Definition of Credit Ratings

Fitch	Rating	Definition
Short term	F1	Indicates the strongest intrinsic capacity for timely payment of financial
		commitments; may have an added "+" to
		denote any exceptionally strong credit feature.
	F2	Good rated intrinsic capacity for timely payment of financial commitments.
	F3	Fair rated intrinsic capacity for timely payment of financial commitments.
Long-term	AAA	Highest credit quality organisations, reliable and stable. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments.
	AA	Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
	AA-	
	A	High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
	A-	
Notes	BBB	Good credit quality. BBB ratings indicate expectations of low default risk . The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

Notes

The modifiers "+" or "-"may be appended to a rating to denote relative status within major rating categories.
