Trust have completed the Hunts Nature Network document, which details Huntingdonshire's priority landscapes. In collaboration with Development Management teams, this work will follow a full policy pathway to be agreed by Cabinet in September.	↔	G	The impact of this action has strengthened the council's ability to contribute to the LNRS and comply with the Biodiversity Net Gain (BNG) requirements set out in the Environment Act. This will have a positive benefit to nature in the district.

**Outcome: Delivering good quality, high value-for-money services**

**Activity type: Do**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
51. Refresh our Commercial Investment Strategy to develop proposals for future strategic investments.	Cllr Mickelburgh	The current strategy continues to be appropriate in the current economic conditions. Economic changes, and a change of S151 Officer, have impacted on the resource and expertise to deliver this work. A delay in the CIS review does not cause any notable risk or negative overall effect. Initial work on commencing the review is due over the summer, with a view to the refresh being brought forward alongside the budget setting for 2025/26.	↔	A	Applicable reserves continue to be invested with the Debt Management Office (DMO), achieving a return similar to the aims of the existing CIS with a lower level of risk.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
52. Complete the remaining elements of the Workforce Strategy to prepare the Council for the changing skills needed in our future workforce and ensure we can continue to attract, retain and nurture talent (PROJECT).	Cllr Davenport-Ray	The project has remained on track against the plan. Further to the April 2024 Employment Committee, where we shared the second Pillar of the Workforce Strategy 'Engagement', the output from Pillar Three 'Well-being' was submitted to the Project Board on 13 May and presented at Employment Committee on 26 June with the full Workforce Strategy and Action Plan. The Committee endorsed the overall strategic direction and supported the proposed actions. The Committee has recommend that Council approve the Strategy when it meets on 17 July 2024.	↔	G	Adoption of the strategy will ensure we are working towards what our employees need now and what they will need in the future. Central to this plan is projecting our future workforce needs, based on service delivery plans and budget forecasts. By thoroughly assessing our current workforce, demographics, skills and gaps, we can then develop targeted recruitment, retention and reskilling strategies. Underpinning the entire plan is a commitment to fostering an engaged, high-performing and inclusive organisational culture.
53. Continue our Customer Services improvement programme to ensure that our customers are always at the heart of what we do (PROJECT).	Cllr Ferguson	The post to lead this work was advertised and a number of strong candidates came forward. Interviews have happened and at the time of writing an offer is being made.	↑	G	This post will lead the work to look at our customer service provision and will improve services and lower costs.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
54. Continue the Development Management Improvement programme to improve the performance of the planning service (PROJECT).	Cllr Sanderson	The Project Manager left the authority in December 2023. Work remains ongoing on individual projects while balanced against maintaining performance with a number of vacancies within the department.	↔	A	Limited impact in Q1. However, the programme will need to be revisited upon outcomes of the General Election and any regulatory changes that may be made to the planning system. Any significant changes will need to be included in the priority programming of ongoing improvements, including any opportunities offered by government by way of transitional arrangements.
55. Progress delivery of Civil Parking Enforcement (CPE) across the District to enforce on-street parking activity (PROJECT).	Cllr Taylor	HDC have undertaken the signing/sealing of the Agency Agreement with CCC, with other works progressing. An update presentation is scheduled for Overview & Scrutiny on 11 July 2024.	↔	G	Progression on track towards the delivery of CPE.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
56. Deliver the enhancement of visitor facilities at Hinchbrook Country Park (PROJECT).	Cllr Taylor	<ul style="list-style-type: none"> <li>- Biodiversity Net Gain Ecological Reports</li> <li>- Archaeological Surveys given permission to proceed</li> <li>- UK Power Networks permission to proceed</li> <li>- Mitigations and adaptations to plan based on Ecological feedback ongoing</li> <li>- Engaged with Keystone communications</li> <li>- Data Reports from HUQ finalised</li> </ul>	↔	G	<p>Actions on track and designed to achieve the critical pathway of planning application submission in October 2024.</p> <p>Outstanding action of National Vegetation Classification survey feedback is all that remains to affect the finalised plan. This will then result in amendments and a design freeze for planning.</p> <p>Other elements have been given the go ahead to achieve iterative project outcomes through concurrent activity.</p>
57. Upgrade path and cycleways at Riverside Park St Neots (PROJECT).	Cllr Taylor	Work has started onsite in June. Contractor working to complete late July to enable events to continue to take place on site.	↔	G	Improvement to aesthetics and access to Riverside Park.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
58. Deliver an independent Corporate Peer Challenge of the Council that will assess, challenge and improve what we do.	Cllr Conboy	We have received a draft report from the Peer Challenge team and now have the opportunity to make corrections to inaccuracies and will then receive the final version. It will then go through the key decision pathway before being published by 16th August. The Action Plan will be developed alongside the approval process.	N/a	G	Findings will be reviewed and inform the Action Plan. The assessment and challenge we've received will help us to improve what we do.
59. Assess, and where prudent, use the emerging national benchmarking data from the Office of Local Government (Oflog) to improve our performance.	Cllr Ferguson	Our new suite of Performance Metrics has been approved and new targets are in place. Some of these are the same metrics as Oflog uses - enabling comparison. There are some caveats - while HDC captures and uses data monthly, Oflog data is only updated annually. The future of Oflog is also subject to change post-election.	N/a	G	Benchmarking allows comparisons to be made and for best practice to be shared - thereby improving customer service.
60. Bring forward and expand our use of unit costs to demonstrate productivity within priority service areas.	Cllr Ferguson / Cllr Mickelburgh	There are unit costs already used within service areas. However, two key resources who lead our performance management workload have progressed to other roles outside HDC and, while recruitment is underway, this has slowed further progress.	N/a	A	Other elements have been given the go ahead to achieve iterative project outcomes through concurrent activity.

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
61. Pilot the use of Artificial Intelligence within the Council, seeking to create efficiencies and service improvement whilst ensuring we comply with all relevant legislation.	Cllr Ferguson	HDC has approved an Artificial Intelligence (AI) policy to promote fair and safe use of AI products. This includes a number of controls.  In addition, a pilot is underway using Microsoft's Copilot product with users drawn from across the Council and from a number of roles.	N/a	G	Automation of tasks and activities is likely to increase productivity and doing this with controls will manage the risks of using this technology.
62. Listen to local residents and respond to their input on service delivery.	Cllr Conboy	The Police and Crime Commissioner elections in May and the General Election in July meant that the Council was in the pre-election period for much of Quarter 1.	↓	A	Greater understanding of residents' needs and how they can be taken into consideration in policy development and service delivery.

**Outcome: Delivering good quality, high value-for-money services**

**Activity type: Enable**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
63. Enable our outstanding volunteers in our parks, nature reserves and elsewhere to continue to improve the quality of those spaces.	Cllr Taylor	Volunteers continued to support the work of Countryside Services in Q1. There were 800 practical volunteers sessions and 300 administrative/events volunteers sessions.	↔	G	The volunteer sessions equated to approximately 2,200 hours, or 60 weeks, of work.

**Outcome: Delivering good quality, high value-for-money services**

**Activity type: Influence**

2024/25 Actions/Projects	Portfolio Holder	Progress Update at Quarter 1	Direction of Travel	Latest Status	Impact as a Result of Action
64. Our well-run council will act as a model for our peers.	Cllr Conboy	The Peer Review has been undertaken in Q1. This important step used external resources to examine every aspect of what we do. An action plan, including areas of best practice, will be presented to Council in Q2.	↔	G	A well-run council meets customer needs. By sharing what we do with others, we seek to share good practice and enhance Huntingdonshire's reputation.

# Appendix B: Operational Performance Measure Graphs, Quarter 1, 2024/25

Improving the happiness and wellbeing of residents	Latest Status	Outturn Status
PI1 Number of attendances at One Leisure Active Lifestyles programmes	G	G

PI32 Staff turnover (per individual month)	A	G

# Outcome: Improving the happiness and wellbeing of residents

## PI 1. Number of attendances at One Leisure Active Lifestyles programmes

### Latest commentary from service:

Overall year to date attendances are up by over two-thirds (68.6%) compared to the previous year, with attendances at organised sessions up by 82% and Wellbeing Walks up 12% (best Q1 since Covid). Active Lifestyles staff have delivered 874 sessions (up 60% compared to Q1 2023/24) and there has been a 53% increase in the number of individual participants (1,834). Income received is up for all categories (Pay As You Go, commissioned services and membership income) and slightly up overall on the same period last year (2% increase), with the Healthy Weight Grant (£49k) still to be received.

### Latest year-end forecast:

35,000

### Latest projected outturn status:

G

# Outcome: Improving the happiness and wellbeing of residents

## PI 2. Number of attendances at Sports Development activities and programmes

### Latest commentary from service:

Year to date attendances are 5% down on 2023-24 (2,928 v 3,069) but above year to date target. This is largely due to the loss of a single contract at Eastfield School in St Ives. However, the sessions being delivered now are wider in range and diversity and more aligned to corporate HDC priorities. These include Brampton Over 60's (older people and frailty), Oxmoor Schools (young people and healthy weight) and Yaxley Multi Sports (young people and positive behaviour). The number of sessions delivered is 14% up on the same period last year (280 v 246) and are more targeted and linked to keeping people healthy and improving the quality of life for local people.

### Latest year-end forecast:

12,600

### Latest projected outturn status:

G

## Outcome: Improving the happiness and wellbeing of residents

PI 3. Number of One Leisure Facilities admissions - swimming, Impressions, fitness classes, sports hall and pitches (exc Burgess Hall & school admissions)

Latest commentary from service:

The year to date attendances are 28.6k (8.5%) higher compared to June 2023 but are 14.6k below the more challenging higher target for this year. Leisure attendances are seasonal and can fluctuate but the expectation is that attendances will overperform from October to January as these are the peak attendance months for the service. It is therefore possible that performance will exceed the forecast and recover towards achieving the target by the year end. A reduction in public swim attendances at One Leisure St Neots accounts for some of the increase in the gap in performance from May to June.

Latest year-end forecast:

1,468,505

Latest projected outturn status:

A

## Outcome: Keeping people out of crisis

PI 4. The number of residents enabled to live safely at home and prevented from requiring care or a prolonged stay in hospital due to a Disabled Facilities Grant (DFG)

Latest commentary from service:

The number of residents helped via a DFG is slightly up on the 41 cases reported from April to June 2023. Delays with Places For People approving works and lack of a Service Level Agreement to speed up the process continue to impact the number of people helped.

Latest year-end forecast:

200

Latest projected outturn status:

G

## Outcome: Keeping people out of crisis

PI 5. Average time (in weeks) between date of referral and practical completion of jobs funded through Disabled Facilities Grants

Latest commentary from service:

The average number of weeks taken continues to be impacted by the time taken for Places For People to approve works, with a Service Level Agreement still not in place. The average number of weeks taken at June 2023 was 29.6 which means performance as at June 2024 has worsened slightly compared with the same period last year. Our refreshed Corporate Plan contains an action to work with partners to review the provision of Disabled Facilities Grants and we have also invited Councillors to express their interest in getting involved with a Disabled Facilities Grants working group.

### PI 6. Average number of days to process new claims for Housing Benefit and Council Tax Support

Latest commentary from service:

Latest year-end forecast:

22

The average number of days taken to the end of June was nearly 1 day quicker than at the same point last year, showing strong performance from the team. Careful monitoring of impacts from the new Council Tax Support Scheme continues to ensure that performance remains on track despite an increase in new claims.

PI 7. Average number of days to process changes of circumstances for Housing Benefit and Council Tax Support

Latest commentary from service:

The average number of days taken to the end of June was over 5.5 days quicker than at the same point last year, largely due to improvements in automation brought about by the implementation of the new Council Tax Support Scheme. Careful monitoring continues to ensure that performance remains on track.

### PI 8. Number of homelessness preventions achieved

Latest commentary from service:

The number of successful homelessness preventions fluctuates throughout the year depending on the rate of homelessness presentations and the opportunity to intervene in a timely way. We have achieved a total of 35 successful preventions in June, giving a cumulative total of 131 in the year. This compares to the 110 preventions in the same period last year, a 19% increase. This figure should be considered in combination with PI 10 showing the number of households in temporary accommodation (TA), which indicates that preventions are contributing to help keep the numbers in TA below target.

### PI 9. Number of households housed through the housing register and Home-Link scheme

Page 3457 of 3488

#### Latest commentary from service:

The number of households housed will vary from month to month depending on the number of vacancies arising existing social rented stock, plus the additional units delivered through the new build programme. There were 226 households housed between April & June. This compares to the 194 households in the same period last year, a 16% increase mainly as a result of the completion of a high number of units in April this year.

## Outcome: Helping people in crisis

### PI 10. Number of households in Temporary Accommodation

Latest commentary from service:

The number of households in temporary accommodation (TA) at any one time will depend upon the number of homelessness preventions to the council, how successful we are at preventing homelessness wherever possible and our ability to move households through TA into settled housing as quickly as possible. Considering each of these, we are aiming to hold the maximum number of households in TA at anyone time below 135. The number at the end of June was 124, compared to the 117 households in TA at the same point as last year.

### PI 11. Net change in number of homes with a Council Tax banding

#### Latest commentary from service:

The number of homes with a Council Tax banding at 30 June was 223 higher than at 31 March 2024, which is slightly below target. The target is linked to the trajectory in the latest Annual Monitoring Report, with monthly targets modelled based on how the annual total was split on average each month over the last three years. However, delivery can be affected by a range of factors, with monthly or quarterly delivery varying considerably.

The Annual Monitoring Report shows that the number of dwellings built since April 2011 was already ahead of the cumulative Local Plan requirement before the high number of dwellings completed in 2023/24 was known.

PI 12. Number of new affordable homes delivered (updated quarterly only)

Latest commentary from service:

There is potential slippage in the programme from this year due to the need to re-design the road on one of our developments. There may still be time to recover some back to this year but for now we are reporting cautiously. However, we have at this stage completed slightly more homes than anticipated at the end of the first quarter.

## Outcome: Improving housing

PI 16. Number of planning applications over 16 weeks old where there is no current extension of time in place

Latest commentary from service:

The service has reviewed older applications over 16 weeks and has targeted these applications proactively over the last month. This has significantly reduced the number of applications in this category. This has placed the service in a more sustainable place and it is hoped this can be maintained. However, this relies on applicants working with the LPA to deliver decisions. This targeting of older applications has impacted on performance of our Minor applications in the latest month and the service will continue to monitor this going forward.

### PI 18. Percentage of household waste reused/recycled/composted

Page 3466 of 3488

#### Latest commentary from service:

Performance at the end of June was just under 54%, more than two percentage points below the target for Q1. This result was more than nine percentage points lower than reported at the same point last year, following the introduction of the garden waste subscription service. The tonnage of organic waste collected has fallen by over 2,600 tonnes compared to last year, with the tonnage for recycling falling slightly (-80 tonnes) and the residual waste tonnage increasing by nearly 950 tonnes. This measure can be impacted by seasonality and weather conditions.

### PI 21. Number of missed bins

Page 3469 of 3488

#### Latest commentary from service:

Overall, just under 1,000 bins have been missed in Q1. This is a 99% increase on the 502 bins missed in the same period last year. There was a reduction in the number of bins missed in June 2024, with 255 bins missed this month, although this was 54% higher than the 166 bins missed in June 2023. There were 415,504 scheduled collections in June and the number of bins missed equates to just 0.06%. Crews continue to be provided with weekly reports to highlight previous missed collections and the service is currently forecasting that they will achieve the target by year-end. This would require an average of under 262 bins missed each month for the rest of the year.

## Outcome: Delivering good quality, high value-for-money services

PI 24. Number of enforcement actions taken on fly tips (fines/court summons)

Latest commentary from service:

To the end of Q1, three Fixed Penalty Notices (FPNs) have been issued: one for Fly Tipping, two for Duty of Care. There have been two prosecutions, one for Duty of Care (£200 fine, £775.31 costs and £80 victim surcharge) plus a joint prosecution for fly tipping with Fenland District Council. There are also three pending prosecutions for fly tipping with 3C Legal services.

While this performance indicator is focused on fines and court summons, the team also takes a range of other enforcement actions also aimed at reducing fly tipping. Activities during the last quarter have included 12 Anti-Social Behaviour Community Protection Warnings (waste) and 6 Domestic Bin Warnings.

## Outcome: Delivering good quality, high value-for-money services

### PI 28. Council Tax collection rate

Page 3476 of 3488

#### Latest commentary from service:

While the June collection rate is slightly below target (0.22%), we continue to see an increase in the number of customers making use of the option to pay over 12 months instead of 10. This has the effect of pushing back payment due dates, with the amount now due to be paid in February and March 2025 increasing by £850k since the start of the year. As such, while performance in June shows as Amber, the final outturn forecast remains unchanged and performance is 1 percentage point ahead of the same point last year.

#### Latest year-end forecast:

**97.86%**

#### Latest projected outturn status:

## Outcome: Delivering good quality, high value-for-money services

PI 31. Staff long-term sickness days lost per full time equivalent (rolling 12 month total)

Latest commentary from service:

Latest year-end forecast:

5.5

While the level of long-term sickness remains high, it has decreased slightly in the last month and over the quarter. This is due to some previous longer-term absences dropping from the statistics and current long-term sickness cases being actively managed to support our staff in the right way. Further information on sickness absence will be included in the Workforce Report due to be discussed at Employment Committee in September.

Latest projected outturn status:

A

## Outcome: Delivering good quality, high value-for-money services

PI 32. Staff turnover (per individual month)

### Latest commentary from service:

The number of leavers over the whole quarter has been relatively low, with a healthy turnover being seen. In the last month, the number of leavers increased slightly. For context, there have been four more leavers in June than in May, and three of those leaving were employees on fixed term contracts who came to the end of their contract with us. As we continue to see more funded projects, we will see a continuance of leavers relating to this.
