2.2 DANGEROUS VEHICLE DEFECT - SUMMARY

A dangerous defect in a vehicle refers to a fault that poses an immediate risk to driver, passenger, or public safety. These defects typically make the vehicle illegal to drive until repaired.

Key Characteristics:

- Immediate safety risk (e.g., brake failure, steering issues)
- Likely to cause an accident or injury
- Fails MOT with a “dangerous” classification
- Must be repaired before the vehicle can be used on public roads

Examples of Dangerous Defects:

- Severely worn brake pads or discs
- Steering components that are loose or broken
- Tyres with exposed cords or below legal tread depth
- Cracked suspension parts
- Fuel leaks
- Non-functioning headlights or brake lights

2.3 MAJOR VEHICLE DEFECT - SUMMARY

A major defect is a serious fault that affects the safety, environmental impact, or overall roadworthiness of a vehicle. While not necessarily posing an immediate danger, it must be repaired before the vehicle can pass an MOT and be legally driven.

Key Characteristics:

- Significant impact on safety or emissions
- Fails MOT with a “major” classification
- Vehicle may still be driven (unless deemed unsafe), but repairs are required promptly

Examples of Major Defects:

- Brake warning light illuminated
- Headlamp not working on one side

- Exhaust emissions exceeding legal limits
- Suspension components worn but not broken
- Tyres damaged but not exposing cords
- Windscreen wipers not functioning properly

Legal and Safety Implications:

- Vehicle fails MOT
- Driving may be permitted short-term, but repairs are mandatory
- Continued use without repair may lead to dangerous defect classification

3. PENALTY POINTS ISSUED

- 3.1 As per the updated Taxi policy in May 2024, we can now issue Penalty Points as a way of disposing with incidents but still allows us to build a picture of driver/operator behaviour.
