Treasury Management Report – Quarter 1

Quarter Ended 30th June 2025

The CIPFA (Chartered Institute of Public Finance and Accountancy) Code of Practice for Treasury Management 2021 recommends that members be updated on treasury management activities at least quarterly. This report, therefore, ensures this Council is implementing best practice in accordance with the Code.

1. Economics update (Provided by MUFG Corporate Markets)

- The first quarter of 2025/26 (1st April to 30th June) saw:
 - A 0.3% month on month fall in real GDP in April – the first fall since October 2024
 - The 3 month year on year rate of average earnings growth excluding bonuses fall from 5.5% to 5.2% in May
 - Core CPI inflation ease from 3.8% in April to 3.5% in May as temporary Easter-related effects faded
 - The Bank of England cut interest rates from 4.50% to 4.25% in May, holding them steady in June
 - The 10-year gilt yield fluctuate between 4.4% and 4.8%, and end the quarter at 4.50%
- The 0.3% month on month fall in real GDP in April was the first fall since October 2024 and the largest fall since October 2023. This is a significant shift from the 0.7% quarter on quarter rise in quarter 1 2025, probably as a result of the boosts from net exports and business investment unwinding. The decline in exports was mostly due to a reversal of US tariff front-running with export values to the US falling by 31% month on month after rising 34% in total in the five months to February. April's GDP figures also showed manufacturing output falling by 0.9% month on month along with the domestic economy showing signs of weakness in April. Despite construction output growing by 0.9% month on month, services output declined by 0.4% month on month, reversing all of March's 0.4% month on month rise. This weakness in services likely reflects higher labour costs from April's rise in National Insurance Contributions for employers. May's GDP may have fallen a bit further as the boosts in quarter 1 continued to unwind. Overall, GDP in quarter 2 is likely to have flatlined and the economy will probably be hindered by subdued overseas demand and domestic businesses cutting spending given a rise in costs due to April's increase in taxes. The Bank of England expects growth in 2025 to be around 0.8%.
- Despite the rise in the composite Purchasing Managers Index (PMI) from 50.3 in May to 50.7 in June, it is still below its level in March, prior to the rise in business taxes and Trump's Liberation Day tariffs. This rise was driven by increases in both the services and manufacturing output balances. Although the services PMI rose from 50.9 to 51.3, that is consistent with non-retail services output growth slowing from 0.5% 3month/3month in April to 0.3% 3month/3month in June.

- The sharp 2.7% month on month drop back in retail sales volumes in May adds to other evidence that the burst of economic growth in quarter 1 is over. The weakness was widespread with sales falling in all seven of the major categories. This decline was partly due to the unwinding of the previous boost from April's unusually warm and dry weather along with inflationary pressures prompting consumers to cut back. The latter would be a more persistent drag on retail spending. Looking ahead, the rise in the GfK measure of consumer confidence from -20 in May to -18 in June is consistent with the annual rate of real retail sales growth accelerating from -1.3% in May to around +0.5%.
- While the £17.7bn of public sector borrowing in May was higher than the Office of Budget responsibility (OBR) forecast of £17.1bn, borrowing was £2.9bn below the OBR's forecast in the first two months of the 2025/26 fiscal year. The current budget deficit was £12.8bn in May, a touch below the OBR's forecast of £13.0bn. Within that, government spending surprised to the downside. Central government expenditure was £0.5bn lower than the OBR's forecast in May, leaving it £1.6bn lower in April and May combined. That has been largely driven by debt interest payments, which were £1.1bn below the OBR's forecast in May. But if the rises in gilt yields since the Spring Statement in March are sustained, the OBR will revise up its forecast for debt interest payments in the years ahead. That of itself would knock £1.0bn off the Chancellor's £9.9bn of headroom against her fiscal mandate and the subsequent Government U-turns on benefit and welfare spending and higher borrowing costs may mean to maintain her current £9.9bn buffer, Reeves has to raise upwards of £13bn later this year. And with the gilt market sensitive to significant increases in borrowing, all this means substantial tax rises are looking very likely.
- The weakening in the jobs market is gathering pace. May's 109,000 month on month fall in the PAYE measure of employment was the largest decline (barring the pandemic) since the data began and the seventh in as many months. The monthly change was revised lower in five of the previous seven months too, with April's 33,000 fall revised down to a 55,000 drop. Overall, the payroll measure of employment has now fallen by 276,000 since the announcement of the rise in payroll taxes and the minimum wage in the October Budget. The job vacancies data also portrays a rapidly weakening labour market. The number of job vacancies is now falling a bit faster, dropping from 760,000 in the three months to April to 736,000 in May. Capital Economics' seasonally adjusted measure of single-month vacancies declined sharply from 763,000 in April to 713,000 in May.
- A looser labour market is driving softer wage pressures. The 3 month year on year rate of average earnings growth excluding bonuses fell from 5.5% to 5.2% in May. The rate for the private sector slipped from 5.5% to 5.1%, putting it on track to undershoot the Bank of England's quarter 2 forecast of 5.2%. And after rising in April as the 6.7% rise in the minimum wage took effect, the timelier PAYE median earnings measure fell back from 6.2% year on year in April to 5.8% in May. Softer wage growth is feeding through to lower services inflation, pointing to a slowdown from 4.7% in May to around 3.0% by the end of the year.
- CPI inflation fell slightly from 3.5% in April to 3.4% in May – close to consensus. The sharp falls in services inflation from 5.4% to 4.7% and in core inflation from 3.8% to 3.5% confirmed that the previous month's jumps partly reflected an Easter-related blip. Services inflation is expected to continue to fall as wage growth slows,

supporting a view that CPI inflation will fall close to 2.0% by the start of 2027. An upside risk, however, in the near term is that higher oil/gas and food prices could trigger another bout of second-round effects on wages and inflation expectations, meaning CPI inflation stays above 3.0% for longer and causes the Bank to shift to an even slower rate cutting path. CPI is expected to peak at 3.8% in September.

- The yield on the 10-year gilt moved sideways in the second quarter of 2025. After rising from 4.4% in early April to 4.8% in mid-April following wider global bond market volatility stemming from the “Liberation Day” tariff announcement, gilt yields eased back as trade tensions began to de-escalate. By the end of April, the 10-year gilt yield had returned to 4.4%. In May, concerns about stickier inflation and shifting expectations about the path for interest rates led to another rise, with the 10-year gilt yield fluctuating between 4.6% and 4.75% for most of May. Thereafter, as trade tensions continued to ease and markets increasingly began to price in looser monetary policy, the 10-year yield edged lower, and ended quarter 2 at 4.50%. We expect this trend to continue over the next year. However, it is more difficult to be confident that the longer part of the curve will also see falls in yields, although that is still our central case, as that part of the curve is increasingly held by transient investors, such as foreign investors and hedge funds. Pension funds and insurance companies have more appetite in the short to medium part of the curve nowadays.
- The FTSE 100 fell sharply following the “Liberation Day” tariff announcement, dropping by more than 10% in the first week of April - from 8,634 on 1st April to 7,702 on 7th April. However, the de-escalation of the trade war coupled with strong corporate earnings led to a rapid rebound starting in late April. As a result, the FTSE 100 closed quarter 2 at 8,761, around 2% higher than its value at the end of quarter 1 and more than 7% above its level at the start of 2025.

MPC meetings: 8th May & 19th June 2025

- There were two Monetary Policy Committee (MPC) meetings this quarter. In May, the Committee cut Bank Rate from 4.50% to 4.25%, while in June policy was left unchanged. In June's vote, three MPC members (Dhingra, Ramsden and Taylor) voted for an immediate cut to 4.00%, citing loosening labour market conditions. The other six members were more cautious, as they highlighted the need to monitor for "signs of weak demand", "supply-side constraints" and higher "inflation expectations", mainly from food prices rising. By repeating the well-used phrase "gradual and careful", the MPC continued to suggest that rates will be reduced further.
- At the start of June, amid escalating tensions between Israel and Iran, oil prices surged to over \$75 per barrel. However, following a ceasefire agreement near the end of the month, oil prices eased back to levels prior to the conflict. Given the drop back in energy prices and the relatively muted reaction to fears of a ceasefire violation, along with a large drop in the services PMI output prices balance, our central view is that once inflation begins to trend downwards in the final months of 2025, Bank Rate reductions can begin again from November (pause in August as inflation remains close to its peak), falling to a low of 3.5% in May 2026. However, if the conflict in the Middle East were to result in higher energy prices and/or domestic inflationary pressures grow stronger, there is a risk the Bank of England may skip cutting rates further.

2. Interest rate forecasts

The Council has appointed MUFG Corporate Markets as its treasury advisors and part of their service is to assist the Council to formulate a view on interest rates. The PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1st November 2012.

The latest forecast was provided on 10th February:

MUFG Corporate Markets Interest Rate View 10.02.25													
	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28
BANK RATE	4.50	4.25	4.25	4.00	3.75	3.75	3.75	3.50	3.50	3.50	3.50	3.50	3.50
3 month ave earnings	4.50	4.30	4.30	4.00	3.80	3.80	3.50	3.50	3.50	3.50	3.50	3.50	3.50
6 month ave earnings	4.40	4.20	4.20	3.90	3.70	3.70	3.50	3.50	3.50	3.50	3.50	3.50	3.50
12 month ave earnings	4.40	4.20	4.20	3.90	3.70	3.70	3.50	3.50	3.50	3.50	3.50	3.50	3.60
5 yr PWLB	5.00	4.90	4.80	4.70	4.60	4.50	4.40	4.40	4.30	4.20	4.20	4.10	4.00

50 yr PWLB	5.50	5.40	5.30	5.20	5.10	5.00	4.90	4.80	4.70	4.70	4.60	4.60	4.50

- Money market yield forecasts are based on expected average earnings by local authorities for 3 to 12 months.
- The MUFG Corporate Markets forecast for average earnings are averages i.e., rates offered by individual banks may differ significantly from these averages, reflecting their different needs for borrowing short-term cash at any one point in time.

The forecast has proved robust over the period since February, setting out a central view that short and long-dated interest rates will start to fall once it is evident that the Bank of England has been successful in squeezing excess inflation out of the economy, despite a backdrop of stubborn inflationary factors. Nonetheless, the longer dated part of the forecast also reflects the increased level of Government borrowing over the term of the current Parliament and the weakness in the public finances, with the Government struggling to deliver on the efficiencies detailed in the 30th of October Budget.

Moreover, there is still on-going debate as to when, and if, the Government's policies will lead to a material uptick in growth given their reliance on the logistics of fast-tracking planning permissions, identifying sufficient skilled labour to undertake a resurgence in building, and an increase in the employee participation rate within the economy.

Overall, our central view is that monetary policy is sufficiently tight at present to cater for some further moderate loosening, the extent of which, however, will continue to be data dependent. We forecast the next reduction in Bank Rate to be made in November and for a pattern to evolve whereby rate cuts are made quarterly and in keeping with the release of the Bank's Quarterly Monetary Policy Reports (February, May, August and November). Any movement below a 4% Bank Rate will, nonetheless, be very much dependent on inflation data releases in the coming months.

International factors could also impact the prospect for longer dated gilt yield falls. President Trump's budget bill has successfully made its way through the House of Representatives in July and given that it will signal a continued large budget deficit position in the US finances, any uptick in Treasury yields will likely impact other developed economies markets too. There will also be a keen focus on whether US-driven tariff policies result in upward pressures on inflation.

3. Annual Investment Strategy

The Treasury Management Strategy Statement (TMSS) for 2025/26, which includes the Annual Investment Strategy, was approved by the Council on 26th February 2025. In accordance with the CIPFA Treasury Management Code of Practice, it sets out the Council's investment priorities as being:

- Security of capital
- Liquidity
- Yield

The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity, aligned with the Council's risk appetite. In the current economic climate, over and above keeping investments short-term to cover cash flow needs, there is a benefit to seeking out value available in periods up to 12 months with high credit rated financial institutions, using the MUFG Corporate Markets suggested creditworthiness approach, including a minimum sovereign credit rating and Credit Default Swap (CDS) overlay information.

As shown by the charts below and the interest rate forecasts in section 2, investment rates have started to taper downwards during the first quarter of 2025/26 and are expected to fall back further if inflation falls through 2025 and 2026 and the MPC loosens monetary policy more substantially.

Creditworthiness.

There have been few changes to credit ratings over the quarter under review. However, officers continue to closely monitor these, and other measures of creditworthiness to ensure that only appropriate counterparties are considered for investment purposes.

Investment counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function.

CDS (Credit Default Swap) prices

For UK and international banks, these have remained low, and prices are not misaligned with other creditworthiness indicators, such as credit ratings. Nevertheless, it remains important to undertake continual monitoring of all aspects of risk and return.

Investment balances

The average level of funds available for investment purposes during the quarter was **£68.4m**. These funds were available on a temporary basis, and the level of funds available was mainly dependent on the timing of precept payments, receipt of grants and progress on the capital programme.

Investment performance year to date as of end-June 2025
Sterling Overnight Index Averages (Term)

FINANCIAL YEAR TO QUARTER ENDED 30/06/2025						
	Bank Rate	SONIA	1 mth	3 mth	6 mth	12 mth
High	4.50	4.46	4.47	4.36	4.28	4.17
High Date	01/04/2025	07/05/2025	03/04/2025	01/04/2025	02/04/2025	02/04/2025
Low	4.25	4.21	4.20	4.10	3.98	3.77
Low Date	08/05/2025	08/05/2025	08/05/2025	30/06/2025	08/05/2025	02/05/2025
Average	4.35	4.31	4.28	4.20	4.09	3.92
Spread	0.25	0.25	0.26	0.25	0.30	0.40

Approved limits

Officers can confirm that the approved limits within the Annual Investment Strategy were not breached during the quarter ended 30th June 2025.

4. Borrowing

Due to the overall financial position and the underlying need to borrow for capital purposes (the Capital Financing Requirement - CFR), it is anticipated that further external borrowing will not be undertaken during this financial year, based on currently approved expenditure.

PWLB maturity Certainty Rates 1st April to 30th June 2025

Heading into the second quarter of 2025/26 markets seem to be comfortable with a central case of gradual monetary policy easing, leading to Bank Rate and gilt yields out to c10 years trending downwards. That part of the curve has broadly acted in line with our forecasts, unchanged since February.

However, the Government's difficulty in convincing the market that it can work within its self-imposed fiscal parameters has meant there has continued to be a somewhat fragile confidence in the medium to longer dated part of the curve. The worst of this sentiment was reflected on 21st May, but as recently as the first week of July has provided a reminder that markets will be quick to sell-off if they feel there is anything to prejudice the Chancellor's stated aim of not raising the headline tax rates nor boost borrowing to greater than has already been reported. The markets have also indicated that they would prefer Chancellor Reeves to stay in post even if the fiscal landscape has deteriorated since the Autumn.

The Bank of England has remained cautious in stating that any Bank Rate cuts must be undertaken gradually, and the inflation outlook remains a little opaque with the CPI measure of inflation not expected to peak until September (possibly 3.8%) before falling back towards 2% by the start of 2027. Annual wage increases also remain at 5% year on year, even though the seasonally adjusted job vacancies number has fallen to 712,000. Nonetheless, both the 5-year and, albeit to a lesser extent, 10-year PWLB Certainty Rates have trended lower through the quarter.

Further out, however, rates have either finished close to their starting point for the quarter, if not a little higher. It remains problematic that historic buyers of longer-dated gilts – pension funds and insurance companies – have preferred the shorter-dated maturities of late, whilst there is anecdotal evidence that both foreign investors and hedge funds, who are not natural long-term holders of long-dated debt gilt issuance, as a rule, may be more active in this part of the market currently than has previously been the case. Their presence, arguably, adds even greater volatility to the equation. Consequently, and pulling all these factors together, and it is clear that any signs of public finance weakness could put even greater upward pressure on medium and longer dated gilts and, therein, PWLB rates.

Additionally, US Treasury yields have also remained elevated because markets are unclear as to the relative impact of President Trump's tariffs, deportation and tax-cutting policies. Given the effect US markets have globally, this is another contributing factor to the stubbornness of medium to long-dated gilt yields to fall back.

PWLB RATES 01.04.25 - 30.06.25

High/Low/Average PWLB Rates for 01.04.25 – 30.06.25

	1 Year	5 Year	10 Year	25 Year	50 Year
01/04/2025	4.82%	4.94%	5.38%	5.95%	5.63%
30/06/2025	4.50%	4.70%	5.27%	5.97%	5.71%
Low	4.46%	4.62%	5.17%	5.78%	5.46%
Low date	08/05/2025	02/05/2025	02/05/2025	04/04/2025	04/04/2025
High	4.84%	4.99%	5.56%	6.25%	5.97%
High date	02/04/2025	21/05/2025	21/05/2025	21/05/2025	22/05/2025
Average	4.61%	4.81%	5.36%	6.03%	5.72%
Spread	0.38%	0.37%	0.39%	0.47%	0.51%

5. Debt rescheduling

Members will be advised if there is value to be had by rescheduling or repaying a part of the debt portfolio.

6. Compliance with Treasury and Prudential Limits

The prudential and treasury Indicators are shown in Appendix 1.

It is a statutory duty for the Council to determine and keep under review the affordable borrowing limits. During the quarter ended 30th June 2025, the Council has operated within the treasury and prudential indicators set out in the Council's Treasury Management Strategy Statement for 2025/26. The Corporate Director (Finance and Resources) reports that no difficulties are envisaged for the current or future years in complying with these indicators.

All treasury management operations have also been conducted in full compliance with the Council's Treasury Management Practices.

7. Other

1. Changes in risk appetite

The 2021 CIPFA Codes and guidance notes have placed enhanced importance on risk management. Where an authority changes its risk appetite e.g., for moving surplus cash into or out of certain types of investment funds or other types of investment instruments, this change in risk appetite and policy should be brought to members' attention in treasury management update reports. During quarter 1 2025/26 the council's investment portfolio maintained its reliance on investments in the DMO, Money Market Funds, Property Fund, and smaller deposits with banks

2. Sovereign limits

The council policy is to invest with banks in other countries that have a sovereign rating of at least AA-. The council policy is to continue to invest with the UK banks and building societies even if the UK sovereign rating falls below AA-.

Annex 1: Prudential and Treasury Indicators for 2025-26 as of 30th June 2025

Treasury Indicators	2025/26 Budget £'000	30.06.25 Actual £'000
Authorised limit for external debt	135,000	
Operational boundary for external debt	115,000

UK Banks 5 Year Senior Debt CDS Spreads as of 30th June 2025

This graph which shows the assessment of creditworthiness risk of key banks. The cost of insuring against default is shown in basis points down the left- hand axis. Credit risk has reduced markedly in recent weeks. The cost of insuring against the prospect of default is still low in historic terms. (The chart shows the cost in basis points of ensuring against the prospect of default on 5 year “paper” issued by major UK banks v the ITRAXX Senior Financials Index.)

Annex 3: Approved countries for bank investments as of 30th June 2025

Based on lowest available rating:

AAA

- Australia
- Denmark
- Germany
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

AA+

- Canada
- Finland
- U.S.A.

AA

- Abu Dhabi (UAE)
- Qatar

AA-

- France
- **U.K.**

A+

- Belgium *(Please note that Belgium had its Fitch sovereign rating lowered to A+ from AA- on 13th June. However, it is still rated Aa3 {AA- equivalent} by Moody's and AA by Standard & Poor's, thus meets the minimum "AA-" criteria applied by the Council {change as appropriate}).*

Annex 4 Glossary

Bail in Risk

Bail in risk arises from the failure of a bank. Bondholders or investors in the bank would be expected to suffer losses on their investments, as opposed to the bank being bailed out by government.

Bank Equity Buffer

The mandatory capital that financial institutions are required to hold, in order to provide a cushion against financial downturns, to ensure the institution can continue to meet its liquidity requirements.

Bank Rate

The official interest rate of the Bank of England, this rate is charged by the bank on loans to commercial banks.

Bank Stress Tests

Tests carried out by the European Central Bank on 51 banks across the EU. The tests put banks under a number of scenarios and analyse how the bank's capital holds up under each of the scenarios. The scenarios include a sharp rise in bond yields, a low growth environment, rising debt, and adverse action in the unregulated financial sector.

Basis Point

1/100th of 1% i.e. 0.01%. 10 basis points is 0.1%.

Bonds

A bond is a form of loan, the holder of the bond is entitled to a fixed rate of interest (coupon) at fixed intervals. The bond has a fixed life and can be traded.

Call Account

A bank account that offers a rate of return and the funds are available to withdraw on a daily basis.

Capital Financing Requirement (CFR)

The CFR is a measure of the capital expenditure incurred historically but has yet to be financed; by for example capital receipts or grants funding. The current CFR balance is therefore financed by external borrowing, and internal borrowing (i.e. use of working capital on the balance sheet – creditors, cash etc).

Capital Receipts

Funds received when an asset is sold. This can be used to fund new capital expenditure.

Certificate of Deposit

Evidence of a deposit with a financial institution repayable on a fixed date. They are negotiable instruments, and have a secondary market, and can be sold before maturity.

Collar (Money Market Fund)

The fund "collar" forms part of the valuation mechanism for the fund. LVNAV funds allow investors to purchase and redeem shares at a constant NAV calculated to 2 decimal places, i.e. £1.00. This is achieved by the fund using amortised cost for valuation purposes, subject to the variation against the marked-to-market NAV being no greater than 20 basis points

(0.2%). (This compares to current Prime CNAV funds which round to 50 basis points, or 0.5%, of the NAV.)

Constant Net Asset Value (CNAV)

Constant Net Asset Value refers to funds which use amortised cost accounting to value all of their assets. They aim to maintain a Net Asset Value (NAV), or value of a share of the fund at £1 and calculate their price to 2 decimal places.

Counterparty

Another organisation with which the Council has entered into a financial transaction with, for example, invested with or borrowed from. There will be an exposure of risk with a counterparty.

Credit Default Swaps (CDS)

A financial agreement that the seller of the CDS will compensate the buyer in the event of a loan default. The seller insures the buyer against a loan defaulting.

Credit Ratings

A credit rating is the evaluation of a credit risk of a debtor and predicting their ability to pay back the debt. The rating represents an evaluation of a credit rating agency of the qualitative and quantitative information, this result in a score, denoted usually by the letters A to D and including +/-.

DMADF

The Debt Management Account Deposit Facility. This is run by the UK's Debt Management Office and provides investors with the ability to invest with UK central government.

ECB

The European Central Bank, one of the institutions that makes up the EU. Its main function is to maintain price stability across the Eurozone.

ESG

Environmental, society, and governance investing, makes reference to a set of standards for an organisation's behaviour, which can be used by a socially aware investor to make investment decisions. Environmental factors include how an organisation safeguards the environment, social criteria look at how the organisation manages its relationships with the community, employees, suppliers, and customers, and governance deals with leadership, internal controls and audits.

Federal Reserve (Fed)

The central bank of the United States.

FOMC (Federal Open Market Committee)

The committee within the US Federal Reserve that makes decisions about interest rates, and the US money supply.

Forward Deal

The act of agreeing today to deposit/loan funds for an agreed time limit at an agreed date and rate.

GDP (Gross Domestic Product)

The total value of all final goods and services produced and sold in a year by a country.

Gilts

Bonds issued by the Government in Sterling.

A committee of the Bank of England that meets to decide on the UK interest rate.

Monetary Policy

A policy adopted by government to affect monetary and financial conditions in the economy.

Money Market Funds

An open-ended mutual fund that invests in short-term debt securities. A deposit will earn a rate of interest, whilst maintaining the net asset value of the investment. Deposits are generally available for withdrawal on the day.

MUFG Corporate Markets

The council's treasury advisors, was called Link Group.

Passive Investor

An investor that does not usually or frequently buy individual stocks, and does not individually pick investments to beat the market. Holdings are usually long term. This contrasts with an active investor.

Prudential Code

The CIPFA code of practice which ensures local authorities spending plans are affordable, prudent and sustainable.

Public Works Loans Board (PWLB)

The PWLB is an agency of the Treasury, it lends to public bodies at fixed rates for periods up to 50 years. Interest rates are determined by gilt yields.

Purchasing Managers Index

Economic indicators derived from monthly surveys of private sector companies.

REFCUS

Revenue Expenditure Funded from Capital Under Statute. Expenditure which would normally be considered revenue expenditure, but has been statutorily defined as capital expenditure, including the giving of a loan, grant or other financial assistance to any person, whether for use by that person or by a third party, towards expenditure which would, if incurred by the authority, be capital expenditure. Or expenditure incurred on the acquisition, production or construction of assets for use by, or disposal to, a person other than the local authority which would be capital expenditure if those assets were acquired, produced or constructed for use by the local authority.

Reserves

The accumulation of past revenue surpluses and contributions, which can be used to meet future expenditure. The reserves can be general reserves, or earmarked for a specific purpose.

Security, Liquidity, Yield (SLY)

The factors taken into account when investing and are prioritised in the order.

SONIA

Sterling overnight index average interest rate. On each London business day, SONIA is measured as the trimmed mean, rounded to four decimal places, of interest rates paid on eligible sterling denominated deposit transactions.

Transactional Banking

Use of a bank for day-to-day banking requirement, e.g. provision of current accounts, deposit accounts and on-line banking.

UN Principles for Responsible Banking

Are a unique framework for ensuring that signatory banks' strategy and practice align with the vision society has set out for its future in the Sustainable Development Goals and the Paris Climate Agreement.

The framework consists of 6 Principles designed to bring purpose, vision and ambition to sustainable finance. They were created in 2019 through a partnership between founding banks and the United Nations. Signatory banks commit to embedding these 6 principles across all business areas, at the strategic, portfolio and transactional levels.

- Principle 1: Alignment, align business strategy with individual's goals as expressed in the sustainable development goals, the Paris Climate Agreement and national and regional frameworks.
- Principle 2: Impact and Target Setting, increase positive impacts and reduce negative impacts on, and managing the risks to people and environment.

- Principle 3: Clients and Customers, work with clients and customers to encourage sustainable practices and enable economic activities that create shared prosperity.
- Principle 4: Stakeholders, engage with stakeholders to achieve society's goals.
- Principle 5: Governance and Culture, implement the commitment to these principles through effective governance.
- Principle 6: Transparency and Accountability, periodic review of the implementation of these principles, and be transparent about and accountable for the positive and negative impacts, and the contribution to society's goals.
-

A 3-step process guides signatories through implementing their commitment:

1. Impact Analysis: identifying the most significant impacts of products and services on the societies, economies and environments that the bank operates in.
2. Target Setting: setting and achieving measurable targets in a banks' areas of most significant impact.
3. Reporting: publicly report on progress on implementing the Principles, being transparent about impacts and contributions.

UN Principles for Responsible Investments

The 6 principles for responsible investments offer possible actions for incorporating ESG issues into investment practice.

The principles that the signatories sign up to are;

- **Principle 1:** We will incorporate ESG issues into investment analysis and decision-making processes.
- **Principle 2:** We will be active owners and incorporate ESG issues into our ownership policies and practices.
- **Principle 3:** We will seek appropriate disclosure on ESG issues by the entities in which we invest.
- **Principle 4:** We will promote acceptance and implementation of the Principles within the investment industry.
- **Principle 5:** We will work together to enhance our effectiveness in implementing the Principles.
- **Principle 6:** We will each report on our activities and progress towards implementing the Principles.

The Principles for Responsible Investment were developed by an international group of institutional investors reflecting the increasing relevance of environmental, social and corporate governance issues to investment practices. The process was convened by the United Nations Secretary-General.
