

**NEW GUIDANCE FOR LOCAL AUTHORITIES ON THE HOME ENERGY  
CONSERVATION ACT 1995 (HECA) AND THE DELIVERY OF THE GREEN DEAL  
IN HUNTINGDONSHIRE**

**(Report by the Overview and Scrutiny Panel (Environmental Well-Being))**

**1. INTRODUCTION**

- 1.1 At its meeting held on 11th September 2012, the Overview and Scrutiny Panel (Environmental Well-Being) considered the report by the Head of Environmental Management on the Home Energy Conservation Act 1995 and the delivery of the Green Deal in Huntingdonshire. The following paragraphs contain a summary of the Panel's discussions on the report.

**2. THE PANEL'S DISCUSSIONS**

- 2.1 The Panel has previously received information about the Green Deal. At that time Members expressed the view that safeguards should be put in place to guarantee the standard of work by providers. This view is now reiterated. The Council has a good reputation, which could be tarnished by poor work. Equally, a Member has had experience of private companies selling Green Deal products that are purportedly endorsed by the Council. The Panel has stressed that the Council's partner companies should employ acceptable sales practices. Members have been assured that these matters will be addressed through the procurement exercise to identify partners, which will realise a single scheme for Cambridgeshire with acceptable sales methods and effective products. The process will emphasise the Energy Company Obligation (ECO).
- 2.2 The Panel recommends that option two of those identified in paragraph 3.3 of the report by the Head of Environmental Management is adopted. The Council's role in this arrangement would be to provide leads for potential customers to be followed up by providers. The Council has a data base of properties in the District, which contains relevant information such as whether they have solid or cavity walls. This data base has recently been updated. The Council will benefit through the receipt of referral fees. It is estimated that this could produce an income in the order of £150k per annum. The Council would also publicise the Green Deal and market services.
- 2.3 The Panel has discussed the County Council's involvement in the scheme. Although it will operate County-wide, only District Councils, that is authorities with housing responsibilities, will be party to the scheme. However, the County Council will be involved by providing procurement expertise. Furthermore, the Green Deal is most appropriate for housing and is probably not suitable for County Council properties such as schools. This position will be confirmed at forthcoming meeting of the Making Assets Count Board.
- 2.4 Once the scheme starts to operate the Panel recommends that details of accredited partners are published on the Council's website. It is also recommended that feedback on providers is sought and monitored to ensure satisfactory standards are maintained. This will ensure members of the public receive satisfactory services and protect the Council's reputation.

2.5 The Panel will review the outline business case at a future meeting.

**3. CONCLUSION**

3.1 The Cabinet is requested to take into consideration the views of the Overview and Scrutiny Panel (Environmental Well-Being) as set out above when considering this item.
