

IMPLEMENTING ELECTRONIC GOVERNMENT RETURN 2005 (IEG5)

"Meeting the targets for e-government"

Name of Authority: Huntingdonshire District Council

IEG Contact Name: Chris Hall

Email: Chris.Hall@Huntsdc.gov.uk

Telephone No: 01480 388116

Local Context

The six local authorities in Cambridgeshire are continuing to work together towards achieving the target of being 100% e-enabled by the end of 2005. We are working jointly and sharing knowledge on a wide variety of projects, the nature and degree of participation depending on each Council's local circumstances.

The main projects in which all six authorities are involved are:

- The Cambridgeshire Community Network (CCN), a Public Private Partnership to provide broadband infrastructure across the County.
- The Cambridgeshire Community Portal, which provides a single access point to each authority's information and services. The Portal went live on May 14th 2004 and is linked to the Police and NHS. Some town and parish councils and local voluntary organisation have also been brought on board.
- The Cambridgeshire Smartcard project, which is at the pilot stage and which is bringing together transport, library and leisure services.

HDC's e-government programme, Customer First, is on track to deliver all our objectives. As well as the three projects listed above, the main elements of the programme are:

- A call centre, which went live in September 2005. We are sharing the County's technical infrastructure and signed a contract with them in March 2005. We are also leasing space in their call centre building but have employed our own staff and adopted different opening hours.
- A customer service centre (CSC) in Huntingdon for face-to-face contact. We have just completed tendering for the provision of a new headquarters, a CSC and an operations centre. Members decided on the preferred solution on 7th December 2005 and, early in 2006, we will be developing the timetable for introducing the CSC
- A transactional website. We implemented a content management system in July 2004 and are continuing to develop the site. We are also introducing an online payments system.

Underpinning all of this work are:

• Sound governance principles. We have a programme board and employ PRINCE 2 project management methodology.

- Effective change management processes all Directors and managers have received three days' change management training.
- A communication plan designed to ensure that members, staff and, in due course, customers understand what we are doing and why, and have the opportunity to provide input into the process to ensure that everyone's needs are met.
- A thorough review of our business processes. While committed to the 2005 deadline, we have taken a measured approach to implementation. We are placing great emphasis on business process review and improvement to ensure that we increase our efficiency and effectiveness rather than simply making our existing processes electronic.

We are confident that, as befits an authority assessed as Excellent in CPA, our implementation of e-government will result in:

- Significant improvements in levels of customer service which are already high
- Greater efficiency through streamlined processes and better use of information
- More effective and joined-up working with our partner organisations.

The call centre implementation has already resulted in improved call-handling performance due to the increased resources being deployed and the use of a Customer Relationship Management system. Lost call rates are down, the average time to answer a call has reduced significantly, and the percentage of calls dealt with first-time by our advisors is already exceeding our targets.

Our e-Government Strategy is driven by our customer service strategy, and the focus is on improving customer service rather than reducing costs. However, we are implementing measurement mechanisms to capture efficiency savings in order to meet the requirements of 'Delivery Efficiency in Local Services'.

We are confident that take-up of Electronic Service Delivery will be high because:

- Our approach is customer-driven rather than technology-driven
- Huntingdonshire is a relatively affluent area with a high level of IT literacy and home computer ownership
- We have high take-up of existing electronic services for example 70% of Council Tax payers pay by direct debit
- Much customer usage is driven by us, for example by implementing a call centre to deal with customer contact by telephone and introducing mobile technology to take services to the customer rather than having them come to us

We also have plans to ensure that we provide the benefits of e-government to those least able to access technology themselves.

 We were a Beacon Council for Social Inclusion through ICT in 2003/4 and are continuing to support the provision of e-learning points in rural locations throughout the District
 Having provided an ICT centre in the Oxmoor area of Huntingdon, one of the District's most deprived wards, we have moved on to set up Customer Information Centres in Yaxley and Ramsey and are scheduled to provide one in St Neots
Note : Please note that the date for the implementation of Government Connect is arbitrary and is only included as the ESD Toolkit software will not allow submission of IEG 5 unless a date is present. The Council will make a decision on whether to implement Government Connect based on an assessment of local priorities and needs at a later date.

Section 1 - Priority Outcomes (self-assessment)
Satisfactory progress towards delivery of the listed priority outcomes listed below is required within the remit for achieving e-government by 2005

Outcome And Transformation Area Description	Current Status	Anticipated status at 31/12/2005	Anticipated status at 31/03/2006

Section 2 - Change Management (self-assessment)

Authorities are asked to provide information on advisory good practice outcomes relating to the internal organisation and management practices of the council that are required to help deliver the people, systems and service management changes necessary for e-government. Information supplied here will be used to inform national policy, but does not fall within the remit of the December 2005 target.

Establishment of policy for addressing social inclusion within corporate e-government strategy	Green 30/06/2003	Green 30/06/2003	Green 30/06/2003		
	Comment: Addressing the needs of different types of customers and communities has been a key consideration in developing the corporate e-Government Programme. More specifically, the Council has played a key role with the County Council in the development of a network of broadband access points across our villages. This resulted in a Beacon Council award in 2003/4 for ICT and Social Inclusion.				
Identification of the specific needs of the most disadvantaged groups and exploring how Information	Green 27/03/2003	Green 27/03/2003	Green 27/03/2003		
disadvantaged groups and exploring how Information Communication Technologies (ICT) can help to address these needs (see http://www.socialexclusion.gov.uk/page.asp?id=583)	Comment: Huntingdonshire is a relatively affluent District. However, we have identified the need for access to ICT in rural areas and have implemented several Learning Points which give general access to IT and IT learning to disadvantaged groups. This is supported by tuition from the Library Service. As part of a partnership initiative, we have also implemented a Community Learning Centre on the Oxmoor estate which gives residents access to IT technology which they can use to develop their skills for work or further education.

Engagement with intermediaries re addressing issues of take up and efficiency in the delivery of e-government	Green 30/06/2005	Green 30/06/2005	Green 30/06/2005		
services (e.g. Citizens Advice Bureaux) and including intermediaries component of Government Connect (see http://www.govtalk.gov.uk/documents/intermediaries_poli cy_document.pdf & http://www.govconnect.gov.uk/ccm/portal)	Comment: The Council has already stated its intention to consider joining up with local partners / agencies in a main Customer Service Centre. Broadband access points have been or are planned to be installed in Council community shops shared with other agencies such as the CAB and Connexions. The Council is keen to promote the use of e-services to all partners in the community. Through working with Parishes, County, Community Groups and others, the Council will be looking to join up the promotion of e-services with all of its rural broadband access points.				
Compliance with BS 7799 on information security management	Green 30/06/2005	Green 30/06/2005	Green 30/06/2005		
	Comment: The council recently commissioned external consultants to review our ICT Strategy and a report was produced which addressed information security. As a result we have now set up security forums with different parts of the organisation to consider the recommendations from the review. The Council will seek to comply with this policy as far as is practical. We have also recruited an Information Manager who is responsible for information security and he will reviewing the Council's processes.				
Implementation of Benefits Realisation Plan for delivery of local e-government programme strategic	Green 30/06/2005	Green 30/06/2005	Green 30/06/2005		
objectives	Comment: The Programme is committed to undertaking Benefits Realisation Management. External consultants have been used to help advise on and pilot an appropriate methodology, and the benefits to be delivered from Customer First will be built into our new corporate performance management framework.				
Completion of mapping of Local Government Services List transactions against approved security levels (0-3)	Green 30/06/2005	Green 30/06/2005	Green 30/06/2005		
(see http://www.esd.org.uk/standards/lgsl/lgsl.doc & http://www.authentication.org.uk/levels.asp & http://e-government.cabinetoffice.gov.uk/assetRoot/04/00/22/40/04002240.doc)	Comment: This will be applied in the future to all online transactions on our recently re-launched website (to include online payments by early 2005). It will also be addressed as part of the implementation of the new call centre and associated processes.				
Planned compliance to HMG Security and authentication frameworks through commitment to	Red 30/11/2004	Red 30/11/2004	Amber 15/01/2006		
citizen, employee and volunteer account registration in Government Connect (see http://www.govconnect.gov.uk/ccm/portal)	Comment: The Council has recently commissioned an independent review of its Information Security framework, including the establishment of an information asset register, risk analysis and BS7799 gap analysis. These areas will, in future, be regularly reviewed and as part of the review process the development of Government security and related policies will also be monitored. The Council will seek to comply with these policies as far as is practical and when a proven business case and/or potential service improvements have been identified. We are also monitoring developments in Government Connect/Authentication.				
Compliance with an independent trust scheme approval process designed to provide assurance for	Red 30/11/2004	Red 30/11/2004	Amber 15/01/2006		
individuals and companies using or relying upon e-business transactions (see www.tscheme.org) and which will work with Government Connect (see http://www.govconnect.gov.uk/ccm/portal/)	Comment:For e-payments the Council will be using reputable third party Payment Service Providers (PSPs). The security credentials of the supplier will form part of the Council's decision to use them or not. Compliance with trust schemes could form part of the selection criteria in the future as more online services are deployed. Our website uses SSL technology to verify it as trusted by an independent verification company.

Section 4 - Access Channel Take-Up

In order to demonstrate public take-up of the main e-access channels that you are investing in, you are asked to complete the table below detailing actual and forecast figures for numbers of e-enabled payment transactions and change of address notifications. Planning authorities should also complete the Local Service Website line for planning applications. It is important that e-access channel investment and rollout also facilitates accompanying improvements in the corporate management capability required to monitor and collect such statistics. Click on the light bulb icons for industry definitions of page impressions and unique users.

	Ac	tual			
E-enablement & Main E-Access Channel Take-Up	03/04	04/05	05/06	06/07	07/08
Other Electronic Media (e.g. BACS, text messaging)					
Number of e-enabled payment transactions accepted via BACS	524,000	600,000	700,000	750,000	800,000
Number of e-enabled payment transactions accepted via text message or other electronic form	0	0	0	0	0
Number of change of address notifications accepted via other electronic media	0	0	0	0	0
	Comment: High volumes includes Direct Debit payments for council tax. We not accept payment transactions via text messages or other electroniforms and this is not a priority for HDC at the moment.				
Non Electronic (e.g. cash office, post)		-			
Number of payments accepted by cheque or other non-electronic form	116,000	120,000	125,000	125,000	125,000
Number of change of address notifications accepted via non-electronic form	2,000	2,000	1,000	1,000	1,000
	Comment: We anticipate that the number of payments by this channel will plateau as other channels become more popular. We also accept that certain customer groups will still continue to prefer non electronic transactions.				

Section 5 - Local e-Government Implementation Expenditure

Councils are asked to provide a summary of current and forecast expenditure on implementing electronic government up to 2007/08. This should include the standard elements in the table below and brief commentary on the use of IEG money. For 2005/6 onwards, please include best estimates of revenue and capital expenditure even though the council may not yet have officially approved the budgets. (Please note that implementing e-government expenditure refers to investment designed to e-enable local services and to transform their accessibility, quality and cost-effectiveness in line with the 2005 target. Cyclical spend related to the maintenance of the existing ICT infrastructure should not be included):

Section 6 - Local e-Government Programme Efficiency Gains

The calculation of efficiency gains from local e-government has been designed to align with the approach to measuring achievement against the efficiency gains target set out in the January 2005 Efficiency Technical Note (ETN) for Local Government. Links to listed websites in the table Notes also offer a key source of support in calculating figures.

expenditure	Comment: The calculation of "Total Efficiency Gains – Net" is both misleading and meaningless. It is misleading because it implies that the rationale for the e-government programme is one of efficiency. This is not the case, and never was. It was driven by a desire to make significant improvements in customer service, and has always been seen in HDC as being an investment to that end, although it was also recognised that the programme would also present major opportunities for efficiencies to be made. It is meaningless because it makes no distinction between capital costs and revenue costs. The only valid calculation to be made would be the revenue efficiencies made less the revenue impact of net capital expenditure.
