

**FINANCIAL STRATEGY, MEDIUM TERM PLAN 2009-2013 AND BUDGET
2008/09**

(Report by the Head of Financial Services)

1 PURPOSE

- 1.1** The purpose of this report is to allow Cabinet to determine its recommendations to Council on 20 February in relation to the Council's Budget and Council Tax for 2008/09, Medium Term Plan for 2009/13 and associated matters.

2 BACKGROUND

- 2.1** This year's process started with consideration of a financial strategy by Overview & Scrutiny, Cabinet and Council in September which highlighted the major uncertainty created by the Government's decision to announce grant settlements for three years at a time. In one sense the change to 3 year settlements is beneficial because of the added certainty during the three year period but it also leads to significant volatility every 3 years when changes to the formula are considered. This year's consultation included proposals which could have led to a £500k per year reduction in the Council's grant.
- 2.2** This was followed by the draft MTP and Budget report, again considered by Overview & Scrutiny and Cabinet before being considered by Council on the 5 December. The major uncertainty on grant remained because the draft settlement was not announced until 6 December. Council made the following resolutions:
- (a) that the implications of receiving a low level of revenue support grant in terms of future Council Tax increases be noted and that Officers be requested to report to a future meeting on other options which would involve increases of between 4.99% and 7.5%
 - (b) that a policy of limiting increases in the budget requirement to 4.99% be supported but Officers be invited to consider models requiring a lower requirement approximately to circa 4%;
 - (c) that the content of the draft Medium Term Financial Plan, appended to the report submitted, be approved to assist in the production of the budget for 2008/09, revised Medium Term Plan for 2009/2013 and the financial plan to 2018/2019; and
 - (d) that officers be requested to critically review all budgets and Medium Term Plan schemes (revenue and capital).

3 PROPOSED CHANGES TO THE DRAFT PLAN

3.1 The following adjustments have been made to figures reported in December.

3.2 Revenue Support Grant

The Council has received the proposed grant settlement for 2008/09, 2009/10 and 2011/12. Whilst it is better than feared, due to the Government using revised, higher, population figures and not removing the area cost adjustment, the LGA consider it to be the worst settlement for a decade. Any advantage from the population revision is also minimised by a major deduction to protect those Councils who are receiving more than the Government consider appropriate. The table below summarises the position:

Government Support	2007/08	2008/09	2009/10	2010/11
	£000	£000	£000	£000
Assumption in approved MTP Provisional settlement		12,162	12,684	13,033
True Grant	12,014	12,961	13,162	13,358
Withheld to protect other authorities	-364	-804	-589	-418
Receivable	11,650	12,157	12,572	12,939
Shortfall from MTP assumption		5	111	93

3.3 The Government's figures show the Council will be the 3rd most under-funded, in cash terms, District Council in England. Next year's deduction will be £804k or 6.2% and is the equivalent of increasing Council Tax by almost £14 or 12.7%.

3.4 Although we now have certainty for the next three years (subject to the final settlement in January which has not historically resulted in significant change) the position for 2011/12 onwards is difficult to estimate given the likelihood of formula changes. For the purpose of the forecast it has been assumed that increases will be 3.5% per year, thereafter based on a 2.5% for inflation and 1.0% for population increase.

3.5 Unless the final announcement results in a material change it will be covered by adjusting the use of revenue reserves.

3.6 Interest Rates.

The December report was based on investment rates of 5.5% in 2008/09, 5.25% in 2009/10 and 5% thereafter while long term borrowing to finance the capital programme was assumed at 4.6%. In the light of current fixed investments and recent international liquidity problems it has been necessary to revise investment rates to 5.7% in 2008/09, 5.0% in 2009/10 and 4.75% thereafter and borrowing rates to 4.5%.

3.7 The **taxbase** has been marginally increased from 57,721 to 57,785 in 2008/09 together with a small extra growth increase in subsequent years. This results in a slight increase in income for a given level of Council Tax.

- 3.8** The position on the **Collection Fund** has now been forecast for the current year and will result in a small deficit (£28k) next year.
- 3.9** Council requested that officers critically review all budgets and Medium Term Plan schemes (revenue and capital). This is an ongoing exercise which has already commenced but will take some time to conclude. This review will form part of the search for spending adjustments which is dealt with later in this report. In order to streamline the process whilst preventing any MTP schemes with obvious potential for adjustment going ahead a list of schemes that require COMT or Cabinet approval before being committed are attached as Annex A. It is proposed that any scheme not covered by the annex be allowed to commence once the budget for next year is formally approved by Council.
- 3.10** Any remaining variations are shown in Annex E2.
- 3.11** There are also some items for which no adjustment has been made at this stage. They include:

Whilst the grant allocation for **Concessionary Fares** is towards the top end of the consultation range it is still assumed that there will be no surplus as the actual cost cannot be forecast until some way into the new financial year.

4 STRATEGY OPTIONS

- 4.1** Huntingdonshire's Council Tax is one of the lowest in England and public surveys indicated that many local people consider that increases in Council Tax are preferable to service reductions. The current approved plan (February 2007) was therefore based on increasing Council Tax by between 5.7% and 8.2% over the next ten years until it was in line with the national average. The increase for 2008/09 was planned to be 5.7% but Council, at its December meeting, requested alternative financial strategies to be exemplified in this report. The table below shows three options compared with the figures shown in the December report:

	2008/ 2009	2009/ 2010	2010/ 2011	2011/ 2012	2012/ 2013	2013/ 2014	2014/ 2015	2015/ 2016	2016/ 2017	2017/ 2018	2018/ 2019
December Report based on an annual increase in Budget Requirement of 4.99%

- 4.2 This section considers the position regarding capping so that Cabinet can recommend an appropriate strategy to Council.
- 4.3 John Healey, the Minister for Local Government, wrote to Council leaders on 17 December with the following comments on capping:

“The Government expects the average council tax increase in England to be substantially below 5% in 2008/09. I made it clear to the House that we will not hesitate to use our capping powers as necessary to protect council taxpayers from excessive increases. This applies to all authorities - including police and fire authorities.

No decisions have been taken on capping principles for 2008/09. It would, however, be unwise for any authority to assume that capping principles set in previous years will be repeated. We intend to take decisions on principles after authorities have set their budgets, but we are prepared to announce the principles in advance if the circumstances suggest this is necessary.

The onus now is on all authorities to demonstrate leadership and to deliver top quality, efficient services for their citizens. Authorities should be capable of innovating, managing change and improving efficiency without having a disproportionate impact on their council taxpayers.

As I said in the House, this is a tight settlement but a fair and affordable one. It delivers the certainty, flexibility, equity and stability that local government told us it wanted. With the additional funding, efficiency gains and flexibilities we have provided local government, there can be no excuse for excessive council tax increases.

In previous years Ministers have written a reminder about the risks of capping to individual authorities which, on the basis of public information, appear to be heading for high council tax increases. I do not intend to do that this year. The decisions are yours and the Government has set out very clearly the context in which you must make those decisions.”

- 4.4 It should be remembered that although the Government constantly refers to Council Tax increases, the legislation requires any capping decision to be framed around increases in budget requirement.
- 4.5 Whilst there was no capping in 2007/08 the figures used in 2005/06 and 2006/07 capping were as follows:

	Increase in budget requirement of	AND	Increase in Council Tax of
2005/06	6%		5.5%
2006/07	6%		5%
2007/08	No Authorities capped		

- 4.6** In both years with capping there were standard criteria for all authorities although the regulations allow the Government to set different criteria for different classes of authorities.
- 4.7** In 2004/05 14 Councils were capped, in 2005/06 this fell to 9 Councils and in 2006/07 two Councils (York and Medway) were **designated** i.e. they were not actually capped but were told that for 2007/08 any capping decision would be based on the figures for 2006/07 as if they had been capped.
- 4.8** The fact that whilst the increase in Council Tax fell the increase in budget requirement stayed at 6% is particularly relevant as the Council's Financial Strategy has been based around the increase in budget requirement before capping applies not falling below 5%.
- 4.9** Huntingdonshire's Council Tax this year (£109.91) compares to that of other Districts as follows. It is:
- in the lowest 8% of Council Tax levels for all Shire Districts in England. Range £62 to £290, average £155.
 - 8.4% of the total Council Tax bill* for Huntingdonshire residents.

**This includes the amounts set by the County Council, the Fire and Police Authorities and Town or Parish Councils.*

- 4.10** Obviously there will always be some risk linked to increases in Council Tax and/or Budget Requirement that are above the norm – experience has shown that the Government only caps those authorities clearly above the norm. The key figures from the options above relating to 2008/09 are as follows:

OPTION	2008/2009	
	Increase in Budget Requirement	Increase in Council Tax
A	4.99%	6.0%
B	4.6%	4.99%
C	4.00%	3.2%

- 4.11** The Chief Officers' Management Team considers that Option B gives the best balance between minimising the level of spending adjustments required and avoiding capping next year. The tables in the remainder of this report are therefore based on Option B.
- 4.12** **The intentions of other authorities, on a national basis, needs to be kept under review as this may change the level of risk related to particular levels of Council Tax increase.**

5. SPENDING ADJUSTMENTS

5.1 The table below shows the position on Spending adjustments based on Option B

SPENDING ADJUSTMENTS	FORECAST	BUDGET	MTP			
	2007/08 £000	2008/09 £000	2009/10 £000	2010/11 £000	2011/12 £000	2012/13 £000
TARGETS						
Last Year's Target (net of items previously identified)	137	643	1,369	2,195	2,809	3,579

<i>Additional Grants (e.g. Housing & Planning Delivery)</i>		-250	-250	-250	-250	-250
<i>Leisure Centres</i>		-160	-750	-900	-900	-900
<i>Assumed level of general underspendings</i>	-1,248	-178	-150	-100	-50	-50
Provisional Shortfall (+) or Surplus (-)	-1,111	0	+500	+1,000	+2,000	+3,884

Figures for subsequent years are shown in Annex B

5.2 The following actions are underway to identify how these adjustments will be achieved, particularly to identify the requirement for 2008/09:

- Existing budgets have been reviewed in the light of historic underspendings to determine whether further spending proposals can be met from existing resources. This has identified £206k of adjustments for 2008/09.
- New and potential sources of income, including Government specific grants, will continue to be investigated to ensure opportunities for funding existing spending plans or enhancing services at no additional cost are maximised. It is estimated that this will generate at least £250k per year.
- A way to provide leisure centres in a more efficient way is being investigated.
- In the medium and longer term efficiencies may be introduced by considering our range of activities and whether there are smarter ways of addressing social issues. No specific targets have been set for this exercise but it is anticipated that such an exercise will contribute towards the savings required in future years.

6. 2008/09 BUDGET

6.1 As far as next year's budget is concerned the table below shows the breakdown and funding of the revenue and capital budgets for which approval is required. Annexes C and D gives further details of next years revenue and capital budgets respectively whilst Annex E gives the summary over the Forecast period and Annex F shows the consolidated MTP.

REVENUE BUDGET	2007/08	2007/08	2008/09
	Original Budget**	Forecast	Budget
Service Spending	£000	£000	£000

Notes						
① contributions and grants from other organisations						
② includes the re-sale of mobile homes bought to house tenants during the remediation work at the Mobile Home site.						
③ includes contributions from sales of land to fund past expenditure on the Oxmoor.						

7 CONSULTATION AND COMMENTS

7.1 This report will be considered at a meeting of the Overview and Scrutiny (Corporate and Strategic Framework) Panel on the 29 January and a consultation meeting with members of the business community is taking place on 30 January. Comments from both meetings will be reported to Cabinet.

8 PRUDENTIAL CODE

- 8.1** The Prudential Code sets various limits relating to the budget and this has been included as an annex to the Treasury Management Strategy elsewhere on the Cabinet's agenda.

9 RISK ASSESSMENT

9.1 2008/09 BUDGET

The Local Government Act 2003 requires the Director of Commerce and Technology (as the Council's Chief Financial Officer) to report to the Council on the robustness of the estimates and the adequacy of reserves when it considers its budget and the consequent Council Tax. His comments are contained in Annex G and confirm that the budget is adequately robust and that the level of revenue reserves is currently significantly above the minimum level required.

9.2 FORECAST

Annex H considers the sensitivity of the plan in the longer term to variations in inflation, pay awards and interest rates and highlights other significant risks to the Council's financial position. Some of these issues are clearly outside the Council's control and there is little alternative to simply keeping them under review and reacting appropriately if they occur. Others are more clearly within the Council's own control and so can be programmed and dealt with at the appropriate time. This annex also explains the need for revenue reserves to be retained at a minimum of £3M in the longer term.

10 CONCLUSIONS

- 10.1** The Council approved the draft Budget, MTP and Financial Strategy figures in December but noted the potential for significant reductions in Revenue Support Grant.
- 10.2** RSG for the next three years has been announced. The LGA consider the settlement the worst for a decade. Whilst the Council gains benefit from population increases the Government is withholding the equivalent of a 12.7% Council Tax increase next year so that Councils who have too much grant only have to give it up slowly.
- 10.3** The December figures have been amended for the items highlighted in section 3 of this report.
- 10.4** As requested by December Council, Section 4 considers three potential financial strategies with direct trade-offs between increased spending adjustments and lower Council Tax rises.
- 10.5** The Government have, as usual, signalled their intention to use capping to keep Council Tax levels down for 2008/09 and have referred to an expectation that average increases should be substantially below 5%. There can be no guarantee of the actual level at which capping will apply because the Government refuse to give this figure as a matter of principle.

10.6 Given the differing Council Tax increases necessary for each option the Chief Officers' Management Team considers that Option B – limiting Council Tax rises to 4.99% - gives the best balance between minimising the level of spending adjustments required and avoiding capping next year. The intentions of other authorities, on a national basis, need to be kept under review as this may change the level of risk related to particular levels of Council Tax increase.

10.7 The Council previously determined that revenue reserves should be reduced to £4.358M by March 2013 in order to allow spending adjustments to be identified and managed effectively. It is not considered prudent to use further reserves within this timeframe.

10.8 Net spending therefore needs to be capped at the following levels:

2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19
£M	£M	£M	£M	£M	£M	£M	£M	£M	£M	£M
20.4	22.2	24.3	25.1	25.0	24.5	24.1	25.1	26.2	27.4	28.6

10.9 The challenge for the future is to identify £3.9M of further spending adjustments by 2012/13. Those required for 2008/09 have been identified and work is underway to identify specific proposals for subsequent years. It will obviously be necessary for any new additional spending pressures to be matched corporately by corresponding savings.

10.10 The resulting proposed Council Tax increase of £5.48 for 2008/09 or 4.99% is less than 11p per week for a band D property.

10.11 The combination of sound budget practices, the success so far in identifying savings and significant revenue reserves means that the proposed 2008/09 budget is robust and that the Council is well-placed, for the time being, to deal with any unforeseen expenditure.

12. RECOMMENDATION

The Cabinet is asked to recommend to February Council:

- **Approval of the proposed budget, MTP and Financial Plan (Annexs C, D, and E)**
- **Approval of a Council Tax (Band D) increase of £5.48 (4.99%) for 2008/09.**

ANNEXES

- A MTP Schemes requiring approval before commencement**
- B Spending Adjustments**
- C 2008/09 Revenue Budget**
- D Budget and MTP – Capital Spending**
- E Forecast Summary to 2018/19**
- F Budget and MTP – Revenue elements**
- G Reserves and the Robustness of the 2008/09 Budget**
- H Financial Plan - Sensitivity and Risks & Future level of Reserves**

ACTIONS/SCHEMES REQUIRING APPROVAL BEFORE COMMENCEMENT

The proposed approach is that:

- Routine things that just happen to be Capital should be treated the same as base revenue budget i.e. no further approval required.
- Small or unavoidable items do not require approval.
- Significant schemes require approval from Cabinet.
- Items reliant on ensuring the “trading” position stacks up (e.g. leisure and industrial estate) would require Director plus Executive Councillor agreement.

The colour coding on Annexes D and F show this as follows:

Approval by
COMT and then Cabinet
Service Director following consultation with Director of C&T and Executive Councillor
COMT
Head of Service

Note: Some schemes appear in both annexs but the highlighting is shown on Annex D for capital schemes and only in Annex F for purely revenue schemes.

RESERVES AND THE ROBUSTNESS OF THE 2008/09 BUDGET

The Local Government Act 2003 requires me, as the Council's Chief Financial Officer, to report on the robustness of the 2008/09 budget and the adequacy of reserves when you consider it and the consequent Council Tax.

Robustness

The Council has tended in recent years to underspend its budget. This demonstrates that it has budgeted prudently and that managers have taken a mature approach to budgetary control rather than to simply spend any spare sums on low priority items. There is consistent and effective application of financial controls and thus a sound base for setting future budgets. The process for compiling this budget included an efficiency savings/budget reductions exercise involving all Heads of Service and I believe this has resulted in a tighter but realistic budget proposal for each service grouping.

The 2008/09 budget has been prepared using the budget for 2007/08 as a base, and amending it for known changes, particularly:

- Inflation, including pension contributions and fuel costs which are in excess of general inflation
- Potential pay rises
- The impact of MTP schemes
- Forecast interest rates, which have a significant impact on our investment income

There will always be some items that emerge after the budget has been prepared. These are normally met by compensating savings elsewhere in the budget, the use of the contingency (£140k) or, if necessary, the use of revenue reserves.

The most significant potential risks to the budget are:

- higher inflation than anticipated
- lower interest rates
- an emergency (e.g. flooding)

A ½% increase in general and pay inflation, **assuming no compensating increase in fees and charges was possible**, would result in a net cost of approximately £160k.

A ½% reduction in interest rates would result in lost income of approximately £170k but this might also lead to lower borrowing rates in due course.

Certain types of eventuality are mitigated in other ways. Many significant risks are insured against, so losses are limited to the excesses payable. The Government's Bellwin Scheme meets a large proportion, over a threshold, of the costs of any significant peacetime emergencies (e.g. severe flooding).

Revenue Reserves

These are estimated to be £19.1m at April 2008 and £17.5m at March 2009. This is very significantly above what would be considered a safe minimum level, which would be around £3m.

I believe the drawdown of £2m of revenue reserves during the year is reasonable particularly as all necessary savings have been identified to achieve the budget for 2008/09.

The medium term financial plan sets out how revenue reserves are expected to fall to £3m by 2013/14, at which point I consider it prudent not to plan for further draw down. In order to balance income with expenditure the net revenue budget for 2012/13 will need to be reduced by £3.9m.

Conclusion

Considering all these factors, I believe that the combination of a robust budget process and significant reserves should give Members no concerns over the Council's budget and financial position for 2008/09.

Terry Parker
Director of Commerce and Technology

FINANCIAL PLAN - SENSITIVITY AND RISKS

The financial forecast model has been used to demonstrate the impact that variations in investment rates, borrowing rates and increases in pay will have in specific years.

	Extra cost in year:	
	2012/13 £000	2018/19 £000
0.5% extra pay award cumulative from 2008/09	+635	+1,862
0.5% increase in staff efficiency cumulative from 2008/09 assuming this can be translated into reduced staffing levels.	-635	-1,862
0.5% higher investment returns in year	-35	-21
0.5% higher borrowing costs in year	+114	+202

Inflation, other than pay, is fairly neutral as long as fees and charges are increased in line with it. If pay awards increase by more than forecast then further efficiency improvements would be needed to reduce the impact.

The impact of investment rates has significantly diminished by 2012/13 as reserves will have been significantly reduced to meet revenue deficits and to fund capital projects.

The impact of higher borrowing rates is less significant than pay but is growing.

Other Risks

The next triennial revaluation of the Pension Fund is imminent. Significant funding pressures identified in the last revaluation resulted in increases spread over a 6-year period to 2010/11. Preliminary informal comments suggest that any further increases will not be significant and would not be applied before 2011/12.

The Plan assumes that the extra specific grant awarded for Concessionary Fares for the three years starting in April 2008 will, together with the base budget provision be sufficient to meet the Council's costs. This will not become clear until late in 2008/09. It is also possible that responsibility for the scheme may become a County or national responsibility in three year's time. Resulting Grant adjustments, because they will be formula based, may not be equitable.

The Government's next Comprehensive Spending Review will be published in the summer of 2010 (and every three years thereafter) and will create, as this year, significant uncertainty and potential volatility. This could have a significant impact.

It has been assumed that capping will continue to allow 4.99% increases in Council Tax. If this limit were to be reduced significant additional spending adjustments would be required. Relaxation of capping would provide potential to reduce the level of spending adjustments required by increasing Council Tax levels.

Inflation on Capital Schemes of 2.5% per year has been included in total within the plan. There have been examples of high tender prices on specific schemes but there is little objective data on which to base a higher inflation allocation or even to estimate a suitable contingency sum so no additional provision has been included. The Pathfinder House figures are predominantly fixed prices.

There is no provision for any demographic growth in services. Pressures will emerge due to additional housing and increased longevity over the plan period.

Most budgets are based on 97.5% of salary due to the expectation of savings from staff turnover. If turnover falls financial pressures will emerge and vice versa.

Leisure Centre income is approaching £5M per year and certain facilities are in direct competition with the private sector. If income was lost it would be difficult to reduce expenditure by an equivalent sum in the short term. In addition the financial plan incorporates a substantial challenge for leisure centres to reduce their net cost by £1M per year. This may not be achieved.

Spending Adjustments of a further £3.9M by 2012/13 and £10.8M by 2018/19 are included in the financial plan and achievement of these will require detailed identification and delivery plans.

FUTURE LEVEL OF RESERVES

The Plan is based on net spending rising to £31M by 2018/19 and revenue reserves falling to £3M. Assuming the same proportions as currently this would imply expenditure of £100M including £42M of benefits payments and income of £69M including £42M of government reimbursement of benefits.

In order to identify a reasonable level for reserves there is a need to consider the circumstances that could occur that would require immediate extra funding pending reductions in expenditure or obtaining additional income.

These fall into various categories:

Inflation

If pay awards and inflation were 1% more than expected in 2018/19, and fees and charges were not increased to mitigate it, the cost would be about £520k

Interest Rates

Limited impact in the longer run but 1% increase in borrowing rates would amount to £400k per year by 2018/19.

Cash Flow

Changes to the profile of when the Government pays the Council its Government Grant and other payments (e.g. housing and Council Tax benefit)

Major failure of the computer systems for billing and recovering Council Tax, NNDR or other income. Impact is exaggerated because this Council takes the risk of late collection for the whole sum on Council Tax and NNDR for the area which amounts to £110M at present and would grow to, say, £180M by 2018/19. One month's loss of interest on £180M is £750k.

Non achievement of Spending Adjustments

Spending adjustments of £10.8M are still to be identified.

Emergency/Disasters

The impact of a disaster to the public (e.g. flooding or a plane crash) is restricted by the Government paying 85% of any cost in excess of £36k but the Council would still need to fund the total cost pending reimbursement.

A Council disaster (e.g. the Council's computers or offices catching fire), would

not receive government funding but certain aspects are insured such as alternative accommodation and lost income at Leisure Centres. There would still be a need to fund the costs “up front” and there is no cover for the cost of lost cash flow.

Unplanned Spending loss of income

This would include items like planning inquiries. Whilst unlikely to recur the cost of the Alconbury Inquiry was in excess of £2M.

Loss of income

Changes in economic activity can have a significant impact on development control fees, building control fees and land charges.

Leisure Centre income could suffer if a new private Fitness Centre aggressively entered the market.

Invest to Save

In order to meet the spending adjustments and to manage the authority effectively there will be a number of opportunities that require investment in order to increase service provision for no additional long term cost or to maintain provision but at a lower long term cost. Reserves are therefore required to allow this to happen.

Capping

If capping continues there is a need for higher reserves to allow any mitigating action to be undertaken in a planned and controlled way so that the service impact on the public is minimised whilst replenishing reserves to an adequate level. Thus it should be assumed that any significant financial shortfall may take 3 to 4 years to resolve.

Conclusion

It is difficult to arrive at a scientific calculation of a minimum figure for reserves. Whilst the unexpected items are unlikely to all occur in the same year and may be reduced by compensating favourable changes the remaining level of unidentified spending adjustments and the manner in which capping tends to force immediate rather than best solutions means there is a need to hold significant reserves to cover the period until compensating adjustments are achieved or capping relaxed.

Our current reserves (£19M) are clearly well above the necessary levels to cover these risks but it is considered that £3M is the minimum that should be retained, based on the information currently available.

Whilst the statistics need to be treated with some caution, £3M would result in 75% of District Councils having higher reserves per £1M of net expenditure than Huntingdonshire.
