13/01/11	<p><u>A14 IMPROVEMENTS</u></p> <p>Members decided that they want to engage local MPs in a co-ordinated approach to lobbying the Government with a view to achieving the Council's aim of upgrading the A14 in a more cost effective way than previously planned. Request made for further explanation of life of Huntingdon Viaduct.</p>	<p>Information sought from Director of Environmental & Community Health Services.</p>	<p>Since the announcement cancelling the A14 scheme, public authorities, including this Council, wrote to the Secretary of State for Transport, Phillip Hammond, expressing how important it was to find an effective alternative solution. In response to some suggestions which appeared to be emanating from the Department that what was required was a new multi modal study, the letter to the Secretary of State, also made the point that progress was already being made with some other modes of transport and what was required was a study focussed on the road solution element. The letter proposed a Ministerial sponsored study to that effect.</p> <p>A holding response has been received (copy attached) and it is understood that a full response is imminent and expected to be positive.</p> <p>In preparation and anticipating of a positive response, Lead Members of relevant authorities have met and set up an Officer Task Group to scope out what we believe is required and to provide relevant input to any study brief and to the study itself.</p> <p>With regard to the specific request from O&S, all relevant local MPs have already been fully engaged with Council leaders in ongoing discussions with the Department of Transport. They have agreed the basis of the letter put forward to Phillip Hammond and will be kept briefed on progress.</p> <p>The Panel will also be advised as matters</p>
