# DEVELOPMENT MANAGEMENT COMMITTEE 21st NOVEMBER 2022

Case No: 21/02493/FUL (FULL PLANNING APPLICATION)

Proposal: DEMOLITION OF 7 GARAGES AND RE-MODELLING

OF EXISTING PARKING AREA

Location: NORTH OF 115 DUCK LANE ST NEOTS

Applicant: CHORUS HOMES GROUP

Grid Ref: 518947 259806

Date of Registration: 23.11.2021

Parish: ST NEOTS

#### **RECOMMENDATION - APPROVE**

This application is referred to the Development Management Committee (DMC) in accordance with the Scheme of Delegation as the ward member for the area has 'called in' the application.

This application was presented to Development Management Committee on the 21<sup>st</sup> of February 2022. Members resolved to defer the application pending further detail from the applicants in the form of parking surveys and consultations with Cambridgeshire Fire and Rescue, Cambridgeshire Constabulary, East of England Ambulance Service and HDC Operations (Waste and Recycling).

## 1. DESCRIPTION OF SITE AND APPLICATION

- 1.1 The application site is an area of land housing garages on a 1960's Council housing development in St Neots. Some of the dwellings have since transferred to the ownership of Places for People (previously HHP, Luminus & Chorus Homes) following the transfer of the District Council's housing stock in the year 2000. This site is to the north of 115 Duck Lane.
- 1.2 In terms of constraints the site is not within a Conservation Area, there are no Listed Buildings in the immediate vicinity and no protected trees. The site lies within Flood Zone 1 though does have a greater than 75% risk of surface water flooding.
- 1.3 This application seeks permission to demolish the seven garages on the site, re-model the parking area and create additional visitor and allocated parking. It should be noted that this is a

- significant change to the original proposals as the dwelling has been deleted and the site is now given over entirely to parking.
- 1.4 Officers have scrutinised the plans and have familiarised themselves with the site and surrounding area.
- 1.5 During the lifetime of the application revised plans have been received, where required, re-consultations have been carried out with the Town Council, relevant consultees, neighbours and other interested parties accordingly.
- 1.6 Given the nature of the development, though not specifically required, officers have taken the cautious approach of displaying a site notice in the vicinity of the site to ensure that any interested parties were fully aware of the proposals.
- 1.7 The application is one of 14 similar applications in this area which have been submitted to the District Council for consideration.

#### 2. NATIONAL GUIDANCE

- 2.1 The National Planning Policy Framework (20th July 2021) (NPPF 2021) sets out the three objectives economic, social and environmental of the planning system to contribute to the achievement of sustainable development. The NPPF 2021 at paragraph 10 provides as follows: 'So that sustainable development is pursued in a positive way, at the heart of the Framework is a presumption in favour of sustainable development (paragraph 11).'
- 2.2 The NPPF 2021 sets out the Government's planning policies for (amongst other things):
  - · delivering a sufficient supply of homes;
  - building a strong, competitive economy;
  - achieving well-designed, beautiful and safe places;
  - conserving and enhancing the natural, built and historic environment
- 2.3 Planning Practice Guidance and the National Design Guide 2021 are also relevant and material considerations.

For full details visit the government website National Guidance

#### 3. PLANNING POLICIES

- 3.1 St Neots Neighbourhood Plan 2014-2029 (February 2016) Policies:
  - A3 Design
  - PT1 Sustainable Travel
  - PT2 Vehicle Parking Standards for Residential Development

- P4 Flooding
- 3.2 Huntingdonshire's Local Plan to 2036 (Adopted 15th May 2019)
  - LP1: Amount of Development
  - LP2: Strategy for Development
  - LP5: Flood Risk
  - LP4: Contributing to Infrastructure Delivery
  - LP6: Waste-Water Management
  - LP7: Spatial Planning Areas
  - LP11: Design Context
  - LP12: Design Implementation
  - LP14: Amenity
  - LP15: Surface Water
  - LP16: Sustainable Travel
  - LP17: Parking Provision and Vehicle Movement
  - LP25: Housing Mix
  - LP30: Biodiversity and Geodiversity
- 3.3 Supplementary Planning Documents
  - Huntingdonshire Design Guide Supplementary Planning Document 2017
  - Developer Contributions SPD 2011
  - Huntingdonshire Landscape and Townscape Assessment (2022)
  - Huntingdonshire Strategic Flood Risk Assessment (2017)
  - Cambridgeshire Flood and Water SPD 2017
  - LDF Developer Contributions SPD (2011)
  - Annual Monitoring Review regarding housing land supply (2020)
  - Cambridgeshire and Peterborough Minerals and Waste Local Plan (2021)
- 3.4 The National Design Guide (2021)
  - \* C1 Understand and relate well to the site, its local and wider context
  - \* I1 Respond to existing local character and identity
  - \* I2 Well-designed, high quality and attractive
  - \* B2 Appropriate building types and forms
  - \*M3 Well-considered parking, servicing and utilities infrastructure for all users
  - \* H1 Healthy, comfortable and safe internal and external environment
  - \* H2 Well-related to external amenity and public spaces
  - \* H3 Attention to detail: storage, waste, servicing and utilities

Local For full details visit the government website Local policies

#### 4. PLANNING HISTORY

#### 4.1 None relevant

#### 5. CONSULTATIONS

- 5.1 As detailed above, St Neots Town Council have been consulted a number of times during the lifetime of the application following receipt of revised plans and details. As such, they have now removed their objection and recommend approval of this application.
- 5.2 St Neots Town Council recommend approval.
- 5.3 HDC Urban Design no objections to original scheme they have not been re-consulted as part of the revised scheme but their recommendations (in terms of hard and soft landscaping) shall be included in any permission.
- 5.4 HDC Environmental Health no objections subject to conditions relating to site investigation detail, the reporting of unexpected contamination and the implementation of an approved remediation scheme.
- 5.5 HDC Operations Team (Waste & Recycling) no objection, further details in para 7.16.
- 5.6 Cambridgeshire Constabulary no objections in terms of parking. Suggestions made to general design enhancements (for security purposes) which are addressed in para 7.15.
- 5.7 Cambridgeshire Fire and Rescue no objections further details in para 7.21.
- 5.8 East of England Ambulance Service no objections further details in para 7.21.
- 5.9 Lead Local Flood Authority (LLFA) no objections further details in para 7.28.
- 5.10 Cambridgeshire County Council Local Highways Authority raise no objections in terms of highway safety further details in para 7.20.
- 5.11 Cambridgeshire County Council Transport Assessment Team no objections further details in para 7.20.

#### 6. REPRESENTATIONS

6.1 At the time of preparing this report 40 objections had been received, (these included two from local Councillors). Since the application was presented to DMC in February a further six have been received, two of these were from the Ward Councillor. These are all available to view on HDC's Public Access Site but broadly relate to the following concerns:

- Potential that local residents may be unaware of the proposals and so may not have had the opportunity to comment
- Loss of highway safety/emergency vehicle access
- Loss of parking with make an existing bad situation much worse
- Increase in congestion, accidents, frustration and arguments and general highway safety concerns
- Parking spaces for existing residents should be provided on-street
- Plans contrary to Government document 'A Green Future: Our 25 Year Plan to Improve the Environment' and loss of green spaces and trees
- Increased population density in Huntingdonshire
- Increased density of houses in the locality
- Design and impact upon visual amenity
- Overshadowing
- Loss of privacy
- Noise
- Contrary to Government policy (NPPF)
- Contrary to the Development Plan and St Neots Neighbourhood Plan
- Contrary to the development plan
- Disabled persons access
- Bin storage (both for new dwellings and impact in terms of existing waste collection methods)
- Potential for increased criminal activity
- Query on the re-allocation of parking (by Chorus Homes)
- Out of date information submitted (parking)
- In the evenings and weekends the site is often filled with parked cars
- Lack of EV charging point
- Existing garages are not used as they are too small to put a car in and because Chorus charge too much rent and do not maintain the garages
- Some garages are used as storage due to problems with overcrowding
- Perceived lack of communication with the Town Council
- Quality of the detail provided in the submitted parking surveys and suggestions contrary to Highway Code

It should be noted that the six additional comments received were following a revision of the plans which deleted the proposed dwelling and solely gives the area over for parking which may mitigate some of the concerns raised. However, notwithstanding this matter, as officers are considering the cumulative impacts of the 14 sites (as well as the individual impacts), the matters will be addressed in the proceeding sections of this report.

Officer comments in relation to the above:

As stated in the preceding section of this report, though not specifically required officers did arrange for a site notice to be displayed in the vicinity of the application site in an attempt to ensure that any interested parties were made aware of the proposals. The comments regarding density both of the immediate locality and in Huntingdonshire are noted, however, given that St Neots is identified as a Spatial Planning Area under Policy LP7 of Huntingdonshire's Local Plan to 2036 (2019) which supports development where it is appropriately related to the built-up area (and where it accords with other appropriate policies), the proposal and principle of further residential development is supported in this location in line with this Policy of the Local Plan. This and other policies matters are addressed later in this report.

Officers note the comments regarding green spaces and impact on trees, however, in this case the application form states that no trees will be removed such to facilitate the development and, as this utilises an area of hardstanding there is no significant loss of green space as a result of the development. The document referenced above 'A Green Future: Our 25 Year Plan to Improve the Environment' does not impose direct restrictions on new development. It is noted that HDC have been guided by this document and the ambitions within it will eventually form the renewed Environment and Climate Strategy. However, at present there is no policy in place which restricts development of this nature, especially given the existing built-up location of the area concerned.

In terms of EV (Electric Vehicle) charging points, officers are aware that there is a proposed change in law mandating this addition but there is no requirement for this at present. Further, whilst the concerns regarding the remoteness of the proposed parking is noted, this does not prevent the future addition of EV charging 'upstand points' and so the fact that the parking areas are not directly adjacent to the new dwellings does not necessarily result in a barrier in this regard.

#### 7. ASSESSMENT

- 7.1 When determining planning applications, it is necessary to establish what weight should be given to each plan's policies in order to come to a decision. The following legislation, government policy and guidance outline how this should be done.
- 7.2 As set out within the Planning and Compulsory Purchase Act 2004 (Section 38(6)) and the Town and Country Planning Act 1990 (Section 70(2)) in dealing with planning applications the Local Planning Authority shall have regard to have provisions of the development plan, so far as material to the application, and to any other material considerations. This is reiterated within

paragraph 47 of the NPPF (2021). The development plan is defined in Section 38(3)(b) of the 2004 Act as "the development plan documents (taken as a whole) that have been adopted or approved in that area".

- 7.3 In Huntingdonshire the Development Plan consists of:
  - Huntingdonshire's Local Plan to 2036 (2019)
  - Cambridgeshire and Peterborough Minerals and Waste Local Plan (2021)
  - St Neots Neighbourhood Plan 2014-2029
  - Godmanchester Neighbourhood Plan (2017)
  - Houghton and Wyton Neighbourhood Plan (2018)
  - Huntingdon Neighbourhood Plan (2019)
  - Bury Village Neighbourhood Plan (2021)
  - Buckden Neighbourhood Plan (2021)
  - Grafham and Ellington Neighbourhood Plan 2020-2036 (2022)
- 7.4 The main issues to consider in the determination of this application are:
  - The Principle of Development
  - Design and Visual Amenity
  - Residential Amenity
  - Highway Safety and Parking Provision
  - Flood Risk and Surface Water
  - Biodiversity
  - Developer Contributions

#### The Principle of Development

- 7.5 Policy LP7 of Huntingdonshire's Local Plan to 2036 defines St Neots as a spatial planning area. Whilst the area in question is not an allocated site, Policy LP7 states that a proposal for development on a site which is additional to those allocated in the plan will be supported where it fulfils certain requirements and where it is in accordance with other policies.
- 7.6 One requirement is that any housing development (class C3) would be supported where it is located within a built-up area of an identified Spatial Planning Area settlement. Given that the proposed dwelling has been deleted, this section of the Policy is therefore not considered wholly relevant though it should be regarded that this proposal will support the introduction of class C3 dwellings in the locality.
- 7.7 Policy LP7 goes on to state (amongst other matters), that a proposal will be supported where it will not undermine the role of the primary settlement within the Spatial Planning Area or adversely affect the relationship between the settlements of the Spatial Planning Area whether this is through its scale or other impacts.

- 7.8 In this case, the application seeks to re-model an existing garage court/parking area by demolishing the seven garages on the site (all of which are void) and re-modelling the area thus providing 22 new spaces (16 allocated and 6 visitor spaces).
- 7.9 It is therefore considered that this proposal will support the introduction of much needed affordable (class C3) housing into the area and would not (by the provision of additional parking) undermine the role (as mainly residential) of the primary settlement within the Spatial Planning Area and is therefore acceptable in principle subject to compliance with the other relevant policies and considerations.

#### **Design and Visual Amenity**

- 7.10 The section of land in question is surrounded by dwellings which typical of a 1960's purpose-built housing development hosting mainly two-storey terraced dwellings of brick and tile construction. There are also some three-storey flats in the vicinity. Given this variance in design and style the streetscene cannot be considered to have a uniform appearance.
- 7.11 This application seeks permission re-model the parking area following the demolition of the seven (unused) garages to the north of the site, 8 allocated and 14 visitor spaces shall be provided as part of the works.
- 7.12 In terms of design, the scale of the spaces proposed appear to be acceptable and the overall appearance of the area will be improved as a result. The section to the north-west currently hosts the garages whereas the section to the south-east is used for parking adjacent to number 117 Duck Lane and number 48 Whitehall Walk. Under this scheme elements of soft landscaping shall be provided which will soften the appearance and is considered to enhance the overall area. This shall be secured by condition.
- 7.13 Overall, whilst the objections in terms of visual amenity and density of development in the area are noted, (and, aside from the Town Council these have not altered following the revised plans), given the factors detailed above and the limited contribution (in terms of visual amenity) the current garage court adds, it is considered that the proposed development would make a positive contribution to the area. Therefore, the proposal is considered not to have a detrimental impact upon the character or appearance of the area and, (subject to condition) complies with Policies LP2, LP11 and LP12 of Huntingdonshire's Local Plan to 2036, Policy A3 of the St Neots Neighbourhood Plan 2014-2029, the NPPF and the National Design Guide in this regard.

#### **Residential Amenity**

- 7.14 Given the nature of the proposed development there are considered to be no concerns with regard to overbearing impact, overshadowing or loss of light. In fact, the loss of the garages will improve the 'openness' of the area particularly adjacent to the boundary with 47 Whitehall Walk.
- 7.15 The use of the area for car parking is unlikely to give rise to any other factors which are likely to have a detrimental impact in terms of residential amenity when compared with the existing use (as a garage court with associated parking). The area is publicly accessible and significant parking and vehicle movements are clearly taking place within the site adjacent to the boundaries with residential dwellings. Therefore, officers do not consider that there will be any detrimental impact in terms of overlooking, loss of privacy or increased noise as a result of the development. Cambridgeshire Constabulary have been consulted and raise no concerns with regard to anti-social behaviour.
- 7.16 Officers note that some concerns were raised regarding bin collection methods. These mainly related to the original plan for the dwelling but as the LPA have not received anything to the contrary, they are considered to be relevant and in practice, it may be that at certain times bins may be moved into the parking area for collection. HDC's Operations (Waste and Recycling Team) have been consulted regarding the development as a whole (the 14 applications) and raise no objection. They state that the proposed development would not have a great effect on waste collections in the area as it's only an additional 29 bins per service. They observe that there are no communal collection points and collection from the highway will be easy. They also note that all of the dwellings proposed as part of the 14 individual applications (notwithstanding this site) can store their bins within their gardens. It is recognised that the storage of wheeled bins and waste collection methods may present some form of nuisance, but this cannot be completely eradicated through the planning process and again the introduction of development of this scale is unlikely to significantly contribute to this. There are appropriate channels (separate to Planning), that can be taken to address any future issues that may arise.
- 7.17 Lastly, matters relating to parking and potential amenity concerns which may arise from displacement of existing provision will be dealt with later in this report.
- 7.18 Therefore, taking the above points into consideration, the development is considered not to have a detrimental impact on the residential amenity of neighbouring properties, and would provide a suitable level of amenity for future occupiers of the proposed dwellings and therefore accords with LP14 of

Huntingdonshire's Local Plan to 2036 and the NPPF (2021) in this regard.

#### **Highway Safety and Parking Provision**

- As the proposal will result in the demolition of seven garages and the loss of the associated garage court, which officers understand is unofficially used for parking, there is naturally some concern about this loss, and this is certainly what most of the objections relate to. In this case the revised existing parking and garage usage detail which has been submitted reflects that from the 7 garages all are void. Since the original application was submitted, the applicants have deleted the proposed dwelling and have given over the area entirely for parking. Under the original scheme the seven (void garages) were to be retained, one space was to be provided for the dwelling alongside two visitor and two allocated spaces. As detailed above, under the revised scheme a total of 22 spaces shall be provided. 8 allocated for local residents and 14 for visitors therefore enhancing the level of parking in this particular area. It is noted that parking already takes place (unofficially) with the garage court area, but as the applicants have stated, this is private land (owned by them), and presumably this use could cease at any point.
- Since these applications were presented at DMC in February 2022 the applicants have submitted revised details with regard to parking provision following the loss of the garages and garage courts such to enable officers to establish the cumulative impacts of the development (the 14 sites) as a whole. Subsequently Parking surveys have been completed which were carried out in March and April 2022 (both on a weekday and at the weekend) and a later assessment (explained below) in June 2022 (a weekday) to meet a request made by Cambridgeshire County Council's Highways Team. Upon initial review of the revised surveys and details within these, concerns were raised by Highways that the surveys had not been carried out to fully accord with the Lambeth Methodology (as was suggested). Therefore, an amended survey was requested (including the June data). There were also a number of other matters which Highways considered needed to be addressed such as:
  - The inclusion of vehicles parking in the garages included in the figures.
  - Criteria used to identify the spaces to ensure that they would be in a suitable (and safe) location.
  - Query on provision of the unallocated spaces which will be provided (mainly their location – several in one area).

Following these comments revised survey detail was provided to the LPA (as detailed above) and CCC Highways were consulted again. This time, as well as the Development Management Team of Highways the Transport Assessment Team have also been consulted. The Development Management section has provided comments advising that in terms of the layout access and scale. their original comments (prior to February DMC) remain consistent. They state that the accesses do not change in terms of their suitability or safety whether they are considered as individual applications or as a whole. The original comments received stated that there were no objections in principle but that the Local Planning Authority should consider the impact of the displaced vehicles (from the garages and associated courts) when determining the applications, particularly with regard to any residential amenity impacts which was also a matter (raised originally) by HDC's Urban Design Team. Overall, Highways raised no objection on grounds of highway safety. It should be noted that Urban Design have not been consulted further on the proposals given the level of detail provided in the surveys as their original concerns mainly focused on the fact that the earlier parking surveys did not consider parking which takes place within the garage courts which the later surveys now cover.

The CCC Transport Assessment Team have responded separately advising that they would not comment on a development of this scale as it is below the threshold which calls for a Transport Statement or a Transport Assessment to be provided. They advise that they expect a 'light touch' transport statement for 50 dwellings plus and a transport assessment undertaking full capacity assessments for 80 dwellings plus. To conclude, they advise that 29 dwellings would not have a severe impact on highway safety or capacity.

- 7.21 Further to the above, it should be noted that Cambridgeshire Constabulary, Cambridgeshire Fire and Rescue, the East of England Ambulance Service and HDC Operations (Waste and Recycling) have also been consulted on the proposals. They raise no objections in terms of accessibility. Both Cambridgeshire Constabulary and Cambridgeshire Fire and Rescue caveat that this is provided people are parking legally and responsibly. However, it should be recognised that this is likely to be an issue in any area and the matters regarding legal parking are not a matter which are within planning control. Again, balanced consideration should be given to the loss of the garages (which the applicants have demonstrated are largely unused) and the reprovision as part of this (and the related) schemes.
- 7.22 Officers have carefully considered the potential impacts upon residential amenity as a result of the displacement of the vehicles from the garages and garage courts and the cumulative impacts (as a result of 14 similar applications in the same area). Broadly, the development in its entirety will result in the loss of 174 garages, 109 of these are void (as per the latest details submitted). Of the 65 garages in occupation 45 are used by

residents within the site area and 20 are in occupation by people who live outside of the area. It is noted (as is raised in the objections) that the parking courts are also used (unofficially for parking). However, it should be regarded that this area is private property under the ownership of Places for People, therefore it is within their gift to prevent this use at any time (regardless of the outcome of this application). Further, as the area is not within a Conservation Area, in planning terms demolition could take place outside of planning control.

7.23 As part of the development (the 14 applications as a whole) 45 Allocated spaces will be provided, thus providing parking spaces for each vehicle displaced by the loss of a garage (for those who currently rent garages and live within the area - no provision will be made for the 20 tenancies held by those that live outside of the area). 38 visitors' spaces shall be provided and so there is a total provision of 83 spaces as a result of the development. Further, each new dwelling (with the exception of one which requires a larger disabled access space) shall have two spaces allocated to it, thus 57 spaces will be provided for the 29 dwellings proposed as part of the entire scheme. Officers note the concerns raised regarding displacement from the (unofficial) parking taking place within the garage court areas. The data collected during March/April 2022 indicated that as a worst-case scenario 107 vehicles were parking in the garage courts (subject to this and the associated applications) and this assessment was undertaken during the early hours of a Saturday morning when most people were likely to be at home and thus parking their vehicles within the courts. The March/April data demonstrated that between 130-193 on street parking spaces remained free within the study area overnight on a weekend and during the day on a weekday. The later studies did not contradict the earlier figures and therefore 107 vehicles displaced remains a worstcase scenario. The statement therefore concludes that even if the additional parking provided as part of these scheme was unavailable, even in a worst-case scenario (of 107 vehicles displaced from the garage courts) on street provision is available within a short walk of resident's homes within the overall estate. Officers have noted the concerns raised regarding the locations and suitability of the kerbside parking in relation to legal parking and the Highway Code. However, officers refer back to the fact that the legalities of parking are not a planning matter and that given the scale of the development Cambridgeshire County Council as the Local Highways Authority have not raised any objections in terms of highway safety and once again, the Transport Assessment Team have confirmed that the provision of 29 dwellings is below the threshold for formal transport statement to be submitted as it would not have a severe impact on highway safety or capacity.

- 7.24 It should also be highlighted that (as confirmed in the revised Parking Displacement Statement) that Chorus Homes do have other garage courts in close proximity where there are void garages and so if the residents would still prefer to rent a garage, then this is a possibility, though, in practice there are practical implications to consider as part of this solution.
- 7.25 It is considered that the provision of affordable housing is a key factor in the determination of this application. The most recent data from the Annual Monitoring Report 2022 Part 1(Housing Supply) reflects that the availability of affordable housing in Huntingdonshire is a major issue with a growing gap between average earnings and housing costs. In 2021/2022 255 new affordable homes were completed, amounting to 23.61% of all new dwellings completed and 27.29 of completions on qualifying sites (those that meet the affordable housing policy criteria). In St Neots, 13 affordable dwellings were provided. Whilst in this case no dwelling is proposed as part of the scheme it is intrinsically linked to the other 13 sites in terms of the provision of affordable housing and so officers consider that this development supports the viability of the other schemes and the provision of much needed affordable housing in this regard.
- 7.26 Broadly speaking, whilst the concerns raised in the objections are noted and officers do not discount the potential amenity/access issues caused by the parking displacement, given the comments from CCC Highways there is no reason to consider that development of this scale would result in a detrimental impact on highway safety in the locality and therefore no justifiable reason for a refusal on this basis alone. Further, the comments from Cambridgeshire Constabulary, Cambridgeshire Fire and Rescue and the East of England Ambulance Service all demonstrate that they have no concerns with regard to public safety as a result of being able to access emergencies when required. Overall, the parking provision is acceptable, therefore, the proposed development is considered to broadly meet the objectives of Policy LP17 of Huntingdonshire's Local Plan to 2036. Policy PT2 of the St Neots Neighbourhood Plan 2014-2029 and the NPPF (2021) and would not give rise to highway safety issues.

#### Flood Risk and Surface Water

7.27 The application site is in Flood Zone 1 as identified by the Huntingdonshire Strategic Flood Risk Assessment (2017), which means it has a low probability of fluvial flooding and is not subject to the sequential and exception tests as set out within the NPPF. The site is less than 1 hectare in size but is identified as having a greater than 75% risk of flooding as a result of surface water. As per the guidance contained within the NPPF (2021) sites which may be subject to 'other sources' of flooding and which would also introduce a more vulnerable use (a dwelling is

- classed a more vulnerable) should be accompanied by a Flood Risk Assessment.
- 7.28 Subsequently a Flood Risk Assessment (FRA) has been submitted and has been passed to the LLFA for consultation. During the lifetime of the application various iterations of the FRA has been provided along with technical details (at the request of the LLFA). As such, the LLFA have commented that they raise no objection to the proposed development subject to conditions relating to drainage, sustainable drainage systems (SuDS) and surface water run-off measures.
- 7.29 The proposal is therefore considered to be acceptable with regard to its approach to flood risk and complies with Policies LP5 and LP15 of the Local Plan to 2036 and the NPPF 2021 in this regard.

#### **Biodiversity**

7.30 Policy LP30 of Huntingdonshire's Local Plan to 2036 requires proposals to demonstrate that all potential adverse impacts on biodiversity and geodiversity have been investigated. Policy LP30 also requires development proposals to ensure no net loss in biodiversity and provide a net gain in biodiversity where possible. In this case, some minor measures such to provide a net gain have been provided in terms of increased soft landscaping. However, given the nature of the site and its surroundings it is considered that it provides little overall value in terms of biodiversity and so there will be no net loss as a result of the development. The proposal is therefore considered to be acceptable with regard to its impact on biodiversity and therefore accords with Policy LP30 of Huntingdonshire's Local Plan to 2036 in this regard.

#### Other Issues

#### Community Infrastructure Levy (CIL):

- 7.31 The development will be CIL liable in accordance with the Council's adopted charging schedule; CIL payments will cover footpaths and access, health, community facilities, libraries and lifelong learning and education. A completed Community Infrastructure Levy Form has been provided.
- 7.32 The proposal is therefore considered to accord with the requirements of Policy LP4 of the Local Plan to 2036 and the Developer Contribution SPD in this regard.

#### Conclusion

7.33 The proposed development is compliant with the relevant national and local policy as it:

\*Is acceptable in principle

#### And it:

- \* Is of an appropriate scale and design
- \* Would not have a harmful impact upon the character and appearance of the area;
- \* Would not have a significantly detrimental impact upon the amenity of neighbours;
- \*Would not result in an increased risk of flooding in the locality;
- \* Is acceptable with regard to parking provision and would not be detrimental to highway safety;
- \* Is acceptable with regards to biodiversity matters;
- 7.34 There are no other material planning considerations which have a significant bearing on the determination of this application.
- 7.35 Taking national and local planning policies into account, and having regard for all relevant material considerations, it is recommended that planning permission be granted, subject to the imposition of appropriate conditions.
- 8. RECOMMENDATION APPROVAL subject to conditions to include the following
  - Time limit
  - Development in accordance with plans
  - Materials
  - Hard and soft landscaping
  - Highway matters
  - Contaminated land/mitigation measures
  - Lead Local Flood Authority (LLFA) requirements
  - Water efficiency measures to accord with LP12
  - Accessible and adaptable homes to accord with LP25

Highway Safety: Road Narrowing – road
		Development Area Cambridge Road St Neots  Application for reserved matters in respect of appearance, layout, scale and landscaping pursuant to Sub- Phase B of outline planning permission 1300388OUT for the construction of Spine Road and Secondary Road Primary Infrastructure	Subject to the recommenda submitted by members.	tions	narrowing schemes should be avoided. They can cause issues for vehicles and emergency services. On Love's Farm, many road narrowing schemes are hot spots for collisions, especially where there are no parking restrictions to ensure room for two-way traffic either side of the schemes.  Road Design: Committee members recommend the addition of limited sections of wider roads to allow for 2 car widths in addition to on-street parking, similar to Great High Ground beside the Pirate Ship playground. Some limited sections of clearly designated on-street parking will discourage and free-for-all approach by residents and visitors that would result in antisocial and dangerous parking.  Use of Block Paving: Committee members recommend against the use of block paving.  The surface does not lend itself to hard wearing road markings such as parking restrictions, which are liable to cracking, rendering them unenforceable. Block paving at two locations with high volume traffic on Stone Hill have exhibited some movement and have become uneven and unstable.

13	21/02431/FUL	Chorus Homes Group Opposite 27 To 30 Naseby Gardens St Neots Demolition of 16 garages and construction of four 2 bed dwellings with associated external works	Reject	This development is on land that is used by local residents for parking. This includes not just the garages that are earmarked for demolition, but also the hard standing that has become the de facto parking provision as garages have become too small and/or too expensive for residents to use for parking. This will result in a significant loss of parking, pushing traffic into the street. The resulting congestion will cause significant problems for local residents, including road safety and emergency vehicle access.  Overlooking/loss of privacy Adequacy of parking/loading/turning Highway safety Traffic congestion Layout and density of building Road access Local, strategic, reginal, and national planning policies Disabled persons access Proposals in the development plan. Previous planning decisions (including appeal decisions) Demonstrable harm to the amenity of the residents Loss of important open spaces or physical features.
